[Snippo 300 lines of useless fullquote]

You don't have a degree in astrophysics either, otherwise you would have
learnt how to use an editor for trimming redundant lines from your own
postings.

Do you talk that way on the radio?

Thank you Peter for pointing out I failed to check the little box on my att email
screen that includes original message. I agree that it is poor practice to have the

original 300+ lines in my post, so here it is again without the extra junk.

Answer to your question about my talking on the radio that way,

I do not do so !

No reason for you to be nasty !

Perhaps you have taken my post as offensive, my point was that the commissioners
are lawyers, two are not, all have 'advised' or drafted policies to our government
at one time or another. Without technical expertise can the commissioners
understand
what BPL can do to the hf spectrum ?

regards,

brian USA

I think that you are absolutely right, Ryan. I know that some of these other
services and agencies have been alerted, but I don't know how many know, or
what they have done in response.

I think that's a perfectly valid point Brian. How can one regulate
what he can't understand? I see no use for a law degree as one can
easily hire lawyers to create a law from a well thought-out opinion,
but to create such an opinion takes, in my judgement, thorough
knowledge of the subject field.

Frankly, I don't understand what Powell brings to the table.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 21st/September, through Sunday, 28th/September there were 228 countries active. Countries available: 3A, 3B8, 3B9, 3C0, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9V, 9X, 9Y, A2, A3, A4, A5, A6, A7, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E4, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FW, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V6, V7, V8, VE, VK, VK9L, VK9N, VP2M, VP2V, VP5, VP8, VP8/o, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZK1/s, ZK2, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3C0, ANNOBON ISLAND. 3C0V is now active until October 10th on all HF bands 160-6 meters on CW/SSB/RTTY/PSK/SSTV. QSL via DJ9ZB.

BQ9P, PRATAS ISLAND (Update). The Chinese Taipei Amateur Radio League (CTARL) received their official document (landing permission) September 25th from the Ministry of Defense. The BQ9P Pratas Island DXpedition will take place on October 7-16th. They expect to be on air at 1000z on October 7th and go QRT at 0100z on October 16th. They plan to have at least two antennas set up before dark in the first day and will have 5 stations set up (total) after that. Activity will be on 160-6 meters, including the WARC bands on CW/SSB/RTTY/SSTV/PSK31. Frequncies will be in most DX window (+/- QRM). Also, DXer Floyd Gerald, N5FG, a member of the Magnolia DX Association (ed. great bunch of guys who I met during my vacation in Mississippi!), was named pilot station for the Eastern USA. Floyd's E-mail address is: floydgee@datasync.com
The BQ9P's Web site is at: http://www3.ocn.ne.jp/~iota/newpage64.htm

CU2, AZORES. Members from the Lufthansa Amateur Radio Club (DL0DLH) will be operating from the Acores, October 9-12th, under the callsign CU2L. Activity will be on HF bands (160 meters included) on SSB, CW and PSK. Operators are: DL1FDS, DK7TF, DG5FCN, DL4FP and DK7PE. QSL via DL4FP.

FK, NEW CALEDONIA (IOTA Op). Yoshi, JA7AQR, will be active from Male Island (OC-033) from New Caledonia, October 2-6th. He will operate as FK/JA7AQR on 40-10 meters SSB and RTTY. QSL via JARL or direct to his home address at: Yoshihiro Tanaka, 1-10-6 Minamihara, Yamagata, 990-2413 JAPAN.

FR/E, EUROPA. It was announced this past week that the world's number 6th most wanted entity (Europe 10th and U.S 6th), Europa Island (IOTA AF-009) would be active between November 22nd and December 5th. A team of eight French military operators also plan to operate in the CQ World-Wide CW DX Contest during the last weekend of November. They report that it was a difficult project to secure permission to go to this rare island, however thanks to the persistence of Didier, F5OGL, and his team, they did receive the "OK" from the general headquarters to go. The team hopes to have three stations active on 160-6 meters on CW, SSB and the digital modes. The team members for this operation include: Didier/F5OGL, Dany/F5CW, Eric/F5JKK, Stephane/F5KIN, Freddy/F5IRO, David/F0CRS, Chris/TU5AX and possibly another operator. The callsign will not be announced until the operation begins. QSL cards will be handled by F5OGL and may be sent via the bureau or direct to: Didier Senmartin, P.O. Box 7, 53320 Loiron, France. ADDED NOTE: It was also announced: "Be aware of the possibility that the operation could be cancelled if the international situation were to unfold, as these operators would have to all go on active duty because of their military jobs."

HK0, SAN ANDRES ISLAND (Top Band Added). It was announced this past week that the team members of the Florida Dxpedition Group going to San Andres Island Dxpedition will be active on 160 meters (1826.5) in a few weeks. The antenna will be a 80/160 vertical, the one used by ZL7C (Chatham Island DXpedition) last October 2002. The operation/DXpedition is scheduled to take place October 20-28th. They will have 8 operators and plan to run 4-5 stations before and after the CQWW Contest (contest callsign will be 5J0J). The San Andres Island DXpedition 2003 Web page is at:

http://www.geocities.com/hk02003/

IOTA NEWS.....
EU-136. Look for Dusan, S52DG, to be active as 9A/S52DG/P from Krk Island (CI-046), from October 2-5th. QSL direct or via bureau to S52DG.

OC-228. Peter, VK3QI, reports that they had to postpone their Baudin Rocks operation for the time being. Reasons given are that two of the operators could not go, and also the weather has been very bad for the last week (with continuous 35-45 knot winds making landing and exiting the Rocks difficult in the time slot they had available for the remaining operators). Peter said, "Not worth taking the risk at the moment. We hope to put the operation on later in the next 6 months when the weather is much better and operators are better placed to be available."

LU, ARGENTINA (Rare Province). Alberto/LU1DZ, Hector/LU6UO and Fernando/ LW2DX, are going to "Valle Fertil" near Moon Valley in the San Juan Province to operate from this "rare" Province between October 2-6th. Due to LU regulations, they will use the callsigns LU1DZ/P, LU6UO/P and LW2DX/P, where "P" stands for San Juan Province. They plan to operate on all HF bands, from 160-6 meters, both CW and SSB.

OH0, ALAND ISLAND. Marko, OH4JFN, will be active as OH0Z (Zone 15) during the CQWW SSB Contest as a Single-Op/All Band entry. Marko's activity will take place between October 25-28th. QSL via OH5DX. More information concerning OH0Z can be found via the Web page at: http://www.qsl.net/oh0z

PACIFIC OPERATIONS (5W and ZK2). Anci, JA2ZL, will be active from Niue Island (OC-040) as ZK2ZY, October 18-24th. His activity will be on 80-12 meters on SSB/CW/RTTY with 100w with dipoles and a 2 element beam. After Niue Island, Anci will move to Samoa and operate from here as 5W0ZY from October 25-28th. His activities will be only SSB on 75-12 meters, and he hopes to participate in the CQWW DX Phone Contest. QSL to his home callsign via JARL bureau (until July 2004) or direct to his home address: Anci Yamada, 17-8-2 Takirocho, Tajima, 507-0813 JAPAN. Please visit to his Web page at: http://www4.ocn.ne.jp/~ja2zl

PJ4, NETHERLANDS ANTILLIES (Update OPDX.625). Uwe, DL9NDS, informs OPDX that the German team going to Bonaire Island (October 16-26th) has received their CQWW DX SSB Contest callsign, PJ4T. QSL Route for PJ4T and all personal callsigns (PJ4/Homecall) is via DL9NDS.

PY9, BRAZIL. Julio, PP2BT, will activate the callsign PY9BT from Chapada dos Guimaraes-MT from October 1-8th. Activity will be on 80-10 meters using CW and SSB. QSL via the PP2 Bureau PP2 (slow) or via P.O.Box 105, Itumbiara-GO, ZIP 75500-970. QSLs for the 2001 PY9BT operation not receveid may be claimed via E-mail at: pp2bt@arrl.net

PZ5, SURINAME. Operators Bob/PZ5JR, John/PZ5DX and Arnold/PZ1AP will be active during the CQWW SSB Contest as PZ5JR from October 20th to November 4th. operators PZ5JR and PZ5DX will be operating in different parts of

the country, possibly from the jungle as portable seven. Their bands/modes of activity were not provided.

QSL INFO AND NEWS.....
DIRECT ONLY PLEASE. QSL Manager Frank, N3ZOM, informs OPDX that he only accepts QSL cards for CO6XN, CO6TB, and CL6BIA, "DIRECT ONLY" with the proper return envelope and sufficient postage. He mentions that he received a shipment of bureau cards recently and found quite a few of CO stations he manages. These cards that Frank received will be answered via the bureau, but any cards received after this will NOT.

Operators RA0FU and UA0FZ from Sakhalin Island who operated from Moneron Island on August 20th should be QSLed as follows:
QSL for RA0FU/P: Yurij Buryh, Box 12, Sakhalin Island, ZIP 693023
QSL for UA0FZ/P: Vlad Kovalev, Box 43, Sakhalin Island, ZIP 693020

QSL YB0ZZ via the address on QRZ.com. The operator this past weekend during the CQ WW RTTY Contest from Jakarta, Jawa Island, was Stan, OK1JR (YB0AJR).

Zik, DL/VE3ZIK, wants to remind everyone that QSL info for this past weekend's CQ WW RTTY Contest will be published on Wednesday on the Web site at: http://www.contesting.info

The JAs that were active from Sri Lanka a couple of weeks ago should be QSLed via the following managers by the bureau or CBA (QRZ.com):
CALL NAME MANAGER
4S7YHG Yshihiko Hasegawa ----- JA3HXJ
4S7CHG Sadao Konagai ----- JA3CHS
4S7FAG Nobuko Hasegawa ----- JH3FAR
4S7GXG Satoshi Abiko ----- JH3GXF
4S7DUG Masahiko Ikeda ----- JQ3DUE
4S7YJG Hikari Sakamoto ----- JR3QHQ
4S7GGG Kazuo Ebihara ----- JA3ART
4S7QHG Toru Tanaka ----- JR3QHQ
4S7UJG Tsuguya Nakasako ----- JA3UJR
4S7DBG Soichi Mitamoto ----- JA3DBD
4S7ARG Tatsuo Okushi ----- JA3ARJ
4S7LSG Kunio Miyagawa ----- JH3LSS
4S7JKG Tadaaki Tanigawa ----- JG3JKG
4S7AQG Hiroshi Shirahara ----- 7J3AOZ
4S7QIG Misaki Shirahara ----- JN4QIN
4S7OCG Fumie Miyamoto ----- JR3OCS
4S7FDG Takuo Omura ----- JA5FDI
4S7AVG Masumi Nakade ----- JA3AVO
4S7PBG Horoko Nakade ----- JH3PBL
4S7DSG Takeshi Funaki ----- JI3DST

SPECIAL EVENT. Look for KL7FAA to be active the first weekend of October to commemorate the "Centennial year of flight". For QSL only, send a standard SAE and proper postage to AC7DX. For those wishing a certificate, please send a business size SASE.

SPECIAL EVENT. Ric, DL2VFR, informs OPDX that during the month of October look for a special DOK (SDOK) callsign that was issued to the "Klubstation des Ortsverbandes", DL0KWH. The SDOK callsign is "80VOX" and celebrates the 80th anniversary of starting a regular radio broadcast service in Germany. The program was produced in the historical "VOX-Haus" in Berlin and transferred to the transmitting station in Konigs Wusterhausen where it hit the waves worldwide. The club station DL0KWH is situated in the area of the old transmitting site (it will be shown on the QSL card). The club station plans to be busy giving out the SDOK callsign between October 1-31st on all bands and modes. The SDOK callsign is good for the DARC's "DLD Award". Additionally, there is an award called "Sender Konigs Wusterhausen" and it also counts for this club activity. The club station's Web page is at: http://www.qsl.net/dl0kwh

SPECIAL EVENT. A team of SP4KSY club members will be active again as HF650O to celebrate 650 years of Olsztyn City. The station will be active from October 1st to December 31st, on CW, SSB, RTTY and PSK. QSL via SQ4NR, bureau or direct to: Grzegorz Gawel, ul. Herdera 16/14, 10-691 Olsztyn, POLAND. Their Web page is at: http://www.hf650o.prv.pl

SPECIAL EVENT. During the month of October, look for special event station, SN25JP, to be active to celebrate the 25 years of Pope John Paul II pontificate. The station will be active on 160-2 meters CW/SSB/FM and RTTY. A special QSL will be available via SP4GFG (direct or via the bureau).

SPECIAL EVENT. The Polish club station, SP6KFA, will use special event callsign SR25JP to commemorate 25th anniversary of Pope John Paul II pontificate. Also, on October 16th, 1978, Cardinal Karol Wojtyla was elected as the Bishop of Rome. This October 16th, he will have completed 25 years of service. Look for SR25JP on all HF bands (CW, SSB, PSK31, RTTY) between October 1-31st. ADDED NOTE: The prefix "SR" is a very rare prefix. QSL direct (using address on QRZ.com) or via the PZK bureau to SP6KFA.

SPECIAL EVENT. Look for 20 operators from the F5KCC ARS to activate the special callsign TM9AF, from October 12-26th, to celebrate the 25th anniversary of Ham Expo (October 18-19th), and the memory of Pierre Michel, F9AF (creater of Ham Expo and the long time (only) ham gear builder (Mics Radio products) in France. Activities are planned for 160-6 meters on CW, PSK, RTTY, SSB, SSTV and from 144 to 1.2 GHz on CW, FM, RTTY, SSB, ATV. They will also enter the CQ WW SSB Contest. The QSL route is via F5SM (Pierre's daughter), through the REF Bureau or direct to: Christiane MICHEL, F5SM, 1 rue de l'Ocrerie, Les PillTs, F89240 PARLY, France. (SAE + postage). There will be NO e-QSL. For more info about HAM-Expo, please visit the Web page at: http://www.ref-union.org

V26, ANTIGUA AND BARBUDA. Doug, W3CF, informs OPDX that he "blew a callsign" of one of the V26DX operators in last week's announcement and he apologies to all for the blown call. The correct callsign for Thomas is DF2BO, not DL2BO. Again, look for operators W3CF, WX0B, N5CK, KD3TB, KD3RF, DF2BO and KM9M to activate the Royal Antiguan Radio Club Station, V26DX, as a Multi/2/Low Power entry in the CQWW Phone Contest. QSL all

V26DX QSOs via KU9C with appropriate return postage and SAE or via the bureau. QSL individual ops via their on air instructions.

V51, NAMIBIA. Operators Vlado/ZS6MG and Emil/ZS6EGB will be active as V5/ZS6MG and V5/ZS6EGB from Outjo, between October 23-27th. The two operators will also be active in the CQWW SSB Contest as V51E (QSL via ZS6MG, contest only). Activity outside of the contest will be on most HF bands CW/SSB/RTTY and PSK.

V8, BRUNEI. Kato, JO1RUR, is now here and was active as V8A during the past weekend's RTTY Contest. Outside of the contest, he will sign as V85RH. He was spotted on 40/15 meters RTTY outside of the contest (Thursday/Friday). His length of stay is unknown. QSL via JH7FQK.

VK9C & VK9X, COCOS KEELING AND CHRISTMAS ISLAND (Reminder). Gwen, VK3DYL, informs OPDX that there seems to be some confusion about the dates of the YLs' upcoming VK9XYL and VK9CYL DXpedition. They will be on Christmas Island (OC-002) as VK9XYL, October 13-27th, and on Cocos Keeling Islands (OC-003) as VK9CYL, October 27th to November 10th. QSL via VK3DYL:
Gwen Tilson, 3 Gould Court, Mt. Waverley, Victoria, 3149 Australia.
For direct cards, if you enclose old style IRCs, insufficient postage or no SAE, your cards will be returned via the Bureau. No e-QSLs will be accepted.

VP5, TURKS AND CAICOS ISLANDS. Operators Ken/K2WB, John/N2VW and Frank/WA2VYA will be active from Providenciales (NA-002), October 21-28th, and will be active as VP5T during the CQ World Wide DX SSB Contest (October 25-26th) as Multi/Multi entry. QSL via N2VW. The team will be active before and after the contest signing VP5/homecall on CW and the WARC bands. QSL VP5/homecalls via their home callsigns to their CBA. Bureau is OK.

WP3, PUERTO RICO. Alfredo, WP3C, is expected to be active in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band/Low Power entry. QSL via W3HNK.

XU, CAMBODIA. Shirow, JF6DEA/KE1EO, will be back on the air from Cambodia signing XU7ACD from October 3-6th (Local time). Activity will be on 40-10 meters and also 6 meters. There is further infomation at his web site, "JA 6m Companion", at: http://www.ham-net.net/vu-dx/
QSL via direct to JH6QIL with SASE to: Shin-Ichi KUSUMOTO, 1777-289, Nishi-Mochida, Aira-cho, KAGOSHIMA, 899-5431 JAPAN.

YI, IRAQ. Stefan, OM3JW, father and QSL Manager for Mike, YI/OM2DX, informs OPDX that last week his son received a new callsign, YI9X. You should have heard his first activity with his new callsign during the RTTY Contest this past weekend. QSL via OM3JW.

YJ0, VANUATU (Possibly H40). Early last week we received word that Mike, KM9D, and his girlfriend Jan, KF4TUG, were anchored at Tegua Island in the Torres Island Group (OC-110), northern Vanuatu. Mike was expected to be active as YJ0AMY with no mention of his planned bands of activity. However, there were no QSNs reported over past week. Also, Vanikolo Island

(OC-163) in the Solomon Islands, Santa Cruz Group (H40 - Temotu Province) which is only about 100km north of their position was also mentioned. Be listening. You never know. QSL via OM2SA.

ZONE 2. An international team of thirty operators will activate VB2C (Zone 2, Camp Rupert, James Bay, Northern Quebec, Canada) between October 21-27th. Activity will include the CQWW SSB Contest as a Multi/Multi entry. "Team Zone 2" with its 30 op effort will be active before the contest on 160-6 meters. For QSL info, see the Web site at:
http://www.qsl.net/teamzone2

Please delete rec.radio.amateur.policy from future posting to this thread.
Nobody from this newsgroup has participated in this thread recently. Cross
posting is not a good idea anyway, so you might also want to consider
deleting the other newsgroups as well.

Not a lecture - just a simple request.

Ryan,

That effort is already in the works ... NTIA is making their own measurements in BPL pilot areas ... I don't believe that they can help but come to the same conclusions as Ed Hare and I have as to the level of interference in the Emmaus, PA pilot area (Ed has visited other areas, I happen to live near the Emmaus pilot area).

We are not alone in the battle. (Thank God!)

Carl - wk3c

I've created a Yahoo discussion group for the ARRL Logbook of the
World. Any LoTW user is invited to join at:

http://groups.yahoo.com/group/ARRL-LOTW

See you there.

The following answers my question

Subject: [OPDX] Ohio/Penn DX Bulletin #628
Resent-Date: Sun, 28 Sep 2003 19:40:49 -0400

V8, BRUNEI. Kato, JO1RUR, is now here and was active as V8A during the
past weekend's RTTY Contest. Outside of the contest, he will sign as
V85RH. He was spotted on 40/15 meters RTTY outside of the contest
(Thursday/Friday). His length of stay is unknown. QSL via JH7FQK.

Why not discuss it here?

LOTW might be interesting once it is working.

I agree, more people need to submit logs. I have 1280 log entries and
only 3 hits! Come on, put those logs up on LoTW!

About 6500 log entries, and 20 hits.

But it is simply too complex to use ... they gotta fix that.

I believe they have found a good compromise between security, complexity and ease of use.

I particularly applaud them for providing a working Linux client, together with the source code. With that, it should be easy to integrate LOTW into other log applications, either natively or as a plug in.

There is no other way than a digital certificate to positively and uniquely identifiy a participant, but in a couple of years we will all have a digital identity and sending in snail mail to verify one's existence will no longer be necessary.

Have you studied the license under which LoTW is distributed? I am unsure
whether linking against their libraries is allowed at all:

5. Products derived from or including this software may not use "Logbook
of the World" or "LoTW" or any other American Radio Relay League,
Incorporated trademarks or servicemarks in their names without prior
written permission of the ARRL.

So I would have to ask permission to link against the LoTW libraries? So
much for distributing source-code.

If only they would have picked a more sensible license, I might have
started using LoTW. Their license rules kindof suck, read the LICENSE file
included with the source code.

I have been in and listened to thousands of pileups over the years and the DXer phonetics are very commonly used.
Is that right or wrong -- I don't know - but sure is a fact of DX life.

And they seem to work as well as the NATO phonetics. Many many top gun DXers use them.
Just listen to the pileups (:-(

This is NOT to necessarily recommend or deny the practice -- just stating what many DXers use.
Whether to use them or not is a separate issue. (Start a thread if you want!)

FYI: I know several DXpeditioners who will not answer anyone using anything BUT NATO phonetics or to recognize those using "Lass Two" -- last two letters of the suffix.

But You will hear some DX stations ask for "Lass Two". This also is common practice.
(Sometime in 10 minutes one should give their full call - huh?)

FYI: Unofficial DXer Phonetics, compiled after listening to more pileups than I care to remember (:-)

I actually read the license before the posting and stumbled upon this
paragraph. However, please see that it refers to the *name* of a product you
actually want to use, it is a trademark restriction, not a copyright
restriction. In a previous paragraph you will find that the source
can freely distributed and *modified*, and that's what counts.

> If only they would have picked a more sensible license, I might have

I feel you may want to read it again from a different angle. As far as I can
see, there are no restrictions of use, either as plugins or integration into
a new product, quite on the contrary.

The introductory sentence makes this rather clear:

"Redistribution and use in source and binary forms, with or without
modification, are permitted provided that the following conditions are
met"

And it seems interesting Charles, that I was just forwarded a copy of
something that originated from the arrl, now supporting that direction.

Cool!

I saw the ARRL president at a digital conference in Austin TX last month. He was talking about the need to organize back then, which I took to mean that they hadn't done so yet. It's good to see that they are doing something about it.

2291. dumb question about BPL

Newsgroup: rec.radio.amateur.dx
Date: 2003-09-30 16:10:22 UTC
From: oo7@astro.as.utexas.edu
Message-ID: <blc9te$3hf$1@geraldo.cc.utexas.edu>
Source record: 8975

I know the proposed BPL system uses frequencies from 2-80 MHz
and I belive it uses spread spectrum. Does it have to use
every possible freq in that range or could it skip the ham
bands if we kick up enough fuss?

It seems pretty clear to me that it will happen - 150,000 hams
are outnumbered by more than 100:1 by those who want broadband
delivered to the doorstep.

Not only do I think it will happen, but I also expect the RFI
levels to be "adjusted" so as to allow more pollution - hey,
it works for greenhouse gas and power plants and......

The only sources I can find are just the little applications
for Trusted QSL. Cannot find anything with an API to
the database. Seems that API is via email, or the upload
page on the web site. Maybe I missed something ...

I doubt you searched with the relevant keywords.

"lotw" "arrl"

http://trustedqsl.sourceforge.net/lotwspec.pdf

as the first hit on google.

Really.

I'm guessing it will make enough of a mess that harmonics will
also be a problem.

> It seems pretty clear to me that it will happen - 150,000 hams

You make the assumption that BPL will actually deliver broadband!
It is one of the stupidest proposals I've seen.

OK, Hank, you seem to need spoonfeeding:

http://www.trustedqsl.org/

Not very obvious and *very* hard to find. But it has an FAQ.

http://cesnet.dl.sourceforge.net/sourceforge/trustedqsl/tqsllib-doc.zip

That's on Sourceforge. You *did* look there, didn't you?

Yes, I have this also. The same for everything on SourceForge.
This is *not* what I look for. It is the description of the library
you must use to do things on the local machine. Of course this
is needed, and I have it already. I'm looking for the next part.

Maybe the term "data interchange protocol" will be better.
I am looking for the API *to the LotW database*.
One could reverse engineer an API from the web page code.
It would be better if I had the specification instead.
eQSL provides such a specification for their database.

I am aware of the architecture, understand how the certificates
are used, have my own database and software for dealing with
logs, station identification, DX entities, have ADIF
reading and writing functions for that database, etc.

What I have not yet found is the API into the LotW database, so that I
can create my own client to view, modify, delete and insert QSO data.

For eQSL this is simple. Now I want to do it for LotW.

Keep in mind that the non-ham frequencies are also used by somebody (government, commercial interests, etc.). So skipping around the ham frequencies doesn't really solve the problem. Some one is going to be interfered with.

I bet most, if not all of them, have power lines
going directly into their facilities. In many cases
they may have more than one feed.

A pile of code is not an API, its a pile of code. An API is a designated, documented interface designed to be stable (in an upwardly-compatible way) over time so that client applications can interact reliably.

I'm beginning to think you weren't joking.

Something like that?

|Detailed Description
|The Data API is used to form data into TrustedQSL
|records. A TrustedQSL record consists of a station record and a QSO
|record. Together, the two records fully describe one station's end of the
|QSO -- just as a paper QSL card does.

I believe this describes the local part of want you want to do with your
QSO-data: Forming records, converting and modifying these records and then
upload them via the tqsllib.

Have I understood you correctly this time?

> It is one of the stupidest proposals I've seen.

That, and most of the people who are willing to pay the price for
broadband already have it.

It's my understanding that BPL has already failed financially in Germany
and early plans for deployment in the U.K. seem to have slowed down
substantially. I'm of the sense that both cable and DSL are far more
common in the U.S. than in Europe - that if BPL couldn't make a go of it
in Europe where comparatively few consumers already have a competing
technology, then it's even less likely to work (financially) in the U.S.
where the competition does have a solid head start.

My fear...

is that the power companies really aren't all that interested in
providing broadband internet. They're tired of being cited for leaky
insulators and want to get the Part 15 limits raised so they don't have
to bother fixing them.

==========
I note with interest they're talking about using frequencies as high as
80MHz. All three major TV network affiliates here are on low-band VHF
channels 2, 4, and 5. An S6 signal in the 54-82MHz band will cause
harmful interference to all three stations. And the digital TV
conversion won't solve the problem - the CBS station's digital
assignment is 56 which means they're going to be back on channel 5 -
76-82MHz - at the end of transition. Judging from how ATSC digital TV
deals with impulse noise, I suspect an S6 BPL signal in TV channel 5
will make digital reception on that channel impossible.

Channels 2, 4, and 5 are used for major stations in Boston, NYC,
Chicago, Detroit, San Francisco, Seattle, Los Angeles, Dallas, and many
other smaller cities. National Association of Broadcasters vs. the
electric power industry. Could be an interesting battle.

(I wonder what an S6 BPL signal at 49MHz would do to a baby monitor?)

Getting closer :-)

Here is a description of one application.

1. Connect to the server.
This would probably be via HTTP with a cookie to create a session.

2. Authenticate myself to the server.
Using my user name and password, and possibly a certificate.

3. Query the server for one or more QSO records.
Something that looks like SQL would be most convenient.
It should be possible to say "read only" or "for modification".

4. Acquire the records returned by the query.
The server must also return status information for each record.

5. View and modify the records locally. Possibly create new records.

6. Return any modified or new records to the server.

7. Acquire status information from the server.

8. Disconnect from the server.

I want operations on records, not fields.
Things like "tqsl_getLocationDXCCEntity" are simply too low level.

What I do not see in tqsllib are the "open database", "get record",
"put record", "close database" functions that are needed to build an
application. We will see how things work out over time. Perhaps
everything I want is actually there, hidden under that huge pile of
low level internal function calls.

I think that's probably a bad guess. To get DSL service, you have
to be within x amount of distance from the phone company switch.
To get cable access, you have to have cable TV......

In the area I'm in, there are thousands of homes with no DSL
availability, and no cable TV service. And since the cable TV
service in this area is so bad, people who could have cable TV
are using satellite TV instead, as are those who are outside the
cable coverage area.

So in this area there are plenty of potential customers for some
sort of broadband service. Not that BPL is the answer, or a good
idea, I just wouldn't bank on the assumption that everybody who
wants broadband already has it.......

Not to mention the fact that if there was ho market for it the
people who are pushing it/testing it probably wouldn't be doing so.

The power companies haven't really looked at the investment to make it happen. They have just looked at the size of the potential market. I recently saw an article where a financial adviser discusses this very issue. The power companies actually propose this every few years and then find it to be too large an investment. I hope that is true now too.

Even if the limits are raised, the rules will still not permit them to interfere with licensed services such as commercial broadcasting and amateur radio even if their emissions are within limits. They would have to change that provision also.

Regardless, the FCC is pretty certainly going to encourage
it as much as possible. Katherine Abernathy, the FCC
commisioner who gave the "BPL is Nirvana" speech recently,
used to work for "Broadband Office Communications", for a
start...

It will be a sad day if it comes about with no protection
for the HF spectrum users. We've worried for a long time
that someone would like to take our freqs away from us for
their own use, but to use the HF spectrum as a garbage can
is even worse.

Perhaps we should start a rumor that it will be easy to
decode people's keystrokes by listening to the power lines?
Or better yet, perhaps it will be. Don't tell Ashcroft...

You think they wouldn't change it?? How much commerical
broadcasting goes on between 2-80 MHz? Is it a coincidence
that the AM band stops just below 2 MHz and the FM one starts
just above 80 MHz?

Just imagine all the world's DXers being crowded into the
160m band - yikes!

Hank,

When installing TQSL-108.EXE you get TQSLLIB.DLL. I didn't analyze yet but I guess the API calls could be made through that DLL.

Then you got TQSLLIB-1.3.TAR.GZ which includes a lot of C++ source code and documentation. Maybe it could be useable.

I did not yet really have time to look through it but I think it would a starting point for available functions and descriptions.

Perhaps I'm just stupid, but the ultimate solution to Broadband, Cable
TV, Telephony, etc. is FTTH (Fiber to the Home). Providing a 100 meg
connection is almost trivial. No radio interference at all. It just
takes someone willing to bite the bullet!

FWIW, probably not much, a few of us up here in northern NH are
spearheading an effort to do a 3 county build. Preliminary cost
estimates are around $32 million. This is being done now in 3
counties around Plattsburgh, NY.

>that provision also.

I don't think you have a grasp of the problem. Consider the current
part 15
rules that are completely ignored by the manufacturers of cheap
electronics.
They just sell cheap junk and let us fight with our neighbors about
interference or RFI.
How many new hams do you know that have quit HF because of RFI
problems
with cheap telephones and other electronics?
The BPL providers will just push the problem off to their customers
and let
us fight with our neighbors. When they are forced to act, they'll find
ways
to stall and avoid fixing the problems as long as possible (just like
they
do with leaky insulators and bad grounds). Most hams will become
discouraged
and give-up on HF.

Imagine this scenario: Your neighbor gets a shiny new BPL internet
connection
and is dazzled by it's performance. You have serious interference from
his
connection. You complain. The Power Company contacts your neighbor and
says
'we're disconnecting you (and all your neighbors) because the HAM next
door
doesn't like the noise your internet connection makes on his radio'.
Guess who ends up the bad guy.
Steve

==========

It must not be forgotten the health of French nation has considerable improved since August. The undoubted evidence for this is a much reduced death rate amongst the elderly which will last for several years.

The same sort of statistics apply to other countries which suffered from the heatwave but didn't bother to publish them, ie., for political reasons they kept it secret.

The French government should be congratulated on its honesty as it should be on other matters of international interest and importance.

Vive la France ! Vive l'Europe !

Hello, Reg

Well, I'm sure you'll get some flames on that comment, but it sure is nice to hear some honesty once in a while. I've read comments carried in news organizations some years ago. A number of Europeans were appalled by the number of homeless in the United States. Oh, some of the "conservatives" have broadcast a lot of hot air and some folks will call anyone disagreeing with their position "card - carrying - liberals", but the fact is there has to be some reasonable compromise to keep as many folks happy as possible. Also, it is necessary for any civilized nation to provide some level of support for those citizens unable to take care of themselves. Mind me, I am not saying that we are or are not doing that toady. However, it is fortunate that we have a very powerful weapon here. It is called the vote. If enough folks get upset, it will show despite the 30 second sound bites and handshaking LOL :)

I might inquire if you believe that the administration has been totally honest in its' appraisal of Iraq's weapons of mass destruction. Hmmm ... it may indeed be honest; it may not. All of the information is not in and I doubt it ever will be.

Yes, there is, Hank. API stands for "Advanced Programming Interface" and it
describes the programming interface to a lower layer that you can use.

The README states "API documentation can be found in the doxygen directory."

The API is right there, it's documented, it's usable.

Obviously, what you are looking for is an _application_ that performs
certain tasks to your liking. That's not what an API does, you need to write
an application that makes use of the API.

Apart from that: This is an Open Source project, so you can contribute your
patches and express dissatisfaction with what's currently available.
However, please refrain from telling us "There is no API". There is, Hank,
and I told you where it is about a week ago.

A very dear friend (now SK) swore this is true:

CQ CQ CQ - Beaming The Middle East From W6xx?

W6xx? here is JY1

W6xx? -- JY1 Good evening. Name here is Bill. How did you get such a fancy
call sign?

JY1 -- It helps when you are King!!

JY1 of course was his Majesty King Hussein I of Jordan

Knowing Bill -- might be urban legend -- but a good story

One of my CQ's was answered by a Hang Glider Mobile on 10M.
Another from a John Deere tractor mobile plowing a Kansas field.
Have both QSL cards.

That's going to be hard to beat! (congratulations, and good luck to
Martti!)

One Sunday, I'd been helping N4ZZ (now K4WX) with some RFI issues. We'd
licked them; Don wanted to hear for himself, and to thank the neighbor
for his patience. So he asked me to do some transmitting on 20 while he
walked next door.

Not wanting to just say "TEST TEST TEST TEST" over and over again on a
crowded band, I decided to call CQ.

"W9WI, this is KF6BL/T5 in Mogadishu"

Almost fell out of the chair.

"Application programming interface."
"... TO THE DATABASE."

> The API is right there, it's documented, it's usable.

There is NO API TO THE DATABASE.
This should be very very simple to understand.
What you show me is a set of library calls for manipulating
LOCAL DATA and LOCAL FILES. This is not of interest.

> Obviously, what you are looking for is an _application_ that performs
> certain tasks to your liking. That's not what an API does, you need to write

I am not looking for an application.
I WRITE APPLICATIONS.
To do this, I NEED THE SPECIFICATION.
IF I have the specification ... see below ...

> Apart from that: This is an Open Source project, so you can contribute your
> patches and express dissatisfaction with what's currently available.

There is NOTHING available.
There is NO SPECIFICATION of HOW TO ACCESS THE DATABASE.
None, zero, nichts, nada.
Were there such a specification, I would CREATE a library of
functions and gladly donate it to the project. Then there would
be an API to the DATABASE, and everyone could use it.

Please try very very hard to understand what I have written.
LotW is a CENTRALIZED DATABASE of QSO data.
I wish to access it.
From applications I will write.

For eQSL, I can do these things.
There is an API, it is documented.

LotW is still in it's baby steps, perhaps like a very early prototype.

I am still not sure you are talking about the database I had in mind.

Yes, it is, at least for log programmers. Prepare the data in an accepted
form, sign it digitally with your unique key and hold personal
responsibility for the integrity of the data. And that is done locally by a
log program. Am I still with you?

What you want is restricted remote access to another machine in order to manipulate data (QSO-records). Have I understood you correctly?

> For eQSL, I can do these things.
> There is an API, it is documented.
>
> LotW is still in it's baby steps, perhaps like a very early prototype.

I'm gonna refer to that once you tell me whether I have understood you correctly about the central database of the ARRL.

I was once done with a qso, keeping the rx running at low volume. Couple of minutes later I heard "QRL?" and with good conscience I keyed "NO". He came back with "NO DE CY0NSM UR 5NN".

Nice one.

Logbook and log archive are of interest here of course.
What kind of applications do I write? Many ;-)

Yes. Exactly.
Realtime access to the database.
With the same security as any other access, via certificate and signing.

> > For eQSL, I can do these things.
> > There is an API, it is documented.
> >
> > LotW is still in it's baby steps, perhaps like a very early prototype.
>
> I'm gonna refer to that once you tell me whether I have understood you
> correctly about the central database of the ARRL.

Yes, the one and only LotW database. Where the QSO and QSL
information is located. Online access to that database.

Right now access is via file upload (or email) to put data INTO
the database, and is via HTTP to get data OUT of the database.
I could reverse engineer that process and use it. But it seems better
to have a documented and supported API.

As I mentioned before, this API might be ONLY a protocol
specification, with NO code (libraries) involved.

What I'm talking about is different than the issue of signing the
data. That is already handled by the tQSL library. I don't like
the way the library is organized (too low level and complex),
but that is not a problem since I can put my own wrapper on
top of what exists to make reasonable functions.

Mostly I discuss these ideas because I think it is important for
LotW to do much much more than it does now. If it does not,

people will not integrate it into their applications, it will not be used, and the project will fail. The existing prototype of LotW does not seem to me very useful. Perhaps that will change.

There are other competing "global ham radio QSO" databases. Eventually these databases will need to be linked for them to be useful. It is not clear that LotW has a chance. Were the LotW team work with others (e.g. eQSL) progress might occur faster.

I step down from my soapbox now.

Sorry for delay in this response, took a few minutes away from the computer to work 3C0V on 15M ...

Nonsense. If someone offered me a vacation in either of those countries, I'd be packed and ready to go in an hour. You criticize Germany, yet we're the ones (the United States & Allies, after WWII) that put constitutional restrictions on that country's military and its participation in foreign conflicts. France, when it dropped out of NATO decades ago, also swore off any participation in NATO and U.S. foreign conflicts. Both of those countries now have a several decade tradition of this, yet you seem surprised, even outraged, when they maintained that same tradition during our invasion of Iraq. Unlike some countries, they mean what they say. If you now want to punish them for that, go right ahead. But don't expect everyone else to be a party to it. I, for one, will never punish a country for choosing peace over war.

On September 12, 2001, after 3000 Americans were butchered by religious fanatics, thousands of French spontaneously, with heartfelt tears in their eyes, marched with American flags in sympathy. At France's urging, NATO immediately invoked, for the first time in its history, the clause of common defense.

Almost two years later, over 14,000 French, mostly aged and infirm, are felled by one of the worst extended summer heat waves of the last hundred years. Our glorious right wingnuts laughed and said it served 'em right.

I know this is off-topic, folks (my first, I think), but there was a time when you could be a conservative and a patriotic American without spouting dittohead trash or playing Newtball with foreign policy. The country would be better off if the real conservative, patriotic Americans left the John Bircher wingnuts in the gutter where they belong, and take their rightful place running the country and guiding America through some difficult times. If nothing else, after we're done alienating every potential customer in the world, who will we design for or sell to?

2345. Re: Logbook of the World (LoTW) Yahoo Group

Newsgroup: rec.radio.amateur.dx
Date: 2003-10-04 04:49:27 UTC
From: "Dave, AA6YQ" <aa6yq@ambersoft.com>
Message-ID: <rjsfb.489875$Oz4.337948@rwcrnsc54>
Source record: 8879

Just to make Hank's point concrete:

One can today export ADIF from a logging application and upload that ADIF to LOTW. However, it is not possible to write an application that can determine which of the QSOs in that uploaded ADIF were accepted by LOTW (as opposed to rejected for a host of possible reasons). Furthermore, it is not possible to write an application that can determine which of the QSOs accepted by LOTW have been "matched" by LOTW and thus considered confirmed. If a user wishes his or her logging application to accurately reflect the status shown on the LOTW web page, that user must manually update the logging application, QSO by QSO.

This situation exists because there is no documented API that provides access to information in the LOTW database. The access required is read-only; the fact that the database is centralized is not an obstacle to the provision of a client API.

I have discussed these points months ago with Jon KE3Z (LOTW project manager) on the Trusted QSL reflector, and he acknowledged an intent to provide such a mechanism; the relevant messages are http://groups.yahoo.com/group/TrustedQSL/message/240 and http://groups.yahoo.com/group/TrustedQSL/message/246 . My understanding is that the LOTW team has higher priorities right now.

In my view, an API should have been provided prior to beta test; waiting until after production release to implement such functionality is highly risky. That, however, is where we are. Lets just hope this functionality isn't permanently triaged. Pressure from the user community wouldn't hurt.

You can't do that unless your ISP has DSL modems with a quarter
slot in the top......

Not to mention it wouldn't be "secure" if you knew who I worked.
Maybe I worked you and you didn't know it, so you could then
apply for credit for working me even though you didn't know you
did. (work me)

LOTW is much more complicated that it really appears to be.....

Please try very hard to understand what the ARRL has written.
Software for collecting quarters...... Cha Ching.......

I don't think it's fair to lump the Germans in the same bracket as the
French. I believe the Germans' objections were genuinely held. As for
France, OTOH, they have a long history of back-stabbing and
rug-pulling against Britain and the US in particular. I certainly
avoid buying French stuff wherever possible, I'm sorry to have to say.

Why? I can access my QSO data via the web page for no charge.

> Not to mention it wouldn't be "secure" if you knew who I worked.

Why? I can only access my own QSO data.

> Maybe I worked you and you didn't know it, so you could then

For this part of the discussion, and for the API of interest,
awards do not come into play. Only my own QSO data.

> LOTW is much more complicated that it really appears to be.....

Naw, I think it is less complex than it appears :-)

> Please try very hard to understand what the ARRL has written.

Oh I do understand!

> Software for collecting quarters...... Cha Ching.......

That is the ARRL view of their database.
My view is different, since I do not care about the awards.

On one hand: France and Germany chose to not participate. They well
may have thought that Iraq did not pose the threat professed by
Britain and the US. It may well be that France and Germany were
correct, particularly given the fact that no "weapons of mass
destruction" were found.

On the other hand: France, Germany, and Russia were alleged to have
oil contracts with Iraq. Any disruption would be considered against
their national interests. Did they let commercial interests interfere
with their national sense of morality? The US would never do that,
right?!

More importantly, I don't believe you can judge one's patriotism by
whether or not he agrees with current national policy.

We invaded another country. We're now occupying that country. There are risks associated with both of those. How in the heck could you possibly blame France and Germany for the normal risks associated with our own actions?

> 9.11.2001
> Never Forget.

I won't, my friend. However, I also won't try to *use* that in an attempt to blackmail countries into supporting our military actions around the world - especially military actions that have little, if anything, to do with that incident.

Yes, that seems to be what they have arrainged for themselves. Ask the surviving adult children of any of these elderly victims of the heat wave, and they will be happy to lecture you about how uncivilized and irresponsible the Americans are with their widespread use of the dreaded *air-conditionining* process.

I would not be surprised to find myself being lectured to on this point while standing with one of them before the open coffin containing their deceased mother or father.

The French "government", which has painted itself into a corner by promising more entitlements than the French economy can possibly support, saw these deaths at least to some extent as a relief of their disability. Over 10,000 no longer productive French citizens would no longer be demanding the entitlements that had been so generously promised to them in their productive years by the compassionate, caring socialism that is so widely accepted and implemented there in Europe.

Wouldn't it be just a hoot if the truth that was uncovered was that
the deaths were due to the fact that they didn't have any freon thanks
to thier pet the UN having pushed it out existence for airconditioning,
and thier economy was too weak to support the purchasing of the
more expensive, politically correct refrigerants?

I think the french people must have weak blood
or something.. I just read another artical about the
heat wave and have found that for 2 weeks the
temperature exceeded 104 degrees F, and the
health minister says that his prolonged length
of time accounts for the deaths.. whether you accept
the figure of 3,000 or 14,000, that's STILL a lot
of deaths. I live here in Texas where we've had
summers exceeding 104 for over a month at a time;
if you include the heat index due to humidity close
to the coast, we've had weeks where the temperature
exceeded 115 degrees for several weeks at a time
(this summer was an exceptionally cool one; we didn't get
over 101 for more than a few days). Yet here we
haven't had 3,000 deaths from it and ESPECIALLY
we haven't had 14,000 deaths.

WELL, "kieren", whoever you are, I don't know where
all this went, I simply replied to a post in alt.radio.amatuer.policy;
if it went to other groups it was because the original post was
also cross-posted. I have no idea where all it went; the same
place the post did that I *replied* to. I guess you do not have
the mental capacity to figure out this was a reply, not an original
post.

If you do not like it, I guess you have a personal problem then,
do you not? I guess if you find this something distasteful, it would
seem to me the problem is on your end, not mine. Ignore the
message, don't read it, if you do not like it. Put me in your
killfile. Log off the internet and go read a book. Do something.

But do not bother posting such condescending messages ever again
you overinflated sense of self-worth, because I could care LESS.
Got it? are we clear?

Clint

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 28th/September, through Sunday, 5th/October there were 233 countries active. Countries available: 3A, 3B8, 3B9, 3C0, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9N, 9V, 9Y, A2, A4, A5, A6, A7, AP, BV, BY, C3, C6, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/m, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, T9, TA, TF, TG, TI, TK, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK9L, VK9N, VK9X, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XZ, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4M9, VENEZUELA (Update/Rare District). Just a reminder that a group of YVs and YYs will be active as 4M9YY between October 7-12th from the very rare YV9 calling district and Grid Locator FJ67gv. Jose (Joe), YV5LIX, states, "This is the first time in the last 13 years that any

serious effort is made to give both, the 4M9 prefix and the FJ67 grid, to the rest of the world." Operators are:
YV4GD Jose Mendez YY5EDG Emilio Daniel Gallo
YV5HHV Hugo Hernandez YY5ERP Eloy Ritter
YV5IAL Roberto Piol YY5GAR Argenis Graterol
YV5KAJ Pasquale Casale YY5JMM Jose Manuel Robaina
YV5LIX Jose Manuel Valdes YY5OGU Miguel Gonzalez
YV5OHW Gregorio Almonte YY5OIH Juan Carlos Yanez
YV5SSB Alexis Deniz YY5RED Rafael Giann
YY5ADM Arnaldo Aguilar

4M9YY will be active around the clock on all HF bands and modes (10, 12, 15, 17 ,20 ,30 ,40 ,80 and 160 meters, SSB/CW/RTTY/PSK31/PSK63) as well as on Satellite, 70 cm, 2 meters and 6 meters. Operations will be from San Fernardo de Apure which is located some 300 Km south of Caracas very near to the Brazilian and Colombian borders. This will be a great opportunity for hams in these countries to try a direct QSO on 2 meters and 70 centimeters with Venezuela. Also, if propagation allows and since this is the correct season of the year, hams in the southern portion of the continent, especially in Argentina and Uruguay, will experience some TEP openings on 6 and 2 meters. For satellite operators, 4M9YY will be a good catch to work the rare FJ67 Grid Locator. For more information (in Spanish for now, but in English very soon), visit the Web page at: http://www.4m9yy.com.ve/

4V200, HAITI. Operators Hans/DL7CM, Sid/DM2AYO, Manfred/DK1BT and Juergen/DL7UFN will be active from here between January 28th and February 15th. The German team will be using the special callsign 4V200YH (Four Victor 200 Years of Haiti). Activity will be on 160-6 meters on CW, SSB, RTTY, PSK and SSTV. They plan to have 3 stations on the air (two on the air around the clock with AMPs). Antennas will be: 27m GP, 3 element band beam, HF9V and a 4 element for 6 meters. QSL via DL7CM. A Web page with a log search is already up and available at: http://www.qsl.net/dl7cm/haiti2.htm

4W3, TIMOR LESTE. Peter, 4W3CW, is expected to be active in this year's CQWW CW Contest as a Single-Op/Low Power entry. QSL via the address on QRZ.com.

5U, NIGER. Fred, G4BWP (ex-XT2WP), will be active as 5U7WP some days before and after the next CQWW CW Contest (November 29-30th). Activity will be on the HF bands and mainly on CW. During the contest, Fred will sign 5U7A or 5U5A (the callsign has not been issued to date). QSL via G4BWP, direct or via the bureau.

5Z, KENYA. Mirko, DJ1AA, is expected to be active from Nairobi now through October 23rd. He will sign 5Z4/DJ1AA (or possibly 5Z4**; still waiting for license). He also plans to be active in the German WAG Contest (October 18-19th). Activity will be on all HF bands. QSL via DJ1AA (DARC bureau).

6Y, JAMAICA. Ken, K2KW, will be active as 6Y0A in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/Single Band (160m)/QRP entry. QSL via WA4WTG. He will also be active before the contest on 160 meters.

9H, MALTA (C5 Cancelled!). Holger/DL5XAT and Matthias/DL5OB have cancelled their C5 (The Gambia) operation scheduled for October 21st to November 2nd. They will now be active from Gozo Island (EU-023) from October 20-30th. Activity should include the CQ World Wide DX SSB Contest (October 25-26th). Contest callsign was not mentioned. However, outside of the contest look for 9H3SB (DL5XAT) and 9H3UD (DL5OB). QSL via the bureau or direct via home callsign.

9Y4, TRINIDAD AND TOBAGO (Update/Contest Change). Ben, DL6FBL, reports that Andy, 9Y4/DL4MEH, has received his native callsign, 9Y4ZC. Instead of 9Y4TBG, this callsign will now be used in future contests. So look for Ben to be active as 9Y4ZC (not 9Y4TBG) in the CQWW SSB Contest. QSL via DL6FBL (this contest only).

AH2, GUAM. Members of the Guam Contest Club will be on the air during the CQ WW DX SSB Contest SSB at the end of this month. Look for operators JI3ERV/NH2C, JR7OMD/WI3O, JP1JFG/N2IU, JG3RPL/N1BJ, JH7QXJ, JR8VSE/NH2N and JE8KKX/AH2K to activate AH2R from Guam Island (KH2, Zone 27, IOTA OC-26) as a Multi-Op/2TX entry. QSL via JH7QXJ (Direct or JA bureau, NOT the KH2 bureau).

BQ9P, PRATAS ISLAND (Update). As this was being typed, operators BV4FH, BV3FG, BV3BW, DL3DXX, DK7YY, JI6KVR, ZL4PO, OE1WHC and N2OO are gathering in Taipei and expect to be on Pratas Island around noontime (1200 local time) October 7th. Paul, BV4FH, states they should have 5-6 hours before dark (sunset is 1820 local time) to set up antenna(s). They will first set up the low band antenna (depending the location difficulty). They will be aided by 3-4 soldiers to help put up the V80. The team hopes to set up at least 1 yagi before dark (one of the C3S for 10/15/20m) and if the moonlight is good, they will be able to set up the second yagi after dinner and rest. Remember activity will last until 0100z, October 16th. Operations will be on 160-6 meters including the WARC bands on CW/SSB/ RTTY/SSTV/PSK31. Frequncies will be in most DX windows (+/- QRM). Pilot stations: Floyd/N5FG (Eastern USA) and Lee/ZL2AL (ZL/VK). QSL via KU9C. The BQ9P's Web site is at: http://www3.ocn.ne.jp/~iota/newpage64.htm

CO8, CUBA. Operators Eduardo/CO8LY, Juan/CO8TW and possibly others will activate station CO8LY in the next CQWW SSB Contest as Multi-Op/Two transceiver entry. QSL via EA7ADH.

CU2, AZORES. Ingo, DH5ST, will be on holiday from Sao Miguel, Azores (EU-003), between November 9-23rd. He will sign CU2/DH5ST/p and be active 80-10 meters CW/SSB. QSL via address on QRZ.com.

DXPEDITION WINNER IS ANNOUNCED! The ARRL Letter reports that Daniel Bradke, W2AU, a 14 year old from Niskayuna, New York, will operate as part of the VP5X Contest Group during the CQ World-Wide CW Contest (November 29-30th). Bradke was the winner of a competition sponsored

by the VP5X Contest Group headed by David Kopacz, KY1V. According to the VP5X Contest Group's Web site, ""Daniel's essay, operating skills and enthusiasm have moved our contest team to select him to be our first annual VP5X Young Ham Team Member." Daniel, an Extra Class license holder, will receive an all expenses paid trip to Turks and Caicos Island (VP5) for the contest. More details are available via the ARRL Letter (Vol. 22, No. 39) this week or the VP5X Contest Group's Web site at: http://www.vp5x.com/

GP0, GUERNSEY ISLAND. The St. Helens Radio Club will again be active from Guernsey Island (IOTA EU-114) as GP0STH (GP0 ST. Helens). Operators Ron/G4DIY and Lee/G0DBE expect to be active from 1100z Thursday, October 9th, through Monday the 13th. Activity will be on 40/30/20/17/15/12/10 meters CW/SSB on the usual DXpedition frequencies. QSL via G4DIY direct or by the Bureau. PLEASE Note: If you are in the bureau, you will automatically be sent a QSL for each contact. They don't require your QSL card (Thanks). If you have to go direct, they will reply direct as long as return postage is received.

HK0, SAN ANDRES ISLAND (Update). Seven members of the Florida DXPedition Group will be on San Andres Island October 20-28th. They will be active as a Multi-Two entry in the CQWW Contest. The contest callsign has been put on hold. Orginally it was announced to be 5J0J, but it looks to be 5J0X now. They hope to receive a copy of the license soon. Stay tuned. Operators outside of the contest will be active as HK0/N2WB, HK0/KR4DA, HK0/W9AAZ, HK0/K4QD, HK0/N1WON, HK0/W1LR and HK0/W4WX. The team will be on all bands (160-6 meters) and on most modes (CW, RTTY, PSK-31, HELL, SSB) before and after the contest. QSL direct or via the bureau. Logs will also be available on LoTW. QSL 5J0J via N1WON, HK0/N2WB via N2OO, and all others via their home callsigns. Please view their Web sites at: http://www.geocities.com/w4wx1/upcoming
http://www.geocities.com/hk02003/

INDEXA OFFICERS 2003-2004. Judy, AA7UC, informs us that the International DX Association (INDEXA) has announced its elected directors and officers for the 2003-2004 term.
President: Judy Roush, AA7UC
Vice-President: Bill "Pick" Pickard, WA5PAE
Secretary-Treasurer: Bill Jennings, W4UNP
Directors: Franz Langner, DJ9ZB
Ron Wright, ZL1AMO
Richard Grant, W9RG
Nellie Saltiel de Lazard, XE1CI
INDEXA is a non-profit organization that is dedicated to supporting rare and semi-rare DX while promoting goodwill among amateur radio operators of the world. INDEXA also provides DX news and QSL routes via the daily INDEXA Information Session on 14.236 MHz at 2330z. For more information, visit INDEXA's Web site at: http://www.indexa.org
Or contact Bill Jennings, W4UNP, P. O. Box 607, Rock Hill, SC 29731, USA.

IOTA NEWS.................
EU-057. Detlev, DL1RTW, will be active as DL1RTW/p from Ruegen Island, October 11-16th. Activity will be holiday-style, 40/30/20 meters. QSL via his home callsign (bureau).

EU-070. Six operators from the Radio Club of Nancy (F6KIM) will be active from October 22-27th, from Porquerolles Island using the callsign TM5CRO. The island is located in the JN32 Grid Square. Activity will be on 160m-23cm expect 6m (not allowed) and 432 MHz. WSJT activities are also planned. VHF/SHF Skeds will be welcome via: f6kim@free.fr QSL via F5RMY. More info and log will be available soon at: http://f6kim.free.fr/

EU-125. Peter, DL2MX, will be active as OZ/DL2MX from Mando Island now through October 11th. QSL via his home callsign (bureau).

EU-128. Martin, DL1ZU, informs OPDX that he will be going to Fehmarn Island, October 19-26th. Activity will be on 80-10 meters mainly on CW, RTTY and PSK. QSL via bureau.

NA-062. Mark, KG8DP, trustee/member of the Rusty Zipper HF & DX Contest Club (NA8KD), informs OPDX that he will be active as NA8KD from Grassey Key, October 13-19th. He will be a fixed station there, but he will be mobile when heading south to Key West. QSL via KG8DP. Visit the Web page at: http://www.qsl.net/na8kd

KH0, MARIANA ISLANDS. Look for Takashi, JF1MIA, to be active as KH0A during the CQ World Wide DX SSB Contest (October 25-26th). Bands of activity were not provided. QSL via JF1MIA.

LOTW A HIT! The ARRL Letter reports this week that the "Logbook of the World" (LoTW), the League's new QSL-cardless awards and contact credit system, has proven to be a huge hit with the amateur community. Since opening September 15th, LoTW has acquired more than 2200 registered participants. Another 2400 or so applications are pending, and the QSO database of 4900 uploaded logs had topped 8 million contacts at week's end. For more details, please visit the ARRL Web Page at: http://www.arrl.org
Also, news and announcements will be posted to the Logbook of the World Web site at: http://www.arrl.org/lotw/

LX, LUXEMBOURG. Operator Philippe, LX2AJ, will be active as LX7I in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/Single Band (40m) entry. QSL via LX2AJ. There is more information available via his Web page at: http://www.qsl.net/lx2aj

MM0, SCOTLAND. Leo, W3LEO, informs OPDX that he will once again be active from Portpatrick in southwest Scotland from about October 13th to November 15th. His callsign will be MM0LEO, and he plans to be in the CQWW SSB Contest. He will use an Icom 706 (w/100 watts) using the following antennas: R-5 vertical [10/12/15/17/20 meters] and a 40-meter dipole [in inverted-V, semi-delta configuration]. QSL via W3LEO, CBA or bureau. He provides the following reference numbers: Worked All Britain [WAB]

Square NW-95, CQ Zone 14, ITU Zone 27, Grid Square IO-74ku and IOTA EU-005.

MW, WALES. Joel, VE6WQ, will be active as MW/VE6WQ during the CQWW SSB Contest as a Single Band entry on either 15m or 20m depending on the conditions.

NEW BOARD MEMBERS APPOINTED. The following are new board members of the Clipperton DX Club:
President : Yannick F6FYD
Vice-President : Joel F5IPW
Vice-President : Jean-Louis F9DK
Tresorier : Gerard F2JD
Tresorier adjoint: Jean-Louis F9DK
Secretaire: Mauricette F8BPN
Secretaires adjoints: Catherine F8CIQ et Patrice F6JOB
Relations internationales: Gerard F2VX
Fournitures: Alain F6BFH
TM8CDX: Rafik F5CQ et Alain F6BFH
Web master: Rafik: F5CQ
Informations DX: Florent F5CWU et Joel F5IPW
Relations avec RSGB/CDXC-UK: Vincent G0LMX
Rubriques Radio-Ref: Didier F5OGL
Diplomes DIFI/DXPA: Jean-Pierre F5XL
Demandes de Subventions: Florent F5CWU
Membres du bureau: F4AJQ Franck, F6ANA Alain, F5IL Jean-Claude
Charge de mission, bulletin du CDXC: Alain, F5LMJ.

QSL INFO AND NEWS.....
QSL AH2J to JR1VAY through the JARL Bureau. Operator was Aki. He was active over the past week/weekend during the Oceania DX SSB Contest, TARA PSK, CA QSO Party, RSGB21/28 etc... from GUAM.

Tom, G0PSE, reports that QSOs from the recent GB0SM (IOTA EU-011) September 20-27th operation have been added to the main log. The log is now available online at: http://www.qsl.net/gb0sm
E-mail requests for a QSL to receive a QSL card via the bureau can be sent to: g0pse@qsl.net

Fran, EA7FTR, informs OPDX that he is now the QSL Manager for Francisco Jose Colindres, HR1FJC, a DXer from Honduras. He states that he has the complete log, and anyone who needs to confirm a HR1FJC QSO can send a card to EA7FTR: Francisco Lianez Suero, Asturias 23, 21110, Huelva, SPAIN. He is also the QSL Manager for CN8YZ and HR2JGG.

Scott, K7ZO, QSL Manager for NK7U, has been processing cards for Joe that were received via the bureau for about the last 6 months. In the pile were around 40 cards for TA0/NK7U for activity on August 9, 2002. This operation was a PIRATE/SLIM. There were also a handful of cards for TA9/NN7E that were QSLed via NK7U for November 22, 2002. This operation may or may not be a PIRATE, but even if it is a good one NK7U is not the QSL Manager. Scott will return all cards via the

bureau.

Jeff, K8ND, informs OPDX that he spoke with Sid, NH7C, at Signal Point on Curacao, and he told him that the proper QSL route for the PJ2P operation in the CQWW RTTY Contest this past weekend is KQ3F. They operated in the M/S Low Power category. Sid will be on the island and operating as PJ2/NH7C through October 6th.

ZW8M QSLS. Moreira, CT1AHU, reports that the first batch of direct cards for ZW8M Mexiana Island (IOTA SA-042; DIB-69, May 21-25th, 2003) operation were sent out September 30th. Direct QSL will now be processed as they are received by the QSL Manager CS1GDX.

SPECIAL EVENT. Pi, K1RV, informs OPDX that there will be an upcoming operation onboard the USS Constitution "Old Ironsides" during their annual "Turn-around Cruise" on October 11th. They have been trying for several years to get onboard and operate a HF station. Look for them to operate as N1S from 1200-1800z on October 11th. The USS Constitution is the oldest commissioned ship in the U.S. Navy and is permanently berthed at the Old Boston Navy Shipyard. Each year they turn her around to allow for weathering. They also mention that they will have another station, N1B, operating on the pier of the shipyard. QSL manager for both of these stations is W1QWT. There will be three other U.S. Naval vessels on the air with them. Look for USS Caisson Young (WW2DD), USS Chaffee (callsign not provided) and USS Salem (K1USN). Operations will center around 7260, 14260, 18160 and 14039 kHz. Here is a Web link with additional information: http://ema.arrl.org/article.php?sid=213

SPECIAL EVENT. Look for special event station, LZ100JVA (Lima Zulu 100 John Vincent Atanasoff), to operate as of October 1st to commemorate the 100th anniversary of the birth of John Vincent Atanasoff, the father of the electronic computer. In the early forties, together with his assistant Clifford Berry, John V. Atanasoff created the ABC (Atanasoff Berry Computer) in a laboratory in Iowa State University. Some of the computer basics he invented are still used in modern computers. J.V.A. was born on October 4th, 1903. His father was an immigrant from Bulgaria. A Web page is under construction and will be soon available at: http://www.qsl.net/lz1pj/lz100jva.
LZ100JVA will be activated by a group of Bulgarian amateurs. QSL via LZ1PJ. Direct requests go to CBA: P.O.Box 15, BG-1324 Sofia, Bulgaria. PLEASE include SAE + postage (1 IRC or 1 USD). Bureau cards and e-mail requests are also welcome.

SPECIAL EVENT. Look for special event station, EN750WKD, to be activated by club station, UT7WZA, to celebrate the 750th anniversary of Prince Danylo Halytskyi's coronation (the founder of Lviv City), between October 23rd and November 3rd. QSL via UT7WZ either direct (Miroslav Lupiy, P.O.Box 94, Lviv, 79000, Ukraine) or through the bureau.

TI8, COSTA RICA. Operators Carlos/TI2KAC, Eddie/K4UN, Robert/W4BD, Will/K4WPM, Dennis/K4ZJ, N5VI and Keith/W4KTR will be active as TI8M in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi/2

entry. QSL via W4BD, by the bureau or w/SASE direct. Look for W4BD/TI8 and K4UN/TI8 before and after the contest. Activity will be on 160-10 meters. QSL via their home callsigns.

UV7, UKRAINE. Look for station UV7M to be active in both CW/SSB CQWW DX Contest as a Multi-Op/All Band entry. Operators for the CW Contest will be: Anatol/UY5LO, Serge/US8MX, Vlad/UX3MX and US5MTJ. Operators for the SSB Contest will be: Valery/UT1ML and Vitaly/US5MTJ. QSL is OK and only via bureau to Vitaly/US5MTJ.

VK9X, CHRISTMAS ISLAND (Also VK9C). Operators Gerhard/DJ5IW, Thomas/DL2RMC, Hartmut/DM5TI and Andree/DL8LAS are now active from Christmas Island (OC-002) as VK9XW until October 11th (before moving to Cocos-Keeling Island as VK9CD between October 11-23rd). Activity will be on all modes, 160 through 6 meters with a focus on the lower and the WARC bands, including operations on AO-40. They will have 3 stations on the air. Over the past weekend, they were active on 30/20/15m (Mixed CW/SSB/RTTY). QSL VK9XW via DL2RMC. QSL VK9CD via DJ5IW. Pilot stations are: Floyd, N5FG (NA stations) and Bernd, DF3CB (Rest of the world). Their Web page is at:
http://www.qsl.net/vk9xt
EDITOR'S ADDED NOTE: REMEMBER, if you miss working these guys you will have a second chance to work the YL team mentioned in OPDX.628 and OPDX.612.

XV, VIETNAM. Lee, N5PO, informs OPDX that he plans to operate from Vietnam as XV2PO, November 25th to December 3rd. Activity will be on 40-10 meters (no WARC bands), CW ONLY. He will operate in the CQWW CW Contest as a Single-Op/All Band entry. His plans are to operate from the Kimdo Hotel in downtown Ho Chi Minh City. QSL via N5PO direct or via the Bureau.

XZ7, MYANMAR. The German team (mentioned in OPDX.619) is now active as XZ7A unitl October 17th. Bernd, DF3CB, who has E-mail contact with them, states "the team arrived very well. Just the stopover in Bangkok was a little too long. The employees of Myanmar Travel and Tours met them at the airport. Therefore entry including all the equipment was no problem. Nothing got lost this time!" The entire roof is covered with antennas now. The hotel crew gave them a lot of support. The team reports that receiving on 80m is difficult (and worse on 160m). Some interesting pictures are now available on the Web of the XZ7A location and antenna setup at:
http://www.qsl.net/dl7df/xz7a/pictures.html
Activity over the past weekend covered 80-10 meters (including 30/17 meters) mainly on CW with some RTTY and SSB. QSL via DL7DF. Pilot stations are: Floyd/N5FG and Bernd/DF3CB.

ZL, NEW ZEALAND (Also, KH6). Roy, W6UKX, will operate as ZL/W6UKX from October 16th through November 6, and as W6UKX/KH6 from Hawaii a few days prior and after these dates. Operations will be SSB and CW, mostly 20 and 17 meters; with conditions permitting also 15-10 meters. QSL to his home callsign.

ZL4, NEW ZEALAND (IOTA Op). Chris, GM3WOJ, will be active as ZL1CT/4 from Stewart Island (OC-203), January 11-16th. Activity will be on 40

and 20 meters CW/SSB using only 400 watts to verticals. QSL via N3SL.

ZM8, KERMADEC ISLANDS. Ron, ZL1AMO, informs/reminds OPDX readers that Jacky, ZL3CW, will be leaving for Kermadec on October 7th. He should be active about October 10-18th from Raoul Island. This is not a DXpedition. Jacky will be there doing some maintenance on the communication gear (repeaters etc) for the Department of Conservation. He will be active as work permits. QSL this operation, ZM8CW, to Ron, ZL1AMO.

Hi Clint,

Do you really have no idea where your posts go? Wow, perhaps you *were*
aiming to post to alt.ego.biggots after all! I withdraw any inference I
made that you're xenophobic - "plain stupid" sounds more like it. I
apologise for that gross error; I meant you no offence.

The second para. causes me no concern, but I take issue with the third:
You say you "could care LESS" (I suspect you *meant* to say 'couldn't
care less' - an error that strengthens my case for your stupidity, by the
way). However by writing a detailed reply, you indicate that you DO
care...if you really didn't care, you wouldn't have lowered yourself to
responding to my post, you see? Get it?

Because you really don't care what I think, I'll assume you won't respond
to this & we can both leave the topic forthwith.

Enjoy.

Humble apologies to anyone reading this thread: I somehow doubt Clint's email address is valid and, deep down, I suspect he's not really able to drive that medium correctly anyhow.

Spleen vented.

One more newbie question. I worked several contacts with the CA QSO party last night. With the multiples of contacts being made, is it considered bad form to send a QSL card? Because I'm new, I'm sending out SASE to get some "starter" cards. With some individuals making hundreds of contacts, I would imagine QSL requests could be quite an undertaking. Thanks for your input.

It is *never* considered a bad form to ask for a QSL. Most people will
reply, especially if you use a direct/SASE method.

> Because I'm new, I'm sending out SASE to get some

Some of them rationalize their not QSL-ing with this old excuse, yes.
Don't let this stop you.

> > Don't buy goods made in France or Germany and vacation somewhere else!

Whats going on - why is everyone so down on the French! - and I thought in Amateur Radio the banned subjects were sex, politics, and religion - if you want to argue with the French government, go for it, but there seems a disturbing trend to abuse French amateurs (and everyone else) because of their government policy in not doing what the Americans want in getting bogged down in another Vietnam - and yes, the french can be and are frequently bloody minded, but unlike the rest of us, they are just more upfront about it.

Think about the high death rate in the current European summer, use the same intelligence you would have applied to get your amateur licence - and think what would happen in Texas if you have several weeks of below zero (-32 degrees F from memory) - people, especially the elderly, would be dying simply because their homes were not equipped to deal with such abnormal extremes of temperature.

The French elderly are becoming dehydrated, (as elderly people do, their feedback mechanism about the need for water stops working when they get old) and get no relief at night because it doesnt/didnt cool down, so they get very little rest. Keep this up for a while and people start to die. A simple explanation, no need to resort to "they are inferior to us" racist bigotry.....

Working contests are a good way to get new DXCC countries or USA States.
Most contesters will QSL.
But keep in mind that they receive hundreds of QSL requests --
so an SASE to US Stations and IRC's or green stamps ($1) to
overseas with an SAE. Some countries require more -- see URL:
http://www.qsl.net/n6dhz/irc-chart.html

However a less expensive way for QSLing for outside the USA is the ARRL
Bureaus -- see URL:
http://ac6v.com/callbooks.htm#BURRO

More on QSLing at URL:
http://www.ac6v.com/qslmisc.htm

Hi,

Check out this challenge:

http://www.af9y.com/radio30.htm

$100.00 to the person who decodes the callsign!

But be warned, it's not as easy as it sounds. I just spent 8 hours and
still haven't cracked it.

Have fun.

It is never bad to request a card. We all have to start our collection some place and QSO parties are a good place to pick up new states.

An SASE is the appropriate for sure.

Most of the contest folks will answer, some won't of course. One thing that can help is to jot a note saying something to the effect - "Thanks for my first California contact" or "Thanks for my first XXXX county contact in California". When they are the first contact for someone they seem to respond more favorably, they usually realize it is special to you and you have taken the time to send a card and SASE so it is worth their time to get one back to you.

Good luck and happy card hunting. Remember, once you get card fever it can become addictive.

2374. 3C0V - whats going on ?

RTTY Archive:

Hello Dr OM

please help me out publishing in the DX Reflectors the following
Early Morning of October 2003 at 10 AM 3C0V DX stopped for some bad
reasons and they got a serious warning not to use any of their Radios
,The Crew are fine The reason still unknown!!! But it is a serious one
I believe that. Sorry Guys hope the Operators will leave safely from
the Island. since yesterday morning till this moment 9:31 UTC the
5th of October there is no signal saying when they will be released out
and go back to EU I spoke to Elmo EA5BYP one of the operators and he
mentioned that the situation is too bad
. Gaby OD5NJ Pilot of 3C0V
Thanks in advance

Sounds like they got the boot off the air, and out of the country?
WHich brings up the question - was this an authorized operation in the
first place, or another 7O1YGF?

It seems like these guys have more to worry about than DXCC documentation. Here's the latest via Bernie, W3UR:

"I just received word from OD5NJ, Gaby, who is the pilot station for 3C0V. Gaby received a 10 second phone call from EA5BYP, Elmo, who reported "that the military soldiers allowed only the three operators to go back to Spain". There are four team members and it seems that DJ9ZB, Franz; EA5FO, Victor; and EA5YN, Vicente; were released. It appears that Elmo will be remaining on the island as the phone call was cut off.

I don't know how the guys were being sent back home (via plane or boat). If we get anymore details I will pass them on. Gaby has asked that this be forwarded to all DXers (mailing lists, etc.). So by all means fell free to forward this on."

Without more info, it's hard to guess what happened. Perhaps the military on Annobon just freaked out at 4 Europeans operating radios and generators 24/7. The idea/purpose of a dxpedition is pretty alien to non-DXers. There have been recent coups in Sao Tome and Guinea-Bissau, so maybe the military are a bit jittery. From the description above, this sounds decidedly serious. I hope that Elmo gets off the island safely soon.

At the moment, it does not appear that they are using the entire
2-80 MHz, at least in Emmaus, PA ... but they could expand.

> Does it have to use
> every possible freq in that range or could it skip the ham
> bands if we kick up enough fuss?

There is still the issue of intermod, harmonics, etc. And, simply
avoiding the ham bands won't protect the other users of HF.
NTIA and its USG "clients" will, hopefully, be one of our strongest
allies ... we should not take a "protect us and the heck with everyone
else" approach ... to do so would dillute our potential support.

> It seems pretty clear to me that it will happen - 150,000 hams
> are outnumbered by more than 100:1 by those who want broadband
> delivered to the doorstep.
>
> Not only do I think it will happen, but I also expect the RFI

VP2VB, Danny Weil, has gone on his last DX-pedition. He died Oct 3, 2003 in San Antonio. His obit is copied below.

Fair winds and following seas, old friend.

73, de Hans, K0HB/KG6AQI

Danny Weil of San Antonio, TX was born January 14, 1918 in a suburb of London England. He was descended from many generations of watchmakers and was apprenticed in the trade of watchmaking. Later he earned a Degree in Mechanical Engineering and Navigation. His father, Jack Weil, was killed during World War II in the London Blitz.

Danny joined the Royal Air Force at the age of 17 and in the 10 years he served, he was stationed in Ceylon, India, Norway and Stalingrad. Danny left England in 1954 in a boat he made by himself in order to travel the world alone after being inspired when he read the book "Kon Tiki" in 1947. In 1963, after 9 years, 3 boats and travels to the Atlantic, the Carribean and the Pacific Islands,

Danny completed his around the world voyage. Needing a means of communication, he taught himself Morse Code, radio theory and obtained a British Amateur radio license. Sailing single handedly around the world was a trip he volunteered to undertake on behalf of radio "hams". His voyage was integral in setting up ham radio stations on remote islands and the expedition was monitored by over 100, 000 amateur radio enthusiasts around the world. He is remembered by most "hams" as "the first DXpeditioner."

Danny was known as an adventurer who had a dry sense of humor which was characteristic to the British but his heart was warm and his loyalty as a friend was unparalleled. He was preceded in death by his wife Naomi Weil and his mother Christine Eckels.

Danny is survived by his close knit extended family of friends, Dan & Barbara Mclhany of Fair Oaks; Bonnie & Billy Henderson of San Antonio and all of the employees at Towne North Animal Hospital.

Danny Weil, VP2VB . . boy this brings back a lotta memories from my
'wayback radio days!

After his first boat sank he toured the radio clubs in the States,
particularly the DX and DX contesting groups to drum up funds for a
replacement boat. He was the guest speaker at one of the FRC club
meetings and put on a great show which is when I met him. He was a
very memorable piece of work to say the least. And it didn't take very
long to get him back in the water either.

He changed the face of DXing in a big way and was the first of the
real DXpeditioneers and led the way for other pioneers of his ilk like
Gus Browning and OH2BH.

Last anybody around here heard Danny had taken up residence in San
Antonio and settled into a career in the machine shops in that region
supposedly never to heard on the air again.

Although, the case could be made that he wasn't a real ham.

Yes, he was an important part of ham radio for some years. But I
always got the impression, and the story suggests the same, that
he was interested in amateur radio beyond communication for
his sailing voyage. It always seemed like once he had that in place
for his own reasons, he discovered amateur radio beyond that. Amateur
radio gave him a reason to wander, because it gave him a reason for
visiting plenty of isolated locations for more of a reason than because
they were there. The fact that he pretty much disappeared after
Yasme was over, not being interested in DXing those exotic locations,
leaves in question how much of a ham he was, his contribution to
the hobby notwithstanding.

One might compare Danny to Gus Browning. The latter started
out in amateur radio at a young age, and went on the tour to put
many countries on the map. But then when that was over, he was
still considered a high power DXer, publishing DX Magazine for many
years.

First off I don't agreee with these sorts of "categorizations". The
implication here is that you consider Gus a "better ham" than Danny
was and I reject the concept. Categorically. Plus dissing Danny a half
century after he lit up the bands is not exactly a class act Michael.

Danny never made any bones about the intent and purpose of his ham
activities. We kept his boat(s) afloat which was his need and he
shipped the cards which was our need. And there isn't any more to it
than that.

His format has been followed innumerable times since, i.e. hams with
marginal and/or short term interests in the hobby or DXing putting new
ones on the air. If the cards they've sent over the years hit the
no-counters pile your own totals and the Honor Roll membership count

would drop like rocks.

It is never bad form to send QSL's, and especially because you're thoughtful and making it easy by including SASE. Most contest stations are pretty good QSL'ers because they know a lot of their contacts during contests are from casual operators looking to get QSL cards for awards, etc. They want to keep those casual operators happy and coming back in future contests.

No, Not good news, 30,000 would've been good news.

15,000 is a good start though.

During one of the many wars that the French and the British fought and the French usually lost, the French just happened to capture a British Major. An officer brought the Major to the French general for interrogation. The French general began ridiculing the Major for wearing "that stupid red tunic." The French general said, "Why to you wear that red uniform, it makes it easy for us to shoot you." The British major replied, "If I do get wounded, the blood will not show, and my soldiers will not get scared." The French general said, "That is a very good idea," The Frenchy turned to his orderly and said, "From now on all French officers will wear brown pants."

AARGH!!. . never mind . .

> W6AM

W6AM tale: My second transmitter was a $29.95 Heathkit AT-1 I'd
cobbled together. The only FT-243 xtal I owned was 7.060. Xtals were
EXPENSIVE boy! Which when doubled put me on 14.120. Kinda useless freq
for dxing so I had to really scrounge for contacts. CQ, CQ, CQ, CQ ad
infinitum after school with all 3-5 watts of RF out or whatever it
was. Finally a CT1 found me and we latched up for several days
running. After some number of days another station called out of
nowhere, it was W6AM mobile running CW from his car. So 14.120 got to
be a three-way round table around 5pm Eastern Time for days on end. At
the time I had no idea who W6AM actually was except that his name was
Don and he was a really neat guy. I have a W6AM card.

Yeah, Gerry W3BES/W3GM. The radio god in these parts, my all-time great mentor. EVERYBODY'S mentor, that's the way he was. I yakked with Gerry on the club machine one day then found out he passed away two days later. Dredge up QSTs from the late '40s and early '50s and check the glossy back cover RCA power tubes division ads for a look at Gerry himself and the collection of the gorgeous monster amps he designed and built.

Anything new on these guys? They have some serious problems and we
want to hear of their safe return to civilization. Does their
operation have a website that's posting updates? All we can find is
contest/DX info, which is pretty irrelevant given their last known
status report. GL guys!

Amateur Radio Newslineï¿½ Report 1364 ï¿½ October 3 2003

Amateur Radio Newsline report number 1364 with a release date of
Friday, October 3rd 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. The comment period closes on Morse code
restructuring, Logbook of the World makes its debut and a new D-X
record for -- would you believe Wi Fi? The details on Amateur Radio
Newsline report number 1364 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: MORSE PETITION COMMENTARY CLOSES

If you have not yet filed comments on the frst seven Morse related
rule making requests, you are you of luck. Newsline's Bruce Tennant,
K6PZW, tells us why:

--

The why is simple. The period for filing comments on this initial
group of seven Morse code related rule making petitions closed on
Monday, September 29th. This, before several other requests that
favor retaining Morse have been made available for public comment.

Of those in the first group, some petitioners had suggested
eliminating the remaining 5 Word Per Minute C-W test. Others wanted
various levels of change in Morse testing. In all, well over 2000
comments that were filed by the closing date.

And what about the pro-code side of the debate? Will their views ever
be assigned a rule making designation? That's really up to the FCC.
Those waiting include the request from FISTS, the international Morse
preservation society. That one not only asks the FCC to retain the 5
word per minute C-W exam for General class license, but to also
require that Extra class pass a 12 word per minute test. FISTS also
wants written exams stiffened as well.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

We will have more on the latest round in the Morse debate in future
newscasts. (ARNewsline(tm))

**

RESTRUCTURING: LUXEMBOURG DROPSS HF MORSE REQUIREMENT

Yet another country has announced the dropping of the Morse code requirement for HF bands operation. As of the 25th of September, radio amateurs in Luxembourg with a CEPT Class 2 licence and callsigns in the LX3 series have had use of all of the HF amateur bands. (RSGB)

**

FROM THE ARRL LOGBOOK OF THE WORLD PREMIERES

The ARRL's new Logbook of the World secure electronic contact confirmation and logging system officially began operation on September 15th. The Logbook of the World system is a repository of log records submitted by users of the system. When both participants in a QSO submit matching QSO records, the result is a QSL that can be used for ARRL award credit.

To minimize the chance of fraudulent submissions to Logbook of the World, all QSO records must be digitally signed using a digital certificate obtained from ARRL. Getting a certificate requires verification of the licensee's identity either through mail verification for U S hams or inspection by ARRL of required documentation for those outside of the United States.

Software developed by ARRL can be used to convert a log file into a file of digitally signed QSO data, ready for submission. Full details on the system are in cyberspace at www.arrl.org/lotw. (ARRL)

**

REPEATER LINKING: ECHOLINK SAYS YES TO LOTW

Meantime, the Amateur Radio Internet linking system EchoLink has announced that it will begin accepting digital certificates issued by the American Radio Relay League's Logbook of the World program/ This, as an alternate means of authenticating new users.

According to Echolink creator Jonathan Taylor, K1RFD, system security is critical, and all new EchoLink users must be validated before being allowed access. In many cases,these people are asked to provide proof of license for verification.

Taylor says thst EchoLink system administrators currently process dozens of Amateur license photocopies each day, received by fax and e-mail. To streamline the process, participants in Logbook of the World will now be able to prove their identity to EchoLink using a that digital certificate, as an alternative to submitting a license copy. (K1RFD)

**

AT THE FCC: FCC COMMISSIONER SAYS YES TO BPL AND ARRL OBJECTS

FCC Commissioner Kathleen Q. Abernathy has taken the position that Broadband over Power Line is important to the future of cyberspace

communications. Speaking before a United Powerline Council conference an September 22nd, Abernatjy said that the introduction of BPL will contribute to what she terma as a broadband nirvana.

Addressing the council, Abernathy not only expressed enthusiasm for Broadband over Powerline technology. She went so far as to recommend the elimination or substantial modification of existing rules governing its deployment.

The ARRL Letter says hat the League was quick to respond. In a tersely worded September 25th fax to Abernathy, ARRL Chief Executive Officer David Sumner, K1ZZ, asserted that the commissioner overlooked some significant issues in her Nirvana analogy. In fact, Sumner called B-P-L a nightmare noteing that technical showings submitted by the ARRL and others in response to the Commission's Notice of clearly establish that BPL is a significant source of radio spectrum pollution. Sumner went on to say that it cannot be implemented without causing harmful interference to already established over-the-air radio services. (ARRL, published news reports)

AMATEUR RADIO SURVIVAL: UCF CLUB EVICTON FOLLOW-UP

A follow-up on the story of a college radio club thats been evicted after 31 years of continious service. The news is pretty positive as we hea from Amateur Radio Newsline's Mert Garlick, N6AWE:

--

The future of he University of Central Florida Amateur Radio Club is now in the hands of the school's Provost. This, as a direct result of hams from around the nation contacting the college to voice your dismay over the eviction of the club station after 31 years of operation from its campus location.

But even with all the community and political support, Mike Potaczala, KC4NUS, advises the College of Arts and Sciences is unwilling to quash the eviction. In fact, they have gone so far as to tell the Provost they no longer want any interaction with the radio club.

Potaczala, who is a staff advisor of the University of Central Florida Amateur Radio Club, says that now the Provost at least has a base understanding of the club's benefit to the students and the community

at large. More important, he is willing to help the club find a place to relocate on campus and is in the process of putting together the relocation cost figures. Unfortunately, the he does not feel he can justify directly allocating money from the university's budget to fund the relocation process. As a result, funding will have to come from school's Student Government, state and federal grants, and donations from the community.

Right now, the club is seeking help from anyone experienced in researching and writing proposals for state and federal grants. If you can assist in this project please contact the club via its website. That U-R-L appears in the print edition of this weeks Amateur Radio Newsline report.

For the Amateur Radio Newsline, Im Mert Garlick, N6AWE.

--

Again, if you can help the club write its grant proposals, contact it via the links at its website at http://ucf.edu/~wb4tcw/relocation.html (ARNewsline (TM), QRZ.com)

**

AT THE FCC: POWELL SAYS HE PLANS TO STAY

Federal Communications Commission Chairman Michael Powell says hat he plans to stay at the agency until the end of the Bush administration. Powell came under widespread criticism earlier this year for pushing thrugh new media ownership limits that allow television networks to acquire more local stations and permit a company to own a newspaper, television station and radio outlets in a single market. His announcement halts speculation that he might be leaving the agency. (Published reports)

**

ENFORCEMENT: GOOD NEWS FOR NJ REPEATER

Meantime on this side of the Atlantic theres some really good news for a New Jersey repeater operator. Tthe FCC's Daryl Duckworh, NN0W, explains why:

--

Duckworth: "The Enforcement Bureau has closed the matter of the technical compliance and coordination problems of the N2CTD repeater of Elizabeth Olsen in Farmingdale New Jersey on 146.775 MHZ. This is in view of replaced repeater equipment, corrected deficient operations and proper coordination."

--

In its letter closing the case, the FCC took the opportunity to remind N2CTD that the decision to operate a station as a repeater is a

totally voluntary one. That Repeaters are a convenience, not a necessity. Also that all stations including repeaters must have a licensee and a control operator capable of ensuring the immediate and proper operation of a station regardless of the type of control. (FCC, RAIN)

**

ENFORCEMENT: YOU NEED MORE THAN A TECH ON 17 METERS

Kelly G. Jones, K0EMD, of Fordland Missouri and Kenneth W. Paul, N0VDP, who resides in Lake City Minnesota have both been told by he FCC to stop operating in the 18 Mhz band. The reason for the notes is that both hams are Technician class license holders and Tech's do not have any operating privileges in the 17 meter Amateur band.

In its September 10th letter to the pair the FCC requested each to respond to within 20 days with whatever material either wanted to have considered in regard to the matter. The Commission says that the information submitted will be used to determine what further action the government might take. (FCC)

**

WITH THE SCOUTS: JOTA IS COMING

On a much lighter note, October 18th and 19th are the dates for the scouts 2003 Jamboree on the Air. Amateur Radio Newsline's Mark Abramowicz, NT3V, takes a look at the special relationship between ham radio and scouting:

--

When you think of Scouts and a Jamboree, images of tents, the aromas from all those goodies cooking in a dutch oven or a pot on the fire, and young men enjoying the outdoors might come to mind.

But add JOTA - or Jamboree on the Air - and the recipe for a great weekend is complete.

JOTA is sponsored by the World Scouting Bureau of the World Organization of the Scout Movement. This is the 46th year for the annual event.

Its goal is a simple one: connecting Scouts with other Scouts around the country and around the world by way of ham radio.

For many of those who take part, the fun starts with the campout - but the friendship and fellowship come through contacts on the radio. Jean Wolfgang, WB3IOS, is the American Radio Relay League's educational programs coordinator. She says several Scout councils in the United States schedule a campout around JOTA.

--

Wolfgang: "A lot of times the fall camporee falls this same weekend and so districts will arrange their camporee around the JOTA and then the hams come in and put up the big tarps and set up antennas.."

--

She says ham operators - whether adult Scouters or simply the fathers or friends of Scouts - bring their radios to Field Day-type settings - some in tents or cabins, others in picnic groves. They attract many a mike-shy Scout to come over and listen to the chatter from the radio. Maybe it's a Scout camp in Michigan, a community center in Arizona, a radio shack in Australia, or a hut in Panama.

--

Wolfgang: "It's more hands on, get the kids on the radio. And it creates friendships between Scouts in different countries, places that they would never talk otherwise to other Scouts."

--

The exchange is easy: a name, a location, Scout rank, age, and hobbies. That's for starters. Once the kids get going, you'd be surprised how much they enjoy talking to someone across the country or across the globe.

It's not a contest. But it's easy to generate a pile-up as operators scanning the bands look for stations calling: "CQ Jamboree" or "CQ JOTA."

And, Wolfgang says, the activity isn't restricted to just the boys.

--

Wolfgang: "This event is also for Girl Scouts," she says. "It's been a real struggle to get Girl Scouts to, the Girl Scout Leaders to find out about it."

--

And, of course, there are Girl Guides and co-ed Venture Crews. All are welcome.
Wolfgang says you may help turn someone on to the fun of Amateur Radio by taking part.

--

Wolfgang: "The League sees it as an opportunity to expose young people who may not be exposed any other way to ham radio," Wolfgang says. "And, although they may not turn out to be a ham in the next year or two - there'll be a time in their life when they'll settle down and may think of ham radio as a prospective hobby."

--

For the Amateur Radio Newslline, I'm Mark Abramowicz, NT3V.

--

The Jamboree on he Air is a world-wide event. Scouts may operate for 48 hours or any part of the time starting on Saturday at 00.00 hours until Sunday 24.00 hours local time. For more information visit the Jamboree on the Air website. Its in cyberspace at www.scout.org/wse/jota.shtml (ARNewsline(tm))

**

CONVENTIONS AND HAMFESTS: CALIFORNIA IN OCTOBER

Turning to ham radio happenings, the 12th annual Pacificon convention takes place October 17th to the 19th, but at a new location. This year the show's venue is the San Ramon Matiott with ARRL 1st Vice President Joel Harrisson, W5ZN as the featured banquet speaker. For more information take your web browser to www.pacificon.org or write to MDARC, P.O. Box 23222, Pleasant Hill., California. The zipcode is 94523 (VHF Reflector)

**

SEMINARS: WSWSS TO MEET IN CERRITOS CALIFORNIA

And the Western States Weak Signal Society's 9th Annual VHF UHF and Microwave Technical Conference takes place on Saturday October 11th. The venue is the Sheraton Hotel Towne Center in Cerritos California. The gatherng will feature technical seminars covering advanced DX'ing and contest techniques on 6 meters and all bands above. Producer Dave Bell, W6AQ, will be this years featured banquet speaker. More information found on the web at www.wswss.org . (WSWSS)

**

CONVENTIONS AND HAMFESTS: KALAMAZOO MI IN OCTOBER

And October 12th brings with it the Kalamazoo Hamfest. This at the Kalamazoo County Fairgrounds. Information on this one is in cyberspace at www.kalamazoohamradio.com slash hamfest and kalamazoohamradio is one word. (e-mail)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

ENFORCEMENT: UK GOES AFTER PIRATE BROADCASTERS WITH NEW ARREST LAW

If you decide to become a pirate broadcaster in the United Kingdom, getting caught will now be allot more than the seizure of your transmitting gear. You will now be going to jail. Jeramy Boot joins us from Nottingham in the U-K with more:

--

New powers of arrest were introduced on the 18th of September in an attempt to combat pirate radio stations. The police, working with Radiocommunications Agency investigators, will now be able to arrest a pirate broadcaster or anybody suspected of supporting or facilitating illegal broadcasting.

Previously police could only detain someone if they suspected them of giving a false name and address or another criminal act, such as a breach of the peace or assault. The new powers of arrest will also extend to acts of deliberate interference with radio communications and hoax calls, especially false distress calls.

The Communications Minister Stephen Timms said: "These new powers will be an important weapon in the campaign against pirate broadcasters. By interfering with communications services which are vital for public safety, pirates can put lives at risk. They also cause interference with other licensed radio users and can be a social nuisance to those who live near pirate stations."

Jeramy Boot, G4NJH.

--

Unlicensed broadcasters detained under these new U-K powers could face an unlimited fine or up to two years in prison. For other transmitting offences such as unlicensed use of business, marine, or amateur radio station the maximum penalty is a 5000 Pound fine and / or 6 months in prison plus forfeiture of any radio gear. Currently 5000 pounds comes out to a bit over 8000 U-S dollars and thats allot of money and jail time for talking unlicensed on the air. (GB2RS)

**

INTERNATIONAL - UK: UK ISSUING 5 MHZ NOV'S AGAIN

The United Kingdom's Radio Communications Agency says that it will resume issuing of 5 MHz Notices of Variation to permit more hams onto the band to expand propagation studies. A United Kingdom Notice of Variation is similar to the FCC's Special Temporary Authority document. In this case the privilege is reserved for United Kingdom Full Amateur License holders. British Intermediate and Foundation Amateur License holders and Short-Wave Listeners are also encouraged to participate in the experiment by submitting reception reports or by working on the experiment with an Notice of Variation holder. (GB2RS)

**

INTERNATIONAL CANADA: VO1MRC BACK ON 5 MHZ

And the U-K is not the only place where 5 Mhz is making news. To the norrth, V-Oh1-M-R-C, the Marconi Radio Club of Newfoundland club station, has resumed its experimentation on 60 metres. The permit to comtinue comrs as the result of Radio Amateurs of Canada recommending to that nations radio regulators to grant a request from the club to continue with its work on the 5 MHz band until the end of 2003. (RAC)

**

INTERNATIONAL - SOUTH AFRICA: SA AMSAT ISSUES ITS FIRST EZINE

South Africa AMSAT sayys that it has e-mailed its first electronic newsletter to its members. Called S A AMSAT Ezine, the newsletter is published in Portable Document File format and is available free of charge to South Africa AMSAT members. (ZS6AKV)

**

ON THE AIR: VICTORY AT SEA - HAM RADIO STYLE

In special events, the museum ship the Cassin Young will accompany the USS Constitution as it does its bi-annual turn around cruise and ham radio will be a part of the event. An Amateur Radio station operating as N1S will be on board the Constitution. There will also have a ham station on the pier of the Boston Navy Yard with the callsign N1B. Also on the air will be WW2DD from the Cassin Young and another station on board the USS Chaffee. Operation will be on 40, 20, 17 and 2 meters including an AM station around 7 point 290 MHz. This event is operated by members of the USS Cassin Young Radio Club and the USS Salem Radio Club. More information is on the web at www.qsl.net/ww2dd (W1QWT)

**

ON THE AIR: THE PA QSO PARTY

Also, word that the Pennsylvania QSO Party is scheduled for October 11 and 12th. This year Pittsburgh's Steel City Amateur Radio Club, has been selected as the Special Event station for the annual operation. Because of this every contact with W3KWH will bring 200 bonus points. More information on the Pennsylvania QSO Party is in cyberspace at the website at www.nittany-arc.org/paqso.html . (Via e-mail)

**

DX

In DX, word that G3WQU, is in Timor Leste, formerly East Timor, and active again as 4-W-3-C-W. This, after a break of two and a half months. He will be active for about one year and operates CW only on all HF bands with 100 watts into a vertical. (RSGB)

And G3PMR, is active again from Cyprus as 5B4AHJ from now until the 13th of December. QSL via G3PMR, either direct or via the bureau. (GB2RS)

And mark October 7th to the 12 for the 4M9YY 9th District Venezuela DX-Pedition. The Venezuela 9th. District, is a one of most wanted WPX prefix's worldwide and to give out lots of contacts the group will be active on all bands and all modes from 160 through 2 meter satellite from the city of San Fernando de Apure. QSL direct with a self addressed stamped envelope to the 4M9YY DXpedition, PAKMAIL 10012, P.O.BOX: 025304, Miami Florida 33102-5304 in the USA. More information is in cyberspave at www.4m9yy.com.ve (Via e-mail)

**

THAT FINAL ITEM: A NEW RECORD FOR WI-FI

And finaly, a group of researchers in Poland have set a new wireless LAN or Wi-Fi record. Q-News Felix Scerri, VK4FUQ, has the details:

--

Interline Wireless Technology, a Polish company has reportedly set a world record in stretching the range of a Wi-Fi network for an amazing 110 Kms at 2.4 GHz. They achieved this using an antenna developed by them and an INTEL Wireless Access Point.

The Interline report on their web site www.interline.pl - in Polish - seems to show and say that, on their mountain-top site, in what we would consider "Amateur Radio" field-day conditions, they generated 500mW into a 27dB 1.1m off-axis parabolic section dish. It seems to say that the reverse direction from the base station was 6 watts into a 2.4m dish.

--

And it was all done, ham radio style. (Q-News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2003. All rights reserved.

2404. Aktivantenne ADDX-AT2

Newsgroup: rec.radio.amateur.dx
Date: 2003-10-10 20:44:57 UTC
From: Chello Newsgroup <yogi97@gmx.at>
Message-ID: <dTEhb.37782$KP4.433953@news.chello.at>
Source record: 8838

Hallo!

Aktivantenne ADDX-AT2 (Frequenzbereich 3-30 MHz), mit Teleskopantenne und magnetischer Loop-Antenne (Frequenzbereich 3 - 28 MHz, 35 cm Durchmesser, 2-dimensional drehbar), f�r den Kurzwellenempfang. Zur Verwendung mit einem Kurzwellenrado wie z. B. Sangean ATS909 oder �hnliche geeignet. Betrieben mit einer 9V-Blockbatterie (nicht enthalten). Verschiedene Empfangsbereiche vorw�hlbar. Regelbare Antennenverst�rkung und Feinabstimmung.Die maximale Verst�rkung liegt bei 25 dB, bei sehr g�nstigem Rauschverhalten. Anschl�sse R�ckseite: 50-Ohm-Anschlu� in PL-259-Ausf�hrung zum Anschlu� anderer Antennen, Chinch-Kupplung (Verbindung zum Empf�nger), Batterieanschluss. Oberseite: Anschluss f�r Teleskopantenne und magnetischer Loop-Antenne (ebenfalls eine Chinch-Kupplung). Durch die vielen Anschl�sse ist die AT2 eine vielseitig verwendbare Aktivantenne oder Antennetuner. Ger�t wenig gebraucht, Optisch und technisch einwandfreier Zustand. F�r weitere Infos oder Bilder bitte Mail an mich. Neupreis betr�gt Euro 140,-, Verkaufspreis Euro 85,-

Gru�, Hans-Peter

I have to disagree with John. The loss of 73 magazine is a very minor
event in the history of amateur radio. On the other hand, the loss of
"Ham Radio Magazine" 10+ years ago was truly a tragic loss to amateur
radio. Compared to "Ham Radio Magazine", 73's technical articles were
generally trivial and often didn't follow good engineering practice.
Often, the construction articles would not work as described and most
mistakes were never corrected.
Although some were entertaining, I found Wayne Greens editorials to be
sensational and they contributed nothing to the community or the radio
art.
I'm sorry to see any amateur radio publication fail but I don't think
the loss of 73 will amount to much in the total scheme of things.

I remember when Wayne was trying to get rid of the top two megs of 2 meters.
146 to 148 Mhz. Because it wasn't being used and served no purpose.

Shortly thereafter FM came along and the 'rest is history'.

I dropped his rag years ago.

Re: 73 MAGAZINE SAYS "73 AND QRT"

Sad, in a way. But how much of 73's problems were caused by the shrinking world of hamdom in the U.S., and how much was caused by the reduced segment of ham subscribers caused by the narrowness of the self-proclaimed "El Supremo and Founder" Wayne S. Green II, W2NSD?

Over the years, I subscribed and had two articles published in 73 - an honor that paid. But Wayne didn't like us brain-damaged extras and berated CW operators at every opportunity. Hey, I could take that. But, then he didn't like contests either, so Wayne refused to publish contest information in his magazine. Those of us that wanted to know what contests were on, or at least what exchange was expected on contest weekends, had to take another publication to find out. By the time I stopped subscribing to 73, it had become a mostly no-code VHF enthusiast's publication - with the downbeat editorials of Wayne Green providing much of its contents. I still hate seeing
73 Magazine go down for good, even though I also wonder how it managed to stay in print as long as it did.

Hang in there CQ. You too, QST.

"Editorials"...?!?! You mean acidic rants, perhaps?

Many of his "prognostications" were echos of professional
engineering journals, presented in such a way as to wow and awe the
Amateur community that otherwise was unaware of those writings.

> I hope he makes an appearance on Art Bell's show to discuss
> the 73 Magazine demise and other commentary soon!

They'd go well together.

> > Green's 73 editorials and regular round of personal appearances

Like certain other posters in RRAP, he liked to carry on about
subjects for which he was inadequately informed, prefering to shoot in
the dark, hoping he'd hit something.

Sure,
What I do not understand is that anybody with a scientific education can see easily: big radiating short-wave antenna will transmit signals all over the earth, so should be unlawful by any means as it will not be limited to polluting the ether in the US of A but the globe.
Anyway, I think the governing power never made a big issue of that (radiation fallout etc was never kept inside the frontiers either and the cancer rate keeps going up! Guess twice why)
Don't really see what international goodwill in your rules means nowadays.

BTW BPL experiments in several places in the E.U. showed clearly the technique is not up to standard even if some results are kept secret too.

So just keep arguing counter and I hope every ham at least writes just one letter to his representative in the governing body, imho the only way to make any impact.

I don't think it was Wayne that wanted to recycle the top of 2 meters,
though I think Popular Electronics proposed it in the late sixties.

In the early seventies, Wayne proposed a license that used the top portion
of 220MHz. He proposed that it be an amateur license, but with little or
no exam, but it didn't have much connection with ham radio. He did
claim that 220MHz was underused, and it was a the time, which is why
the EIA wanted the same slice of the spectrum for the "Class E Citizen
Band".

73 Mag published my one and only article (in the 80s). While it's a
shame to see any ham-related business fail, it's not surprising in
this case. I had a subscription to 73 this past year (it was actually
a mistake. I subscribed to CQ via a subscirption service, and they
sent me 73 in error). The articles were of little content and the
editorials were pure fantasy and the rants of a madman off his
Thorazine.

I'm gonna miss my copy of 73 in the mail each month. Wayne is a genuine American legend. Off the wall, often mistaken, often over the edge, but always stands up for his position regardless of how goofy it seems to the rest of us. I rarely agreed with him, but I always admired his good natured poking at the pompous among us, and his absolute support for the causes which he believed in, regardless how unpopular.

I hope the old rascal figures out a way to start another magazine.

It was Wayne Green. It was in the early sixties. At least that is where I
read it. I took 73 for two years. Must have been 62-64 or so.

By the time I got back from Asia, 146.94 was 'the' FM spot on the 2 meter
band. About 79 or so.

I don't know if that will happen, Hans. I remember 73 (and Hot CoCo) from the early 80s and they were *huge* magazines. Unfortunately, I feel that amateur radio (and cb) are slowly going the way of these newsgroups. More bickering (and nastier) every day. I've had many a chuckle over Wayne's editorials and did subscribe a few years back. 73 had shrunk tremendously and I remember QST as being a bit more rounded back a few decades ago too.

I think I'll agree with you on hoping that Wayne figures a way to start up again. You can bet he isn't gonna roll over and play dead :)

It's not going to happen, this has nothing to do with money.

Maybe Wayne frittered it away, but twice he sold off magazines and
got a lot for them. Twenty years ago, he sold the computer magazines
and 73 to IDG, and became a millionare. He later sold his CD magazine.
Unless it was all spent, some late payments would not stop the magazine.

Wayne is over eighty. The magazine has been in decline for some years.
They cut back circulation some years back, too. I enjoyed reading what
Wayne had to say, until the past decade or so, when he was repeating
himself and getting into weird areas, like "the moon landing was a hoax"
and all the junk medicine stuff. I think that sent a fair number of readers
away, when his previous "muckraking" did not. The last time I saw the
magazine, it was arriving on the newsstand sporadically, it had
gotten pretty thin, there were a lot of blatant errors, a lot of the old
authors were no longer around, and there wasn't much of interest there.

If the magazine had been in good shape, he wouldn't have made the decision
to stop publishing. A little glitch, and he's had them over the years,
would not stop Wayne Green. But there isn't anything there to salvage.

Wayne has my respect; he is a vet of WWII- he was in submarines, and
those brave souls deserve all the respect they can get.
I don't know the details, but I understand his underlings cleaned him
out at least twice, leaving his company gutted and near death.
Maybe this has happened again, and at 80+, he simply hasn't the ability
to recover had when he was younger.
The loss of 73 isn't a death blow, but the loss of ANY source of new ham
material will be noticed.

"Peace is that brief moment in history when everybody stands around
reloading."

As I recall, the former Mrs. Wayne got most everything from Byte, etc.

Amateur Radio Newsline™ Report 1365 – October 10 2003

Amateur Radio Newsline report number 1365 with a release date of Friday, October 10th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Deciding the future of ham radio was not an easy task in Geneva and the problem of Broadband over Powelines continues to grow world-wide. Find out the details on Amateur Radio Newsline report number 1365 coming your way right now.

(Billboard Cart Here)

**

IARU: HOW RADIO REVISIONS CAME TO PASS

The word is out. Some of those who attended last springs World Radiocommunications Conference in Geneva Switzerland are now saying it was not all that easy to reach decisions. Q-News Graham Kemp, VK4BB, has the rest of the story:

--

Just now some of the background work done at WRC-03 is coming to light. The work was intensive. The main conference hall had over 1500 seats, simultaneous translation in 7 languages often more than 10 meetings going on at the same time, distributed in three adjacent buildings.

Some meetings went on till the wee hours of the morning and resumed at the usual time the next morning!

The growing number of completely new radio services clamouring for spectrum allocation, such as for example space borne radars for terrestrial observation, high altitude platforms together with the ever increasing number of new ITU Member States with active participation made the deliberations that much more difficult.

For Q-News Australia, I’m Graham Kemp. VK4BB, reporting for the Amateur Radio Newsline.

--

It was the decisions made at this conference that lead some nations to abandon C-W testing of radio amateurs and also spur the ongoing, world-wide Morse code debate. (Q-News)

**

RADIO LAW: BPL BECOMMING A HOT ISSUE WORLD-WIDE

Meantime, down here in Kiwi-Land as well as around the world, the debate is heating up over Broadband Over Powerline or BPL as its called in North America. This is the technology that claims to provide broadband high-speed Internet services using domestic power lines for system wide transmission and Internet connectivity.

For those not aware, BPL works by injecting the data signal into the powerline near the electricic substation and it travels along the line to the user. In some proposed systems, it interconnects cities using existing long distance power distribution grids.

The problem, of course, is that powerlines are not radio frequency cables. They are not shielded and leak RF energy causing a level of wideband noise in the vicinity of the cable. And as tests conducted by the ARRL have graphically proven, powerlines radiate for long distances.

AC powerlines are a very noisy transmission medium, with spikes and other noise. To make it work, BPL operators have to use higher injection powers to get their data signals to propagate along the cable. Higher injection power mean higher emissions, and this is bad news for all High Frequency radio operators.

By way of example, current proposals in Europe would raise the level of the background noise level on H-F by some 60-70 dB within 3 meters of the cable. Further away, the rise would be less, but still considerable.

Because of this, Broadband Over Powerlines poses a threat not only to amateur radio. Users of many low power devices such as security systems that tag products in shops are very concerned. And High Frequency broadcasters world-wide are fighting to support sensible emission limits for powerline breoadband communications.

But that’s not where it ends. In many places security services are worried. Unfortunately, in some countries, government departments involved in security have been told to not object to BPL as the government policy is to support it.

Civil Aviation communication and aero-navigation can be threatened by BPL. There are reports of an air accident in Canada being directly attributable to interference from broadband cable systems.

And this is only the beginning. New plans for BPL will attempt to use much higher frequencies which could immediately pose a threat to some nations emergency service communications. This is an extremely serious issue for amateur radio world-wide and for other users of the High Frequency spectrum as well. (NZART)

**

RADIO AIDS: NOAA PROPAGATION SERVICE TO GO QRT

Amateurs around the globe may soon loose the propagation information system operated by the United States National Oceanic and Atmospheric Administration. This includes real time data on the state of the interaction of the earth's

magnetosphere with the solar wind and state of the earth's magnetic field.

These tools have been invaluable to ham radio operators world-wide for many years. The reasons it may be going away? Budgetary cutbacks and lack of future funding. (Published news reports)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Xerox Amateur Radio Clubs WD6CZH repeater serving Los Angeles from El Segundo California.

(5 sec pause here)

**

ENFORCENMENT: HAM REPEATERS ARE NOT FOR BUSINESS

Back in the United States, the FCC has written to a Lakewood New Jersey to ask him why a repeater bearing his his call sign is being used as an adjunct to a business band radio system. The FCC’s Daryl Duckworth, NN0W explains:

--

Duckworth: “Martin Gross, N2DCG, of Lakewod New Jersey, has 20 days to reply to an inquirey about a repeater on 448.825/443.825 MHz and is used as an adjunct to WNVF 627, a business radio system for the Hatzolah Emergency Medical Services, rather than for Amateur Radio purposes as set forth in Section 97.1 of the Commission’s rules.”

--

In a September 11th letter, the FCC notes that Gross’s repeater is not coordinated. (FCC)

**

AT THE FCC: THE FCC's MASTER SEARCH ENGINE

The CGC Communicator reports that there is an obscure but very important search engine at the FCC website. One that allows you to comb through most of the Commission's licensing systems for specific information.

According to CGC, member databases include Universal Licensing System, Experimental, Cable Operations, Mass Media and International Bureau. Queries can be set up by frequency range, state, county, location call sign and licensee name. More information is in the cyperspace address found at http://gullfoss2.fcc.gov/reports/index.cfm or the backup site at http://svartifoss2.fcc.gov/reports/index.cfm (CGC)

**

RADIO LAW: CABLE TOLD TO SOLVE ITS OWN PROBLEMS

FCC Chairman Michael Powell has told the cable industry that it needs to work out its own problems before appealing to regulators for remedies. At a recent appearance at the annual cable sector conference Powell highlighted issues that have driven a wedge between cable companies and local broadcasters. Specifically, the rules that dictate what over the air channels cable outlets must carry on their systems.

Currently, cable companies are required by law to carry local broadcast channels. But broadcasters are also hoping regulators will eventually force cable companies to carry both digital and analog signals during the broadcasters' transition period to all digital transmission. But cable companies argue that if they were forced to carry both a broadcaster's regular analog signal and digital signals, it would significantly deplete their capacity to air other channels. (Published reports)

**

RESCUE RADIO: ORGANIZING 60 METERS IN VA

Bringing emergency communications to 60 meters is the theme of a new net organized by Virginia RACES, Inc. This, by providing a twice monthly opportunity for equipment tests in the new spectrum asllocation.

The Mid-Atlantic Emergency Net began opeeration on October 1st. It now takes place the first and third Wednesdays of every month at 2000 hours Eastern Time on 5330.5 using upper sideband.

All ARES, RACES and other emergency communications organizations within reliable communication range of the net are encouraged to participate. Liaisons are also invited with similar groups in neighboring states. (Via e-mail)

**

GETTING YOUR E-MAIL: AOL BLOCKS QRZ.COM

If you use America Online as an internet service provider and are waiting for e-mail or a password from QRZ.com, this is for you. A-O-L has decided to unilaterally block delivery QRZ.com e-mails unless a specific A-O-L user goes to the trouble of unblocking his or her own account.

According to QRZ, they have been getting up to 50 emails a week from America Online users who have not received their QRZ passwords or Links. QRZ advises that it is A-O-L and not them that has placed spam filters on incoming e-mail. To fix the problem, users must log onto A-O-L, go to “SPAM CONTROL” and set it so that e-mail from QRZ.com as an allowable e-mail address.

QRZ adds that it has no other way of sending America Online users a password or log on information as A-O-L has QRZ e-mail filtered out. (qrz.com)

**

HAMVENTION 2004: YOUR IDEAS ARE SOLICITED

Turning to the convention scene, the planners of Hamvention 2004 are putting out a call to the world-wide ham radio community. They say give us your input

and we will listen.

According to the Hamvention website, those in charge of next years gathering have implemented what they call a new "open door policy.” In other words, they want to hear your suggestions or comments on how to improve their show. They also promise to consider your ideas, discuss them, and implement them if possible.

If you want to help make Hamvention even bigger and better, now’s your chance. Sit down at your keyboard and write the 2004 Hamvention team directly at w-mail to info@hamvention.org. And yes, they promise a personal response to every e-note that’s received. (Hamvention)

**

CONVENTIONS AND HAMFESTS: DENVER COLORADO IN OCTOBER

Still with hamfets and conventions, the Rocky Mountain Radio League welcomes everyone to the 2003 R-M-R-L Hamfest slated for October 18th at the Jefferson County Fairgrounds in Golden Colorado. For more information e-mail Ron Rose to N0MQJ@rose3.com. (Press release)

**

CONVENTIONS AND HAMFESTS: SOCORRO N.M. ON OCT 25

Also, mark down Saturday October 25th for New Mexico’s Socorro Hamfest. Socorro is about 80 miles South of Albuquerque. This year the venue is the Firefighters Training Academy with R-V parking available. For information by e-mail please write to ac5bx@arrl.net. (e-mail)

**

WITH THE SCOUTS: A SPECIAL ON JOTA

Last reporter Mark Abramovich, NT3V, told you that the 46th annual Boy Scouts of America Jamboree on the Air will take place on October 18th and 19th. Now Mark has prepared a special report that details the Jamboree on the Air and the very unique relationship between scouting and ham radio.

--
AUDIO HERE
--

Mark’s report is our September Newsline Extra. It can be downloaded as an M P 3 file from our website at www.arnewsline.org/quincy. Just scroll down to the bottom of the page, click on ARNewsline Extra, turn your speakers up and enjoy. (ARNewsline(tm))

**

PROMOTING HAM RADIO: JOTA VIDEO NEEDED

Are if you are planning to take part in this years scouting Jamboree on the Air and own a good quality home video camera, your help is needed. As you know,

Dave Bell W6AQ, Alan Kaul W6RCL and Bill Pasternak, WA6ITF, are always looking for good video of ham radio happenings that they might be able to incorporate into a presentation about the hobby. As scouting and ham radio enjoy a very unique relationship, this is an event that is sure to make it into one of their shows, but only if they have the pictures and sound.

Since the Jamboree on the Air happens only once a year, that's where you come in. What's needed are volunteer camera people to take their gear to where the scouts are holding their JOTA gatherings and videotape them in action. Pictures and sound of them setting up their JOTA campsites, ham stations and their on-the-air operations. Also wanted is video of licensed scout hams introducing non-ham scouts to our very special new world of Amateur Radio.

If you can help in this project, or want more information, e-mail the production team to hamvideo@juno.com. (The Producers)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

CHANGING OF THE GUARD: DANNY WEIL, EX-VP2VP - S.K.

The changing of the guard in ham radio continues. This with word from the San Antonio Radio Club that Danny Weil, the former VP2VP, has passed away October 3rd at age 86.

Weil is best known for his post World War 2 DX operations. During the 1950's and 1960's Weil took to the ham radio airwaves from numerous exotic locations that he sailed to in a boat named the YASME.

Born in the UK in 1918, Weil had been living in a managed care facility in Texas since suffering a stroke in 2001. But during his lifetime his voyages lead to the setting up ham radio stations on remote islands around the world and contacts with over 100,000 amateur radio enthusiasts. His exploits are credited with giving birth to the terms D-X'er and D-Xpedition.

Weil's adventures and those of the Colvin's -- Lloyd W6KG-and Iris W6QL -- lead to the formation of the famed YASME Foundation that assists DX operations world wide. Services for Weil were held in San Antonio Texas on Wednesday, October 8th.

More about the life and death of Danny Weil is on-liner at http://obit.porterloring.com/obit_display.cgi?id=82269&clientid=porterloring (San Antonio Radio Club, Paul Guido)

**

RADIO TRAGEDY: HAM KILLED TRYING TO ACTIVATE DX STATION

A ham radio operator has died while trying to put a rare location on the air. RSGB News Reader Jeramy Boot, G4NJH, has the tragic details:

--

We are sad to have to report the death of Richard Baker, M3RWB, who died as the result of injuries sustained while climbing Aran Fawddwy in North Wales. He was intending to activate the summit for the Summits on the Air, or SOTA, award programme.

The Summits on the Air management team has released a statement which says, "Richard was an experienced hillwalker who saw SOTA as a good opportunity to re-ascend many summits that he had climbed in the past. His death is an untimely reminder that while accidents can happen anywhere, the mountains can present special dangers to those who are experienced as well as those new to mountain travel."

Jeramy Boot, G4NJH

--

The Summits on the Air management team went on to stress that in all cases, the safety of those travelling must come above the desire to ascend to the mountain. (GB2RSO)

**

RADIO RECORDS: US TO CZECH REPUBLIC ON 24 GHZ

Shooting for the moon has provided two hams the first-ever United States to Czech Republic E-M-E contact on 24-Ghz. The ARRL Letter reports that Amateur Radio moonbounce and microwave history was made September 24 at 1400 U-T-C when Josef Sveceny, OK1UWA, and Al Ward, W5LUA, completed the 24-GHz EME QSO between the two nations.

Sveceny used a 3-meter Prime Focus dish with 35 watts at the feed, vertically polarized. Ward’s station also utilized a 3-meter Prime Focus dish with but with 70 Watts at the feed. Ward was horizontally polarized to account for the spatial offset between North America and Europe. Previous international 24 GHz EME QSO’s have taken place between the US and Canada, the US and Russia and Canada and Russia. (ARRL)

**

INTERNATIONAL - INDIA: ECHOLINK COMES TO VU

News out of India is that a new EchoLink VHF Repeater has been installed at the Indian National Institute of Amateur Radio. The new system allows local hams in Hyderabad to contact Amateur stations all over the world twenty-four hours a day. According to Jose Jacob, VU2JOS of the National Institute of Amateur Radio, this is the second such repeater to go into service in India. (GB2RS)

**

INTERNATIONAL - UK: RAYNET AT 50

The Radio Society of Great Britain is hosting RAYNET’s 50th Annniversary Emergency Communications Convention in Birmingham, England on Saturday the 25th of October. RAYNET is the U-K equivlant to our RACES an d ARES combined. Paul Gaskell, G4MWO, tells Newsline that in addition to the convention, a special event station will be taking to the airwaves as GB50RAEN. It will be on the air from October 20th till the 31st. QSL’s go via RSGB Bureau. Further information is in cyberspace at www.rsgb.org/emergency (GB2RS)

**

ON THE AIR

On the air, HE2GR is a special event call for the USKA club station HB9GR. It’s on the air to celebrate the 200th anniversary of the Swiss Cantons of St Gallen and Graubuenden. HE2GR will be active on CW, SSB and digital modes until the 30th of December. QSL as directed on the air. (VHF Reflector)

**

DX

In DX, ZL3CW will be active as ZM8CW from Raoul Island in the Kermadecs through the 18th of October. Jack says that he will be there doing maintenance work for the Department of Conservation and hopes to be active in his spare time. This is actually not a DXpedition, but ZL3CW is considered to be one of the better Morse operators and enjoys the challenge of the pile-ups. (Modern DX’er)

And a D-Xpadition to Annobon Island was forced to shut down prematurely. This after authorities ordered operations curtailed on October 4th local time. According to the various D-X remailers, no reason was given for ordering the 3CZ0V ham radio operation off the air. (Via Internet)

**

THAT FINAL ITEM: HAM RADIO AT THE NYC MARATHON

For this weeks final story we turn the ham radio sports page and one of the biggest events of the year thats about to take place. And its Amateur Radio that makes it happen. We have the details in this report:

--

If you want to see a shining example of how valuable amateur radio can be as a public service, look no further than New York City the first week in November. Providing communications for the marathon is no small job. Just ask Communications Director Steve Mendelsohn, W2ML. When the marathon was run back in 1976, 26 hams provided communications assistance. This year, 425 hams will help, and they'll do it using 9 repeaters on 2 meters and 440. Mendelson says it's a source of pride for the ham volunteers who come from across the country:
--
Mendelsohn: “Just like Disney's fantasy land, once you hav e been there you want to come back over, over and over again.”
--

The marathon isn't just for New York area hams. Mendelsohn says amateur radio operators show up from more than half a dozen states to help:

--
Mendelsohn: “We have people coming back from Colorado, coming back from Vermont, from florida. They come in from all over. Seven states, twenty-six miles, no waiting.”
--

New York's boroughs will be flooded with over 30-thousand runners this year. The hams helping will be part of more than 9-thousand people volunteering. How you manage that many people could be a massive challenge -- but Mendelsohn says race organizers figured out how to do it:

--
Mendelsohn: “You break the nets up into sizable chunks. You name a Mile Captain for each of the miles, and the Mile Captain manages a staff of anywhere from 3 to 15 people. Oncve you get further along in the race where there is more of a chance of the runners falling and dropping out because thery are tired, you increase your manpower.”
--

18 net controllers with 2 standby operators will be on duty. Communications start at 3 a.m. race day and go until 6 o'clock that evening. 35 hams will be on hand at the starting line alone. Once the race is done, Mendelsohn says the hams' work doesn't end. For this many runners and their family members to reunite takes up an area of more than five blocks.

Hams help there, too. And they'll tag along not just with race organizers, but with translators who will need amateur radio operators by their side, too. It's a huge undertaking that takes a lot of planning and makes for a very long day. But the hams helping out with New York City's marathon wouldn't trade it, because Mendelsohn says, it's just plain fun.

From Birmingham Alabama, I’m David Black, KB4KCH, for the Amateur Radio Newsline.

--

For those of you in North America who might want to grab a glimpse of ham radio in action, NBC Sports will broadcast a one hour New York City Marathon highlights show nationwide beginning at 2:00 p.m. EST on November 2nd. Check your local listings for details.

Also, the full interview with Steve Mendelsohn, W2ML, can be heard on this weeks RAIN Report. Its as close as your telephone at 847-827-7246 or on-line at www.rainreport.com. You can find more information on the race in cyberspace at www.ingnycmarathon.org. (ARNewsline(tm))

Sending an SASE is the best route to go if your QSL'ing direct. Going
through the QSL Bureau is handy for DX'ing, but it doesn't hurt to
always check to see if the DX station has a stateside manager where
you can send an SASE to. Sending SASE's to QSL Managers also helps to
grab those DXCC entities you're needing.

But Wayne was out of Byte by the third issue, at a time when it did not amount to much. He only lost the potential for when it did get big.

He then turned around and started Kilobaud, which was pretty good for some years, and then launching the very successful magazine for the Radio Shack computer, titled something like "TRS-80 Microcomputing", and a number of other computer specific titles. It's those he sold to IDG, which brought in quite a bit of money at the time. Ironically, by the time he did sell them, they were past their peak because the computer world had moved on. I can't remember the year of the sale, but I thought it was just as a lot of computer magazines were folding, because too many had entered the field.

And since your wording can be read two ways, it's worth throwing in that Wayne was divoriced from Virginia Londner Green by the time Byte had started up. They had broken up about 1967 or 68, and from an editorial at the time, it seemed to be the indirect cause of his later tax problems.

By the time Byte was started, he was married to his second wife, Lynn.

It was never clear why Byte was put under the name of is his ex-wife, though years later he did say it had to do with the tax problems and the problems with Bell over those telephone articles, so he put it under someone else's name so it couldn't be grabbed. That still does not explain why it was his ex-wife. Three issues into the magazine, Wayne's name was gone from the masthead. Nothing was said at the time. And it was amusing how childish it got, with no mention of Wayne or 73 for about ten years. Even when there was an article in Byte about teletype machines, and the bibliography mentioned QST, CQ and Ham Radio, 73 was significantly absent.

I used to enjoy reading 73. Nobody could ever agree 100% with Wayne Green, but I liked to read his editorials.

I suppose all of us that didn't renew are to blame. Certainly the combination of falling ham numbers and hard times haven't helped. Magazine subscriptions have dropped right off the bottom of my list of financial priorities, for instance.

Oh well, I still have my 73 hat. I actually ordered an entirely different free gift, but they ran out of whatever it was. I will miss 73, though.

Well since the number of licensed hams in the US is at or close to an all
time high, I don't think "falling ham numbers" had a thing to do with it.

With the ten-year license, many "official" hams are actually SK or totally inactive. Also, while the no-code VHF hams do buy equipment, it's often not the more expensive gear that many of the HF operators buy - in addition to their VHF and UHF gear. I know Larry (the "L" in R&L electronics) supported the no-code change to not only keep customers at his business doors, but also to keep ham manufacturers in business. He noted the drastic reduction of suppliers he now has available. For my two cents worth, the FCC should seek to maintain CW as an effective, efficient, low cost option in amateur radio by offering a CW certification (maybe 15 wpm) to any amateur license. Especially, if they drop the lowly 5 wpm requirement. That certification would allow the use of a 20 KHz , or the present 25 KHz now reserved for Extra Class, at the bottom section the 10/15/20/40/80 meter US band segments. It would not provide any special SSB incentives.

My gut feeling is that a lot of mags have or will drop. Yes, there will (likely) always be antenna construction articles, articles on safety, DXing, and a (very) limited amount of homebrewing. Do you remember the construction articles of the 50s and 60s? Back then, there were a lot of home brew projects. Even Heathkit threw in the towel a couple of decades ago. How much did anyone learn dropping in an integrated circuit that contained the whole if amplifier? That plus postal rates going threw the roof hasn't made it any easier for magazines. I've dropped all magazine subscriptions except tv guide (sign of the times LOL). Even when I assembled my first computer (a Heathkit H-8, which I still have), there were modifications to be performed. I had to chuckle when Kilobaud had an article on increasing the transfer rate from the tape deck to/from the computer from 1200 baud to 2400 baud. I was already running 4800 baud (and could get it to sync, but not transfer, at 9600 baud. I think the cheap cassette deck had something to do with it.).

Those days are long gone; today we have satellite tv and BPL (hopefully, not for long on the BPL!!!).

Hi OM,

Don't worry about your QSLs. Most OM will send theirs if they receive yours,
most, not all... even after a recall.
Good to know, http://www.astrosurf.com/lombry/qsl-gs.htm

If memory serves, Heath didn't throw in the towel, per se.

Zenith bought them out for their computer(s) and terminals and then Zenith tossed out nearly all of Heath except those items.

About two years ago, I was in a Home Depot and came across some sensory-motion fictures that were labeled as "Zenith-Heath". What that is (or was) about, I have no idea.

My first kit was a Heath Q-1. I was ten or eleven years old and had bought an used S-38B with my paper route money.

I used ,y Dad's 350-watt soldering iron and cold soldered (what else?) every connection.

A friendly ham helped me out.

If you're interested in carrying on an extended conversation, you can
always call "CQ Ragchew" on phone, or "CQ RCC" (RCC = Rag Chewers Club)
on CW. During a contest, you might just call CQ and mention that you're
not in the contest and would like a chat. You may still get some
contesters that would like to work you just to get the points for the
contest -- after all, from our point of view in the states you're the
DX. You can also come on about an hour before the contest is due to
end, hand out points for the short QSOs and mention now and again that
you'll be on the air at the end of the contest if anyone would like to
wind down with a nice chat after it's all said and done....

If you work someone in a contest in the US and you'd like a QSL card,
send one of yours with an SASE. You'll be surprised at the number of
folks who will be happy to send you one! The SASE is important, though,
because as you mentioned the volume of contacts during a contest can be
rather large, and the cost can mount up even if they're just sent
through the mail as postcards.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 5th/October, through Sunday, 12th/October there were 225 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, AP, BV, BV9P, BY, C3, C5, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J8, JA, JD/m, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, PA, PJ2, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9N, VK9X, VP2M, VP2V, VP5, VP8/o, VP9, VQ9, VR, VU, XE, XU, XW, XZ, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZK1/s, ZK2, ZL, ZL8, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3C0, ANNOBON ISLAND. The 3C0V operation ended prematurely last weekend (October 4th) when the operators were told by local authorities to stop operating. Some operators left the island and some were held. Details were very thin, but OPDX was told the last operator has left the island

on October 10th.

4L6, GEORGIA. Shota, 4L6AM, will be active in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/Single Band (20m)/High Power entry. QSL direct to address on Buck.com.

4M5, VENEZUELA. Scott, W4SO, will be active as 4M5X in the CQWW CW Contest as a Single Band (20m) entry. Activity will be from the QTH of Ramon, YV5EED. QSL via W4SO.

4U1UN, UNITED NATIONS HEADQUARTERS. Pedro, HK3JJH, was active Sunday, October 12th, on 14260 kHz starting just before 1300z. This was to be a one day operation only. HOWEVER, as this was being typed, Carl, N4AA, Editor of "QRZ DX", informs OPDX that Pedro may be able to go back and operate the station again next Monday or Wednesday, but that is uncertain at this time.

4W, TIMOR LESTE. A well equipped team lead by Yuu, JR2KDN (also known as VP6DIA), will be going to Timor Leste between October 22-28th. The team consists of three good DX operators: Yuu/JR2KDN, Yasu/JI1NJC (also known as ZK1NJC from North Cook) and Shu/JH1SWD. They will operate on all HF bands from 160-6 meters on CW/SSB/RTTY. They will also be active on AO-40 Satellite. Yuu hopes to participate in the CQ WWDX SSB Contest as 4W2A. For 6m and AO-40 activity, the following information was provided:
* A 6m beacon will be transmitted on 50.095 MHz with following message: CQ CQ DE 4W4W 4W4W K
* AO-40, look for them around the main beacon + 30 kHz.
QSL 4W1SW via JI1NJC, 4W2A via JR2KDN and 4W4W via JI1NJC.
JH1SWD - Shuichi Matumoto: 2-15-16 Nakanaru, Hitachi, 316-0007 JAPAN
JI1NJC - Yasuyuki Iizuka: P.O.Box 3, Naka, 311-0100 JAPAN
JR2KDN - Yuichi Yoshida: 4th Floor, Kato Building, 529 Rokugaike, Nagoya, 462-0002 JAPAN

8P1, BARBADOS. Look for Tom, W2SC, to be active as 8P1A in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band/High Power entry. QSL via NT1N. He will arrive the Monday before the contest and be active on the non-WARC bands each day just to test out the equipment.

9N, NEPAL. Tohru/JA0UMV (a member of JA0-DX-GANG) and his friend Koji/JI1LET, will be on their first ever DXpedition from Katmandu, Nepal, between October 20-29th. Tohru applied for 9N7MV and Koji applied for 9N7ET. They will be active on 40-10 meters, including WARC bands, and participate in the CQ WWDX SSB Contest. Before the contest they will be active on CW and RTTY. QSL via their home callsign direct or by the JARL bureau.
JA0UMV, Tohru Kataoka: 15-9 Sakae, Kamo, 959-1382 JAPAN
JI1LET, Koji Iijima: 7-12 Tenma, Gyoda, 361-0076 JAPAN

BQ9P, PRATAS ISLAND (Update). Due to a typhoon, the BQ9P was delayed in reaching the island until October 9th . Operators BV4FH, BV3FG, BV3BW, DL3DXX, DK7YY, JI6KVR, ZL4PO, OE1WHC and N2OO had to go back to Kaohshung

and take a commercial charter plane to Pratas. Activity is all over the bands. They are expected to stay until October 16th. QSL via KU9C.
The BQ9P's Web site is at: http://www3.ocn.ne.jp/~iota/newpage64.htm

BW3, TAIWAN. Tatsuhiko, JD1BKQ, will be active as BW3/JD1BKQ in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band entry. QSL via JR3PZW.

C6, BAHAMAS. Magnolia DX Association member Terry, W8JE, will be active as W8JE/C6A from Treasure Cay, Abaco Island (NA-080) in the Bahamas, October 20-27th. Activity will be on 80-10 meters SSB, CW and possibly RTTY. He will also participate in the CQ WW DX SSB Contest as W8JE/C6A (Single Op). QSL direct or Bureau to W8JE. Floyd, N5FG, will act as his pilot station.

CARIBBEAN OPERATION. Look for Pete, VE3IKV, to be active from Sint Maarten (PJ7), Saba (PJ6) and Saint Martin (FS) between November 8-15th. He will use the callsign PJ7/VA3RA/m, FS/VA3RA/m and PJ6/VA3RA/m. Activity will be mainly 10 and 6 meters, CW/SSB. QSL via VE3 bureau (slow) or direct (fast). The following times were mentioned: Asia 1100z; Europe 1200-1700z, North/South America and TEP 2200-0000z.

CT3, MADEIRA. Ben, OZ5AAH, will be active as CT3/OZ5IPA from October 21st to November 2nd. Activity will be only CW/SSB mostly on the WARC bands. Also, Ben will be active in the International Police Association Contest (info at: http://ipa-rc.de). QSL direct to:
Ben Jakobsen, Gjethus parken 25, DK-3300 Frederiksvaerk (Denmark).

CT9, MADEIRA. Operators DH1TW, DK2PH, DK5TX, DK8FS, DJ6QT, LX1NO, OH4XX and OH6RX will be active as CT9L in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-2 entry. QSL via DJ6QT. Before and after the contest, operators will use their own call/CT3. QSL via their home callsign.

CT9, MADEIRA. Operators DL1EFD, DL1QW, DL1YD, DJ6QT, I2VXJ, IK2QEI, SM2EKM and W8LU will be active as CT9L in the CQ World Wide DX CW Contest (November 29-30th) as a Multi-2 entry. QSL via DJ6QT. Before and after the contest, operators will use their own call/CT3. QSL via their home callsign.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, reports that the following operations are approved for DXCC credit:
Chesterfield Island - TX0AT (October, 2002 operation)
Timor-Leste - 4W2DN
Afghanistan - YA1D, YA0J and YA1RS
Iraq - YI/KV4EB

E21, THAILAND. Champ, E21EIC, will be active in the CQWW SSB Contest as a Single-Op/Single Band (15m) entry. He states that he will use a mobile antenna on a door up 20m and 100W. QSL ok via direct or Bureau.

HK0, SAN ANDRES (Update). It is official now! The seven members of the Florida DXPedition Group will be using the callsign 5J0X in the CQWW

SSB Contest. Outside of the contest they will sign HK0/N2WB, HK0/KR4DA, HK0/W9AAZ, HK0/K4QD, HK0/N1WON, HK0/W1LR, and HK0/W4WX. You may QSL direct or via the bureau. Logs will also be available on LoTW. QSL 5J0X via N1WON, HK0/N2WB via N2OO, and all others via their home callsigns.

IOTA NEWS.....
AF-018. Members of "Tikirriki Contest Club" will be active again during the next CQWW DX SSB Contest as IH9P from Pantelleria Island (African Italy - CQ Zone:33, IIA:TP-01, WAIP:TP). It will be the first Multi/Two operation ever from African Italy. Operators (JA3USA, OL5Y, I2IFT, I8QLS, IK2ANI, IK2CIO, IK2HKT, IK2RZP, IK7JWY, IK8ETA, IN3QGY, IT9BLB and IT9ZMX) are expected to arrive on the island October 18th. Some CW and RTTY activity will be possible before the contest using personal callsigns /IH9. Operations are widely supported again by "Sezione A.R.I. di Bergamo" and "I.T.C. Industria Tecnica Cavi". Their Web page is at: http://www.ih9p.com/ (to be updated)

EU-052. Operators SV8CS, SV2DCD, IK2QEI, IK4MTF, IK2SGC and IZ2AAJ will use the special callsign SY8A in the CQWW SSB Contest as a Multi-Single. The QTH is Zante Island, from the house of Spiros, SV8CS. NOTE: This is NOT Mount Athos.

NA-069. The North Port ARC will do a six hour DXpedition to Cayo Costa (USI FL-464S, Lee county), Florida, (accessible only via boat), on October 18th, operating under Field Day conditions. The team will consist of Carl/K1ARL, Al/WD4A, Mike/KA9WIE and possibly others. They will try to have at least two bands on at all times. Activity will be on 40 meters and up. QSL via operator's instructions.

NA-151. Birger, OZ1GER, will be active as OX3UB during the CQ World Wide DX SSB Contest (October 25-26th) from Christian IV Island or Prins Christian Island which is listed in the IOTA Directory. QSL via OZ1GER.

SA-086. Marco, CE6TBN, informs OPDX that due to some personal problems by several team members, the team had to change the dates of their 3G2D expedition to Damas Island to November 25-28th.

JOTA INFORMATION. Malcolm, G4CXT, informs OPDX that a full list of UK stations participating in the World Scout event Jamboree on the Air (JOTA) on October 18-19th can be found at this Web site:
http://www.radio-scouting.org.uk
Also, this list has details of location, operating schedules, JOTA weekend E-mail addresses and websites etc.....

KH0, MARIANA ISLANDS. Yoichi Sakurada, JP1NWZ, Editor of JA CQ Ham Radio Magazine, informs OPDX that Satoshi/JE1JKL (NH6J), Seiichiro/JF1SQC (KH0DQ), Nob/JH1EAQ, Yoichi/JP1NWZ (AH7X) and Tom/JA5OVU (K1RJ) will be active as KH0AA from Saipan, October 23-27th, CQ WW DX Phone Contest included. They will be as a Multi-Two entry. Outside of the contest they

will be on SSB, CW and the WARC bands as well. QSL via JA5DQH (bureau or direct to: Akito Nagi, P.O. Box 88, Tokushima, 770-8691 JAPAN).

LIGHTHOUSE ACTIVITY. Members of the Kettering Amateur Radio Club will be operating from the old lighthouse on Lundy Island from October 14-20th. Their callsign will be GB4LI. Activity will be on all HF bands. Operators are G0NFL, G4VID, G0AQP and G4TTX.

LT1, ARGENTINA. The "BAD POWER Team" will be active as LT1F during the CQWW SSB Contest as Multi-Multi entry. The operators are LU1FAM, LU1FKR, LU1FGE, LU1FMO, LU2DLKT, LU3FZW, LU4DX, LU5DX, LU5HM, LU9HS, LU8VCC, LU7VCH, LU1FJ, LU1FT, LU6ETB, LU8EKC, LU3CQ and LU8ADX. QSL via AC7DX. The "BAD POWER Team's" Web page is at: http://www.badpower.com.ar

MD4, ISLE OF MAN. Once again, operators G0HSS, G1GEY, G3NKC, G4XUM and M0BEW will be active in the CQWW SSB Contest. For additional interest, they will be operating from the Point of Ayre Lighthouse (Reference number - IOM013). There is a possibility of some activity before the contest with operators using their own callsigns (especially 160m!). QSL to G3NKC; or Bureau request through their Web page at: http://www.md4k.com

PZ, SURINAME. A reminder that Randy (W5UE/PZ5UE), Darryl (KD5CQT/PZ5CQ), and Glenn (K2FF/PZ5FF) of the Magnolia DX Association (MDXA) will join forces with Ramon (PZ5RA) to operate from Suriname during the period October 20-28th. Look for PZ5UE, PZ5CQ, and PZ5FF to be very active on all bands/modes outside the CQWW SSB Contest, and be sure to work PZ5A (Multi-Two) during the contest. Their Web page has complete information regarding the operation. QSL via W5UE for PZ5A and home callsigns for pre-contest operation. Web page is: http://www.mdxa.org/pz_2003.html

QSL INFO AND NEWS.....
Tex, 9M2TO, informs OPDX that he is having a problem with cards being sent direct to Penang QTH. Over the last few months, Tex has received many direct QSLs without RETURN POSTAGE. He thinks someone is opening and taking the IRCs out of the envelopes. So, he is requesting to please send DIRECT QSL to JA0DMV: Tex Izumo, 827 Nakanojyou UEDA, Nagano 386-0034, JAPAN. 9M2TO's QSL status is still 100% automatically through the JARL bureau. He has already sent out 150,000 QSLs through the BUREAU.

NEW MANAGER. Effective immediately, N4QB is not the QSL Manager for A61AJ.

Joe, DF6IC, wants to remind everyone that if you want to get your QSL cards direct via airmail or land for his recent FO/DL6IC Austral DXpedition the postcards from Germany the cost: 1.50 € or 1.76 USD.

Special event station VI3BVS was active this past Sunday to commemorate the 200th anniversary of Victoria's first European settlement. The operators were Ron/VK3AFW, Jim/VK3PC and Barry/VK3JBR. A commemorative QSL card will be available. QSL via VK3WI or through the bureau.

NEW QSL MANAGER for VB2R and VB2V. James Davidson, VE3TPZ, who is currently QSL Manager for VC2C Canadian and International, has taken on the additional duties for the callsigns VB2R and VB2V. James has started working on clearing out the backlog bureau cards that he has recently received. If you are awaiting a QSL card you, may E-mail him to check the logbook and see if your request is in the current batch of cards received recently from the bureau. His E-mail address is: ve3tpz@sympatico.ca
There will be a large shipment of cards shipped out in the next few days for VB2R,VB2V and VC2C.

The VK9XW operation is now QRT. The Germans logged 13000 QSOs. The log (along with pictures of the DXpedition) is now available at the following Web site: http://www.qsl.net/vk9xt

YI9X QSLS. Steve, OM3JW, informs OPDX that after the R/J RTTY Contest he received some direct QSLs for Mike's activity as YI9X. He reports that he is having basic QSL cards printed and will get them around the end of October. Full colored YI9X QSL will be printed and ready later at the end of year (because he is still waiting for photos from Baghdad). Communication between Steve and his son Mike, OM2DX, is only via radio or satellite phone. There is no Internet hookup at the Slovak Embassy yet. Please be patient, and don't send duplicate QSL. "Thanks! 73!", Steve, OM3JW.

SILENT KEY. Several sources are reporting that the YASME legend Danny Weil, VP2VB, has become a Silent Key on October 3rd in San Antonio. Danny sailed/traveled the Atlantic, Pacific and Carribean, plus was active from many DXCC entities (30 were mentioned). OPDX and its readers would like to send out our deepest sympathy to Danny's family and friends. For more on the life of Danny Weil, please go to the following Web site and read the obituary at:
http://obits.mysanantonio.com//index.cfm?id=28006&fuseaction=viewobit

SILENT KEY. Jack Haden, VK2GJH (ex-T20JH), informs OPDX: "It's with much sadness that I wish to report the passing of Ian T. Anderson T20AA, of Funafuti, Tuvalu. Ian passed on last Friday, October 3rd, from a heart attack, aged 79 years. Ian was much travelled and formerly signed as GM4JAB, ZD9BT, VP8GZ, J87BD and T2ITA. A former commercial band operator, Ian enjoyed his amateur radio and was well known for his Scottish wit and humour. From Tuvalu he was very active on HF and six meters, mostly CW, before sickness prevented him operating further. Ian is survived by his wife Fipe, five children and three grandchildren. The Pacific has lost one of its more colourful radio amateurs." OPDX and its readers would like to send out our deepest sympathy to Ian's family and friends.

UK, UZBEKISTAN. Naoki, JE7RJZ, will be visiting Tashkent, Uzbekistan, as a member of a TV crew between October 24-29th. He hopes to be active in his spaer time plus participate in the CQWW DX SSB Contest as UK/JE7RJZ. Naoki has not decided what entry yet. QSL via JE7IDA by the JARL bureau or direct to: Kunihiko Nanao, 2-5-4, Mitsuwari, Morioka, 020-0011 JAPAN.

USI NEWS. The Sandusky Radio Club, W8LBZ, will be active November 7-9th from Kelley's Island (OH-001L) located in Lake Erie, Erie county, Ohio, for the United States Island Award (USI). Activity will be on 40 and 20 meters, mostly SSB, using the club call. QSL direct, with SASE, to W8LBZ (Sandusky Radio Experimental League, Inc., 2909 West Perkins Ave., Sandusky, Ohio 44870, USA), or via the bureau for DX.

VK9C, COCOS-KEELING ISLAND. The German team is now active as VK9CD. Their activity will last until October 23rd. The first night there they worked via satellite AO-40, and Hartmut, DM5TI, worked more than 100 stations. As this was been written, their activity was mostly on 20 and 15 meters CW/SSB/RTTY. REMEMBER: QSL this activity only to DJ5IW.

VK9X, CHRISTMAS ISLAND. This DXCC entity has become very active lately. The German team active as VK9XW went QRT over the past weekend and is now on Cocos-Keeling Island (active as VK9CD). By the time you read this, the YL group should be active as VK9XYL until October 27th. Also (and just a reminder), look for Charlie, W0YG, to be active as VK9XG between October 26th and November 8th. Charlie informs OPDX that he will concentrate on the low bands and RTTY for the States. He mentioned that he has already shipped some of the equipment there and that David Burger, VK2CZ, who is going to the island about a week before him, will unpack and set up his station. David is also bringing antennas and will install them as well (antennas from Force 12). Charlie states, "While I cannot operate 24 hours a day, I will be on as much as practical considering I want to explore sights on the island a bit. My present intentions are to operate mostly when there are common periods of darkness between Christmas Island and the States which will also mean many other areas of the world will also have propagation and can work me then too." Please QSL direct only to W0YG. No bureau cards please.

VP2E, ANGUILLA. Operators Ray/KC5EA, Sheila/N5HGB, Gordon/N5AU, Robert/ N5KO, Jeff/N5TJ and John/K5MR will be active as VP2E for the CQWW SSB Contest as a Multi-Single class. They are going to try for a new North American record score. QSL via N5AU.

VP5, TURKS AND CAICOS ISLANDS. Members of the North Florida DX Association will activate Middle Caicos (NA-002) as VP5DX in the CQWW DX SSB Contest. Operators are William/K4UTE, Ron/N4KE, Jim/NU4Y, Mike/NF4L, Mike/N4EPD, David/WA4ET and Steve/AB4UF. QSL VP5DX via NU4Y, all operators will use homecall/VP5 before and after the contest; QSL to their home calls. The first guys will arrive October 16th, and everyone will leave by October 30th.

ZK1, SOUTH COOK ISALNDS (Update). Don, K6IPV, informs OPDX that he and Dave, W6AQ, will arrive on Rarotonga about 9:00 PM (local time) on October 20th. After a decent nights sleep, they will start assembling the antennas. They will have N6FF's 40/75/160 vertical set up right at the high-water line, and Dave's SteppIR 3-element Yagi up at least 18 feet (maybe as much as 36 feet). The rig will be a K2/100 driving an ACOM amp. They hope to be on the air by the afternoon of the 21st. They are going to operate mostly SSB with some CW and, they hope, RTTY and PSK-31. Licenses are in hand. Don is ZK1IPV, Dave is ZK1AQT, and they will use ZK1SSB for the CQ

WW SSB Contest. QSL Manager is W6ORD. They will not have a Web page. Don mentions that they will be next door to Victor, ZK1CG, who has been a tremendous help to them with their living and operating arrangements. They look forward to meeting him and Jim, ZK1JD, who has the mast sections they will use for the beam. Victor has offered his shack and antennas if they run into any trouble. Their wives will be with them, so they will not be on the air constantly before and after the contest. They will probably operate a lot of late afternoons and nights, getting tuned up for the contest. They will tear everything down on the afternoon of October 28th.

ZONE 2. Operators Raphael/VE2CVI, Paul/VE2PGI and Sebastien/VE2GTZ will be active from ZONE 2 as VE2CVI during the CQ World Wide DX SSB Contest (October 25-26th). For more details, watch the Web page at:
http://www.qsl.net/ve2cvi

ZONE 2. Fred, VE3JM, will be active from CQ ZONE 2 as VO2WL in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band/High Power entry. He will be in Zone 2 between October 22-26th. QSL via VE3JM.

ZONE 2 (Update/More). Team-Zone 2 will activate "CQ Zone 2" (Grid Square FO11) for CQ World Wide DX SSB Contest (October 25-26th). During the contest, look for the special event callsign VB2C to be used to commemorate the 400th anniversary of the first voyage of Samuel de Champlain to Canada in 1603. For more information, please visit the Web page at:
http://www.blupete.com/Hist/BiosNS/1600-00/Champlain.htm
Their operating plan during the contest will be 160-10 meters, SSB only.
There are two specific QSL routes for VB2C:

USA/International Direct Canada/International Direct
and Bureau: and Bureau:
Dennis Egan, NB1B James Davidson, VE3TPZ
3 Keith Rd, Wayland 65 Youngs St, Stratford
MA 01778-4517 USA ON N5A 1J5 Canada

For sked requests and any additional information, send E-mail to:
TeamZone2@qsl.net
TEAM-ZONE 2 DXPEDITION Web page is: http://www.qsl.net/teamzone2

ZW0, ST. PETER AND ST. PAUL ROCKS. Joaquim, PS7JN, informs OPDX that he is planning a DXpedition to PY0S again, possibly March or April of 2004. He will probably sign ZW0S again. However, he is looking for a sponsor. He states that his radio equipment is old and the salt from past operations has taken their toll on the radio and accesories. If interested in helping, E-mail Joaquim at: dasvirgens@yahoo.com.br
Also, visit his Web pages at: http://www.qsl.net/ps7jn
http://www.qsl.net/ps7jn/zw0s

Sorry for the xpost. My buddy John WB2ISI recently passed away and his widow w/ 3 children under 18 asked me to dispose of his equipment as follows:
Yaesu YS200 Watt/SWR meter
Kenwood 2 meter transceiver TR-7850 w/ mic. slight wear, missing rt side panel.
Icom IC751
AIM 20 amp power supply
National NC-33 Receiver, fair appearance, no dents/dings, power cord needs work.

Didn't Shlumberger get into the picture before Zenith, or was it
after Zenith?

>My first kit was a Heath Q-1.

My first Heathkit was their VTVM (Vacuum-Tube Voltmeter for those
who never played with one). One of the best test instruments of its
time (1950s). I had built one from EICO before that, and there was
no comparison.

That is right, Zenith did not believe Heath was profitable except for the early
PC stuff.

Many companies that once were the cutting edge technology now are just
a trademark that brings in revenue to the new parent company, like
the Heath and Zenith names. Another brand that had a large following is
Westinghouse, now under license to Angelo Bros. Lighting in Phil. PA
for all lighting and ceiling fan products.

I will miss that mag as well.... in the 70's and 80's I can honestly say it
was almost better than QST or CQ. You definitely got your money's worth in
the amount of content. In the 90's, it definitely started to dwindle
though.

I may not have agreed with everything Ole' Wayney said, but I definitely
support him in having the balls to say what he was thinking, even if the
"old guard" didn't like it. He did have a "few" really good ideas, and even
some that were way ahead of the time, but later became a reality.

Yes, those were great if you needed something to get your blood boiling.
Sometimes he had a good cause to champion, but most of the time he was
just looking to start a controversy. (The print version of today's
Usenet trolls, I suppose.) I'd go back into the back issues to cite
some examples, but I've long since disposed of them.

> My gut feeling is that a lot of mags have or will drop.

That is, if they don't get wise and start looking into ways of
publishing that do away with the costs of publishing. Monitoring Times
has done it right by making their magazine available in PDF format,
downloadable each month from their FTP site. They provide a smaller
file with somewhat lower resolution, suitable for downloading by dial-up
subscribers, plus a larger, higher-res version for those of us fortunate
enough to have access to broadband Internet connections. I put each
month's issues on CD-ROM so that they're readily available for
reference, without having to keep a bunch of magazines around. (I'm
always citing this as an example, so if I've gotten annoying by saying
it so many times I apologize.)

If only the rest of the publishers would consider similar options....

Sometimes, even if a QSL card isn't requested, it pays to send one off anyway. I had a great QSO with a young man (age 13, I think) in Temecula through a repeater here in Orange County (CA) while I was driving home from work. Just on a whim, I shot off a QSL card to him with thanks for the chat and some words of encouragement. Turned out my card was the first QSL he'd ever received! His reply card now holds a special place in my QSL collection.

There was never an KiloByte.

That did seem to be the intended title as they were getting ready
to publish the first issue. But by the time it was published, it
was Kilobaud. I have many of the issues, including the first six,
and it was always Kilobaud, until they changed the name to Kilobaud
Microcomputing and then just Microcomputer, about five years later.

I've heard varying stories on why the name was changed before the
magazine came out. The oldest would be that it would result in
a lawsuit from Byte, though I'm not sure if this had outright been
threatened or someone just urged Wayne to change his mind on this
because of the potential problem.

But more recently, someone pointed out that very briefly, Byte
ran a cartoon strip entitled "Kilobyte" and they suggested it
was a deliberate attempt at protecting the name. I'm not sure
if that's possible, but it was a lousy cartoon strip, having something
to do with "Star Trek" like characters. I never did go looking to
see exactly when they ran.

BPL should certainly boost KW and 10KW rf amplifier sales. Anything that
will work through the power company noise. Could be a little tough on the
neighbors, however. Especially since newer TVs seem to have less and less
shielding.

I wonder how many lifetime subscribers this will affect?

If I'm remembering right, fairly early on Wayne sold them, and they
were $37. In 1973, he sold them for $73. I think he continued to
sell them for some time after that; I have a recollection of a $150
life time subscription, but that's a more vague memory.

Were the lifetime subscriptions honored for all that time? How many
of them abandoned the magazine. explicitly telling 73 they didn't
want anymore issues, or just not providing a new address when moving?
How many who did buy a lifetime subscription were still alive by this
month?

Wayne has always been a "rebel" from way back to the beginning of RTTY vs the FCC. Along with some of the pioneers of RTTY, Boyd Phelps, W0BP, Byron Kretzman, W2JTP, Merrill Swan, W6AEE and a few others. Those amateurs convinced the FCC to allow FSK keying instead of "make and break keying". Wayne got his writing start with CQ magazine as W2NSD's "Amateur Teletype" bi monthly column or before with a small RTTY newsletter in Cleveland, OH? Then on to assistant editor or editor of CQ magazine before breaking away and the creation of 73 magazine.

In 73's heyday the magazine was twice as thick as QST, with just about every ham related company or store advertising in the magazine. Some of the articles and columns were very informative. The "April fools" issue was really a great innovation for it's time. The one I remember the most was the burial of a dipole underground and the signal therefore would be "inverted" on the transmit end and one also needed a buried dipole to receive the "inverted" wave.

He exposed a ham store in the suburbs of Chicago called "Trigger Electronics" The store advertised the purchase of your "used gear", When the received check bounced at the banks from Trigger then hams wrote to Wayne and he personally looked into the store and it's business practices. Put "Trigger" out of business by exposure in 73 magazine editorials.

The magazine promoted two meter FM repeaters, maybe even lobbying for the hams before the FCC to relax the rules some for repeater operation?

I was behind Wayne at a Hamfest in the coffee and doughnut line where he was the featured speaker, he mumbled something about the price of the doughnuts and that they were to small for the price, but he took one anyway.

I heard in the later years that Wayne required a certain format for articles or columns and if the author did not follow the format, then the article or column did not get published.

Think a lot of the advertisers were leery of Wayne when he attacked the ARRL so often in the editorials and they dropped out in fear of QST removal of their advertisements in that magazine.

Somewhere along the way, Wayne got off on the wrong tangent and destroyed a good technical magazine.

So not all is bad about W2NSD, he has contributed to the amateur radio in ways that are behind the scenes.

Thanks Wayne for the "good years" when 73 was great.

Just a *bit* of a stretch of logic there... I think you pro-code test types are having to dig as deep into the soot and dirt to come up with argument points now. It's a little difficult to believe that just a lack of interest in having a morse code profeciency test is to blame for a magazine not cutting it in a capitalist system.... they mentioned "a reason of economics".. ever thought that maybe it's just another product who's time has come and gone? Did you really think that the model-T would last forever and never be taken out of production?

Clint

DX Monitor is live and well at URL:
http://www.benlo.com/dxmon.html

If you meant the DX Summit at URL:
http://oh2aq.kolumbus.com/
It was up a few days ago but not responding now (Monday 23:55 UTC)
I used it on Sun, 12 Oct 2003 16:22:25 -0700 to find the D703BN QSL info
(via: DS3EXX)

I one I love was the "MAD Magazine" issue. The cover had ol Alfred E. Newman soldering a radio chassis with a big 300 watt soldering gun saying "What, me solder?" Inside the issue was "Ham versus Ham" comic strip which was a parody of "Spy Versus Spy". That whole issue had me in stitches for days.

QST used to be fun as well. Compare this month's issue from any one during the 40's, 50's, 60's and 70's.

The 80's and solid state electronics changed things.

Reading QST now is about as much fun as going to the dentist.

2466. Why XZ7A or BQ9P say USA only

Newsgroup: rec.radio.amateur.dx
Date: 2003-10-14 01:06:52 UTC
From: David L Thompson <thompson@mindspring.com>
Message-ID: <M_Hib.48828$mQ2.34699@newsread1.news.atl.earthlink.net>
Source record: 8750

I keep seeing comments from European stations about stations in SE Asia
often working Stateside or East Coast only. The path from Atlanta to XZ is
usually only open for a few minutes
above 20 meters (if at all). So far they have been readable on 12, 15, and
17 but nothing on 10 (either BQ9P or XZ).

So please have patience and allow East Coast stations to have a crack at the
rare DX. The path to Europe is much easier and open for several hours even
when conditions are poor.

He offered a lifetime subscription to Byte and later, to Kilobaud for
$150. I paid the $150 for Byte. After it was sold, I was notified my
subscription had expired. I sent a photo copy of the canceled check,
marked, "Lifetime subscription." They sent them for another year, then
pulled the same stunt, and refused to honor the contract. I have never
bought anything from the publisher, since they screwed me.

IIRC, the subscription form in the mag for some time used to say
"Lifetime (ours or yours)".

The magazine cover parodies were always fun, the Playboy and QST's
particularly memorable.

Sadly, most of my 73 (and HR) collection got turned to mush in a
basement flood a few years back; still have a few of each.

I'm expecting that Wayne will be appearing on Art Bell some weekend soon
to Explain It All.

Of course it's a stretch, Clint. That's all some have left at this point. In reality, the magazine "73" has never obtained great success in the marketplace, which means advertising revenue has always been lower than the other magazines. At the same time, printing and other costs are going up, making it much more difficult for smaller publications to stay in business. This same thing is happening throughout the publishing industry. Lower advertising revenue, combined with rising costs, is putting many smaller magazines out of business. Knowing that, it shouldn't surprise anyone when the same thing happens to the ham radio publications.

Come on, David... listen to any given pile-up. Most of the callers don't
even have the courtesy to stop sending their calls when the dx is in a
QSO, and you expect them to do this?

Wish I could say <grin> but...

I fondly remember a day when you could break a pileup by figuring out where the DX was listening and call just a bit higher. Today, it's a lost cause - you'll never find the guy he's working among all the continuous callers.

Heard BQ9P twice over the weekend but never strong enough to work. Likewise with VK9X. (did hear someone *calling* VK9XYL on 15 Sunday but no response) VK9CD was victim to the continuous caller syndrome - I don't need VK9C so didn't waste my time.

What I *should* do is start writing down the continuous callers & post a list here...

Steve, like Ham Radio magazine, now that 73 is "defunct" it's time for you to call into question of what value any of its contributing authors made to the ARS. Additionally, you may now call into question whether any of their work was original or not.

Finally, you may tell us how many articles you've had published by 73 magazine.

Best of luck, Brian

You're WRONG! No-Code Techs and Extra-Crispies are NOT the reason 73
magazine is out of business.

Britney Spears is to blame. Ever since the "Baby One More Time"
video, Britney has been working tirelessly to corrupt all 6 billion
members of the human race by exposing her midriff. If Britney hadn't
tied up her shirt in the "Baby One More Time" video, the Good Old Days
of ham radio would still be with us. :)

CQ, CQ, CQ baby one more time!

I dunno, Steve... I downladed a 46megabyte file from Germany last
week and it only took about 5 hours with my snailpace dialup.(no
broadband available here) Seems the website has a lot to do with how
download speeds. Or maybe I just lucked into a good net route. It never
even flinched during the entire process. Normally I would lose the link
after a time.

Good idea really, with the PDF subscription. I'll have to take a look at
Monitoring Times site.

A very sad loss to the amateur community. A nice guy, and a great qsl manager.
He also ran the africaner net on 21.355mhz.
I thought they can controll that better nowadays, but there are different types.
His wife may be taking up the qsl manager job.
A moment in prayer.....

>continuous callers.

Of course you can - you just have to listen a bit harder.
And the continuous callers on the wrong freq are not going
to cover you up when you call on the right freq. Things
would be much worse if everyone was listening, and then all
calling on the 'right' freq at the 'right' time!

For the past 3 or so days, the DX Monitor by VE3SUN which monitors the DX announcements available on the internet at DX Summit is not available, according to the web site. The DX Summit seems to be behind also.

Anyone know what the trouble is? I do not recall it being down for such an extended period of time.

Murray, K3BEQ

Note. The URL contained in the message from "Keyboard in the Wilderness" which states the "DX Monitor is alive and well" takes me to some web page where you can order books.

I don't read these newsgroups too much anymore, but the demise of 73 is something I have to comment on. Basically, the magazine has no one to blame but Wayne Green.

His editorials often had very little to do with amateur radio, except how the ARRL and hams in general have failed to promote the hobby to attract young people. Other than that, Wayne's editorials would praise the latest pseudo-science, conspiracy theory, or any other crackpot idea that came along. The bad part about this is that Wayne would often combine these ideas with things that were tried and true, making it seem, to some, like he knew what he was talking about, and was an authority. Example: He has touted a change in diet and lifestyle to promote a long, healthy life and prevent disease - no argument there. But electroshock therapy with a "bioelectrifier" device to cure cancer and even AIDS? Give me a break!

But in all of his editorials, did Wayne ever ask himself if this was the kind of thing that ham operators were interested in? Did he ever conduct a poll to see what his readers were interested in? Did he do anything to attract new advertisers? My guess is that he probably didn't.

Despite this, I don't think we've heard the last of Wayne Green. The last I heard, he was trying to start a new magazine about living/vacationing in New Hampshire. He'll also probably still make the occasional appearance on Coast to Coast AM.

Well, the DX Summit is *the* source of the spots for the DX Monitor
which picks them up from the DX Summit website. The DX monitor is just
the, well, monitor.

> Anyone know what the trouble is? I do not recall it being down for

There's another contributing or influencing factor; the internet. The
prevalance
of internet connections & accounts, growing all the time, has offered a new
medium through which information and published materials can be
shared. Just like with the snail mail industry, i'm sure there *has* been a
substantial impact upon the hard-copy publishing industry.

Then again, it shouldn't be surprising that the PCTA crowd doesn't
understand this, that it has gone completely over thier head, as the
mere concept of modernization and progress, along with evolvement,
is totally alien to them, I guess.

Oh, absolutely. I'm certainly buying fewer magazines today exactly because of that. I can usually find the information I need much quicker, and much more fully, on the internet. That obviously reduces the value of paper publications. However, I still buy just about as many books, though the typical content of that has changed (software manuals instead of leisurely novels).

> Then again, it shouldn't be surprising that the PCTA
> crowd doesn't understand this, that it has gone

I can understand their position to some extent. I'm not exactly thrilled with all the changes taking place today either. The romance, mystery, and charm, of life is disappearing, slowly replaced by hard facts, technology application, and an almost fanatical rejection of the "old" way of doing things wrapped under the guise or pretense of modernization and progress. With that comes an almost rabid zeal to push anyone opposing that out of the way, without consideration for their thoughts, feelings, or emotional needs. At the same time, many of the changes are not designed to, and often don't, benefit the "old guard," leaving them few reasons to actually support those changes. Many clearly see the efforts to regenerate Amateur Radio (removal of code testing, changes to the license structure, and so on) as just one more example of that process. Of course, when it comes to code testing, very few could claim we're exactly rushing to kill it off - it should have been dropped a couple of decades ago (at least). I obviously don't think we should rush into changes just for change sake, but we clearly shouldn't sit still forever either.

Hi,

DX you said ? Are you interested in applied Science with the ISS crew ?

If you are interested in taking part in an experiment with Electric Thruster
Ion Plasma Engine tests onboard the ISS, read this.

The engine causes a VHF radio blackout on Earth and your help is need as
part of ground receiving network to map the extent of the effect.
Check http://www.qsl.net/vk3ukf/etshadowozindexqsl.html

What you need : a VHF transceiver or even a scanner (listeners) and any kind
of antenna including whip/mobiles 2m.

Up to now, there is not the slightest contribution outside Australia, no one
from Europe (me excepting) or America... It's a pity.
Still more knowing that the ISS crew is currently very active on the air.

2497. My Letter to Editor Wayne Green didn't publish

Newsgroup: rec.radio.amateur.dx
Date: 2003-10-15 12:29:47 UTC
From: w2Xup@mindspring.com
Message-ID: <3f8d3d03.3916343@news.cis.dfn.de>
Source record: 8631

I sent this letter to 73 Mag about 6 months ago. They never published it:

Dear Wayne,
One day, I was browsing Ebay, and ran across a discounted subscription offer to CQ Amateur Radio. As it turned out, I never got my CQ Magazine, and 73 Amateur Radio Today started showing up in my mailbox 4 months later.

I haven't seen 73 Magazine since August 1988, when you published an article I wrote (you weren't first choice - QST rejected it). Even though it's been 15 years, your magazine has not changed, other than being 1/3 thinner. You still have all the answers to all the world's problems, but even after all these years, nobody listens.

I've tried to put 73 Magazine to good use, since it's not worth reading, but the paper isn't as soft or absorbant as Charmin. So, you might as well cancel my subscription and save the postage. If you have any connections (which I expect you do, being as smart as you are), please see if you can get them to send me CQ, which is what I wanted in the first place.

Thanks and 73,
Barry, W2UP

Yes at URL: http://www.benlo.com/dxmon.html

the weird book notice is there but scroll down and see:

[Introduction] [Download] [Settings] [Operation] [Maps] [FAQ]

DX Monitor

by VE3SUN

Version 0.94 is now available for download.
a.. CTY.DAT updates are now retrieved from K1EA's new site.
b.. WWV problem fixed.
c.. Automatic update notification problem fixed.

Please read the FAQ before reporting a problem.

DX Monitor is a standalone Windows 95/98/NT program which monitors the DX
announcements available on the internet at DX Summit and presents the
information in a sortable grid format and on a map centered on your
location.

AND the DX Summit is again operational at 14:16 UTC

Hello everyone,

Looking forward to work you on the upcoming JOTA this weekend. I and other hamradio friends, will be operating from the 9th system of scouts in my area, Evosmos. We have a special call J42EVO and qsl is via my homecall SV2EVS. I will also try to be active besides SSB/CW and on digital modes RTTY/PSK31 and maybe SSTV.

73's
P.S J42X will be also active that weekend from a nearby area (Xyrokrini). Operator will be SV2GNC (Mike) and qsl via his own call.

2501. Re: 4U1UN/Pedro - QSL via?

Newsgroup: rec.radio.amateur.dx
Date: 2003-10-15 18:24:22 UTC
From: David L Thompson <thompson@mindspring.com>
Message-ID: <qhgjb.7435$kx.2055@newsread2.news.atl.earthlink.net>
Source record: 8634

The address is via the PO Box in NYC. Good luck on ever getting a card no matter whether its HK3JJH or ON4WW operating.

Several years ago some employees decided that 4U1UN was for UN folks only and on a limited basis. They fired Dave K2GM and the solid QSL manager he used. Yaesu and Ten Tec pulled their gear. I had given them an Alpha amp (from the N4IN estate) to use with the Yaesu in a 160 meter station. The employees have just about removed 4U1UN from the air and have virtually eliminated getting a QSL. Its a shame ...wish they followed the 4U1ITU model. Maybe one day the employees who have caused the problem will retire. There is no reason why access to 4U1UN should be so limited. Plus the reason HK3JJH was so weak is that those same employees took most or all of the antennas down. Such a waste!

>> Maxim is turning over in his grave.

>Ain't it the truth.

It ain't. 73 magazine's demise can be attributed to both the economic
times in which we are mired as well as the electronic-publishing era.

In the heyday of dead-tree magazines we didn't have this vast
worldwide resource replete with Yahoo Groups, Usenet (at least not as
it is now), mailing lists/reflectors, etc, etc. We needed things like
QST, CQ, 73, et al as a good source of news and reviews, etc.

Times have changed. Life's a bitch. Deal with it or embrace Father
Darwin and the Evolver.

For those who only long for the Good Olde Days of vacuum tubes,
homebrewing tranceivers, 20+ WPM CW, etc, my question is simple: At
what year do you want the technology clock to become frozen? If so,
will you kindly give me your computers, home entertainment centres,
digital TVs, satellite broadcast receivers, new cars, etc? When time
catches up with you, will you refuse medical treatments based on
scientific advances made in the years following the point beyond which
you refuse to evolve?

Sorry, time marches on, technology advances. Unfortunately, in our
hobby, it's advanced beyond the point that most people can
troubleshoot or repair down to the component level. So, our hobby must
now look at ways it can thrive in this era or $99 palm-sized
transceivers that cover DC-to-daylight. We do this be learning new
things, developing new technologies and find ways of merging our hobby
with other technologies.

Naturally you are fully aware that if BPL is implemented as the power
companies would like to it will also trash significant VHF frequencies such
as 6meters and 2meters plus the commercial FM radio and the lower channels
on broadcast TV.

Perhaps they're following the same logic as the 1A0KM people, i.e. they
want to "keep the country rare". The stupidest thing I ever heard.

Something about a broken clock being correct twice a
day.....

I lost interest because of all the old farts who couldn't talk about
anything except the good old days.....Took me 25 years to get
to that point, but it did happen.

Take yer homebrew 6L6 transmitter and show it to Hiram Percy Maxim so he can
see how LITTLE progress you have made in the last 65 years.

THAT is what will make him turn over in his grave.....

The speed's only going to be as good as the slowest connection along the
line. And I do admit that downloading a full copy of a magazine isn't
going to be feasible for everyone, at least until broadband is widely
available (via some other means than BPL!), but it's nice to have the
option. Or perhaps it'll be possible to distribute magazines on CD-ROM?

Here's a business idea: set up an outfit as a clearing-house for radio-
related magazines. Subscribe through the clearing-house and they burn a
CD with all of the mags you get (CQ, PopComm, MT, whatever) each month
and send it off to you. Just a thought....

Comment from valentin, the main investigator for ISS (shadow@tsniimash.ru)
about ET shadow project.

"After catastrophe of Columbia some things on ISS and also scientific
activity come with additional difficulty. However the Shadow project in its
"cold" phase may use available equipment on board and takes minimal time of
astranauts, so it may begin, say, this autumn (or winter) if we will be fast
in managing of the receiving network. Under the current circumstance it will
be not only a particular scientific task, but also a distinct public support
of space researches in general. So if we can do it, I think we must do this
job together in memory of Columbia and its crew.
Therefore all western participation is warmly welcome".

Hi,

Many foreigners who don't speak French requested a translation of my webpages... Unfortunately I am unable to translate my thousand pages in English or any other language. The job is too time-consuming. However I do it from time to time if a subject can potentialy interest the all community of amateurs.

Therefore I selected another method : using Altavista Systran tool. It is quite useful. I made some tests translating my English page in French, German or other language. The result is better than expected. Of course they are errors but it is more useful that being face to a text which you do not understand the slightest word !

Now you have no more excuse to read my pages in plain English, Spanish or German or even Corean !
Subjects currently presented are Basics of Astrophysics, Cosmology, Bioastronomy, Quantum physics, Relativity, Evolution, Radio amateur and much more, for a total of about 800 MB, 240 films, and 6000 images on line. The site is update practically every day.

The translation tool is displayed at left, button "Translate". It is easy to find.
Enter some words or the concerned page URL, press Translate, that's all. The page is translated in your language. Fast, and easy.

If the routine interest you, check on
http://www.altavista.com/help/free/free_searchbox_transl

Your feedback is welcome ;-)

Hope this helps.

Or on a mailed CD.. Both QST and Monitoring Times are available that
way, (among others) though unfortunately only with the whole year's
issues on a single disk. (i.e., it's only available at the end of the
year) Fantastic idea, I love it! No more realizing the article I want
is in the July issue - and I can only find June and August...

I wonder if broadband prices will ever drop to dialup levels?
Personally I have a very hard time justifying the (very) roughly
$200/year difference.

On the other hand, we may be fast approaching the point where the sum
total of the malicious executable emails being spammed into our
mailboxes and the critical updates necessary to protect against them
every day will take more than 24 hours to download via dialup!

> is in the July issue - and I can only find June and August...

It certainly beats storing piles of QSTs but at least at this point
one glitch is the cost. ~$40 for the membership then another ~$40 per
stale CD. No biggie but it's annoying. Our club monthly bulletins are
usually 10-12 pages long and are now being posted in the club website
as archived .pdf's. Saves a real bundle in publishing and mailing
costs and it eliminates the drudge labor in addressing, stamping and
mailing. With only a few pages per issue I don't even bother
downloading 'em, I just read 'em online and move on. More 'puter files
eliminated. Been hugely successful Dick.

http://www.gofrc.org/newsletter.shtml

Somehow the magazines will get into this game too. The QST product
reviews in the members-only website are a step in the right direction.
Maybe someday we'll be able to dump 'em in on a pay-by-article basis.

Amateur Radio Newsline™ Report 1366 October 17 2003

Amateur Radio Newsline report number 1366 with a release date of Friday, October 17th 2003 to follow in 5-4-3-2-1.

The following is a QST. A chance for pro-code to speak out to the FCC and a warning to firefighting officials about the hazard of BPL. Find out the details on Amateur Radio Newsline report number 1366 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: MORSE CODE AND THE FCC - ROUND II

Well we told you it was going to happen and it has. We are talking about the next round of rule making requests to the FCC on the topic of what to do about Morse code testing. Most of this group want to keep some form of CW test. Amateur Radio Newsline's Bruce Tennant, K6PZW, takes a look at what the FCC wants you to read and comment on:

--

If you were not happy with the first round of Morse code rule making requests, maybe you will find something more to your liking in this latest batch of seven that the FCC has released for public comment.

We have already covered the most prominent of them. That being the one from FISTS -- the international Morse code preservation society. FISTS wants the code retained and all aspects of the ham radio exam process made allot tougher. And in this area, FISTS is not alone.

In is petition, Frank Napurano, K2OKA, calls Morse the purest, most accurate, efficient, reliable and economical form of radio communications ever devised. He tells the FCC that its essential to keep at least the current 5 word per minute CW test in the interest of public safety, the preservation of a radio art and as a tribute of support for a prized and respected avocation.

Also in favor of keeping some form of Morse exam is the Puerto Rico Amateur Radio League. While it wants the FCC to do away with the current 5 word per minute test for General class it says to keep it for those going for an Extra ticket.

James Roux, W4YA, wants the FCC to eliminate the 5 word per minute code test for a General class license, but like the Puerto Rico Amateur Radio League would require Extra class applicants prove they

can do Morse at 15 words per minute. Roux also wants to cut the number of licenses to only two. Under his proposal nobody would loose current privileges but only the General and Extra class would continue to be issued.

Meantime, Robert Rightsell, AE4FA and Harry Kholer, NZ0PU also want 5 word per minute Morse testing continued but would institute a points score system for passing a ham radio exam. Under the Rightsell / Kholer plan, an applicant could earn up to 24 points on Morse testing.

And Joseph Speroni, AH0A, has a novel idea. Only test hams in Morse who want to use the mode. Speroni would have the FCC delete the CW exam for those who want to operate only phone. If a ham wants to operate High Frequency Morse, Speroni says they should pass the current 5 word per minute exam.

Last but by no means least comes Charles Young Jr, AG4YO. He is asking the FCC to delete the 5 word per minute Morse exam for the Technician Plus license, but keep it as a requirement for General and Amateur Extra exams. And like the other petitioners, Young has some specific ideas regarding other aspects of ham radio licensing as well.

These seven petitions have been designated as RM 10805 through 10811. Commentary cutoff on all of them is Friday, November 7th.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

You can comment on one or all of these rule making petitions by taking your browser to the FCC Electronic Comment Filing System. Its in cyberspace at www.fcc.gov/cgb/ecfs. (ARNewsline™ from FCC website)

**

RESTRUCTURING: QRZ SAYS KEEP THE DISCUSSION ON TRACK

In a related story, the operators of the QRZ.com website have drawn a proverbial line in the sand. They say that any attempts to take a Forum discussion that is not directly related to the code versus no code debate and turn it into such will result in those posting being removed. The operators of the website say that this is not a stance by QRZ.com either for or against Morse code. Rather it is a their way to keep a given subject being discussed on track. The QRZed website is in cyberspace at www.qrz.com. (QRZ)

**

RESTRUCTURING: PNG GOES CODE-FREE

I'm Don Wilbanks, AE5DW, with breaking news out of the South Pacific. Dateline Papua New Guinea where that nations Telecommunications Administration, PANGTEL, has declared Papua New

Guinea to be the latest nation to become code free. This as it orders the deletion of Morse Code from the qualifications necessary for its amateurs to have access to the High Frequency bands.

According to Rick Warnett, P29KFS, the decision to drop Morse was actually made back on June 10 th but not widely publicized until now. June 10 th was before the 2003 World Radiocommunications Conference that decided Morse testing was no longer mandatory world wide and retaining it would be the decision of each individual administration.

Warnett, who is the IARU representative for the Papua New Guinea Amateur Radio Society says that the official announcement will take place within the next few days. When it comes, Warnett says that some 30 to 40 new Papua New Guinea full call hams will have international communication available to them. (Q-News)

**

DX PROBLEMS: A FOLLOW-UP ON ANNOBON ISLAND - 3C0V

A little more information has surfaced on why a long awaited Dxpedition suddenly left the air. Jeramy Boot, G4NJH, has the details:

--

The Spanish and German group that had been operating as 3C0V from Annobon Island off the West Coast of Africa were forced to close down early in the morning of last Saturday, the 4th of October. The DXpedition was scheduled to have continued until the 10th of October.

Gabriel 'Gaby' Mardiros, OD5NJ, the 'pilot' for the 3C0V DXpedition, says that the group is "fine" but that they had received "a serious warning not to use any of their radios". The reason for the enforced closure was not yet known."

--

Some reports indicated that local authorities had given the DXpeditioners less than 24 hours to pack up and get off the island. More on this story as information is made available. (GB2RS)

**

Break 1

(5 sec pause here)

**

WRTC: 2006 GAMES IN BRAZIL

It has been announced that the next World Radiosport Team Championship, or 'WRTC', will be held in Brazil in 2006. The last WRTC event took place in Finland in July last year.

WRTC brings together the top HF contesters from all over the world to compete on - as far as is possible - a 'level playing field'. WRTC 2006 will take place in Florianopolis, capital of Santa Catarina State in southern Brazil. The event is open to everyone: competitors and spectators alike.

I'm Jeramy Boot, G4NJH, in Nottingham. (GB2RS)

**

RADIO RULES: WORLD'S BROADCASTERS JOIN ANTI-BPL CHORUS

A subcommittee of an International Telecommunication Union panel of technical experts responsible for terrestrial broadcasting issues has joined a growing chorus of concerned parties about the interference potential of power line telecommunication. According to the ARRL Letter, ITU Radiocommunication Sector Sub Working Group 6E1 has been looking at BPL. Now it has expressed the view that interference produced by systems employing powerline data transmission as well as by Industrial, Scientific and Medical equipment and short-range devices, will compromise broadcast reception. (ARRL, CGC)

**

RESCUE RADIO: BPL VS. FIRE RADIO COMMUNICATIONS

Meantime, hams who are also firefighters or have access to the local fire Department should consider enlisting their help in fighting the rollout of Broadband over Powerlines. This, due to the heavy use of the 33 and 45 MHz radio bands by fire departments.

Writing to the QRZ.com super site, Jim Walsh, K3JIM, says that some fire departments are not technically savvy and think that interference is really blind spots in the radio coverage. Walsh, who is a firefighter and truck engineer Red Lion, Pennsylvania, says that broadband interference is not easily recognizable to fire personnel as say an interfering DX station may be to the trained ear of a ham radio operator. He says that the fire service is used to dead spots and may not know why they exist.

Walsh cites one situation in the area where he lives and works. He says that it is well known that when in the vicinity of certain gas station convenience stores in his area that one cannot use the radio for a few hundred meters. He says that in this case the problem is the Point of Sale system that records the gas transactions and that the lines running to the pumps are not shielded and radiate computer hash like an antenna.

K3JIM has lots more to say about the problem BPL can be to low-band fire radio systems. You can read it all on line at www.qrz.com (K3JIM via qrz.com)

**

ENFORCEMENT: YOU ARE NOT SUPPOSED TO OPERATE THERE

In regulatory news, two hams have been asked to explain why they have been heard operating on law enforcement frequencies. The FC's Daryl Duckworth, NN0W, has more:

--

Duckworth: "Tom Christman, KB2NAV, of Albany New York, has received an inquirey as to operations on the Albany County Sheriff's Department emergency frequencies without legitimate purpose last December.

Along similar lines, Joseph Hutchins, KG4SXD, of Swannanoa, North Carolina, is being asked about operations on police frequencies in February of this year. That of the Black Mountain Police Department in Black Mountain North Carolina."

--

Both hams were given 20 days to respond to the FCC's query. If the agency finds that rules have been violated, each ham could face a fine of $7,500 to $10,000, license suspension and revocation.

**

ENFORCEMENT: AMATEUR TOLD TO KEEP HAM GEAR OFF CB

The FCC has written to James Perryman, KC8KOU, of Toledo Ohio. This, regarding continued complaints involving his alleged operation of non type accepted radio gear on the 11 meter band. Again, the FCC's Daryl Duckworth, NN0W:

--

Duckworth: "The letter went on to say that the operation of non-certified equipment on CB frequencies, such as Amateur equipment and linear amplifiers will result in a monetary forfeiture in the $7500 to $10,000 area, as well as the in-reim seizure of all non-certified equipment in cooperation with the United States Attorney in his jurisdiction."

--

The FCC also told Perryman that his station is subject to inspection at any time by Commission personnel.

**

ENFORCEMENT: YOU CANNOT SAY THAT ON THE RADIO

Meantime, Federal regulators have announced plans to fine a Detroit radio station $27,500. This, for an allegedly indecent broadcast on a popular afterboon show back in January of 2002.

In a Notice of Apparent Liability to Monetary Forfeiture, the FCC said a broadcast on Infinity Broadcasting's WKRK-FM included explicit and graphic sexual and excretory references during separate discussions with nine separate people. Such language is banned under FCC rules.

Infinity was given 30 days to contest the notice. In earlier filings with the FCC, the company argued that no penalty could be assessed. This is because Infinity believes that the FCC's definition of indecency is unconstitutional.

**

ENFORCEMENT: LA REPEATER OWNERS ORGANIZE AGAINST ALLEGED UNLICENSED OPERATOR

Repeater owner operators in the Los Angeles Californias area are taking action to keep transmissions allegedly coming from Jack Gerritsen, the former KG6IRO, from being retransmitted. In are rare show of cooperation, system owners and their control operators are taking repeaters off of the air rather than permit the signals from a station identifying with the call sign KG6IRO call sign from being rebroadcast.

If the name Jack Gerritsen sounds familiar its because we have reported on hin several times before. Gerritsen was licensed for a very brief period back in 2001. His ham ticket was set aside by the FCC's Wireless Telecommunications Bureau after the agency learned that Gerritsen had been convicted in 2000 on charges of interfering with Los Angeles Police Department radio transmissions. Gerritsen recieved a jail term for the interference conviction. He was paroled but sent back to prison after allegations surfaced that he had been operating a radio transmitter without a license. He was released before serving his full sentence as the result of a Federal court order dealing with overcrowding in California state prisons. His application for a ham radio license remains in the FCC's pending file and a hearing on the matter will be scheduled at some future date.

Be that as it may, Los Angeles area repeater owners are not waiting for the FCC to move in the matter. They have taken matters into their own hands and are acting to keep the signal claiming to be KG6IRO from being repeated. (ARNewsline™)

**

HAM RADIO BUSINESS: 73 MAGAZINE FOLDS

73 Magazine is the latest casulty in the weak world-wide ham radio business economy. On Monday, October 6th, founder Wayne Green, W2NSD, e-mail several friends to tell them that 73 Magazine has

ceased publication after completing 43 years.

The reason for 73 going away? Green claims that the hobby is slowly dying as a result of a lack of new hams. In turn the the industry that supports Amateur Radio is fading away as well. Green says that without sufficient advertising the magazine couldn't continue.

--

Green: "The book sales have kept 73 going for the last few years, but book sales have dwindeled way, way down and there was no way to keep 73 going. The ad sales are down and the reciepts from the ad sales are down even weorse than the ads."

--

W2NSD says that it was an interesting 43 years and that he hopes to write about it some time. In the meantime he plans to continuing his essays on his website for those subscribers who mainly bought the magazine to read them. Thats in cyberspace at www.waynegreen.com.

No word what will happen to those with outstanding subscriptions to 73, especially hams who bought lifetime subs at a bargain price when the magazine first started up. Green always said it would last through his lifetime or that of the purchaser, but it looks as if W2NSD and a number of lifetime subscribers may have outlived 73. We expected it of Green. His phonetics are W-2-Never-Say-Die.

You can hear W2NSD talk about the demise of 73 on this weeks RAIN Report. Its available on-line at www dot rainreport dot com or by telephone at 847-827-7246. (ARNewsline™)

**

HAM RADIO BUSINESS: NEW KIDS HAM RADIO MAGAZINE TO BE PUBLISHED

If the ham business is as bad as Wayne Green says, you would not know it by Larry Mahlberg AA0BY. As 73 sails into the sunset, Mahlberg has announced his own new ham radio magazine targeting the younger generation.

According to Mahlberg, he and his crew are putting together a brand new monthly publication called "Hamtastic Kids" that will debuet on November 15th and be available by subscription. To get it started, AA0BY is asking your help by submitting material for publicatoon such as Amateur Radfio poems, stories, puzzles and even ham radio recipes. He is also looking for articles written by kids on such topics as Morse code, DX'ing, ragchewing, fox hunting, contesting and hamfests.

But thats not all. The Hamtastic Kids is offering a free years subscription for best logo that a youngster submits for use in the Magazine. Submissions of logos, articles and information requests go to Hamtastic Kids, in care of Larry Mahlberg, AA0BY, P.O Box 1634

Eugene, Oregon, 97440 (W8HDU)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

RESCUE RADIO: APRS JOINS THE CHARLES REGATTA

Almost two decades after it was developed by an Amateur Radio operator, Automatic Position Reporting System equipment is being used for the first time by the hams on board the rescue launches at the Head of the Charles Regatta. Amateur Radio Newsline's Norm Seeley, KI7UP, reports:

--
Bob Bruninga, WB4APR, is considered the father of the Automatic Position Reporting System thats known in ham radio circles by the acronym of four letters APRS. And from October 17th through the 19th a team of up to 30 operators will be on the air using it and other modes to operate a safety communications net for the annual Head of the Charles Regatta.

According to Bruce Pigott, KC1US, the addition of APRS is very significant because it allows automatic tracking of a ham radio station by sending Global Positioning Satellite information along with the voice or other data on the radio signal. This should permit precise dispatch of land and river emergency units to rendezvous with the launches.

KC1US says that communications coverage begins three hours before the first race on Saturday and an hour before the first race on Sunday. This, will allow medical and public safety communications coverage of practice runs and gathering crowds of spectators.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.

--

This year's communications support covers all aspects of the regatta. This includes preparations, practice and competition for all three days of the event. (KC1US)

**

HAM RADIO CONFERENCES: SVHFS IN GEORGIA IN 2004

The 8th Annual Southeastern VHF Society Conference will be held in Georgia on April 23 and 24, 2004. This, at the Holiday Inn Hotel & Suites in Marietta on the outskirts of Atlanta. More information will be posted the Society webpage. The u-r-l is www.svhfs.org. Qustions go by e-mail to rover@wireco.netb (SEVHFS)

**

HAM RADIO IN SPACE: VU-SAT LAUNCH DELAYED

Turning to ham radio in space, the expected launch of India's VU-Sat has been delayed indefinitely. The AMSAT News Service quoting a release from the launch agency says that during the thermo vacuum test deviations in the performance of the ham radio payload were. Because of the need to correct these abnormalities, the launch will take place at some later date. VU-Sat was to be a passenger with a remote sensing satellite being orbited onboard from Sriharikota launch range later this month. (AMSAT)

**

HAM RADIO IN SPACE: HAPPY BIRTHDAY AO-40

AMSAT is sponsoring an AO40 Birthday Bash to celebrate the satellites 3rd Birthday. The party continues through November 17th. Email Bruce Paige, KK5DO, for more details. His e-mail address kk5do@amsat.org (AMSAT)

**

INTERNATIONAL - GERMANY: DL3KWF RESIGNS AS DARC VP

On the international scene, word from Germany that Hardy Zenker, DL3KWF has resigned from his post as Deutscher Amateur Radio Club vice president He has been replaced by Ingobert Dittrich, DK9MD, who was elected to the post. Dittrich is well known as a former representative of the broadcasters to numerous committees across Europe. The Deutscher Amateur Radio Club which is Germany's natioonal ham radio society holds elections every two years. (DARC)

**

INTERNATIONAL - HOLLAND: ARTIFICIAL BROADCAST ISLAND TO DISAPPEAR

A significant piece of Dutch broadcasting history may soon cease to exist. Media Network reports that the Hollands Department of Public Works has announced its decision to dismantle the artificial platform in the North Sea known as R-E-M Island. The island was constructed in 1964 at a cost of 9 million guilders by a team of entrepreneurs who used it to broadcast radio and television programs to the Netherlands under the name Radio Noordzee and TV Noordzee.
The full story is on-line at http://www.rnw.nl/realradio/features/html/rem031009.html (Media Network)

**

INTERNATIONAL - BRAZIL: CELEBRATING SCOUTING ON THE AIR

And Brazillian club station PY3ARD is on the air as ZW90S for the renmainder 2003. This, to celebrate the 90th anniversary of the Gerge Black Scout Group which happens to be the oldest Scout Group in Brazil. According to the RSGB, the ZW90S call will be aired for the first time during the upcoming CQ World Wide contest. If you work it, QSL via PY3ARD. (G2RS)

**

ON THE AIR: W6AQ AND K6IPV TO RAROTONGA OCT. 21

Hollywood producer Dave Bell, W6AQ and his close friend Don Lisle, K6IPV are headed to Rarotomga. This for a combined mini-D-Xpedition and contest operation. The pair will arrive on the island at about 9:00 PM local time on October 20th. They hope to be on the air by the afternoon of the 21st operating mostly SSB with some CW and possibly RTTY and PSK-31.:

--

Bell: "They will hear us calling CQ on whatever the highest frequency where there is propagation which is going to be during the daytime perhapps 10 meters; 15 meters hopefully and 20 meters certainly. Nighttime we will probably be dealing with 20 meters, 40 meters, 80 meters and perhapps even 160 meters. We will see if we can talk to anybody on that band."

--

Bell will operate as ZK1AQT and Lisle will be on using ZK1IPV. Both will be on as ZK1SSB for the CQ World Wide SSB Contest and will tear everything down on the afternoon of October 28th. Their QSL Manager is Norm Friedman W6ORD whose address is good in just about any Callbook. (ARNewsline™)

**

DX

In D-X, TM9AF will be on the air through October 26th to celebrate the 25rh anniversary of the Auxerre Ham-Expo. About 20 operators will be on the air with the special callsign on 160 to 6 metres using CW, SSB, PSK, RTTY, and Slow Scan TV. They will also operate 2 meters to 1.2GHz on CW, SSB FM, RTTY, and ATV. If you make contact, Q-S-L as directed on the air. (GB2RS)

Stefano Frau, IS0WBT, says by way of e-mail that special event station ISZ0A will be on air during the upcoming CQ World Wide SSB contest. This on the on 25th and 26th of October. Stefano says that the operation will take place from Mt. Cresia in grid square JM49QG. Operation will be in the multi-multi catagory and the operators will

be looking to talk to all of you. QSL direct to IS0MYN. (GB2RS)

**

THAT FINAL ITEM: DUTCH STUDY SUGGESTS ISSUES ACCOMPANY 3G CELL STATIONS

And finally, can cellular telephones make you more alert? Some researchers in the Netherlands think so. Bill Pasternak, WA6ITF, has more:

--
A study by Dutch researchers has found some interesting side effects from certain cellular telephone base station radiation. Initial results show that electromagnetic energy transmitted by base stations for the new third generation or 3 G wireless networks caused subjects in double-blind test groups to experience tingling sensations, get headaches and have feelings of nausea. On the other hand, when the same subjects were exposed to signals from current mobile networks, no negative impacts were found.

But here's the kicker. When the same people were exposed to both types of fields -- that being 3 G plus current networks -- cognitive functions including memory and response times showed measurable improvement. Put simply, the subjects became more alert when exposed to both fields. The report did not discuss the modulation schemes nor the specific RF power densities that were involved in the study, and obviously allot more research needs to be done before anything conclusive can be known.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF

--

Now it has to be pointed out that these are early results. As such, while they are interesting, are yet to be confirmed. You can read more in cyberspace at www.msnbc.com/news/974005.asp (CGC)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Ken Butler, W1NNR, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2003. All rights reserved.

2517. Propagation discussion, and so forth

Howdy, folks.

I'm inviting you to come visit http://hfradio.org/forums/ - where I have created special forums about Propagation. These forums are for beginners as well as experts. Do you have quesitons about propagation? Wonder about current conditions? Want to discuss Aurora? This is an online community where you can explore these topics.

Also in the forums area are sections for Shortwave Listening, including equipment topics, logging, and more.

Come by and check it out. Don't be shy. Post your questions, observations, logs. Of course, it does not replace this invaluable forum, but it does provide an additional resource for all of us.

See you there,

Not agree Peter.
First not everybody can access to rec.radio.amateur.dx through his news
server.
Then if nobody can answer your question on ..dx, maybe someone could on
hfradio.
This is always positive to have more than one forum speaking about such
fields.

Hello,

I'm looking for anyone who has successfully set up the
BV QSL management and label printing program to work
with Avery 5260 labels or their equivalent. These
are 3 across and 30 labels to an 8.5 by 11 inch page.

Thanks in advance for any help.

73,
Bob

Hi Hank,

Not necessary everying, and not necessary on both forums.

I just have a similar case requesting info about portable amps.
I post the msg on one forum and an OM answered me quickly. That helped but
his answer introduced a new one about the portability and nobody had a
accurate response.
So I post on another and nearest forum the complementary question, for which
the first forum cannot help.
After some days the answer I was waiting for was given, with all detail.

Several sources of information are always better than only one. Opinions are
multiples and may vary, what excerb your criticism and may help in deciding.

<snip remainder of self-righteous indignation>

well, I have another perspective; did you ever stop to think that there
wouldn't be
such a prevailing anti-french notion if they would not only QUIT trying to
halt our
attempts to fight & end terrorism in the world, not only STOP being nothing
more
than a nation that uses the UN... (which, by the way, if you didn't know, we
fund
a quarter of the UN's budget; our total basic input, ASIDE of all the extra
few billions here and there we give, adds up to MORE than contribution of
France, Germany and Russian COMBINED?).... to thwart so many of our
righteous and morally correct war against the islamic extremists that, if
given thier
way, would have YOU killed? Did you ever stop to think that maybe if France
began standing up for herself and HELPING in this dreadful ordeal, along
with the
other sniveling weasel nations of europe, that we could wrap this up quicker
and
faster instead of them being a root cause of what is one of the darkest
periods
in human history to be stretched out FUTHER in terms of time and bloodshed?
Just what did all of France's attempts to thwart our removal of saddam and
put another knife in the back of terrorism GET them, huh? Another bomb in
Paris! And did you EVER think that that maybe if France finally began to
learn
her lesson about appeasement, along with all the other nations in Europe
that

had to bear the dreadful weight of world war II on thier backs, just *maybe* relations between that nation and a few others would improve with us? That just
maybe we would truly be the allies instead of this mass-perpetrated delusion
that we are already?

Kuddos to the axis of weasels for coming around on the last UN vote... I know
they didn't do it because of a change of heart, but at least it's a start in the right
direction. I'll give them *that* much. Now if they'll just open thier eyes and
wake up to the world as it really is and begin to help us, things will be much better
for everybody; Civilized Nations: 1, Islamic Extremist bloodthirsty murderers: ZERO.

That is why you need to post your questions and answers to
both places, so they will be seen by everyone. This is usenet,
everyone has access if they wish. A forum has a rather different
use, is usually more like a moderated newsgroup.

I assume that remark stems from the fact that you live in one of the
yellow-bellied gutless coward nations over there. Hey, here's an idea;
why don't you guys start demanding your leaders quit bowing down
and kissing the rear end of terrorists and middle eastern dictators? Just
how can you *stomach* to live in a nation that just sits around and
gets hammered and attacked and blasted instead of standing up for
yourself and doing something about it? Or is making remarks about
newgroup people having no brains simply *safer* because you're
on the other side of the globe at a computer terminal and the terrorists
are right up in your face?

You'll have to excuse me, I just can't fathom why anybody would
take the path that you guys over there have. Perhaps that is why europe
is slowly being left behind economically in the world and the shift of
industrial & economic strength is headed away from you guys and towards
eastern asian nations. I guess they'll be the future, if you're going to be
*the
past* in your hemisphere.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

SV/A, MOUNT ATHOS. By the time you read this, Monk Apollo, SV2ASP/A, should be on the air (or close to being back on) in a "BIG WAY". Over the last several months, George Varvitsiotes, K6SV, has been communicating with Monk Apollo since his radio went down (off the air - broke) and

began the project to help him get back on the air. George informed OPDX on Tuesday, October 14th, that he was leaving the next morning for Greece and would be taking Monk Apollo a new Icom IC-756 ProII and power supply donated by Icom. He stated that he had all the necessary papers (that Monk Apollo sent him) to enter Mount Athos and deliver the new radio. George also told OPDX that it is his intentions (with Monk Apollo's approval) to install all the antennas that were previous donated and get Monk Apollo back on the air in a big way. George informed OPDX of his plans back in July once OPDX announced that the Northern Ohio DX Association (NODXA) was looking into collecting funds to buy Monk Apollo a new radio. At that time he told OPDX he was going to Greece on family business and wanted to keep his plans a secret until the radio was delivered. OPDX and NODXA agreed to his wishes. Once again, OPDX and NODXA would like to thank the many "who wanted to help". We hope you get a chance to work Monk Apollo and welcome him back on the air. ADDED NOTE: George, K8SV, will also participate in the CQWW SSB Contest (See J43).

4L, GEORGIA. Imeda, 4L4AJ, will be active in the CQWW SSB DX Contest. Activity will be on 40-10 meters using High Power.

4X6, ISRAEL. Operators Seth/4X1DX and Zvi/4X6FR will be active as 4X6FR in the CQWW DX SSB Contest (October 25-26th) as a Multi-Single entry. QSL via 4X6OM.

9U, BURUNDI. The "DX Newsletter" reports that Richard, F8LPX, is working at the French embassy in Bujumbura for the next three years. He is expected to be active, but the callsign is not known yet.

AH2, GUAM (Update). Aki, JI3ERV/NH2C, Chairperson of Guam Contest Club (GCC), informs OPDX that members of the GCC will be on the air during the CQWW SSB Contest next weekend (October 25- 26th) as AH2R. This time they plan to set a target as the Oceanic leader in the Multi-OP 2-TX category and the World's Top 5. Also, they are trying to build an Oceanic record in this category. Operators are: Aki, JI3ERV/NH2C; Toshi, JR7OMD/WI3O; Osamu, JP1JFG/N2IU; Kaz, JG3RPL/N1BJ; Kou, JH7QXJ; Sam, JR8VSE/NH2N; and Noz, JE8KKX/AH2K. Guam Island's (KH2, Zone 27 and IOTA OC-026) sunrise and sunset are: 2013z and 0756z. QSL via JH7QXJ (Direct - See QRZ.com) or the JA bureau (NOT the KH2 bureau). SPECIAL NOTICES: Due to the band plan, their operation on 40m is limited between 7075 and 7100 kHz. Please listen carefully!! They are also planning participation in the CQWW CW Contest next month. Details will be released later.

BEWARE OF CLUSTER PIRATES. This has become a growing problem over the last few years. Laurent, F8BBL, informs OPDX that over the past few weeks someone has been pirating his callsign and causing problems on the DXclusters as well as QRM in pile ups. He is sorry, but it's not him, and he is confused/troubled about the problem. He also mentions that the French authority is informed.

BQ9P, PRATAS ISLAND. The Pratas Island DXpedition is now QRT as of 6:00 am (local time) on October 16th. The group made some 27000 QSOs.

For more details, please visit their Web page at:
http://www3.ocn.ne.jp/~iota/newpage64.htm

CE0Y, EASTER ISLAND. Wojciech/SP9PT and Jerzy/SP9EVP are now active as CE0Y/homecall until November 1st. Both have been very active on 40 meters CW this past weekend, but there has been some activity on 20 and 17 meters as well. Keep a lookout for some digital and SSB activity. OPDX has also seen a spot from them on 6 meters. QSL via their home callsigns.

CT8, PORTUGAL. Timo, OH1NOA, will be active from CT1DVV/CT1ESV's QTH as CT8T in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/ All Band/High Power entry. QSLs will be sent out automatically via the Bureau.

EA6, BALEARIC ISLANDS. Look for a Hungarian team to be active between November 2-9th and also participate in the HA-QRP Contest as EA6/HA5RT/p. The contest station will be on 3511 kHz using around 10 watts. The operators will use their home callsigns on the other bands as follows: EA6/HA6NL/p (Laci), EA6/HA6PS/p (Zsolt), EA6/HA6ZV/p (Tibor) and EA6/HA7JJS/p (Sanyi). Their main mode is CW, but some digital activity will also take place. QSLs should go via the bureau by their home calls, and for EA6/HA5RT/p via HA6NL.

FR/E, EUROPA. La GAZETTE du DX announced that the team which will be active from Europa has put online an Internet Web site where you can find all the necessary information about this DXpedition. The URL address is: http://europa2003.free.fr

FY, FRENCH GUIANA. Operators Didier/FY5FY, Marc/F1HAR, Herve/F5HRY, Romuald/F5LND, Olivier/F5MZN, Gerard/F6FGZ and Larry/F6FVY will be active from Zone 9 as FY5KE (Zone 9) in the CQWW SSB Contest as a Multi-Single category. QSL to FY5KE direct or via bureau.

HB0, LIECHTENSTEIN. Members of the Hungarian Pannon DX Club and P.V.R. Klub Puspokladany will operate from Liechtenstein again this fall. The operation will take place between November 2-10th from a rented house at Masescha 1350m ASL. Activity is planned for the HF bands (160-10 meters, with the main focus on lower bands) including the WARC bands, on CW/SSB and RTTY. They will have two stations on 24 hours a day. Operators are: HB0/HA0HW/p (Laci), HB0/HA4DX/p (Tomi) and HB0/HA4XG/p (Geza). They will be using a FT-840 and a TS-450 with groundplanes and wire antennas sponsored by DunaX. Cards can be sent to their home callsigns direct or via the HA bureau. Suggested Web pages to view:
Pannon DX Club - http://www.pannondxc.hu/
P.V.R.Klub Puspokladany - http://www.c3.hu/~ha0khw/
DunaX - http://www.pannondxc.hu/dunax
Liechtenstein (HB0)
http://www.odci.gov/cia/publications/factbook/geos/ls.html

HC8, GALAPAGOS ISLANDS. Dan, NN1N, will be active as HC8N during the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band entry. QSL via W5UE.

HC8, GALAPAGOS ISLANDS. Trey/N5KO and other operators will be active as HC8N during the CQ World Wide DX CW Contest (November 29-30th) as a Multi-Multi entry. QSL via W5UE.

IOTA NEWS.....
AS-085. Operators Han/DS2GOO, Chae/DS5BSX, Ryu/DS4NYE and possibly others will be active from Soan Island between November 1-4th. They will use their homecall/4 or D90HE/4 with 100w transceivers and various wire antennas. QSL via operator's homecall. They said that a log search will be available after the trip.

EU-092. Jim, MM0BQI, is now active as MM0BQI/P from Summer Isles (IOSA SC10) until October 27th. Activity will be on all bands 80-6 meters with particular emphasis on 80m looking for DX around his sunrise and sunset. His activity will also include entries in the CQWW SSB Contest. Look for him to sign as MM0BQI/P as a Single Band 80m entry and as MM0Q as an All Band/Low Power entry. QSL via RSGB or direct to MM0BQI:
Jim Martin, 3 Lismore Ave, Edinburgh, EH8 7DW SCOTLAND.

OC-012. Cal/WF5W and Paul/W5PF will arrive on Yap Island on November 22nd. They will operate as V63WC and V63PF, respectively, until November 29th. They will use 100 watt radios, wire dipoles for 30 and 40 meters and a 2 element SteppIR yagi for 20-6 meters. Operation will be CW and SSB with no digital modes planned at this time. Some limited operation in the CQWW CW Contest may be possible. QSL via W5PF.

OC-203. Chris, ZL1CT (GM3WOJ), will be active as ZL1CT/4 from Stewart Island from January 11-15th. Activity will be on CW/SSB on 40-20 meters only. He will use 400w into vertical antennas.
For more info, please visit his Web page at:
http://www.qsl.net/gm3woj/
Chris states,
"Please work ZL1CT/4 as well as the 3Y0 DXpedition!"

J43, GREECE. Operators George/K6SV, Xenofon/SV3BEF, Dimitris/SV3BEH, and Vangelis/SV3BEG-Vangelis will be active from Southern Greece (Grid Locator: KM17ek) as J43GRC in the CQWW SSB Contest as a Multi-Op/Low Power entry. The team will use a 3 element Tribander for 20/15/10m, and wires for the lower bands. QSL Manager is K6HRO.

KP2/WP2, U.S. VIRGIN ISLANDS. Operators John/K3TEJ and Darrell/AB2E will be active as WP2Z in the CQ World Wide DX CW Contest (November 29-30th) as a Multi-2 entry. QSL via KU9C. Operators will be on the WARC bands before the contest, and 160m after the contest signing KP2/K3TEJ and KP2/AB2E. QSL via their home calls.

KP3, PUERTO RICO. Felipe, NP4Z, will be active as KP3Z in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band entry. QSL via WC4E.

LX, LUXEMBOURG. Two stations from LX have announced that they will be active from here during the CQWW SSB Contest. Look for the following stations:
1. LX5A (operator: LX1AQ - Phil) as SOSB HP 80m
2. LX9SW (operator: LX1RQ - Robert) as SOSB HP 20m
QSL both callsigns to LX1RQ or via the LX bureau.

PY0F, FERNANDO DE NORONHA. Jos&#65533;, CT1BOH, will be active from the station and QTH of PY0FF as PT0F from October 19-28th to take part in the CQWW SSB Contest as a Single-Op/All Band entry. QSL PT0F via W3HC.

QSL INFO AND NEWS.....
NEW QSL MANAGERS FOR A61AJ! QSL via K2UO for North, Central, South America, the Caribbean and U.S. territories (such as KH0, KH2, etc.). K2UO address: George Oliva, 5 Windsor Drive, Eatontown, NJ 07724, USA QSL via DJ2MX for Europe/Asia/Africa/Pacific. DJ2MX address: Mario Lovric, Kampenwandstrasse 13, D-81671 Munich, Germany. George, K2UO, informs OPDX that QSLs will be printed shortly; please be patient. K2UO also promises prompt returns once all logs have been received and organized and the backlog has been eliminated. Direct cards (with proper postage or green stamp or IRC) will be given the highest priority; all bureau cards will be answered. A message from Robert/S53R, Sejo/T97C, and Ghis/ON5NT also states that they are in the process of putting a database together for the QSOs before October 2003. As they are doing this in their spare time over the weekends; this could take a couple of weeks. They will keep us posted on this matter. For the moment, please only send your cards to the above managers for QSOs from October 2003 onwards.

Pete, K3PD, informs OPDX that he is now the new QSL Manager for YO2LEA. He now has all the logs, 1990 to present. QSL direct or via the Bureau (Mark all cards YO2LEA VIA K3PD). Requests without return postage or envelope will be returned via Bureau. USD preferred over IRCs. K3PD's address is: Pete DeVolpi, 408 Hillside Ave., New Cumberland, PA, U.S.A. 17070-3036.

Silvano, I2YSB, informs OPDX that the new QSL Manager for the TX4PG bureau cards is only to IK2DIA. Direct requests should still be sent to I2YSB. Silvano, I2YSB, is also the QSL Manager for 5U7B, 5U7DW, 5U7JK, 5U7JW and 5U7RW. QSL direct only to Silvano Borsa, P.O. Box 45, 27036 Mortara - PV, Italy. Online logs are available at: http://digilander.libero.it/i2ysb

RM0, ASIATIC RUSSIA. Andy, UA0ANW, will be active as RM0A in CQWW SSB Contest as a Single-Op/All Band/High Power entry from Zone 18. QSL via the bureau or direct (address on QRZ.com).

SILENT KEY. Zik, DL/VE3ZIK, informs OPDX that Ron, KZ5RO, became a Silent Key on October 13th. He states that Ron was a great HAM, QSL Manager and helped alot people with QSL information. OPDX and its readers would like to send out our deepest sympathy to Ron's family and friends.

SPECIAL ACTIVITY/EVENT. Take, JI3DST, informs OPDX that he and Joe, JA4PXE, are going to go to Manchester, UK, for the RSGB HFC 2003 International HF & IOTA Convention from Japan on October 30th. They plan to be active from the HF & IOTA Convention event station, MB2HFC, on November 2nd (From 800z to 9:00z) for Asia (JAPAN).

SPECIAL EVENT. To celebrate the Centennial of the Republic of Panama (1903-2003), look for special event station HP100RCP to be activated by the Radio Club de Panama from November 1-3rd. Activity will be on all bands and all modes (CW-SSB-RTTY & PSK31). A special commemorative QSL will be issued to all cards received with one green stamp or two IRCs to the following postal address: RADIO CLUB DE PANAMA, P.O. Box 10745, Panama, PANAMA.

TM7, FRANCE. Laurent, F8BBL, will be active with a special callsign, TM7W, from November 16-30th. Activity will included the CQWW CW Contest. QSL to the bureau via F8BBL.

TY4, BENIN. Jean-Marc, ON4JM, will be here for 2 months starting November 2nd because of his work. He has requested the callsign TY4JM from the Benin's Post and Telecommunication Office. Jean-Marc mentions that his activity will be limited because of his work Monday through Saturday, however, look for him possibly during his evening hours and on Sundays. He will be heading back to Belgium on December 23rd. QSL via ON4JM. Bureau cards are OK and it's preferred.

V55, NAMIBIA (Update/Change). Vlado/ZS6MG and Emil/ZS6EGB will be active as V55V and V55E, respectively (instead of V5/homecall as reported in OPDX.628), from October 23-27th. Also, they decided to use the callsign V55V for CQWW SSB Contest (instead of V51E). QSL via ZS6MG. They inform OPDX that they are not sure if this V55 prefix was used before from Namibia, and it may be of interest for the hams around the world.

VK9X, CHRISTMAS ISLAND. The YL group is now active from here as VK9XYL until October 27th. Most of their activity has been on 20/15 meters CW/SSB. However, there have been some QSNs on 40/17/12/10 meters. QSL via VK3DYL.

VP9, BERMUDA. Operators William/N1HRA, Matt/WE1H, Foster/N3KCJ and Joe/K1JN will be active from October 23-28th and will take part in the CQWW DX SSB Contest. Outside of the contest, they will be active on 160-6 meters as homecall/VP9. The contest callsign has yet to be determined. QSL to homecall outside of the contest and to K1JN for contest QSOs.

VP9, BERMUDA. Kurt, W6PH, will be active as VP9/W6PH from VP9GE's QTH in Hamilton Parish during the ARRL DX CW Contest (February 21-22nd) and the ARRL DX Phone Contest (March 6-7th). His entry in both contests will be Single-Op/All Band/Low Power. QSL only via W6PH direct.

WRTC 2006 (in Brazil!). Steve Morris, K7LXC, WRTC Sanctioning Committee Chairman, released last weekend: "The World Radiosport Team Championship Sanctioning Committee, LABRE - Liga de Amadores de Radio Emisspo, and the GADX Araucaria DX Group are pleased to announce the next WRTC competition in 2006 in Brazil. Following in the footsteps of previous WRTC competitions held in Seattle, San Francisco, Slovenia, and Finland, the WRTC showcases

amateur radio competition at the highest level. The competitors are among the best operators in the world in this ham radio Olympic-type event. The previous WRTC competitions have demonstrated the high degree of friendship in ham radio activity, together with an enormous sense of ethical competitiveness. The competition will be in Florianopolis, capital of the Santa Catarina State in Southern Brazil in July 2006. This event is open to everyone - competitor and spectator alike. Everyone is invited to attend the WRTC2006."

XU, CAMBODIA (Also IOTA op). Jaak, ES1FB, is once again here and will be active as XU7ACE until October 28th. He is currently staying in Sihanoukville and plans to be in next weekend's CQWW DX SSB Contest. Look for him to sign XU7ACV from Koh Poah Island (AS-133) between October 21-23rd. QSL via ES1FB. For more information, please visit the Web page at: http://www.hot.ee/xu7ace

YA, AFGHANISTAN. Masa, JG1OWV, QSL Manager and an operation's pilot for YA1D/YA0J, informs OPDX that Sada, YA1D, is now on a leave back in Japan. Masa and Sada are currently discussing what antennas beside his existing wire dipoles to take back to YA. Sada will be active again from Kabul after October 30th with probably a HexBeam for the high bands and a vertical for lower bands. Masa mentions that some QSLs came to him via his very old "Flying Horse" Callbook address (These take a long time to reach him). Please use his current address to QSL. His address is: Masahiro Wada, 391-C-1204, Shibacho, Kanazawa-ku, Yokohama, 236-0012, Japan.

ZS5, SOUTH AFRICA. Edwin, ZS5BBO, informs OPDX that he will be active in the upcoming CQWW SSB Contest as ZS5T as a Single-Op/Single Band (20m) entry. QSL via ZS5BBO.

Wayne certainly had a great sense of humor. My favorite was
when Wayne printed a letter from the XYL of a subscriber
complaining about the 73 covers of scantily clad hotties and
that her husband didn't need to see such trash and to cancel
his subscription immediately.

LOL,

guess the xyl did not know about why we go downstairs
to the shack to 'read' our magazines !
Or use sstv or now the internet !

maybe 73 will return as an online magazine like http://www.antennex.com ??

It used to be that in ham radio, BPL stood for Brass Pounders' League, a
group and name that has a long and honorable tradition. I have not yet
adjusted to BPL standing for something that many hams abhor.

2543. CQWW DX contest question

Newsgroup: rec.radio.amateur.dx
Date: 2003-10-22 20:17:53 UTC
From: J Tabor <denews@taborsoft.com>
Message-ID: <vpdpfm5paj05a3@corp.supernews.com>
Source record: 8777

Greetings,

Perhaps someone can clarify this for me? <G> The rules seem a bit unclear on points.

"
VI. POINTS:
1. Contacts between stations on different
continents are worth three (3)
points.
2. Contacts between stations on the
same continent but different countries,
one (1) point. Exception: For North
American stations only, contacts
between stations within the North
American boundaries count two (2)
points.
3. Contacts between stations in the
same country are permitted for zone or
country multiplier credit but have zero
(0) point value.
"

I read this to say NA stations can work some guy across town and get 2 points. Right? Otherwise it would state something like :
contacts between stations within the North American boundaties - but different countries - count two points.

Thanks for the help.

Regards,
Jim - KU5S

Hi Jim,

Point 3 indicates that your QSO across town would be worth zero points.
The reason to work him would be if said station was a new country or
zone. In that case, it would add to your multiplier total. Obviously,
it would add nothing to your QSO points.

73,
Bob
K3PH

> is in the July issue - and I can only find June and August...

Yes, that is a wonderful way of storing back issues. I have a couple of
CDs burned so far with the MT Express issues I've downloaded. Very
handy indeed.

With QST, it's unfortunate that the League is so short-sighted on this
matter. They offer you the CD-ROM at a pretty high price, and then only
about six months after the end of the year. I would MUCH prefer it if
they would provide me the option of downloading each month's issue.

> I wonder if broadband prices will ever drop to dialup levels?
> Personally I have a very hard time justifying the (very) roughly
> $200/year difference.

SBC is offering DSL in their service areas for $29.95 per month for the
first year of service. That's not much higher than dial-up, considering
the leap in bandwidth. I don't know if that includes unlimited dial-up
while traveling, though. RoadRunner offers SOME of their subscribers a
princely 10 hours of dial-up, with additional dial-up time costing
something like $8 per hour. Since I travel somewhat frequently, the
dial-up issue is a biggie for me, so I opted for Earthlink when they
became available through my cable provider (Time-Warner). They offered
unlimited dial-up, so I'm covered when on the road, PLUS they are $3 per
month cheaper than RoadRunner. Unfortunately, they're also pretty
stingy when it comes to newsgroups, but that's another story.

> On the other hand, we may be fast approaching the point where the sum
> total of the malicious executable emails being spammed into our
> mailboxes and the critical updates necessary to protect against them
> every day will take more than 24 hours to download via dialup!

Yeah, I know what you mean. I recently went on a trip to central Europe
for a couple of weeks. (Great trip, I'll tell you all about it if
you're interested but it's =way= OT otherwise.) I have a Yahoo! mailbox

that I paid extra to have expanded to 100Mb of storage plus POP3 access;
during that trip of about 12 days, that mailbox filled up to about 75%
of capacity before I got home (I'm on quite a few lists, Yahoo! Groups,
etc.). When the Sven worm hit, my mailbox filled to overflowing (101Mb)
in the space of a single weekend! If I get my hands on the <expletive
deleted> person who wrote that thing....

Greetings,

Since the current larger sunspot group is making national news, it seemed like a good time to press this subject. In his ARLP040 Propagation de K7RA of Oct 3 Tad Cook said it far better than I could so will share his thoughts.

"
Grim news emerged recently concerning the NOAA Space Environment Center in Colorado, where most of the data for these bulletins originates. I suspect due to some misunderstanding about their work, the Senate Appropriations Committee wants to eliminate the Space Environment Center's budget for fiscal year 2004, which officially began October 1. The Senate Appropriations Committee said in a report that NOAA's work should only be terrestrial and not extend to space, so it's proposing to cut all funding for the SEC. The House appropriations bill proposes cutting funding by 40 percent, even in the wake of severe cuts during the fiscal year just ended.

The funny thing about the Senate report is that all of the effects of solar flares and sunspots that concern us are here on Earth. Claiming that NOAA should ignore the sun because it is in space seems silly, since the same standard doesn't apply to NOAA's conventional weather forecasting. The SEC is a small part of NOAA, with an annual budget of just 8 million dollars.

There's a story on this subject on the ARRL Web site (see ''Space Environment Center Funding in Jeopardy'' http://www.arrl.org/news/stories/2003/10/03/3/). The Seattle Post-Intelligencer ran a story in its October 2 editions http://seattlepi.nwsource.com/national/142217_space02.html, and there's an item on the September 20 SpaceWeather.com Web page, available in the archive for that date http://spaceweather.com/archive.php .

I've contacted my representatives in the Senate and House and found that, as expected, staff members really had no idea what the obscure sounding Space Environment Center does. The only hope is that when the House and Senate committees work out that portion of the budget, funding for the SEC will somehow be preserved. You might contact your representatives to inquire about this. Members of the Senate Appropriations Committee are listed on the committee's Web site http://appropriations.senate.gov/ .

"

I sincerely apologize for posting to 5 groups, but this subject is very
important and has not been seen, or I missed such, in any.

Regards,
Jim - KU5S

SUN ERUPTS WITH INTENSE ACTIVITY

Forecasters at the NOAA Space Environment Center in Boulder, Colo., observed two dynamic areas of the sun, one of which has produced a coronal mass ejection, or CME, Wednesday morning at 3 a.m. EDT that appears to be Earth-directed. The forecasters are predicting a strong geomagnetic storm, G-3 on the NOAA Space Weather Scales, that should reach Earth on Friday, October 24.

Another CME today, not as directed towards Earth, but bigger and will
probably hit a glancing blow on the magnetic fields. Check out

Why does this surprise you? Look at the way gobernment does bizness. Look at the FCC jumping up and down about PLC/BPL and too ignorant to understand the problem. Nuff said.

Totally unhelpful and irrelevant response. And you of course had to quoted
the entire message and also place your remarks at the bottom. :)

DX Bulletin No. 632
BID: $OPDX.632
October 27, 2003
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, K3GV, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, K8YSE, W8UVZ, WB8B, DL/VE3ZIK & contesting.info, DL1EK/DL7VOA & DX Newsletter, EA5BYP, EA7FTR, JI6KVR & JA-IOTA Islands News, MM0BQI and OE1WEU and for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX SSB Contest announcements. Also, it will provide the readers with a consolidated listing of the CQWW DX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 17th/October, through Thursday, 23rd/October there were 238 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A2, A3, A4, A6, A7, AP, BV, BY, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T30, T7, T9, TA, TF, TG, TI, TJ, TK, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9N, VK9X, VP2E, VP2M, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZK2, ZL, ZL8, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3XY, GUINEA. Operator Leo, UT1WL, will be active as 3XY1L during the CQ World Wide DX SSB Contest (October 25-26th) using low power. QSL via UY5XE.

8P6, BARBADOS. Dean, 8P6SH, will be active in the CQ World Wide DX SSB Contest (October 25-26th). Look for him to sign 8P6SH as a Single-Op/ Single Band (40m) entry and 8P2K as a Single-Op/Single Band (15m) entry. QSL both callsigns via KU9C.

C4, CYPRUS. Marios, 5B4WN, will be active as C4W during the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band/High Power entry. He will attempt to use the "Logbook of the World" (LoTW) after the contest.

D70, SOUTH KOREA. Operators DS3GLW, DS4NYE, HL3VQ, HL3AHQ, HL3AMO and HL3SEO will be active as D70LW in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-??? entry. QSL via HL3VQ.

DXCC NEWS. Wolfgang, OE1WEU, informs OPDX and readers that YI9OM QSLs are being rejected. Reason indicted: No Documentation Received.

EA8, CANARY ISLANDS. Well known DXer Martti Laine, OH2BH, will be active as EA8BH in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/Single Band (80m) entry. QSL via OH2BH.

EX, KYRGYZSTAN. Andy, UA3DPX, will be active as EX9A during the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/All Band/High Power entry. All QSOs in the log will be QSLed via the Bureau.

HC8, GALAPAGOS ISLANDS (Update). As mentioned in OPDX.631, Trey/N5KO and other operators (team not finalized) will be active as HC8N during the CQ World Wide DX CW Contest (November 29-30th) as a Multi-Multi entry. QSL via W5UE. Trey informs OPDX that he will arrive on the island on Sunday afternoon, November 23rd local time, and depart on the Monday morning after the CQWW CW Contest. Activity before the contest will be on 6/10/12/15/17/20/30/40/80/160 meters, mostly on SSB and CW.

IOTA NEWS.....
AS-049. Operators JA6PSE and JA6PSI will be active for about one week beginning of March 2004 from Tokara Arc in the Takara Islands (JIIA-049-012, WLH-0884). He will be on 160-10 meters CW and SSB. He might try some RTTY and PSK31. They will use the callsigns JA6PSE (for SSB and RTTY) and JA6PSI (CW only). QSL via home calls.

EU-156. Bruno, F5JYD, will be active as F5JYD/P from some of the Normandie Islands (for the DIFM), October 27-30th. Look for operations from Le Mont St. Michel (MA 005), Rimains Island (MA 006) and Landes Island (MA 034). Activity will be QRP with solar power energy. QSL via his home callsign.

NA-072. Mike/DL2OE and Will/DJ7AA will be active as HP1/homecall from Contadora Island now through October 29th. Activity will be on 160-6 meters (with special interest on the low

bands) CW/SSB/RTTY. QSL HP1/DL2OE via DL7CM and HP1/DJ7AA
via his homecall.

NCDXA 2004 OFFICERS. At the October meeting, the members of the National
Capitol DX Association elected the following officers to serve in 2004:
Dick Mayott, W2YE -- President
Terry Hines, N2ZH, -- Vice President
Brian Bayus, N1KC, -- Treasurer
George Vincent, K3GV -- Secretary

OH0, ALAND ISLAND. Toni, OH2UA (ex-OH2JTE), will be active as OH0B in
the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All
Band/High Power entry. QSL via OH2BH.

QSL INFO AND NEWS.....
Elmo, EA5BYP, reports that the logs for the 3C0V operation (modes
PSK31, RTTY and CW) are now available at: http://www.tabarca.es.mn
SSB contacts will be available in a few days. They continue processing
data.

Fran, EA7FTR, informs OPDX that he is now the NEW QSL Manager for
Billy, 6W1RD. QSL via EA7FTR.

Zik, DL/VE3ZIK (4N1DX), informs OPDX that the latest QSL info from the
CQWW DX SSB Contest will be published next Wednesday or Thursday at:
http://www.contesting.info

RW2, KALININGRAD. Members of the UA2 Contest Club will be active as
RW2F in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-2
entry. QSL via DK4VW.

SU9, EGYPT. Tom, N9NC, will be active as SU9NC in the CQ World Wide DX
SSB Contest (October 25-26th) as a Single-Op/All Band/Low Power entry.
QSL via OM2SA.

T30, WESTERN KIRIBATI. Vladimir, UA4WHX, is again active from the Pacific.
After being active from Fiji and Rotuma (3D2VB and 3D2VB/R), he is now
active from Western Kiribati with the callsign T30VB. Activity will be
on 40-10 meters CW/SSB. Over the last few days he has been very active
on 40 meters. There has also been QSNs reported on 30 and 20 meters. The
length of his stay is not known. QSL via UA4WHX.

TF3, ICELAND. Members of the IRA club will be active as TF3W during the
CQ World Wide DX SSB Contest (October 25-26th) as a Multi-Single entry.
QSL via TF3GB.

V73, MARSHALL ISLANDS. Brian, K9QQ, will be active as V73AZ during the
CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band/
High Power entry. QSL via K9JS.

V73 MARSHALL ISLANDS. Neil, V73NS, is still active from Kwajalein Atoll
(OC-028). Most of his operating time is between 1700-1840z and from
0300-0500z. You will find him working only CW on all bands except 20
meters and 160 meters. He has spent most of his previous operating time

on 20 meters but is now trying to spread the QSOs out more across the other bands. He plans on being active on 160 meters in late November and is also getting more active on 6 meters from grid RJ-39. QSL is direct (S.A.S.E. only): Neil Schwanitz, BOX 8341 APO, AP 96557 (USA).

VP9, BERMUDA (Update). Bill/N1HRA, Matt/WE1H, Foster/N3KCJ and Joe/K1JN will be active from October 23-28th and will take part in the CQWW DX SSB Contest as VP9I. Outside of the contest, they will be active on 160-6 meters as homecall/VP9. QSL to homecall outside of the contest and to K1JN for VP9I QSOs. Please do not use the VP9 bureau.

XQ6, CHILE. George, W8UVZ, informs OPDX that Bob, XQ6ET, has been mostly inactive for several weeks now with rig problems. A replacement radio is on its way to Chile but not expected to arrive for at least 4 weeks. A reminder that QSLs for XQ6ET are done only DIRECT to W8UVZ. Bureau cards are being received but cannot be processed.

The following stations are expected to be active in the
CQ World Wide DX SSB Contest (October 25-26th, 2003)

Thanks to Bill, NG3K, for providing OPDX readers the following consolidated listing of the participants in the 2003 CQWW SSB Contest. For a more detailed listing in HTML format, please visit the Web page at:

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, please send
via InterNet Mail to: kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF80.ORG using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

/EXIT

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX SSB Contest announcements. Also, it will provide the readers with a consolidated listing of the CQWW DX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 17th/October, through Thursday, 23rd/October there were 238 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A2, A3, A4, A6, A7, AP, BV, BY, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T30, T7, T9, TA, TF, TG, TI, TJ, TK, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9N, VK9X, VP2E, VP2M, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZK2, ZL, ZL8, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3XY, GUINEA. Operator Leo, UT1WL, will be active as 3XY1L during the CQ World Wide DX SSB Contest (October 25-26th) using low power. QSL via UY5XE.

8P6, BARBADOS. Dean, 8P6SH, will be active in the CQ World Wide DX SSB Contest (October 25-26th). Look for him to sign 8P6SH as a Single-Op/ Single Band (40m) entry and 8P2K as a Single-Op/Single Band (15m) entry. QSL both callsigns via KU9C.

C4, CYPRUS. Marios, 5B4WN, will be active as C4W during the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band/High Power entry. He will attempt to use the "Logbook of the World" (LoTW) after the contest.

D70, SOUTH KOREA. Operators DS3GLW, DS4NYE, HL3VQ, HL3AHQ, HL3AMO and HL3SEO will be active as D70LW in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-??? entry. QSL via HL3VQ.

DXCC NEWS. Wolfgang, OE1WEU, informs OPDX and readers that YI9OM QSLs are being rejected. Reason indicted: No Documentation Received.

EA8, CANARY ISLANDS. Well known DXer Martti Laine, OH2BH, will be active as EA8BH in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/Single Band (80m) entry. QSL via OH2BH.

EX, KYRGYZSTAN. Andy, UA3DPX, will be active as EX9A during the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/All Band/High Power entry. All QSOs in the log will be QSLed via the Bureau.

HC8, GALAPAGOS ISLANDS (Update). As mentioned in OPDX.631, Trey/N5KO and other operators (team not finalized) will be active as HC8N during the CQ World Wide DX CW Contest (November 29-30th) as a Multi-Multi entry. QSL via W5UE. Trey informs OPDX that he will arrive on the island on Sunday afternoon, November 23rd local time, and depart on the Monday morning after the CQWW CW Contest. Activity before the contest will be on 6/10/12/15/17/20/30/40/80/160 meters, mostly on SSB and CW.

IOTA NEWS.....
AS-049. Operators JA6PSE and JA6PSI will be active for about one week beginning of March 2004 from Tokara Arc in the Takara Islands (JIIA-049-012, WLH-0884). He will be on 160-10 meters CW and SSB. He might try some RTTY and PSK31. They will use the callsigns JA6PSE (for SSB and RTTY) and JA6PSI (CW only). QSL via home calls.

EU-156. Bruno, F5JYD, will be active as F5JYD/P from some of the Normandie Islands (for the DIFM), October 27-30th. Look for operations from Le Mont St. Michel (MA 005), Rimains Island (MA 006) and Landes Island (MA 034). Activity will be QRP with solar power energy. QSL via his home callsign.

NA-072. Mike/DL2OE and Will/DJ7AA will be active as HP1/homecall from Contadora Island now through October 29th. Activity will be on 160-6 meters (with special interest on the low

bands) CW/SSB/RTTY. QSL HP1/DL2OE via DL7CM and HP1/DJ7AA
via his homecall.

NCDXA 2004 OFFICERS. At the October meeting, the members of the National
Capitol DX Association elected the following officers to serve in 2004:
Dick Mayott, W2YE -- President
Terry Hines, N2ZH, -- Vice President
Brian Bayus, N1KC, -- Treasurer
George Vincent, K3GV -- Secretary

OH0, ALAND ISLAND. Toni, OH2UA (ex-OH2JTE), will be active as OH0B in
the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All
Band/High Power entry. QSL via OH2BH.

QSL INFO AND NEWS.....
Elmo, EA5BYP, reports that the logs for the 3C0V operation (modes
PSK31, RTTY and CW) are now available at: http://www.tabarca.es.mn
SSB contacts will be available in a few days. They continue processing
data.

Fran, EA7FTR, informs OPDX that he is now the NEW QSL Manager for
Billy, 6W1RD. QSL via EA7FTR.

Zik, DL/VE3ZIK (4N1DX), informs OPDX that the latest QSL info from the
CQWW DX SSB Contest will be published next Wednesday or Thursday at:
http://www.contesting.info

RW2, KALININGRAD. Members of the UA2 Contest Club will be active as
RW2F in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-2
entry. QSL via DK4VW.

SU9, EGYPT. Tom, N9NC, will be active as SU9NC in the CQ World Wide DX
SSB Contest (October 25-26th) as a Single-Op/All Band/Low Power entry.
QSL via OM2SA.

T30, WESTERN KIRIBATI. Vladimir, UA4WHX, is again active from the Pacific.
After being active from Fiji and Rotuma (3D2VB and 3D2VB/R), he is now
active from Western Kiribati with the callsign T30VB. Activity will be
on 40-10 meters CW/SSB. Over the last few days he has been very active
on 40 meters. There has also been QSNs reported on 30 and 20 meters. The
length of his stay is not known. QSL via UA4WHX.

TF3, ICELAND. Members of the IRA club will be active as TF3W during the
CQ World Wide DX SSB Contest (October 25-26th) as a Multi-Single entry.
QSL via TF3GB.

V73, MARSHALL ISLANDS. Brian, K9QQ, will be active as V73AZ during the
CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band/
High Power entry. QSL via K9JS.

V73 MARSHALL ISLANDS. Neil, V73NS, is still active from Kwajalein Atoll
(OC-028). Most of his operating time is between 1700-1840z and from
0300-0500z. You will find him working only CW on all bands except 20
meters and 160 meters. He has spent most of his previous operating time

on 20 meters but is now trying to spread the QSOs out more across the other bands. He plans on being active on 160 meters in late November and is also getting more active on 6 meters from grid RJ-39. QSL is direct (S.A.S.E. only): Neil Schwanitz, BOX 8341 APO, AP 96557 (USA).

VP9, BERMUDA (Update). Bill/N1HRA, Matt/WE1H, Foster/N3KCJ and Joe/K1JN will be active from October 23-28th and will take part in the CQWW DX SSB Contest as VP9I. Outside of the contest, they will be active on 160-6 meters as homecall/VP9. QSL to homecall outside of the contest and to K1JN for VP9I QSOs. Please do not use the VP9 bureau.

XQ6, CHILE. George, W8UVZ, informs OPDX that Bob, XQ6ET, has been mostly inactive for several weeks now with rig problems. A replacement radio is on its way to Chile but not expected to arrive for at least 4 weeks. A reminder that QSLs for XQ6ET are done only DIRECT to W8UVZ. Bureau cards are being received but cannot be processed.

The following stations are expected to be active in the
CQ World Wide DX SSB Contest (October 25-26th, 2003)

Thanks to Bill, NG3K, for providing OPDX readers the following consolidated listing of the participants in the 2003 CQWW SSB Contest. For a more detailed listing in HTML format, please visit the Web page at:

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, please send
via InterNet Mail to: kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF80.ORG using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

/EXIT

I have an easy way to remember. I entered single band 160 one year,
and worked KG6DX, in same country (Guam). No points, but 1 multiplier.
I won for Guam, with a total score of ZERO..... There's a scan of the
certificate here:

http://kh2d.net/contest/awards.cfm

Fourth one on the top row.

73, Jim KH2D

And I thought my 726 points (1953 CQWW 15 meter phone, U.S. 6th call
area) was a contender for all-time low-scoring winner (no, I wasn't the
only entry)! That was my first contest and my only certificate
(actually it wasn't CQWW that year, since it was sponsored by the
International DX Club).

Correct Dan. Bush has 87 BILLION to dump into
the re-building of Iraq (a country who's people would
stab us in the back the minute it's turned..) and yet cuts
the budgets of the VA Hospital, Medicare, Roads and
Public Works and other domestic programs.

No....He want's to give those oil rich sandniggers 87 Billion
at NO LOAN. (more like a bribe for them to behave)

Watch and see as Bush "Act II popcorn man" becomes
a one-term President. He's making the same mistakes
as his daddy did in 92 and the Democrats will eat him
and the GOP alive in 04. Clinton may have been a
pot smoking womanizer, but the checks still came thru
every Friday and more people were working when he
was running the show in the O. Office.

In the end Iraq will go the way of Iran, watch it in 5 Years.

Wouldn't surprise me a bit. I thought from the git-go that Iraq would turn
into a quagmire. Unfortunatly for those fighting the fight, it is serving a
purpose. It is keeping the ragheads 'occupied'. And its not in Boise
Idaho.

As for your political commentary. As far as I'm concerned the Democratic party left me when they turned it over to NOW and Phyliss.

That does NOT mean I support Baby Bush 100%. However lets see how things go.

<capjim300sa@nospam.yahoo.com> wrote:

Whatever we spend, a couple facts emerge.

1) The vast majority of Iraqis are glad that we are there. Probably
a higher percentage than we faced in Japan and Germany in 1945.

2) They have freedom that hasn't been evident in the country for 30+
years.

3) Schools are teaching freedom.

4) Water is running and electricity is back more that prior to
invasion.

5) Morale is NOT low. Perception aside, I listened to a young man
from Phoenix that has just returned and he totally demolished that
lie.

If we stay the course, we will build friendships that will last. To
leave now will open the doors for another 9-11, only this time it will
be a nuke. We may get that treatment anyway but it is guaranteed if
we turn tail.

BTW, Iran is about to see revolution. This will signal the return of
a peaceful government, perhaps democracy and free elections.

It took 5 YEARS to establish a German government. Seven years in
Japan. Americans did not clear the Island of Guam of Japanese
soldiers until 1950+. The costs of peace was in today's dollars,
about 3 times as much as I understand.

This is not a war against Islam. It is a war against radical
terrorists the, in the main, are Muslim.

It is now coming out that Bush was fed bad, erroneous info from the
CIA (Tenet, a Clinton appointee). Perhaps Clinton was duped too. I
would be glad to apologise for some negatives on that guy.

In any event, the war has taken a turn. Not a quagmire because we
have the same direction and purpose as we did in March. Let the
military do their job.

Amateur Radio Newsline™ Report 1367 – October 24 2003

Amateur Radio Newsline report number 1367 with a release date of Friday, October 24th 2003 to follow in 5-4-3-2-1. The following is a Q-S-T. The FCC begins preparing for the 2007 World Radiocommunications Conference, a new all ham crew arrives at the I-S-S and a ham a is charged with violating airport security. Find out the details on Amateur Radio Newsline report number 1367 coming your way right now.

(Billboard Cart Here)

RADIO LAW: FCC COMMITTEE TO GET READY FOR WRC-07

The ink has yet to complely dry on the agreements reached ar WRC-03 as the FCC begins getting ready for the next World Radiocommunication Conference in 2007. As part of the preparations FCC Chairman Michael Powell has announced the appointment of Nancy Victory as Chair, and Peter Hadinger as Vice-Chair of the agency’s WRC-07 Advisory Committee. Amateur Radio Newsline’s Bruce Tennant, K6PZW, is here with has some background on each of the appointees:

--

Nancy Victory is the former Assistant Secretary of Commerce for Communications and Information and the former Administrator of the National Telecommunications and Information Administration. Prior to her appointment to the Department of Commerce, Ms. Victory was a partner in the Washington law firm of Wiley, Rein and Fielding, where she focused on legal and regulatory issues faced by communications companies.

Peter Hadinger is Director of Communications Initiatives for Northrop Grumman’s Space Technology Sector. Mr. Hadinger has taken industry leadership roles on global satellite issues, including privatization, protection and spectrum allocation. He is past Chairman of the Satellite Industry Association and current vice- chair of the Satellite Task Force in the President’s National Security Telecommunications Advisory Committee.

Also getting an appointment is Alex Roytblat who is Assistant Chief of the Strategic Analysis and Negotiations Division of the FCC’s International Bureau. He will direct the Commission's WRC- 07 preparatory activities and serve as the Designated Federal Official to the Advisory Committee. Roytblat directed the Commission’s preparatory activities for last June’s 2003 World Radiocommunication Conference held in Geneva.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, reporting.

--

The Advisory Committee will be tasked with providing advice and technical analyses of the nations telecommunications needs. It will also make specific recommendations on matters relating to that conference. (FCC Release)

**

TALKING ON THE AIR: BIG SUNSPOT ACTIVITY MAY HAMPER YOUR QSO'S

If you are wondering why you may not be able to make contact on your favorite band, the answer is right out there in space. According to propagation reports from the Space Environment Center, a solar storm, centered around Sunspot number 484, has grown into the biggest in recorded history. And a solar storm with a sunspot that size can easily impact on radio propagation here on Earth.

Sunspot 484 is reportedly about the size of the planet Jupiter, and forecasters say that another big sunspot could soon appear near the sun's southeastern limb. The active region is not yet directly visible, but the Solar and Heliospheric Observatory satellite has seen material being blasted over the sun's limb from the approaching spot. Major eruptions are possible from these active regions as they rotate across the face of the sun over the next two weeks.

Also this word of caution. Never, never look directly at the sun. While these sunspots are easy to see its also very dangerous to try. Unprotected eyes can suffer severe and perminant damage from looking directly at the sun. Instead, as we have said before, visit www.spaceweather.com for safe solar observing tips. (ASWLC)

**

RADIO POLITICS: NOAA SPACE WEATHER SERVICE THREATENED

Solar propagation reports like this one could soon disappear. CQ Magazine's news service reports that the service on which many amateurs depend for reports on ionospheric conditions may have its funding sharply cut or eliminated under two versions of a Congressional spending plan for Fiscal Year 2004.

The Space Environment Center, part of the Commerce Department's National Oceanic and Atmospheric Administration, provides space weather reports on solar and geomagnetic activity that affect the ionosphere, which in turn affects radio propagation. In addition, the bureau monitors solar flares and similar events that can damage satellites. This gives advance knowledge that can help protect them. And for radio amateurs, the propagation predictions in C-Q and other publications depend on these space weather observations.

The Space Environment Center is actually operated jointly by NOAA and the Air Force, but its funding is in the NOAA budget. It suffered a 40% budget cut in the current fiscal year. The House budget proposal for 2004 calls for an additional 40% cut. But the nail that could close the coffin lid is in the Senate. That version of the bill cuts funding for the Space Environment Center altogether. The Senate says that such activities are rightly the domain of the National Aeronautics and Space Administration and the Air Force.

According to an e-mail from C-Q, the House Science Committee's Environment, Technology and Standards Subcommittee will be holding a hearing October 30th on

this funding bill. C-Q says that any letters and comments from the public will be entered into the record. If you are concerned about the possible loss of information gathered and disseminated by the Space Environment Center, you may write to the House Committee on Science, Environment, Technology and Standards Subcommittee, 2320 Rayburn House Office Building, Washington, DC 20515. (CQ News Release, W2VU)

**

HAM RADIO IN SPACE: NEW ALL-HAM CREW ARRIVES AT ISS

A new three man all ham crew has reached the International Space Station, but only two of the new arrivals will remain on-orbit the next several months.

Called the Expedition 8 crew, the commander is NASA Astronaut Mike Foale, KB5UAC. He is accompanied on the I-S-S by Russian Cosmonaut Alexander Kaleri, U8MIR, and the Europen Space Agency's Pedro Duque, KC5RGG. All three arrived at the ISS on October 20th on board a Russian Soyuz transport vehicle.

Foale and Kaleri will repace Expedition 7 crew members Commander Yuri Malenchenko, RK3DUP and NASA Science Officer Ed Lu, KC5WKJ. Duque, who's flying under a contract between the Russian and Europen space agencies and will spend the week in space before returning to Earth with the Expedition 7 crew.

KB5UAC and U8MIR hope to be active on the ISS ham radio station as time permits during their stint in space. We will have other ham radio in spaced news later on in this weeks report. (AMSAT, published news reports)

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world W4GSO Greensboro Amateur Radio Club repeater serving Greensboro North Carolina.

(5 sec pause here)

**

ENFORCEMENT: HAM CHARGED IN AIRLINER CASE

A 20 year old ham radio operator and college junior has been charged with breaching airport security. The FBI says that Nathaniel Heatwole, WZ3AR, has admitted to planting box cutters, bleach and matches on two airliners. Amateur Radio Newsline's Paul Courson, WA3VJB, gives us a profile of Heatwole and his involvement in the hobby:

--

If you're a contester, you may have worked WZ3AR, licensed to Damascus Maryland, a suburb of Washington DC. In research for Newsline, a profile of a fairly ordinary young ham radio operator has emerged.

His listing on QRZ.com shows a willingness to QSL both to short-wave listeners and the amateur community alike. The Advanced Class licensee appears to have been primarily active on HF, in the specialty of contesting.

In August of this year he won a thousand dollar scholarship from the Foundation for Amateur Radio, a coalition of radio clubs in the area around Maryland, DC and Virginia. In a club newsletter, he was shown as headed into his 4th year at Guilford College in North Carolina, pursuing a double major of Physics and Political Science.

His former call is KB3CBW, and an internet search has found a snapshot of a young man closely resembling who now is a 20 year old seen in television footage and accused of trying to breach airline security. As KB3CBW, he is listed several times with photos a Dayton Hamvention, 1999 gallery.

His call sign also turns up on a contest log dupesheet for Field Day 1999 on 40 meters phone, and in other contests including a Maryland-DC QSO party. On a contest e-mail reflector, someone signing that name and call sign is asking questions about the beverage antenna, and how he plans to buy a better contesting radio than his Kenwood TS-140S, that the person was using as of the posting dated 1999.

By Feburary 2000, the former KB3CBW was turning up as WZ3AR on the webpage minutes of the Potomac Valley Amateur Radio club, which serves the same area as his licensed station location in Maryland.

This call sign also shows up in various contest logs, including an Islands on the Airwaves event and Field Day. WZ3AR was shown in 2001 as operating from Virginia's Chincoteague Island on 15 meters sideband. One message thread refers to a June 2001 issue of CQ magazine, and an article on keeping a footswitch from sliding around.

There was other advice.

In a contest discussion board, someone signing those call letters rejected the practice among certain hams of tape recording contest activity to later enter the information in a competitive logbook. The posted message said such a practice raises ethical questions, and that he advised against doing so.

The New York Times has quoted friends as saying he has offered strong pacifist views and is highly principled.

For now, he is charged with carrying a concealed dangerous weapon aboard jetliners, reportedly as a test of airline security and to demonstrate his alleged protest to perceived flaws in that security.

In Weashington, Paul Courson, WA3VJB, for Newsline.

--

After a court appearance Monday, October 20th, Heatwole, a junior at Guilford College in Greensboro, N.C., was released without bail for a preliminary hearing slated for November 10th. If tried and convicted, he faces a hefty fine and up to 10 years in a Federal prison. (ARNewsline(tm), published news reports)

**

ENFORCEMENT: FCC TAKES MORE ACTION AGAINST EX-KG6IRO

A follow-up to last weeks story regarding Jack Gerritsen, the ex-KG6IRO. The FCC has now taken action against another one of his licenses and again warned him to stay off the air. Bill Pasternak, WA6ITF, has more:

--

FCC Special Councel Riley Hollingsworth has written to tell Jack Gerritsen of Bell California that the Commission's Wireless Telecommunications Bureau has acted to set aside Gerritsen's General Mobile Radio Service or G-M-R-S license. This, pursuant to Section 1.113 of the Commission's rules.

The action by to set aside Gerritsen's G-M-R-S license took place on October 14th. Hollingsworth's letter says the action is based on Gerritsen's alleged continued unlicensed operations and complaints of deliberate interference from transmitters the FCC says that he operates.

Hollingsworth letter tells Gerritsen that his G-M-R-S application has reverted to pending status. Also, that it will be made a part of a forthcoming hearing to determine if the former radio amateur is qualified to hold any Commission licenses. This is the same type of hearing that Gerritsen's ham radio ticket currently faces.

Hollingsworth letter again warns Gerritsen that he has no authority to operate radio transmitting equipment. If he continues, Gerritsen could face both to monetary penalties and imprisonment. Hollingsworth also suggested that Gerritsen consult an attorney in this matter.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

Meantime, the number of Los Angeles ares repeater owner operators that claim Gerritsen is interfereing with their systems continues to grow. For the moment, they and their control operators continue to turn repeaters off whenever the station claiming to be KG6IRO attempts to make a transmission over one. (FCC, ARNewsline(tm))

**

ENFORCEMENT: UNAUTHORIZED OPERATION LEADS TO LICENSE TURN-IN

Meantime, a ham has surrendered his license to the FCC after it was found that he caused problems for police radio operations. The FCC's Daryl Duckworth, NN0W, has the rest of the story:

--

Duckworth: "In March, the Enforcement Bureau notified Justin Whaley, KC9DCP, Columbia City, Indiana, that close-in proximity direction finding indicated that on numerous occasions between January 2nd and March 13th he interfered with the operation of the Columbia City Police Department radio system. In order to resolve this matter, he has agreed to relinquish his license until

March 28th of 2005 and agreed not to maintain or operate an Amateur station.

--

Whaley was requested to return his Amateur Service license to the FCC. (FCC)

**

ENFORCEMENT: FCC: STAY OF THE W6RHC REPEATER

A ham who refused to stay off a repeater after being told to vacate by the licensee has now received a notice to comply from the FCC. Again, the FCC's Daryl Duckworth, NN0W:

--

Duckworth: "A warning notice has been sent to Scott Rogers, K6EVP, of Paradise, California, for failing to refrain from using the W6RHC repeater ass requsted both verbally and in writing by the trustee of the Golden Empire Amateur Radio Society. The letter was isssued as a result of his failure, verified by the Office of Emergency Services of Butte County California, to follow operational rules set forth by the licensee and control operators of the repeater system for its users."

--

The letter went on to say that the FCC expects Rogers to abide by the request to stay off the W6RHC system and any other such request by a repeater licensee, control operator or trustee. If he uses the repeater again after receipt of the FCC warning letter, the agency says that it will initiate enforcement action against Rogers license. (FCC)

ENFORCEMENT NEEDED: PHONY TEXT MESSAGE TO CA CELL PHONE USERS

Bakersfield California area cellular telephone would probably welcome some FCC enforcement action. This, after they were awakened early Tuesday morning, October 21st to a phony text message.

According to news reports, someone managed to hack the areas wireless communications' system. The hacker then posted a message urging cell phone users to support a strike by many of the states grocery workers now in its second week.

The United Food and Commercial Workers Union denies responsibility for the message. A spokeswoman for the wireless service providers says that she does not know how it happened. She says that that wireless providers have no position on the strike. The sender of the message remains unknown. (Published news report)

RESCUE RADIO: MONTANNA HAMS GET BIG THANK-YOU

Amateur Radio's role in last summers Montana's forest fires haave received official recognition. This, when the US Forest Service and Helena area organizations hosted an appreciation picnic for all the voluntees who put themselves on the line to assist fighting the blaze.

According to the ARRL Letter, the event honored the firefighters, law enforcement officers and community volunteers who assisted with firefighting efforts in Lewis and Clark, Powell, Jefferson, and Broadwater counties. This included a number of radio amateurs who volunteered their time and gear.

Among those recognized were Jim Haslip, W7CK, and Rollie Fisher, KC7WBP. Haslip has been an aerial fire spotter for 40 summers. Fisher set up at Lincoln's Hooper Park every day during the fires, providing current information to residents and visitors. He and his wife were among the many families forced to evacuate their homes because of the fire danger.

Amateur Radio's support of Red Cross and other relief agencies during the fire emergency also received recognition. Lewis and Clark County Emergency Coordinator Bob Solomon, K7HLN, accepted a plaque on behalf of the Amateur Radio Emergency Service and the Capital City Amateur Radio Club.

An estimated 300 people turned out for the event at the Lewis and Clark Fairgrounds in Helena. (ARRL)

**

PROMOTING THE HOBBY: JOTA VIDEO NEEDED

If you took part in last weekends scouting Jamboree on the Air, and have some good quality videotape of the event, the people who produce most of the ham radio documentaries want to hear from you. As reported two weeks ago, Dave Bell, W6AQ, Alan Kaul, W6RCL and Bill Pasternak, WA6ITF, are always looking for good video of ham radio happenings that they might be able to incorporate into a presentation about the hobby. As scouting and ham radio enjoy a very unique relationship, this is an event that is sure to make it into one of their shows, but only if they have the pictures and sound. If you have video that you want to share, please e-mail the production team to hamvideo@juno.com and let them know what you have. They will get back to you with information on where to send it. Again that e-mail address is hamvideo@juno.com (The Producers)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM GATHERINGS: RSGB INTERNATIONAL HF AT MONTHS END

Turning to the ham radio social scene, if you plan to be in the United Kingdom from October 31st to November 2nd. listen up. Thats the weekend of the Radio Society of Great Britain's International High Frequency and Islands on the Air Convention.

This years venue is the Britannia Country House Hotel at Didsbury in Manchester England. Planned events include presentations on DXpeditions, technical lectures, presentation of trophies and awards, a contesting forum, and specialist areas for 5 MHz, 136 kHz, 6 meters and Q-R-P. More information is on-line at the RSGB website Its in cybespace at www.rsgb.org (RSGB)

**

HAM GATHERINGS: HANDIHAMS IN CALIFORNIA IN MARCH 2004

Back on this side of the Atlantic, word that the HandiHams will hold their 2004 California Radio Camp in Malibu California begining on Monday, March 1st, and continuing to Sunday, March 7th. Tuition breaks will be provided for beginners from Western states working on a first license or on a General, and for early bird registrations. An Operating Skills course will also be offered along with opportunities for learning about blind computing with JAWS, public service communications, and lots of getting on the air!. Also, an open ham radio test session will take place on Saturday March 6.

The camp is open to HandiHam members with disabilities. Organizers provide all food, lodging, ham radio classes, and fun activities for the week long outing. To request an application or more information call the HandiHams toll free at 866-426-3442 toll-free or e-mail the group to hamradio@courage.org (HandiHams)

**

NEWSLINE: NO MORE FAX

If you have been trying to send Amateur Radio Newsline a fax the past week then you notice that our machine is not picking up. The reason -- its been taken off line due to our inability to get unsolicted fax spammers to stop sending us unwanted advertising.

Even though it is a violation of federal law to send an unsolicited fax advertisement, that has not stopped the fax spammers. They make their living by sending out this unwanted electronic junk mail. And while much the same as the junk e-mail we all get, the big difference is that unsolicited faxes waste print cartreges and paper. And that costs Amateur Radio Newsline money that we just cannot afford to waste.

After spending the past year trying to get these nuisances to stop -- including an official complaint to the FCC, we have given up. If you need to send us a fax, you will first have to call us or e-mail us to arrange for us to turn the machine on. Otherwise, the fax is gone until the federal government acts to put the spam fax mailing companies out of business. (ARNewsline(tm))

**

EMERGING TECHNOLOGY: BALLOON DELIVERED RADIO

Turning to the emerging technology page, it now looks as if balloon delivered radios could bring new sound to North Korean residents. This, if a preacher gets his way.

Revrend Douglas Shin wants to help liberate North Korea by delivering radio recievers by balloon. Shin's idea is to have helium filled balloons would carry radios acrosss the Demiliterized Zone into North Korea. An automatic valve would let the gas out slowly so the balloons touch down softly without damage to the payload. Once retrieved by the people in North Korea, they would only have to turn them on and listen.

Shin says that he plans to launch his balloons from South Korea or ships off shore. Included aliong with each radio will be prayer material and a North Korean bank note. The latter is worth about one U-S Dollar. (Published news report)

**

HAM RADIO IN SPACE: THE AMSAT VOLUNTEER SURVEY

AMSAT North America says that it has developed an on-line volunteer survey designed to identify the interests and skills of those who may be available to directly help in efforts to develop the amateur satellite program. The survey is designed to be completed and returned on-line, and takes only a few minutes to fill out. To request the survey, simply send an e-mail request to volunteer@amsat.org. (ANS)

**

SPECIAL EVENTS: REMEMBERING THE EDMUND FITZGERALD

Turning to operating news, members of the Stu Rockers group will be on the air from Whitefish Point and Paradise, Michigan on November 7th , 8th, and 9th about 10. This, for an event called `Remembering the Edmund Fitzgerald.'

2003 marks the 7th year that the Stu Rockafellow Amateur Society has sponsored a special event in remembrance of the famed ship and her crew. Look for the call N8F on 40 through 10 meters and QSL to Richard Barker, W8VS, 264 N. East St., Brighton, Mi. 48116 (W9RIF)

**

SPECIAL EVENTS: REMEMBERING VETERANS DAY ON THE AIR

Also, in recognition of both Veterans Day and the birth of the late General Curtis LeMay, W6EZV, the Strategic Air Command Memorial Amateur Radio Club will be operating stations K0AIR and K0GRL. This, on Tuesday, November 11th from 1200 hours to 2400 hours Zulu.

According to Darwin Piatt, W9HZC, the stations will take top the air in the general phone bands on or near frequencies ending in the numerals 47. Piatt says that his is in recognition of the year 1947 when the Air Force became a single entity. He says to QSL K0AIR and K0HRL to the Strategic Air Command Memorial Amateur Radio Club, P.O. Box 1292 Bellevue, Nebraska, 68005. (Via e-mail)

**

ON THE AIR: THE SOUTHEASTERN 6 METER NET

And Jim Worsham, W4KXY would like to remind everyone of the Southeastern 6 Meter Net which meets on Sunday nights at 9 PM eastern time on 50.145 Mhz SSB. The net control is usually Jim who lives in grid square EM84ab. If anyone has any questions about the net they can contact Jim directly. His e-mail is w4kxy@bellsouth.net (VHF Reflector)

**

PROPAGATION AIDS: TRANSATLANTIC BEACON IN PLANNING

The Marconi Radio Club of St. Johns, Newfoundland and the Caccalieu Amateur Radio Club of Carbonear are currently working to put a new 2 meter transatlantic beacon on the air. According to information from the Irish Radio Transmitting Society, the proposed beacon will operate on 144.4 MHz with power output of 250 Watts into an 11 element Yagi. It will be sited at about 90 meters above sea level.

**

DX

In D-X, At least five special event stations are on the air from Poland through the end of October to celebrate Pope John Paul the Second's Silver Jubilee. Keep an ear open for HF8JP; SN25JP, SR25JP, SO25JP and HF25JP. If you make contact QSL as directed on the air. (Via e-mail)

And ten German operators and their guests from other countries will be operating from Liechtenstein through the 31st of October. Keep an ear open for the call HB0/HB9AON using SSB, CW, PSK and RTTY on all of the HF bands. (RSGB)

**

THAT FINAL ITEM: MEASURING THE SPEED OF GRAVITY

And finally this week, it appears as if Albert Einstein was right. Amateur Radio Newsline’s Mert Garlick, N6AWE, tells us about what:

--
The great Albert Einstein was correct when he said that the speed of gravity matches the speed of light. This, according to astronomers who took advantage of a rare planetary alignment to survey the relationship of these two fundamental forces of nature.

Edward B. Fomalout of the National Radio Astronomy Observatory, and, Sergei Kopeikin of the University of Missouri, measured the amount that light from a distant star that was deflected by the gravity of Jupiter as the planet passed in front of it. The researchers used 10 radio telescopes scattered around the world to precisely gauge how light from a distant quasar was bowed or warped as it passed by Jupiter on its way to the Earth.

To make the measurement, the instruments had to detect a minute deflection of the light. Dr. Fomalout compared the required precision to being able to

measure the width of a human hair from 250 miles away.

Jupiter is in the precise position for such a measurement only once a decade. The locations of the telescopes ranged from from Hawaii to Germany. Researchers are very happy with the experiments seeming total success.

For the Amateur Radio Newsline, I’m Mert Garlick, N6AWE, near the Queen Mary in Long Beach California.

--

Knowing the precise speed of gravity is important to physicists looking for technologic break-throughs. It also affects some of the basic theories of the relationship of space and time. (Science Today)

**

NEWSCAST CLOSE

And speaking about time, we are out of it for this week. So with thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Don Wilbanks, AE5DW, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2003. All rights reserved.

> visit....

Oh, he's gotta be shaking in his boots NOW! Haw Haw Hawr! :D

That reminds me of an interview that occurred back in 1967, right after the
Israeli 6-day war. Israel had been attacked on all sides by a number of
raghead states, who were determined to murder every Israeli man, woman, and
child in Israel. (According to the raghead newspapers of the time.)

Of course we all know what happened. Despite having almost no outside
support, and with only a few obsolete old French aircraft, the Israelis
thoroughly kicked every one of those ragheads countries' asses, taking some
of their land from them instead, just to teach the uncivilized scum a little
lesson.

Asked about his astounding success in mowing down thousands of screaming
raghead fanatics with very few casualties (sound familiar?) , the Israeli
general agreed to give the reporter the exclusive secret to his
unprecedented military success...

"Fight Arabs." he said.

Charles Brabham, N5PVL

Apparently, due to a design flaw in the original model, you can easily burn out the 20 meter trap by running legal power. I destroyed mine running 600 watts, and another ham burned his out doing the same thing. Cushcraft can't replace the individual trap. I've obtained a spare 30 meter trap from another ham and am modifying it to replace the bad 20 meter trap.

I don't know if this will work or not, but I had great success with the R7000 during the 2 years I had it. I worked over 280 countries with it and was very pleased with its performance.

"charlesb" <n5pvl@sbcglobal.net> wrote in
news:I0Mmb.12434$%62.5271@newssvr29.news.prodigy.com:

Oh, was that the very same year that Israel ruthlessly and without provocation attacked the U.S.S Liberty? This was done by the same people that still chase phantasms of Holocaust perpetrators nearly 55 years after it ended, while claiming that the U.S.S. Liberty issue has been "resolved" or "closed".

http://ussliberty.org/ excerpts follow:

"During the Six Day War between Israel and the Arab States, the American intelligence ship USS Liberty was attacked for 75 minutes in international waters by Israeli aircraft and motor torpedo boats. Thirty-four men died and 172 were wounded."

"Israel claims they mistook our ship for the out-of-service Egyptian horse carrier El Quseir and that we brought the attack upon ourselves by operating in a war zone without displaying a flag. Not so. We were in international waters, far from any fighting, and flew a bright, clean, new American flag. The flag we flew is on display at the National Cryptologic Museum, Fort Meade, Maryland and can be seen there, or in the USS Liberty Images Archive."

http://home.cfl.rr.com/gidusko/liberty/

http://www.washington-report.org/backissues/0693/9306019.htm

http://www.logogo.net/liberty.htm

http://www.yellowtimes.org/article.php?sid=399 excerpts follow:

"(YellowTimes.org) • June 8 marked 35 years since Israel attacked the USS Liberty without warning in international waters, killing 34 Americans and wounding 172 more. The Israelis lied about it and persuaded our Congress to look the other way, and they are still lying about it today. But the Liberty will not go away. Every attempt to hide this story seems to bring more attention.

This past year brought a 60-minute documentary produced by CBS News Productions that was broadcast by The History Channel on Aug. 9 - much to the dismay and over the heated objections of the Israeli Embassy and various spokesmen for Israel who did all in their power to block it."

http://www.lewrockwell.com/orig/margolis12.html excerpts follow:

"At 0800 hrs, 8 June, 1967, eight Israeli recon flights flew over 'Liberty,' which was flying a large American flag. At 1400 hrs, waves of low-flying Israeli Mystere and Mirage-III fighter-bombers repeatedly attacked the American vessel with rockets, napalm, and cannon. The air attacks lasted 20 minutes, concentrating on the ship's electronic antennas and dishes. The 'Liberty' was left afire, listing sharply. Eight of her crew lay dead, a hundred seriously wounded, including the captain, Commander William McGonagle.

At 1424 hrs, three Israeli torpedo boats attacked, raking the burning 'Liberty' with 20mm and 40mm shells. At 1431hrs an Israeli torpedo hit the 'Liberty' midship, precisely where the signals intelligence systems were located. Twenty-five more Americans died.

Israeli gunboats circled the wounded 'Liberty,' firing at crewmen trying to fight the fires. At 1515, the crew were ordered to abandon ship. The Israeli warships closed and poured machine gun fire into the crowded life rafts, sinking two. As American sailors were being massacred in cold blood, a rescue mission by US Sixth Fleet carrier aircraft was mysteriously aborted on orders from the White House."

http://zog.to/3/liberty/lib-ind.htm excerpt follows:

"In June 1967 jet aircraft and motor torpedo boats of Israel brutally assaulted the American naval intelligence gathering ship USS Liberty. The attack was preceded by more than six hours of intense low-level surveillance. The attack lasted more than two hours, killing 34 Americans and wounding 171 others, and inflicted over 821 rocket, cannon and machine-gun holes in the ship..."

http://www.counterpunch.org/stclair1126.html

"After more than two hours of unremitting assault, the Israelis finally halted their attack. One of the torpedo boats approached the Liberty. An officer asked in English over a bullhorn: "Do you need any help?"

The wounded commander of the Liberty, Lt. William McGonagle, instructed the quartermaster to respond emphatically: "Fuck you."

I believe that evidence of Israel's "at times" inhuman treatment of others in the pursuit of their own safety comes from the increasing numbers of individuals in their own military that refuse specific missions. Few would fault an officer of the law or soldier in the military that takes positive and at times fatal actions against individuals or groups actively seeking to kill others. But in missions designed for revenge purposes against the Palestinians for terror perpetrated by some of them, Israeli military personnel are now, and have been over the years, experiencing soldiers refusing to do as ordered.

To know and to be, this is not even a question, there is no alternative.
You see it clearly in the loneliest little avenues between particles and
waves, shunned even by the gregarious quark and unknown by the various
strands of time, so big it cannot be seen, yet so little it is
immovable, lies the fabric of the ultimate reality gripped in the fist
of the all or nothing."

Most politically correct types are. They are a gutless, spineless
breed that hide behind everything possible and when it's safe
to come out of thier holes, they snipe and take pot shots at
everything that is good and decent, if not just anything
that doesn't fit thier sleazy, terrible, hate-filled agenda.

N.O.W., Earth First!, the ACLU and other yellow bellied
organizations like that are now quickly losing all clout and
political strength they have because they have gone to
the well of jealousy & race conflict just one time to many
to drink from, and now thier paying the price.

Good riddance to bad rubbish.

Clint

It is a good antenna. The weak part is at the bottom, where the base is
attached to the radiator. I would strengthen that tube.

Frank, I haven't used that particular one. Several years
ago I bought a Gap "Eagle" vertical--my wife wasn't happy
with wires festooned through the trees. :-) It actually
worked fairly well and was very easy to set up and to use.
For about 95% of contacts on which I compared them, though,
it was down a couple of S-units compared to a full-sized
loop fed with ladderline. I think this is pretty typical
of multiband verticals, based on what I've heard from others.
They certainly can work well, particularly considering how
little space they take and their low visual profile. Not
sure if this helps you much .. but it IS better than the
incredibly vile political gibberish, isn't it? ;-) 73!

No surprise here. Thats how they all are. On the other hand, I don't hide. And I stand by what I said. And I could care less if that puke likes it or not.

Just in case you don't get it...Try this one. I have advocated from the git-go, before 9/11 which re-inforced my belief, that all the worlds ragheads need to be given a free ticket to Mecca, where we can test our newest tactical nuke.

Like that? Too bad.

And whoever it is, odds are good that both people may be carrying
the same mitochondrial DNA (adjusted for mutations) i.e. long lost
cousins. :-) 'Course, blood didn't stop Cain from killing Abel.

HI,

I am considering buying this antenna, especially to work on 160-80-40 meters. I am in Europe. What can I expect from this antenna? Is it suitable for EU contacts only, or can it be used for DX also?

7'3's,

Ron

Sorry folks, making racist remarks is never cool or justified. I feel
sorry for people like you. Anyway, what does it have to do with
radio?

Again, I feel sorry for people like you. I am sure some day you will
see the error of your ways.

Hearing people like you it is no wonder so much of the world hates the
USA.

Yep....if they believe killing thousands of innocents on 9/11/01 was a good
thing, they need to be gone. Any other stupid questions?

Oh BTW.....I don't think folks from Italy, France and the Cheerokee nation
are ragheads.

No socialist Canadian....the folks don't actually hate us. They just want what we have, and not pay for it. Your 'kind' showed its true colors recently when we asked for assistance in Iraq. If you think that won't have unhappy consequences for your nation, you are mistaken.

Think about it.....asshole liberal puke. Oh there I go again calling you names.

Tell ya what 'Private' call your local mountie and tell him to come get me.....looooooossssseeeerrrr.

And, of course, you can prove that no "raghead" genes sneaked into
your White family tree during The Crusades.

Thanks Rag, Ken and Dave

Believe me Ken ALL inputs and experiences are of value when it's 'head-scratching' time. I, too, have used verticals in the past and found them very good.

Thanks, Rag, for the tip about the lower tube - I'll check this out.Much better to fix it before it's broken in this case.

Dave - Thanks for your tip about the traps. You may be interested to check out the website at:
http://www.qsl.net/ei7ba/r7_vertical.htm
where EI7BA has listed the resonant frequency of the various traps. Guess you might have these already though.

Thanks again everyone. I think I'll go for it.

Personally, I thought most of the regs here were a little more adult than all this...

IMHO, all human beings deserve respect, unless they personally have done something to negate that right. However, I do believe also that anyone who has an opinion on any subject should have the intestinal fortitude to make themselves known. This, too, is part of respect.

Where I do not condone Dan's attitude toward some ethnic groups, he does have a right to voice it, and he does make known not only whom, but where he is by use of his ham call. I didn't read the complete thread, so I don't know what these others said, but it would seem that they, too, allowed it known to whom to attribute what was said. For this, despite their political views, they have my respect.

Please, though.. name calling is so juvenile, and unnecessary. This isn't PC, it's good, old fashioned, good manners.. something we could use a lot more of nowadays. (Funny thing, isn't it, how PC gets pushed, but things never get any better?)

Does anyone know who the operatoor of 3V8BB was during the CQWW Test this past weekend? QSL route?
Thanks.

I didn't find it here but this is a great resource:

http://www.ng3k.com/Misc/cqs2003.html

I also didn't find it in last week's QRZ DX, but I'll keep
an eye out for it--I'd like to QSL it also. A QSL from the
same station from a couple of years ago is my only Moroccan
confirmation to date.

My big question from CQ WW this year (I had a *great* time)
is IH9P, from Zone 33. A couple of sources call it "Italian
Africa"--but that's NOT on my own list of active DXCC entities.
Has that changed, or does IH9P count for Italy?

The manager for 3V8BB is YT1AD, I heard the operator mention this callsign
last weekend. 3V8 is Tunesia, not Morocco.

More info about this station can be found on http://www.ih9p.com/
For DXCC it counts for Italy, for WAS Africa and for WAZ zone 33.

CQWW counts a few entities from the WAE list as separate countries,
including "Italian Africa". It counts as Italy for DXCC, however.

> I was thinking of buying one second-hand.

Hi,

Excellent vertical. Over 295 DXCC confirmed in several years.
Less good during low solar cycle as now, but still good, much better than
any G5RV (I use now). A bit sensitive to QRM.
Works fine at ground level with soft radials burried into the ground but
best results are obtained at about10m high (on a small pylon) and with 10
radials in the ground.

Another ham used it too : see his QSL album on http://www.qsl.net/on4ldu/

Ummm... Dan.... actually, I was much more 'jumping on' "Private" than you.

Try re-reading my post, and then make your comment (or apology?). What I very succintly said was that though I do not agree with your politics, I support your right to voice them, and respect the fact that you do so without anonymity...

2623. 80M antenna question

Newsgroup: rec.radio.amateur.dx
Date: 2003-10-27 20:20:47 UTC
From: aa5qt@aol.com
Message-ID: <20031027152047.20009.00000147@mb-m07.aol.com>
Source record: 8557

My country total on 80 CW is very small, so I plan to do something about it. I'd like some recommendations on a modestly priced 80 meter DX antenna. I can build it or buy it.

I plan to put up the antenna atop a five acre piece of land, at about 1200 feet above sea level. There will be no power lines nearby.

Is a vertical a good solution, or would a dipole be better? What about practical heights for the wire antennas, and should the vertical be elevated or placed on the ground?

Thanks in advance,
Gary K5QT

> last weekend. 3V8 is Tunesia, not Morocco.

Not quite enough brain cells online today. :-)

I accidentally deleted that line but you said YT1AD--
isn't that Hrane? I think I've got a couple of QSLs
from him in the past--always nice to have a good
QSL'er on the other end!

I only got three new countries from CQ WW SSB this
year, but I sure had a lot of fun. What did everybody
else think about it?

Have you considered the Titanex 160/80/40 m Vertical? With a sufficient number
of radials that should do a good job and give you the one or the other
occasional new one on 160, too.

What is your current antenna?

I'm currently using a "mini-G5RV" with a height of 25 feet, in a
deed-restricted subdivision. I'm moving to the country in a couple of months.

Hi,
For what I experimented during this low solar activities where we all need an excellent antenna to work in low bands, the vertical like a R7 placed on top of a 10m high mast, with a dozen soft radials burried into the ground is perfect.
I did another test with aluminum tubes, 20m long "only". Was light enough to be erected alone then a 2d man to pull on wires and erect it perfectly. Signal QRO, similar to R7.

A dipole, but very long, 30 or 60m long, or even a beverage if you have some place left can also worked and will display some lobes? Try to place it as high as you can (lambda being quasi impossible).

See also ARRL ant.hdbk for curtains like antennas and other variantes and the famous ON4UN book about working low bands.

The jerk that called me a racist and put my address on the internet,
soliciting 'ragheads' to come here and attack me.
>
> Is that allright?

I thought it was cool when he "did it" to me. I sign all my posts with my call, and there are callbooks everywhere, so the only thing he really allegedly "did" was to threaten to send some angry raghead my way. Gee, I'm scared about that... (Not!)

As for being called a "bigot" by an apologist for ragheads, I couldn't work up too much concern over that.

Historical note: Almost every african who was ever captured and sold in the americas to slavery was captured by arab slavers who had been infesting the congo basin for more than five hundred years. They were there centuries before the brief opening of the market for slaves in america, and were there long after it closed.

The arab slavers would typically take an entire village at a time, murdering anybody who was either strong enough to resist, or too weak to make the long walk on a long, heavy chain to market. Pregnant women and small children were typically murdered because they did not travel well. There is documented evidence of arab slave-raids in the congo basin going on as late as the mid-1950's. The great majority of the african natives captured over those centuries were of course used by the arabs themselves.

The progeny of the africans who were sent to the americas are living free lives in a free country today. As far as can be seen, there are no surviving progeny from the much greater number of africans who did not go to the americas but instead were used by the arabs. Perhaps this is so because castration of slaves has always been a common practice among the arabs.

... So when an apologist for this uncivilized, backward and violent tribal culture calls me a "bigot", I can't help but smile at the irony there.

Overall, I guess this doesn't bother me because I expect anybody who sticks up for the raghead set to be some kind of an uncivilized jerk anyway, so I wasn't surprised by his behavior. He didn't say or do anything interesting or unusual. He acted pretty much as you would expect an uncilized jerk to

act.

(Yawn)

Our coalition is helping the Iraqi people to build a secure, hopeful and
self-governing nation which will stand as an example of freedom to all
the Middle East,'' George W.Bush said [in his radio address].

G.W.Bush's father also sent the army to Kuwait to liberate the Kuwaitis
from the same dictator they had helped prop up against Iran. Then there
was a man called Oliver North...

Reagan's administration was heavily involved in helping the Afghani
mujahedeen against the Soviets. Yes, that same Bin Laden.

Holy shit, you're right! They are uncivilized jerks!

What ever happened to the American ideal
Freedom of Religeon?
IF you are American and rebel against what we stand for
what religeon is it that you advocate that all must adhere to
so that they are not to be killed ?
Are there any other citizens of this country that you disagree
which you advocate their demise?
Art Unwin

Looks like Daniel L. Jeswald (W4NTI) and Charles D. Braham (N5PVL)
will think twice before making racist remarks on these groups. I
still can't believe they wrote it and may actually think that way.

In any case, DANIEL! you are in your late fifties for crying out loud.
Grow up! What would your 4 children and 5 grandchildren think.
There must be more than a couple black or arab people in Anniston
Alabama, think of how they would feel if they knew what you wrote.
You have done some nice work in Anniston, don't pee it all away over
some racist remarks. Applogize or at the very least keep it to
yourself.

That statement IS tongue-in-cheek, right? By far the largest part of the world's population no doubt doesn't view us at all, doesn't even (or barely does) know we exist (billions in India and China). Of those that do know we exist, most see us as decadent, Godless, and hedonistic. And, thanks to the press at large, that we live in fear of criminals taking our lives and property (and that our guns only make this worse).

Some (those that are allowed to know from whence comes their aid) see us as generous. Those that know our basic political system (without the embelishment of their local government propaganda) see us as democratized, though most poor countries see us otherwise.

Just my observation of the world press.. YMMV

I haven't made any racist remarks. What I have done is to characterize arabs as "rag-heads"... That is not a racial slur and could not be, as there is no "arab race". There are a number of arab tribes though, characterized by the habit of wearing a rag on their heads. You can call it anything you like, but it's still a rag to me. Get the picture?

You are right about one thing. If I were ever tempted to make a racist remark, I would most certainly think twice. The situation never comes up though, so I guess its a moot point, isn't it?

If arabs wish to be respected, they'll just have to do like everybody else and start acting respectably. The best, most accurate description I have heard of the various arab "governments" today characterizes them as "crapulent kleptocracies".... Between that, the insistence upon anti-american propaganda in the arabs schools (where they exist), the mistreatment of arab and enslaved foriegn women by cowardly, vile arab men, and the refusal to stop supporting civilization's terrorist enemies, there's just not a lot to respect in arab culture. It stinks from top to bottom.

That's my opinion. If you don't like it, come up with one of your own. But please - stop whining and snapping like a cur when confronted with opinions that you do not like to hear. Try to pick up a little manhood, somewhere.

Well done Tim and welcome to the hobby. You may find some useful material
for your IL studies at: www.amateurradiotraining.org.uk

Eight more local M3s passed their Intermediate Exam at the Phoenix Radio
Club yesterday and most start studying next week for the new RAE- along with
a previous 'batch' of 2Es- next week.

The club is also running a another FL course, provisional date early
December.

Good luck with the IL!

uk.rec.radio.cb is where you need to be. A licence that is
obtainable from scratch after only two days' effort is not a
Ham Licence.

You have been examined on your ability to operate a rig.
CBers are not stupid such that they need to pass an exam before
operating their rigs.

What's the matter now, Airy? Couldn't you even qualify for a CB licence? I'm
told you're expected to know your name, that must have given you a problem.

Hello again,
Thanks to Thierry and Surious Noise for the info.Certainly ON4ldu seems to think a lot of the r7000 but opinion on the 'eham' site seems divided. Perhaps the 7000 is OK if you have a little time on your hands and a little patience?

I'll think about it.

Thanks to all, you've been a great help.

When you ask the question "How good is an xxxxx antenna", you have to
remember that the answers are all relative - to the type of antennas
that the person answering the question has used.

A guy who's never had a directional antenna, and who was using a G5RV
up 10 feet will tell you that a mutiband vertical is WONDERFUL.....

A guys who's been using a five element monobander on every band will
tell you that a multiband vertical sucks.........

So one guy will be very happy with it, and another will not.

What YOU have been using may be the deciding factor in the question
will YOU like it.....

I would venture to guess that if you put up a dipole on any particular
band, and compared it in real time to the R7000, you'd find the dipole
usually worked better. But then you'll need a bunch of dipoles to
duplicate each band, and maybe you don't have that much space.....

I don't know much about antennas, technically, but I've always like to

play with them, and I have the habit of comparing antennas with each
other - always try and have two I can switch - instead of comparing
what other people think about them. With lots of sunspots, you can
work 278 countries with a chain link fence for an antenna, so boxes
full of QSL cards don't necessarily indicate that an antenna works
well.

Having used a few of different multiband verticals in the past, I'd
say your money would be better spent on a ball of wire (if you have
the space to put it up). With two trees, some rope, and some wire,
you can build a four element 20 meter quad for a couple bucks, and
it'll beat the vertical by 40db.....

It ended when the Muslims of this world decided to attack and kill
Westerners, just because they were Westerners.

It was further solidified by 9/11.

Mr. Bush is not correct on this issue. It is a war against Muslims. And,
guess what? we will win it. They will not be allowed to infiltrate this
country and destroy it from within. It was tried by the Communists, and
they failed.

The Muslims started it. We will end it.

Have a nice day

Of course he qualifies for a CB licence Frank. Doh! You don't need to pass a
test to use 27MHz!! All you have to do is fill in a form..... ah - a flaw in
my argument - to do that, reading and writing are a pre-requisite......

Incidentally, the RLC have no record of anyone named Airy R. Bean which
means he must be a pirate.

Too bad that, by attacking Iraq, he attacked one of the most secular of
Arabic countries. There are now more Al Qaida in Iraq than before.

What Iraq had to do with 9/11 I'll never understand.

Having gone through one 9-11, we went took steps designed to forestall us having to go through another. Of course it is much more complicated than that, but you'll find that this basic motivation is always there.

If you are having trouble understanding these issues, then you are probably reading the wrong news sources. Shop around and look for better sources of information. Round-file the ones you are using now. They're not doing the job.

Just think, had we focused on Bin Laden, the one actually responsibly for
9/11, instead of running off on some wild war based on a perceived threat,
we might already have the true culprit.

I swore to myself I wouldn't get involved in this thread, but, being
attracted to Ham Radio because of the supposed international handshakes, I'm
a sucker for trying to get along with the rest of the world.

Excuse me, I spent one evening swotting up on licencing regulations and passed the C & G RAE the next evening. This was at my first attempt, "from scratch" as you describe it. Thus I have a proper amateur licence, and have held it for 30+ years. If you are saying my licence is not a "Ham Licence", I would agree, but not in the sense that I believe you to mean.

One thing you might consider is that apparently Cushcraft doesn't stock spare parts for discontinued models (The R7000 was replaced by the R8 several years ago) and there have been some reports of occasional problems with the matching network , so maintenance may present a problem.

I'm using a Hy-Gain AV-640 which is quite similar in design (except no traps) with the base at ~15 feet and while the performance isn't that of a quad or yagi, it works better for me than the low dipole I used previously (no tall trees here either). I have a good takeoff over salt water to the north and that does seem to help.

2663. NW7US Propagation Bulletin - 28-X-2003 Alert

Newsgroup: rec.radio.amateur.dx
Date: 2003-10-28 21:15:14 UTC
From: nw7us@hfradio.removethispart.org
Message-ID: <3f9edc16.187099686@news.donobi.net>
Source record: 8598

Folks:

What an exciting time for radio enthusiasts! This past weekend's media hype about a major geomagnetic and solar storm was unfortunate and unwarranted. But, today, solar events have occurred that has the whole propagation science community buzzing.

I just finished talking with Mike Weaver from the National Ocean and Atmospheric Administration Space and Environment Center (NOAA SEC). He is the Solar Forecaster that has been on duty for the last four days. Last week, I also spoke with Bill Murtagh, who is beginning a shift to cover the next few days. Our discussion focused on today's events, and what will transpire over the next few days. The following is my perspective of current solar and geophysical conditions and the forecast for the next 48 hours or so.

On 28 October 2003 UTC, an X17.2-class flare from NOAA Region 486 occurred at 0951Z, peaking at 1110Z. This caused severe radio blackouts (R4 is the reported level, see http://www.sec.noaa.gov/NOAAscales/ for details on the scales used) on the sunlit side of the Earth (which would have been morning, on the eastern coast of North America). It also created an S3 (strong) solar radiation storm. Associated with this flare are a proton event and a full-halo coronal mass ejection (CME). This flare is the second most intense of the current solar cycle. It is not historical. We expect several of these large flares during any given solar cycle.

The proton event started at about 1330Z, and has exceeded all threshold levels, causing a Polar Cap Absorption event (PCA). It is expected that this proton event will be prolonged and last for the next 36 hours, to some degree. This will cause transpolar path degradation (don't expect any DX over the poles nor over any high-latitude paths) for the next few days.

The CME was a full-halo, and is directed squarely at the Earth. Based on the speed and recordings, so far, Mike expects it to impact the Magnetosphere at about 1500Z 29 October 2003. When it hits, the shock alone will produce at least G3-level geomagnetic activity. This would translate to a Kp index of about 8, even if the IMF (Interplanetary Magnetic Field) is not pointed south when the CME arrives. After the initial shock wave, if the Bz is negative, indicating that the IMF has turned south, the Kp index will remain high, with a possible Kp of 9 during the passage of the CME. This will cause between a level G4 and a G5 (severe to extreme) geomagnetic storm. This will severely degrade HF and MW radio communications (while possibly enhancing VHF/UHF propagation).

The timing of the arrival of the CME shock will occur after sunrise for those in North America. Therefore, I do not expect to see any Aurora

tonight, local time on 28 October 2003. However, I do expect radio auroral mode propagation during the day of 29 October 2003, and continuing into the night of the same day. If the IMF remains negative, there is a strong chance of a prolonged severe geomagnetic storm, with associated Aurora viewable as far south as southern California and Florida.

Continued radio blackouts are likely from new flare activity. As I write this, we are in the decline of a new M-class flare. There are eight main regions on the visible solar disk, three of which are actively producing flares. One of these is about to rotate out of view. One of the new regions just rotating into view is active, and has already produced some M-class flares.

Overall conditions:

In the next 12 to 20 hours, expect great conditions on frequencies above 15 MHz, while in general, all HF will have periods of radio blackouts during the flare events, if they occur. (And, they will occur). Sometime around 1500Z, tomorrow (29 Oct 2003), expect all HF communications to become severely degraded with the arrival of the CME shock, and for a severe to extreme geomagnetic storm to commence and last for a prolonged period. S3-level (severe) solar radiation storm conditions will last for the next 24 to 48 hours.

I expect a lot more activity during this week, but I don't view this as a "third" peak in this current solar cycle, number 23. Several past cycles have had such bursts during the decline of those cycles.

I'll post more about this soon.

Interesting that you mentioned the Indian Nations
The tactics that America is supporting against Islam is the same
tactics that we used to take Indian land away and killing all
"savages" I.E. the only good Indian is a dead Indian and delay
retribution by smoking so called peace pipes.
This is exactly what we are doing in the MidEast. We are supplying
missles and weapons of death as we erase villages from the maps, herd
what is left into refugee camps formerly reservations, build on their
land under cover of peace talks (we have doubled the houses and
population in the West Bank in the last ten years) and we condone the
killing of all those who object to the land stealing or the
confiscation of the holy places. These so called savages pray three

times a day where we are schooled to pray once per week and thus are superior.
The one thing that we havent thought thru (The rest of the world has but we have easily prevented any interference in our plans by virtue of a U.N. veto.)
We in America has still not recognised that we are outnumbered with respect to Islam and yet ask for assistance from those who we continualy push aside.
We will continue to see non conventianal fighting by those we tread on and continue to take the stance that they must stop resisting take over of their posessions so that then and only then we can talk about things not withstanding that we will continue to steal while we engage in stalling talks.
Since these people refuse to lie down stay still and be quiet while we do our thing some of our christian brothers advocate the use of nuclear weapons to finish off all that show resistance. We have done it before while we said we are a christian country so if the foundations of christianity have not changed
we have the same excuse to do it again. Bush has stated " bring them on " and he is more than willing to hold on to the coats of those are willing to fight
for him instead of our Country. How many years will it take for us to realise
that we cannot kill off all those that disagree with us without receiving retribution of some sort that will destroy our own way of life and thus kill off our own beginnings.

Remember we have many who follow the faith of Islam thru out our country.
To prove that they are loyal Americans can we ask them to give up their faith
without retribution ? What will the modern christian do if the tables are eventualy reversed ?
How sad it is to see the return of body bags because of our crushing of other religeons for our own material gain.
Art Unwin KB9MZ...XG

An American by choice which is quite different to the loudmouths who prefer violence and yet are only Americans by the accident of birth with no allegiance to true Americas ideals

Hi Jim,
Well yes, of course your basically right, though I might quarrel with your 40db for the quad and in any case I'm a little low on tall trees!

Really all I want to do is get the current node a little higher into the air and the 7000 looked as if it may be the answer (compared with my 1/4-wave at ground level). I don't want to alienate the neighbours so the less stuff I put up, the better.

Right now I'm torn both ways ----- from all accounts the 7000 may need a little maintenance as time goes by, especially as where I live the wind howls and howls during the winter.

We'll see! I only work 40 c.w. ("so why a multiband ant ?", I can hear everyone howling). I may well end up with a dipole with the middle tied as near the top of my GP as possible. I have a good takeoff over the sea so that should be worth a db or two.

Best wishes,
Frank

I cannot believe these two clowns are still at it. I found some of their original comments and sure enough they are as racist as they come. People have a right not be discriminated against or abused because of color, race and religion etc....

If they don't stop making racist posts on this "RADIO" newsgroup I am sure people in their own town will find out about them. They will be very embarassed very soon. Keep it up Charlie and Danny... Keep it up....

Just like you and I.... I am quite sure there are things that we will fight to death disagreeing about, and I am sure there are some things that we will agree on too....

My way of thinking is "Don't hate the man... hate the thoughts driving that man....." As Cecil stated, for the most part I am also closely aligned to the Libertarian party, which is even more "right wing" than the Republicrats, but I do believe in the basic human rights issues. I don't hate all Arabs.... just the fundamental/orthodox ones like Osama, and the others responsible for 9/11 and other related events.

And how much time had you spent previously, being
interested in matters of radio and electronics that enabled
you to pass the rest of the RAE with such facility?

Exactly.

BTW, you are the first person to suggest that your licence is
not a proper Ham Licence. Are you admitting to being a
CBer-Masquerading-As-A-Radio-Ham, perchance?

Hi Gary,

we are using a GAP Voyager DX IV (have a look at there WEB-Page)
with great success. It has only 3 radials and is good on 40+80,
Not too good on 160. I worked Heard Isl. a couple of years ago during
a huge European pileuo without a problem Same with HC8.
In my opinion a fine antenna. The only disadvantage is a vy noisy RX,
but this is also a QTH question. We are in an idustrial area....

Gud luck on 80m.

Bow Wow!

Good luck on attempting to "embarass" me, Fido! One of local hams here joined the Army, and was recently stationed in Baghdad. After being flown into Quwait, he was put in a convoy headed toward Bagdhad airport. Within hours of moving into Iraq, my friend's convoy was attacked and he had to mow down a couple of screaming raghead morons so that they could continue their rudely interrupted cruise down the road to Baghdad. Iraq is infested with hundreds imported raghead terrorists from Saudi Arabia and Syria these days, all anxious to die. Like all of the local hams, The hams in my area are proud that my buddy was able to expedite the way to hell for a few of those worthless arab scum.

Again: Good luck with "embarassing" me, dog-boy! :-P

I guess Bush is a genius. Maybe that's what it takes to invent new words.
Yesterday it was, "suiciders". It's one thing though to invent words,
another to invent enemies behind every tree.

Here's a nice shot of your "genius" hero Rumsfield shaking hands with Saddam
a few years ago: http://www.mydd.com/archives/000427.html

Ah, who to believe in this mixed up world. Politicians are politicians. None
of which are geniuses. Calling politicians geniuses is a slap in the face to
Marconi, Maxwell, and Tesla.

That's a good policy, right up until the point where innocent people are murdered or enslaved by "men" who happen to be thinking those thoughts you hate.

Do not confuse the map with the territory. The thousands of innocent victims of 9-11 were not killed by "thoughts"... They were killed by "men", if you want to be generous and classify arab terrorist scum as "men".

My feeling is that when they step beyond the pale of civilized behavior to become terrorists, then they no longer qualify as "men", but instead must be handled like as you would handle a rabid dog. - You put them out of their misery before any innocent people can end up being hurt by them, and to prevent them from infecting other dogs.

I had been working in the electronics industry for about 5 years.

> BTW, you are the first person to suggest that your licence is
> not a proper Ham Licence. Are you admitting to being a
> CBer-Masquerading-As-A-Radio-Ham, perchance?

I admit that the licence that is relevant and held by me is an "Amateur
Radio Licence". It has nothing to do with poor quality acting. I also hold
other licences permitting me to use radio communication equipment. None of
the licences I hold or have held permits me to use "CB" equipment in the
context that you suggest.

Geoff

2689. QSL ROUTE: 5W1RA ???

Newsgroup: rec.radio.amateur.dx
Date: 2003-10-29 15:26:40 UTC

In May I posted a help message asking for QSL route info for 5W1RA.

Thanks for those who replied, however, the current owner or QSL
manager for this call is -not- N6RA or W6RQ.

Apparently the call has been reassigned several times, causing
considerable confusion.

Has anyone recently worked 5W1RA and obtained valid QSL data?
Thanks and 73

Thanks Bob and Jim

I hurried over to the reviews of the HF2V and AV-640 on the eham site and they made for interesting reading.

I think I'll hang on to my hard-earned cash for a couple of weeks. There's a big radio sale then and there are usually a few guys selling antenna gear.

All the comments on this thread have been most helpful to me - and I really mean that. There's nothing like getting a little input from those who have actually used a piece of equipment, so thanks to all.

Hope to see you on 40m CW.

How could things have gone any worse? We still don't have Osama, and guys are still dying in Afghanistan even though the news acts like it's fallen off the earth.

As far as Sadam, what, specifically, did he have to do with 9/11? When it comes down to it, he was probably more of an ally against militant Islamic terrorists than any other.

....and, I'm probably more conservative than you..... There's nothing more liberal than "nation building", something we were told six years ago that wasn't going to happen under this presidency. My how things change.

I'll make a prediction: the 87 billion dollars going to Iraq is just the beginning.

Alan

Ryan,

I think that many (most) Libertarians would view themselves as
Moderate or more "middle-of-the-road'.

Not as extreme as the "Right Wing" [Ultra-Conservative Christian]
segment of the Republican Party.

Or, not as extreme as the "Left Wing" [Socialist Secularist
Anti-Religion] segment of the Democrat Party.

Even these extremes from both ends of the political spectrum to some
degree 'believe in basic human rights': Although their definition of
what those 'basic human rights' mite be, would vary on a point or two.

2700. All HF bands are dead, wed afternoon NJ USA

Newsgroup: rec.radio.amateur.dx
Date: 2003-10-29 21:19:36 UTC
From: Robert Casey <wa2ise@ix.netcom.com>
Message-ID: <3FA02EE6.1080001@ix.netcom.com>
Source record: 8384

It's now 21:14 zulu, and aside from one local QSO on 80m, everything
is dead on HF. Of course, I wouldn't expect much from 80 and 40 right now,
but 20, 15 and 10 are very dead right now. Some QRN (about s-2),
little QRM and no QSOs.

2701. X11-class flare 29-X-2003

Newsgroup: rec.radio.amateur.dx
Date: 2003-10-29 21:30:26 UTC
From: nw7us@hfradio.removethispart.org
Message-ID: <3fa03141.20045977@news.donobi.net>

Quick update:

At least an X10 or X11 class flare just occurred, peaking at 2049Z
29-X-2003, adding to the already dead HF conditions due to the CME passage
and the Kp >= 7. This one is a short-lived flare. Quick recovery is
expected. I don't know, yet, what CME might be associated, if any.
Details, soon.

At the moment, most of the HF spectrum is "closed" to propagation, not
because of the flare. I'm have not been hearing signals here in the
Pacific Northwest on most of the HF, before the X11 flare. On many e-mail
reflectors, I am reading some folks as saying, "Wow, that X17 flare sure
has shut down the bands." Actually, it is not that solar flare that messed
up the bands, today. Flares tend to cause radio blackouts that might last
from a half hour to a number of hours. On the otherhand, major geomagnetic
storms will cause HF radio propagation degradation because of
"recombination."

Today's general outage is due to the passage of one of the fastest moving
coronal hole mass ejections on record. It caused the highest Kp index - a
level 9 geomagnetic storm. Since it hit us, the Kp index has remained at
or higher than 7. This is a severe geomagnetic storm. During a
geomagnetic storm, the ionosphere experiences "recombination" - much like
what happens at night. The maximum usable frequencies fall - sometime no
HF propagation is possible, because the ionosphere is completely
recombined... this is what is happening at this moment. Most of the HF
spectrum is "shut down."

Now, added to this geomagnetic storm and the general closure of the HF
spectrum, we have this new X11-class flare from 2049Z. I don't yet know if
a CME was associated with this one.

More as details become available...

Let me try to explain thing in special english.

Bush and Rummy are smart.

Most Americans are dumb.

The idea is to occupy territory in the middle of the zoo zone.

The purpose of the army is to kill enemies of the USA.

The Iraqi regime was a enemy of this country.

A. They paid money to the family of the murders that killed women and children in Israel

B. They provided safe passage for terrorists.

C. They provided logistical support to terrorists.

D. In cahoots with Syria they helped to funnel
funds to terrorist organizations, such as hezzbolah, which is guarding the Chemical weapons Sadam made in the Beka valley of Lebannon. Which is controlled by Syria.

Have you noticed how quickly Iran has become nice nice with Washington? Think maybe it might have something to do with 130,000 US Combat troops on their border?

You must understand that it is much much better to have ragheads throwing bombs and shooting off RPGs in raghead land, than some city in the USA. You do agree don't you?

So basically I am saying we are using the hell out of Iraq. What place is better to have a fight?

You are hung up on the WMD thing. Move on, history is bypassing you.

I agree, we were mislead. But what is the option at this point? Do we re-call our warriors and watch the middle east explode? We have made our bed and its time we layed in it.

In otherwords we are in the middle of the crap. So we have to take care of business.

I hope that one day you Bush haters will get your head screwed on straight and realize that you are HURTING this country.

Jane Fonda did the same thing about Nam. It hurts morale. It caused
American troops to die. It extended the war.

Stop repeating history and back this president so we can take care of
business and get the hell out of there.

Again Daniel, this is a Radio newsgroup. You and Chuck should take
your racist comments to yourselves. Everyone knows the type of people
you are.

All you have to do is read your own posts to see who started what.
You got caught, now grow up.

Luigi

I appreciate your "special english". Very well written and easy to read.

What evades me now are some of the conclusions and logic. On one hand you say Bush and Rummy are smart, then you admit we're in the middle of crap. (Iraq) Who put us there? And, don't go saying it was the terrorists. The terrorists we were after were in Afghanistan, Yemen, and Indonesia, with help from all over the world, including our buddies the Saudis. The response to the 9/11 terrorists should've been considered separately from our policy concerning Iraq. Bush-Cheney did a splendid job of mingling and confusing the two disparate issues.

You wanted a sand box to fight in, what was wrong with Afghanistan? Why the shift? Just as we were moving in on Ladin we did this major shift to Iraq. That made no sense.

As far as Iran, we were already on speaking terms. The upcoming elections and internal moderation were already under way long before this whole mess. Both Iran, and especially Iraq, were sworn enemies of Ben Ladin. They were actually on our side as far as routing out Al Qaida. And, as far as justification for invading Iraq based on supporting Hamas, and others, what about Saudi Arabia, home of The Wahhabi sect, certainly no pals of ours. I don't know what agenda Bush, Cheney, and Rumsfield had for going into Iraq. Which theory sounds good to you: Being Israel's big brother, or getting our hands on all that oil? Perhaps it was the personal vendetta Bush Jr. had for avenging the threat made to Bush senior by Saddam? Who knows. The point is, we had the World's sympathy after 9/11 and now we've squandered it, along with 87 billion plus dollars into quick sand.

Our option? Re-hire the Iraqi military.....who did NOT fight us while we entered their country. Help them establish some sort of code and leadership, perhaps through the UN.... and leave Iraq to the Iraqis. We're now just 'occupier's, and as such are quickly drawing the ire of all moderate Arabs. People who could help us.

Yep, 87 billion is just the beginning. Real smart your heroes. Oh, and don't leave out Cheney (Halliburton) in your adoration. He's pretty cunning too.

Hi,
Explanation full exact even if lack of detail (normal in a forum) ;-)

> Now, added to this geomagnetic storm and the general closure of the HF
> spectrum, we have this new X11-class flare from 2049Z. I don't yet know
if
> a CME was associated with this one.

CME was associated to that X flare (as 90% of the time due to strong E.M.
field beneath the Sun surface, near the huge dark spot)
X-flare reached immediately the Earth (ligh speed) while the CME about 2
days later (so now !).
See on SEC or NASA websites for update and detail.

Full explanation in French (but there is a Translation module available too)
on my website:
Aurora: : http://www.astrosurf.com/lombry/aurore.htm (full of pics page
7-11 or so) with links to SEC, etc.
Solar indices X, etc : http://www.astrosurf.com/lombry/indices.htm

Better, with the sound of the 28 oct sun flare :
http://www-pw.physics.uiowa.edu/space-audio/ (2 page further)

NB. For the readers without audio that sounds like an airplane approaching
then going away, low pitch, as it was heard in water.
Strange.

Expanations about type III bursts (in French, but try to use the translation
module at left of my wecbsite):

My cousin is driving near Dundee in Scotland and says the aurora is faint,
but visible. That was about 30 minutes ago.

Cheers

No no. "Only" the largest of this solar cycle (geostorm G5).
Last occurence is 1989.
Some info on http://celestialdelights.info/sol/sunblast03.html
Personaly a never seen such a flare saturate a CCD this way (and I gathered
a image database over 2 GB !)

Indeed.
They are visible from Scotland and above as red glow when Kp=5. and above
see graph at http://www.astrosurf.com/lombry/aurore2.htm (end of page)

There are some pic on forum alt.binaries.pictures.astro

2724. NW7US Propagation Update 30-X-2003, 2000Z

Newsgroup: rec.radio.amateur.dx
Date: 2003-10-30 21:09:51 UTC
From: nw7us@hfradio.removethispart.org
Message-ID: <3fa17cee.82296879@news.donobi.net>
Source record: 8458
Cross-posted to:
alt.ham-radio.hf,alt.ham-radio.ssb,alt.ham-radio.vhf-uhf,rec.radio.shortwave,rec.radio.amateur,rec.radio.amateur.dx

A coronal mass ejection (CME) associated with yesterday's X10-class flare (peak at 2049Z 29-X-2003) impacted the Earth's magnetosphere today at about 1700Z 30-X-2003. Kp index reading show 7 and 8 at many reporting stations. Bz is at the moment strongly negative. At least a G4-level geomagnetic storm is in progress as well as a very strong proton event (PCA) and space radiation storm. This space radiation storm has reached an S4 level on 29-X-2003, and is again on the rise. It is the second-most energetic event during this current solar cycle, 23. Expect this storm to coninue, especially with the prediction of further flare events.

The Aurora index is 10 (maximum), as I write this. This indicates a very strong Aurora. Look for continued AU propagation (reports from yesterday show VHF propagation via AU as high as 222 MHz) and visuals at high to some middle latitudes. I expect a medium to high probability for visual aurora in northern states of the US, tonight.

Solar activity remains at extremely high levels. Region 486 is now the largest sunspot complex of the solar cycle. This very huge sunspot covers an area of over 7.8 billion square miles and there is some indication that it might continue to grow. The flare potential is still very high and further X-class flares are possible, which will affect us until this region rotates over the western solar limb on 5-XI-2003. Several M-class flares, and a number of C-class have occurred already from this region, since the X10 flare. Region 488 has further developed and has merged with former region 493. The region could produce X-class flares. Some M-class and C-class flaring has occurred from this region, as well.

I agree with Thomas (KN4LF) and others that the X17 flare was historic. But, I would say that this increase in solar activity is not uncommon during the decline of a solar cycle. Other cycles have given us the same sort of excitement. What's more, we're in the fall Aurora season. Twice a year, near the equinox, the conditions are favorable for Aurora. Such is the time now. Having the sun provide us with lots of aurora-causing events has given opportunity for some unexpected but welcomed VHF propagation, and visual light shows.

Overall conditions right now are rather poor. I do hear some north/south paths on 11 meters open, but not much more than that. WWV is non-existant at my location, except a faint fading whisper at 10 MHz. Lower frequencies are a bit more alive. The flux is nicely high, so when the geomagnetic fields settle down a bit, the higher level of ionization provided stronger openings on the HF bands, and higher in frequency. Last night, I was hearing SW DX on as high as 17 MHz. This morning, 10 meters was nicely open for North/South paths here into the Pacific Northwest.

I am in East Central Alabama. I am hearing 55A signals on six meters.
Worked IL and OH. It was strong enough to work K9OIM on SSB.

I only run 60 watts output to a 3 element yagi.

Thank you for your reply.

Before posting my message I too obtained this info. "As usual", or at
least "as usual" for the past 3-4 months, there is no reliable QSL
info for this station; correspondence to KB7KET goes unanswered.
Granted, QSL's may not be the most important thing in his life, but
what I was seeking was valid QSL data, which appears to still be
unavailable.

You presume we can only 'focus' on one bad guy at a time. Not true.
Further, Bush never mentioned a clear and present danger from Iraq.
He stated the potential danger + the known inhumanities Saddam was
perpetrating. No one ever said he didn't have WMD and if they are no
longer to be found, there are only two possible answers. He hid them
in the millions of square miles of hiding places or he ushered them
out of the country (prolly to Syria).

By the way, more people die in the top 5 populated East Coast cities
daily than are killed by hostile action in Iraq.

When would you consider it "finished"? At one point the "war" was declared finished.

Alan

I too could care less what he calls it. I don't consider calling someone a
raghead racist. If he does, thats HIS PROBLEM.

I too have been on here a LONG time. It will take a whole lot more that
that Canadian Commie has to run me off.

Take your best shot....raghead.

Not quite. That was Walt Kelly, via Pogo.

Bill Mauldin gave us such gems as:

Is there a view like this for the enlisted men?
I got a target for ya, but ya gotta be patient!
A movin' foxhole attracts the eye!
Don't startle the Kraut; he's got a full bottle!
I'm an expert on European dirt!

The only unfortunate thing about knocking off Sadaam was that he was hated by Al Queda, and, in return, did his best to exterminate them. The enemy of my enemy isn't always my friend. It's quite possible to have two differing enemies. And sometimes, it's wisest to let you and him fight. I think it will be enormously ironic if we ultimately find that Sadaam sealed his destiny by being a great bluffer.

Sadaam earned his fate by attacking our economic lifeline, and being a generally de-stabilizing force in a region quite important to the USA. Yes, it is about the oil! Just how many Grannys in Schenectady have to freeze to death because they can't afford heat until we recognize that our economy is totally dependent on oil availability & pricing?

Temporarily, we work with despicable foreigners who despise us, because we are dependent on them in some way. The industrial world's dependence on oil has caused the worst economic imbalance we could imagine, giving economic power to many who are unfit to govern a bucket of shit.

The best thing we could do for America would be to greatly reduce our economy's dependence on foreign oil. OTOH, I don't expect this to happen in my lifetime.

Good idea Ed. How is this to be accomplished?

Everytime a 'plan' comes up the left wing invironemental waco's jump up and down. Maybe we can start burning trees that are not eaten by the pine beetle. Oh...that wont work either will it?

See my point?

Far from ironic, it was probably part of a deliberate and relatively clever strategy that went awry for this tyrant.

I intend to show (again) why the argument "Saddam Hussein wouldn't thwart the inspections unless he was hiding large amounts of WMDs" is profoundly ignorant. He would thwart the inspections regardless. Let me explain why.

Say, for the sake of argument, that Saddam had MASSIVE stockpiles of WMDs. It would stand to reason he would thwart the inspection process in every way possible, to postpone or avoid their discovery. This much is obvious.

Now say, for the sake of argument, that Saddam's WMD arsenal was decimated in 1991, and he could NOT overcome the inspection regime, the surveillance, and the no-fly zone enforcement to rebuild his arsenal significantly. What would he do? He would thwart the inspection process in every way possible. Why? Because once it came out, that Saddam couldn't outfox the West, it would make Saddam look weak and reduce his intimidation power drastically. Megalomaniacs simply don't do that.

As background, it's perfectly obvious that Saddam Hussein is/was a demagogue with intentions of expanding his influence to rule the Arab world. Does anyone seriously doubt his megalomania? Just look at the cult of personality he's created, if you remain doubtful. He loves (loved?) worship. Now, if you're a megalomaniac dictator, with aspirations to power and influence, who personally gains pleasure from the worship and fear of others, how would YOU act?

First, by "standing up" to the inspections, Israel, or whatever rabidy anti-Western Arabs hate, his popularity among rabidly anti-Western Arabs (of which I hear there are a few) skyrockets. He looks strong and therefore an attractive candidate for leading them. Perhaps even better than Osama bin Laden, his chief competitor to that aspiration. This feeds right into his megalomania. He wants power and followers, and by "standing up to" the allies, and Israel by proxy, he gains major political capital that might have been useful once Saddam had successfully rebuilt his conventional military. A weak nation could be conquered and "Saddamized" rather easily with nothing more than his strong conventional military and an indigenous population of committed sympathetic radicals.

Second, by seeming to have WMDs, he intimidates us more. He uses our stupidity, namely "Why else would he thwart the inspection process at every turn if he wasn't hiding weapons?", against us. Saddam figured the allied forces would think twice before striking at him given the potential for mayhem our soliders would face from these (assumed whether real or not) WMDs. So bluffing at having WMDs was a free deterrent he thought would protect his power. A classic poker bluff.

So it's not very hard to see why he would pretend to have weapons that were blasted to dust in 1991 that he couldn't rebuild.

Where it went wrong for Saddam was he underestimated the single-mindedness of the US Administration to remove him from power. This was something Wolfowitz, Perle, Rumsfeldt, and others had wanted to do for years (cf. PNAC).

With the mounting failures to find any evidence of WMDs in Iraq, the only thing to do for an Administration committed to war was to cook the junk evidence and rush to war at maximum possible speed. And that's precisely what they did.

We achieved the result of pissing off our allies, who understood that removing Saddam was a US political objective that had nothing to do with security of the USA or much of anyone (except Israel, which gains obvious benefits). They openly criticized us and the quality of our evidence. It was junk evidence. They knew it. Everybody knew it except the American and British people, evidently, because they both were the targets of a thinly-disguised sales job.

To bolster the case for going to war, they even went to Iraqi dissidents for threat assessments. The Iraqi dissidents had every reason to co-operate in any scheme to unseat Saddam, and CIA internal documents show they did not consider this source to be reliable at all. Yet their

known-unreliable statements were often repeated
as a justification for war against Iraq. They also
selectively grabbed the minority of evidence bolstering the
position that Saddam had stockpiles of WMDs we just couldn't
find, and ignored the rest, in their making a case for war.

What went wrong for the Bush Administration, is more and
more of the American people (and even more of the British)
are seeing that we were sold a bill of goods by a cabal of
explicitly dishonest manipulators and their dupes.

What went wrong for the American people is we're losing
soldiers virtually every day in a country that posed no
significant threat to our security interests, prior to
invasion.

I said two things before, and history proved me right on
both. First, Saddam didn't have significant WMDs. They
will never be found, because they aren't there. Second, the
Bush Administration is one of the most incompetent and
dishonest we've seen in our history. As the facts emerge
(and it will take quite some time given this is by far the
most secretive Administration in our history), eventually
Bush's Administration will win the mendacity crown from
Richard Milhous Nixon.

> totally dependent on oil availability & pricing?

Jimmy Carter tried very hard to get alternative energy
programs underway. As you can imagine, it was primarily oil
and gas interests that lobbied -- and eventually succeeded
-- in killing subsidies to their competitors. Though some
falsely claim it was environmentalists who were to blame,
this appears only to be true in the nuclear energy case,
where in fact environmentalists did great harm by forcing
the use of dirty coal instead of at-least-cleaner nuclear
energy.

But show me where environmentalists engaged in a concerted
successful effort to block government subsidies for wind and
solar research in a significant way, and I'll buy you lunch.

> power to many who are unfit to govern a bucket of shit.

Saddam wasn't fit to rule the viruses in the bucket of shit.
I'm glad he's gone, but the US economy will suffer for
decades due to the foolish idiocy and dishonesty of this
horrible and corrupt secretive Administration.
>
> The best thing we could do for America would be to greatly reduce our
> economy's dependence on foreign oil. OTOH, I don't expect this to happen in

Probably not. Until the entrenched energy interests figure
out a way to get government money for research, or how to
make a profit, or when reserves finally push gasoline up to
$5 a gallon or so. Then the tune will change by necessity.
Market forces will eventually compel the use of alternatives
to oil and gas. Whether it's in 10 years or 200, I can't
honestly guess. Could just as easily be either.

No, this person is just a lone sicko. It was fun yanking his chain for a
while but now I'm getting bored with him. It's sad but I've noticed that
these sicko types are inevitably very bored, very boring people. I suppose
that's why it doesn't bother them to repeat themselves. After all, they have
no real expectation of ever saying anything interesting or relevant. - or
on topic, for that matter.

Hi Ross, I entirely agree with your assessment of the pathogenesis of the current episode of war fever. This war is the neoconservatives' war. Soon to be the American people's war if it can be conflated, after the fact, with the so-called War On Terror. If the occupation can be made to draw in Al Quaeda and other insurgents and the witting or unwitting participation of other states in the region, then presto, we have the perfect post hoc justification for the invasion in the first place and the perfect pretext for toppling the next domino, so the neocons desire.

But in their overweening certainty and their impetuous rush to war they overlooked the need for international troops to man the occupation and the innate hostility and justifiable suspicion of the Iraqi people. If coalition forces do not find themselves in a quagmire, at the very least they find themselves taking first steps in a long hard slog (an uncharacteristic moment of honest introspection by Rumsfeld or a deliberate leak to better position himself in the internecine blame game now playing out within the administration?). Bogged down as they are in a police action which is dispiriting and not their brief, our troops cannot be cycled out to go onto bigger and better things. If the neocons in charge had played their hand more adroitly, had awaited a season of inspections and won over full international cooperation as did Bush the Elder, then perhaps even now they would be spurring their destriers into Damascas or even into Tehran. The trick now is to bite off more than we can chew, get into grave difficulty, and rally the American people around the troops. Then take another bite. The neocons have repeatedly claimed that the WMD's are buried in the sands of the Bekaa valley, that is why they are nowhere to be found in Iraq. Perhaps this is the next bite of the apple gleaming in their eye. Events, mostly of their own making, have overtaken their resources, not their ambition. If regional war can be achieved, look for a call to resurrect the Draft.

I have read that Rummy and crew established their own little intelligence agency within the civilian side of the Pentagon which examined the raw data collected by the traditional spooks and culled out only the bits which gave credence to a pro-war assessment, even, as you say, going so far as to rely upon the unsupportable evidence presented by unreliable characters such as Chalabi (sic), a member of the diaspora for forty years, and others. Having made their own assessment in their own way, they injected it high up into the national security brief presented to Bush without having it vetted

through the Intelligence chain of command. This is how all the dubious claims about Saddam's WMD's and hostile intentions came to be included in the President's speeches, and how the Niger uranium claim, based on crudely forged documents and widely discredited within the CIA and the State Department, seemed to take on a half-life of its own. The neocon chefs cooked the intelligence books. I have also read that Sharon has his own little rump intelligence agency which is mistrusted by the Mossad.

I wouldn't give Bush too much credit for deviousness. Nixon he is not. I think what happened after 9/11 is that the neocons played to Bush's exchatological leanings. I think they duped him and they duped the American people. Maybe now, with the continuing difficulties we face in subduing Iraq, he is wising up and reevaluating how we got into this mess in the first place.

Regards,

Grumpus

The powers that be do kick binaries off this newsgroup but I
assume that is an automated process.

Go ahead Larry, make my day.

Take your best shot.

Put your best foot forward.

All it proves is you can dish it out, but you can't take it.

For your INFORMATION, if you care. Neither myself or Charles started this.
I recommend you throw off the Canadian goof, you know the one...your buddy
'Private', Luigi or whatever dumb name he uses.

You see I use my real name and standby what I say. If you think it's
racist, I call you a dumbass.

See how it works?

I would love to drop this subject. Tell you what...tell your buddy to shut
the hell up and I bet that works.

You must have me confused with somebody else. Just today, two more soldiers of ours KIA, and our forces involved in a firefight which left ten Iraqi noncombatants dead. Tell me, how long will they love us at this rate? How long before the patience of the average Iraqi runs out? We are up against the clock friend. We didn't get into this predicament by accident, we deliberately stepped in it.

Regards,

Grumpus

No wonder everyone is complaining about you two! I have been to
Canada lots of times and have never met anyone half as stupid as you
two.

Posting racial slurs and including your call signs?, what the heck did
you think would happen. Capital "L" loser....

echolink node in baghdad -soon

there may soon be an echolink node in baghdad
the node could be used by any ham in baghdad to talk home on a vhf
radio
it could also be used for mars contacts

73 Ian G3ZHI

http://www.qsl.net/g3zhi - has many ham radio links

I usually monitor G4NJI node 5200 simplex 145.2875mhz

There is no way to remove racist posts by "Private" or "Larry". Sorry!

The "regulars" here have been using usenet for years, and do not have to speculate as to whether posts can be "removed" from usenet. They already know better.

Amazing how consistently ignorant the little "racist" group that has invaded this newsgroup is.

Sooner or later they will all take a hike, and we can get back to discussing amateur radio.

Charles Brabham, N5PVL

Oh, we gotta be shaking in our boots NOW! Haw Haw Hawr! :D

A bity of history on: Fighting Arabs

That reminds me of an interview that occurred back in 1967, right after the Israeli 6-day war. Israel had been attacked on all sides by a number of raghead states, who were determined to murder every Israeli man, woman, and child in Israel. (According to the raghead newspapers of the time.)

Of course we all know what happened. Despite having almost no outside support, and with only a few obsolete old French aircraft, the Israelis thoroughly kicked every one of those ragheads countries' asses, taking some of their land from them instead, just to teach the uncivilized scum a little lesson.

Asked about his astounding success in mowing down thousands of screaming raghead fanatics with very few casualties (sound familiar?) , the Israeli general agreed to give the reporter the exclusive secret to his unprecedented military success...

"Fight Arabs." he said.

As for being called a "bigot" by an apologist for ragheads, I couldn't work up too much concern over that.

Historical note: Almost every african who was ever captured and sold in the americas to slavery was captured by arab slavers who had been infesting the congo basin for more than five hundred years. They were there centuries before the brief opening of the market for slaves in america, and were there long after it closed.

The arab slavers would typically take an entire village at a time, murdering anybody who was either strong enough to resist, or too weak to make the long walk on a long, heavy chain to market. Pregnant women and small children were typically murdered because they did not travel well. There is documented evidence of arab slave-raids in the congo basin going on as late as the mid-1950's. The great majority of the african natives captured over those centuries were of course used by the arabs themselves.

The progeny of the africans who were sent to the americas are living free lives in a free country today. As far as can be seen, there are no surviving progeny from the much greater number of africans who did not go to the americas but instead were used by the arabs. Perhaps this is so because

castration of slaves has always been a common practice among the arabs.

... So when an apologist for this uncivilized, backward and violent tribal culture calls me a "bigot", I can't help but smile at the irony there.

So the anonymous anti-american Trolls alternately whine and threaten, just like a coy dog.

(Yawn)

Charles Brabham, N5PVL

Amateur Radio Newsline™ Report 1368 – October 31 2003

A NOTE TO THOSE WHO ONLY “READ” AMATEUR RADIO NEWSLINE(tm)

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would like to invite you to listen to the audio version. This Amateur Radio Newsline (tm) script is actually written for the “spoken word.” It is recorded each by professional broadcasters and is available for private listening or rebroadcast over your repeater. Two methods of delivery are available: FTP MP3 or dial-in telephone. Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to our voice newscast. Free FTP Downloads are available at our website by clicking on the newscast number at the top of the page.

RESCUE RADIO: HAM RADIO AND THE SOCAL FIRES

From the Mexican border to the suburbs north of Los Angeles, large sections of the Southern California were under siege the past week. This, as ten major and several smaller wildfires blazed their way across the area.

Fanned by hot, dry Santa Ana winds gusting to 60 miles an hour, the wildfires dervored everything it their path. At least a eighteen people are dead and over 1500 homes and businesses have been destroyed. And as we go to air, well over 1 million acres have burned.

Gordon West, WB6NOA, has been at one of the busiest Red Cross evacuation centers for the past several days. He took time out to file this first hand report on how hams are aiding in fire relief efforts:

--
Audio report only. Hear it at www.arnewsline.org/quincy
--

As we go to air, ham radio operators continue their firefighting communications support efforts. More on their role in future Amateur Radio Newsline reports. (ARNewsline(tm))

**

RESCUE RADIO: KCOP REPORTS ON HAMS DOING FIRE DUTY

Los Angeles television station KCOP appears to be the only one so far to mention the role the role ham radio operators are playing in fighting the Southern California wildfires.

On Monday night October 27th, the stations 11 P.M. newscast showed video of a group of unidentified hams at their radios in the Los Angeles western suburb of Simi Valley. At the same time anchorman Rick Garcia read a brief synopsys of what the radio amateurs were doing. It explained how the hams could provide communications between the various relief agencies that could not speak directly with one another.

While short and simple, the report was well written, accurate and nicely done. KCOP is one of two Fox owned stations serving the Los Angeles area. (ARNewsline(tm))

**

RESCUE RADIO: CALIFORNIA WILDFIRES FROM SPACE

The wildfires that ravaged southern California were even impressive from space. Just before returning to Earth, NASA astronaut Ed Lu took photographs from 240 miles above the fires through the windows of the International Space Station. The photos taken on Sunday October 26th are on-line at www.spaceflight.nasa.gov/station. (NASA)

**

RADIO LAW: AUTHORITIES LOOKING FOR ALLEGED TOWER TERRORIST

Law enforcement authorities in northern California and southern Oregon are searching for a man seen tampering with electrical towers. This, as one official says that the incident smacks of being an act of domestic terrorism.

According to the CGC Communicator, the latest incident took place the week of October 20th just south of Redding California. It involved a heav-set man who used large wrenches to completely unbolt one leg of a four legged transmission tower.

Authorities say that he had half the bolts removed from a second leg when he was spotted and fled. Witnesses chased the suspect onto Interstate 5, where he

sped south into Tehama County and disappeared. As we go to air he is still at large.

According to a news release from the Federal Bureau of Investigation, the suspect is similar in description to a man seen removing bolts at another tower near Klamath Falls, Oregon earlier in the day. He is described as a white male, in his early 60's with long, blackish-gray hair and a salt-and-pepper beard.

More details on this story and the suspect are in cyberspace at: http://redding.com/top_stories/local/20031022toplo043.shtml (CGC Communicator)

**

HAM RADIO IN SPACE: ECHO LAUNCH ANNOUNCED

Ham radio will soon have another new bird on orbit. This as AMSAT-North America announced that launch of the AMSAT OSCAR-E will take place on March 31st. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

That's right. Some really good news on the ham radio space front. This, as word comes that the Echo ham radio microsat is now scheduled to launch on March 31, 2004.

Earlier plans had called for a May 2004 launch for the tiny bird. Echo Project team member Richard Hambly, W2GPS, reported at AMSAT-North America's Annual Meeting that the project has made significant progress in recent months. So much so that advancing the launch date was possible.

Echo is a fairly simple ham radio by todays standards. It has two UHF transmitters. Each one runs from 1 to 8 watts and the bird is capable of simultaneous operation. Also on board are four VHF receivers and a multiband, multimode receiver capable of operation on the 10 meters, 2 meter, 70 cm and 23 cm bands. This means all sorts of transmit and receive band combinations will be possible once the tiny ham-sat is in space. This includes PSK31 on a 10-meter SSB uplink.

Hambly says that the project team powered up the Echo flight hardware in late summer at Space Quest. Data communications, command and control, and attitude control subsystems were tested. Also checked out were the radio equipment, power systems and cabling. It all checked out and that's good news for hams waiting for this latest addition to its family of birds in space.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, reporting.

--

A Russian rocket will carry the 10-inch-square satellite into a low-Earth orbit from the famed Baikonur Cosmodrome in Kazakhstan. (ANS)

**

PROPAGATION: ANOTHER CME AT SUNSPOT 486

More solar activity affecting ham radio. This, as one of the most powerful solar flares ever recorded erupted on the Sun the morning of October 28th.

It happened near giant sunspot 486. That’s the sunspot we reported on last week and this latest explosion hurled a coronal mass ejection or C-M-E directly toward Earth.

Based on the speed and recordings it was expected to to impact the Earth’s Magnetosphere at about 1500 U-T-C on October 29th. When it hit, the shock alone wold produce a G 3 level geomagnetic activity. A level high enough to produce bright auroras at high latitude sites such as Scandinavia, Alaska, and Canada.

As hams are well aware, a solar storm can fully disrupt communications on some bands while creating unexpected propagation on others. What this one is doing is still developing as we go to air. More on this story as the reports come in. (ASWLC)

**

DX DEBACLE: ANNABON ISLAND TEAM SPEAKS OUT

An update to the plight of the plight of the Dxpedition group forced to flea Annabon Island a few weeks ago. Jeramy Boot, G4NJH, is in Nottingham England with the rest of the story.

--

We reported two weeks ago that the 3C0V DXpedition to Annobon Island - off the west coast of Africa - had been forced to close down but at that time the reason for the enforced closure was not known. A press release has now been issued by the 3C0V team which says that all four operators - DJ9ZB, EA5YN, EA5FO and EA5BYP - are now back home safe and sound.

The press release says that each operator had proper individual licences and the group had written authorisation to import and operate amateur radio equipment on the island. However, on the 4th of October the military authorities there demanded that the group should dismantle the stations and leave for the Equatorial Guinea capital. Two days later DJ9ZB and EA5FO were allowed to leave the country but the other two team members remained in the capital until the 10th, when they were eventually able to return to Spain.

Jeramy Boot, G4NJH.

--

The complete press release is in cyberspace at www.tabarca.es.mn Wew will have more DX news later on in this weeks program. (GB2RS)

**

ENFORCEMENT: FCC WRITES TWO CITIES ABOUT INTERFERENCE TO THEIR HAMS

The FCC has contacted officials in two cities about interference to their local ham radio operators. The Agency’s Daryl Duckworth, NN0W, explains:

--

Duckworth: “The mayor of Lubbock Texas, along with copies to the Lubbock City Manager, the Lubbock City Attorney and Lubbock Power and Light have been sent a letter concerning interference to Brian Edwards, W5KFT. This interference, possibly from equipment operated by Lubbock Power and Light, dates back to 1998.

Along similar lines, the mayor of Gouverneur, New York, has a follow-up letter concerning the lack of response to a previous FCC notification of RFI to Morton Howard, W2ATO. The mayor has 15 days from receipt to reply.

This has been Daryl Duckworth, NN0W, reporting.”

--

Both mayors were invited to contact FCC Special Counsel Riley Hollingsworth if they have any questions concerning these matters. (FCC, RAIN)

**

ENFORCEMENT: FCC RAIDS SAN FRANCISCO UNLICENSED STATION

The Federal Communications Commission has raided the San Francisco couple's home and shut down an unlicensed radio station. The action removed Liberation Radio, a low-power alternative FM station that broadcasts political views and independent music programs from the airwaves.

The operation took place at the residence of Jim and Charlotte Hatch. The Hatch's had been told to take the station off the air before the raid. Their first warning came in July, when FCC investigators showed up at the couple's home and asked to inspect the equipment. They refused the FCC entry and were warned that they faced a potential $17,000 fine.

Instead, agents returned on Wednesday October 15th with a search warrant and more than a dozen federal marshals and confiscated the stations’ broadcast equipment. This included the transmitter, mixing console, computers, tape and CD players, turntables and even the rooftop antenna.

No charges have yet been filed against anyone associated with the station but further enforcement action is expected in this case. (Published news reports)

**

ENFORCEMENT: TEXAS FIRMS CITED FOR CB RADIO VIOLATIONS

The FCC has cited David P. Pace Jr of Nacogoches, Texas, for alleged violations of its rules dealing with the sale of 11 meter C-B gear. According to ther agency, Pace, doing business as Pacetronics and Pace Marketing was offering for sale more than three dozen types of non certificated CB transceivers under the guise of them being ham radio transceivers.

According to the ARRL Letter, the FCC evaluated similar radios and found that the devices at issue are not only amateur radios but can easily be altered for use as Citizens Band devices as well. The regulatory agency says that dual use CB and amateur radio gear cannot be certificated under its rules.

The FCC also warned Pace that its rules requires certification for external RF power amplifiers or amplifier kits capable of operation between 24 and 35 MHz. The FCC asked Pace to submit a written statement describing actions taken to correct the apparent violations. The FCC's Dallas office issued the citation. (ARRL)

**

COMMUNICATIONS CRIMES: FLORIDA MAN CONVICTED OF VIOLATING DMCA

A Boca Raton Florida man has been convicted of selling hardware to illegally tap into DirecTV satellite broadcasts. Following a four-day trial in federal court, a jury has found that Thomas Michael Whitehead guilty of one count of conspiracy, two counts of selling devices designed to unlawfully decrypt satellite television programming and three counts of violating the Digital Millennium Copyright Act.

The Digital Millennium Copyright Act is a 1998 federal law that makes it illegal to make or sell any technology designed to get around copy protection measures such as the electronic cards used by DirecTV to give consumers access to its programming. With his conviction, Whitehead becomes the first person to be found guilty by a jury under it. He faces a maximum sentence of 30 years in federal prison and up to up to $2.75 million in fines. (Published news reports)

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: GET READY FOR BOOK RFI

Remember those Radio Frequency I-D tags that are of such concern to ham radio? Well you will never guess where they are about to show up. Ken Butler, W1NNR, tells us:

--
The San Francisco Public Library's plans to track books by inserting an RFID

tag to each one. These are the same radio tags that hams tried to get the FCC to not deplioy earlier this year.

Now, library officials in the Bay area say that they will install the RFID's, into the roughly two million books, CDs and audio visual materials patrons can borrow. The system still needs funding and probably will not be ready for deployment until at least 2005.

--

So in a few years when you receive QRM to your ham radio operations, you might find that its coming from that novel you are reading late at night. (Science Today)

**

CONVENTIONS AND HAMFESTS: HAMVENTION 2004 WILL BE AT THE HARA

The Hamvention will remain at the HARA Arena through 2004. This, according to an announcement from the Dayton Amateur Radio Association which says that it has signed a one year contract that will keep Hamvention at the facility through next years outing.

The Hamvention planners are also looking for volunteers that want to help make Hambention 2004 a big success. To help gather support a new volunteer your services form is available at the Hamvention website. Its an on-line, fill in the blank form and you will find it at www.hamvention.org/volunteer.html. Just fill it out and the Hamvention folks will get back and let you know how you can assist.

The 53rd annual Hamvention will be held May 14th through the 16th, 2004, at the HARA Arena in the Dayton suburb of Trotwood Ohio. (DARA)

**

CONVENTIONS AND HAMFESTS: MICROWAVE MEET IN THE UK

Meantime, word that the Martlesham Microwave Round Table will take place on Saturday the 8th and Sunday the 9th of November. This, at the B-T Adastral Park, near the city of Ipswich in the United Kingdom. Featured will be a full program of talks and seminars including speakers from Europe and the United States along with a giant flea market. Full information is on-line at http://mmrt.homedns.org. There is no www in this URL address. (GB2RS)

**

ON THE AIR: THE 2003 SIX METER SPRINT

Last weekends 6 meter Sprint brought quite a bit of operation to the Magic Band. NEZ0P, one of the stations posting to the VHF Reflector says that he heard or contacted several semi rare stations for this time of the year. This included AA7J in grid DN-30, VE3CDP portable W9 in EM-58 and a couple of others. John adds that he held 34 Q-S-O's with stations in 25 grid squares during the short operating event. This included contacts into Maine, New Hampshire and Vermont. Not bad for a band that usually produces little

excitement at this time of year. (VHF eflector)

**

ON THE AIR: THE BAJA NET INVITES YOU

Berand Kirschner, WB0YCQ, reminds everyone that the The Baja Net meets daily at 08: 00 local California time on 7.238 Mhz. Kirschner describes the Baja Net as a friendly gathering spot for boaters. RV'ers and others who carry ham radio as they roam. (WB0YCQ)

**

DX

In D-X, word that ES1FB plans to be active as XW1FB. This, from Vientiane, Laos, threough the 4th of November. No word on times, frequencies or modes. (GB2RS)

Also on through November 4th will be K3BYV and N3CXM. They will are active as PZ5DX and PZ5JR respectively from Suriname. For both operations,. QSL as directed on the air. (GB2RS)

And GB50RAEN is on the air to celebrate the 50th anniversary of the founding of Raynet. Raynet is Great Britain'd equivlant of our ARES and RACES combined. The station is being operated by groups from West Midlands Raynet in the UK. (GB2RS)

Lastly, VK8NSB reports via Q-News that the Darwin Amateur Radio Club in Ausrtralia's Northern Territory will be operating a special event station to celebrate 25 years of self government. The station signing VI8NT will be on through the 31st of December. QSL directly to VK6NE or via the bureau. (Q-News)

**

THAT FINAL ITEM: ARNEWSLINE(tm) NAMES NT3V NEW CHAIR OF YHOTY COMMITTEE

And finally this week, we at the Amateur Radio Newsline are happy to announce the appointment of Mark Abramowicz, NT3V, as the new Chairman of our Young Ham of the Year Award Committee. Abramowicz replaces Larry Zettwoch, KR4IF, who served in that position the past 9 years.

For those of you not familiar with NT3V, Mark hails from Reading Pennsylvania, and happens to be the father of our 2002 Young Ham of the Year award recipient, Josh Abramowicz, KB3GWY. But Mark and Josh are not the only hams in the Abramowicz family. Mark's wife Suzanna is NZ3G and his daughter Amy holds the call sign KB3IJW. Only the two youngest members of the Amramowicz family -- sons Jonathan and Jordan are not licensed. At least not yet.

By profession, Mark is a news reporter and anchor at KYW radio in Philadelphia where he is known professionally as Mark Abrams. He is also is an adjunct professor at Temple University where he teaches writing for mass media and broadcast newswriting. And like his predecessor, Mark is very involved with the scouts and scouting program as are his two older children.

A very nice bio on Mark Anramowicz, NT3V, can be found at the KYW website. That U-R-L is http://www.kywam.com/staff/bios_detail.cfm?biosid=53 (ARNewsline(tm))

Hey there,

Anybody have suggestions for a good world wall map. I would like to have cities noted as well. I have looked around the Internet but there are so many wall maps. Just wondering if perhaps there are wall maps that cater to amateurs.

Thanks

I like my Radio Amateurs Callbook map of the world. I don't know if
they still make them. ARRL has a decent world map, too.
I guess it's not the same hanging a CDROM on the wall... :.)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, WA1S, K2EWB, KA2AEV, KF2HC, K3WWP, KI3O, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, K5LBU, N5FG, K8AV, K8YSE, NE8Z, W8AEF, KU9C, DL/VE3ZIK & contesting.info, DL1EK/DL7VOA & DX Newsletter, EA5EYJ, EA5YN, I2YSB, JI6KVR & JA-IOTA Islands News, JL1UXH, LZ1MS, ON5TN, VE1AL and VK4FW for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 26th/October, through Sunday, 2nd/November there were 235 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5Z, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9Y, A2, A4, A5, A6, A7, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE0A, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T30, T32, T7, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VK9C, VK9N, VK9X, VP2E, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS (Also FR5). Jose, ON4LAC, is now active as 3B8/ON4LAC until November 23rd. His activity has been mainly on 20/15 meters on SSB and PSK, but is expected to be active on RTTY also. He will leave 3B8 and head to Reunion Island (FR5) to be active as FR5/ON4LAC during the period of November 26th and December 15th. After this activity, Jose will head back to Mauritius and will be active again between December

17th and 27th. QSL via his home callsign.

3B8 & 3B9, MAURITIUS AND RODRIGUES ISLAND. Operators Hans/PA0VHA and Jack/PA3BAG are expected to be active this week as 3B8/homecall from Mauritius (AF-049) November 3-9th and again between November 15-24th. Activity should be on all bands (including the WARC bands) with Hans operating on RTTY and Jack on SSB. Look for these operators to be active from Rodrigues Island (AF-017) between November 10-14th as 3B9/homecall. Please note that operators will be with their XYLs and are on vacation, so radio activity will be limited. Most of their activity will be between 1200-1700z and after 1800z. QSL via PA0VHA. Hans also suggests to visit their club's home page at: http://www.pi4cc.nl

3B8, MAURITIUS. As you can see, this island will be very active during the month of November. Look for Willy, ON5AX, to be active as 3B8/ON5AX between November 6-15th. His activity will be on CS/SSB. QSL via ON5AX.

3DA0, SWAZILAND. Frosty, K5LBU, announced that he will be going here next March and is looking for several operators to tag along. His plans include a trip through the Kruger Game Park. If interested, contact him at: frosty1@pdq.net

6W, SENEGAL. Karel, ON5TN, will be active from Toubacouta as 6W/ON5TN between November 7-18th. His activity is planned for 40-10 meters; main mode CW and some SSB. QSL via his home callsign. His home page with an online log search is at: http://users.pandora.be/on5tn

9M6, EAST MALAYSIA. Bob, N2OO, (who was recently part of the BQ9P team) is now active from Sabah as 9M6OO until about November 11th. He has been active on all bands. However, he mentions that they are having a serious line noise problem there which has caused him to concentrate on the bands with the least amount of noise. He states, "Usually 28 and 24 MHz are very clean so I have worked USA mostly there. Unfortunately, the noise peaks to the north on 15 and 20 meters so those bands to USA are MOST difficult and I have avoided them. I am able to work Europe on 14 MHz as I can turn the beam slightly away from the line noise source. Low bands have been even more difficult. I have experimented with a beverage with no luck at all. So, will have to keep this itinerary until the noise is fixed. Prospect of that happening soon are slim..... The best time to locate me on 24 and 28 MHz is around 2200-0100z. Peak seems to be around 2330z +/-." Bob mentions that he has set up a couple of basic photo album Web pages for both portions of this trip (Pratas and 9M6) at: http://www.qsl.net/n2oo

BOOK AVAILABLE ABOUT CY9!. Al, VE1AL, informs: "For those few who have spent a few days on a DXpedition to St. Paul Is. (CY9) and know how ruggedly beautiful it is there, and for those who would be interested in the island from the perspective of someone who grew up there, I would suggest a new book by Bill Budge, VE1AAO. Bill grew up on the island." Bill can be reached at: VE1AAO@ns.sympatico.ca
His book is "Memoirs of a Lightkeeper's Son - Life on St. Paul Island."

DXCC NEWS (Clarification). Last week's bulletin reported that Wolfgang, OE1WEU, informed OPDX and readers that YI9OM QSLs are being rejected (Reason indicated: No Documentation Received). This past week "The Daily DX" reported that Wayne, N7NG, at the DXCC Desk states, "QSL cards for YI9OM are good for DXCC through November 30, 2002. QSOs after that date were not made from by the original licensee and therefore do not count for DXCC." ADDED NOTE: Bernie and "The Daily DX" also report that QSL cards for 7Z1SJ and HZ1MD currently do not count for DXCC as the DXCC Desk is waiting for documentation. Also, David Chen, BA4RF, informs OPDX that his YA/DL5NAV and OJ0/OE1ZKC QSLs were rejected. Reason indicated: No Documentation Received.

EA8, CANARY ISLANDS. Operators Erwin/DL1DX, Heinz/DJ1OJ and Sigi/DL6QW will be active as EA8AX during the CQ World Wide DX CW Contest (November 29-30th). Their operating class is not yet determined. QSL via the bureau.

ET, ETHIOPIA. Peter, ET3BN, has been active on 20/15/12/10 meters CW over the past week and weekend. Activity seems to take place between 1100-1630z. QSL via DL1JRC.

FR/E, EUROPA (Update and Changes). It seems the dates on the upcoming operations to Europa have been changed, but for the better. The team of five to eight operators will be active a little longer than previously announced. The team will be on Europa between November 24th through December 15th. They will use a French navy ship to get to Europa and also return. On the return trip they will head to Reunion Island. The callsigns they requested are TO4E for the main operation and TO4WW for the CQWW CW Contest. They plan to have 3 stations on the air. Donations can be sent via F5OGL.

FS, FRENCH ST. MARTIN. Ann/W2AZK and Brian/KF2HC return to French St. Martin with Gene/K2KJI, Mary Ann/K2RVH, Captain Bob/W5GJ and Mike/WA2VUN from December 3-10th. The group plans to have 2 stations on 160-6 meters CW/SSB/PSK31. They hope to add to their operation satellite activity and a 6m beacon prior to departure from the island. Captain Bob and Brian will participate in the ARRL 160m Contest that weekend using the callsign FS/W2JJ. All other times operators will sign FS/homecall. QSL to the callsign worked direct or via the bureau. QSOs with Ann and Brian are good towards the North Jersey DX Association's "NJDXA Award". See the following Web page for details at: http://www.njdxa.org/

FT1Z, AMSTERDAM ISLAND. Jean-Louis, F6AGR, from AMSAT-France, reports that Sebastien, who got his ham license October 31st, will be active for one year (2004) on AO-40 (and LEOs) from Amsterdam Island (FT1Z, Grid Locator MF81TX). He also plans to be active on 50 MHz, and on HF as soon as the French laws permit (he has a no-code license). AMSAT-France is actively preparing his SAT hardware (dish, 2.4 GHz converter, yagi, etc which have to be as light as possible), providing training and will handle QSL cards.

IOTA NEWS.....
AS-008. Operators 7N1NAI and JQ1QFO were expected to be active as homecall/1 from Mikura Island this past weekend. QSL to their home callsigns via the bureau or direct.

EU-123. Weather permitting, Peter, GM3OFT/P, was expected to operate SSB from the Isles of Fleet (SF-03 for IOSA) between 1200z on November 1st until about 1500z on November 2nd.

J3, GRENADA. Ann, WA1S, will be active as J38AA (expected license renewal) in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/All Band/Low Power entry. Ann informs OPDX that she will arrive late November 20th and stay until December 1st. Activity outside of the contest will be on 160-10 meters but will primarily concentrate on the WARC bands. The mode will mainly be CW, but she will do some SSB. QSL via her home callsign WA1S.

KH2, GUAM. Setsu/JL1UXH/KK2H and his XYL Maki/7L4FSR will be on the air from November 12-16th as KK2H/KH2. He states, "Not a rare entity though we will focus on EU and USA east coast." Activity will be on all HF bands CW/SSB. Setsu states, "Sorry, no RTTY/SSTV this time. This is rather a DX Vacation, not a DXpedition HI..." An online log will be available during the operation and will update on daily bases at: http://kk2h.4th.jp QSL via JL1UXH via bureau or direct. Please do not send anything to the U.S. address of KK2H.

LX, LUXEMBOURG. Operators Philippe/LX2AJ, Jorgen/DL4SDW, Uwe/DL4SDX, DL5SEJ and Bernd/DL8SCG will be active as LX7I in the CQ World Wide DX CW Contest (November 29-30th) as a Multi-Single entry. QSL via LX2AJ (Bureau).

OH0, ALAND ISLAND. Ari, OH5DX (ex-OH1EH), will be active as OH0Z in the ARRL 160 Meter Contest. Operating class is not yet determined. QSL via OH5DX.

OOOPPPSSS DEPARTMENT!!! In OPDX.632 under "NCDXA 2004 OFFICERS", OPDX received and reported the wrong callsign for Terry Hines. His callsign should be N4ZH (NOT N2ZH as reported).

QSL INFO AND NEWS.....
Vicente, EA5YN, reports that the complete 3C0V log (SSB,CW,RTTY, PSK) is now available at: http://www.tabarca.es.mn
Also, a direct link is available at:
http://personal.telefonica.terra.es/web/ea5yn/3c0lo.htm

Leon, K2EWB, reports that he is no longer the QSL Manager for AP2JZB. All current requests have been answered. New requests should go to the QRZ.com address for AP2JZB.

It was announced this past week that the BQ9P logs are now available online at: http://www3.ocn.ne.jp/~iota/newpage64.htm
Also, QSL Manager Steve, KU9C, has sent out the following press release:
"Now that it's noted that the log search for BQ9P 2003 is up and running, let me remind/share with you what will help to get your QSL back more quickly:
-if you notice a difference between your log and the log on line, NOTE IT IN WRITING and send with your QSL request. Please avoid sending me or the team members an email, it's much more orderly and efficient to deal with this in the process of checking the logs against QSL cards received.

-send to me ONLY your request for BQ9P 2003. If you add other
years of BQ9P in, or other calls I manage, it will slow your
return SUBSTANTIALLY. It amazes me how many folks will try to
stuff as many calls in as they can for me, and then wonder why
their return takes a long time. Rule of thumb, at least 2 months
per call beyond the first one....just the facts of life. Sometimes
longer, sometimes sooner, depends on the call, how quickly I
research that log, and a host of other items."

Steve will send out a press release when the cards start going out. He
states, "I've got the log....I'll be able to predict mailing once the
QSL card is put to bed.. If you care to donate to this operation, I will
forward donations received with the QSL cards to the team. As a note of
interest, the costs of this DXpedition were budgeted at approximately
8000 USD, and this does not include the cost of the operators getting
to Taiwan. The costs overran somewhat, due to the typhoon, and a need
to juggle aircraft to get to the island. All but about 1200 USD of this
amount was funded by the operating team..... Thanks es 73 Steve KU9C"

QSL HC1HC (operator Alfredo) was active in last week's CQWW SSB Contest
via NE8Z.

Paul, W8AEF, reports that the following logs have been uploaded to
the LookBook of The World (LoTW): XZ0A (2000), XZ1N (1998), TU5A (1996)
and FO8DX (1997).

The PZ5A contest logs are now available on the Web site at:
http://www.mdxa.org/pz_2003.html

MORE QSL routes for the 2003 CQWW SSB DX Contest are available via the
following Web page at: http://www.arrakis.es/~ea5eyj

Please QSL the following "Team Antigua Members" via these routes
"DIRECT ONLY PLEASE":
V26B via WT3Q V26KEN via N2KEN
V26EM via W2SN V26R via KA2AEV
V26G via N2ED V26U via W2UDT
V26OC via N3OC Direct only

QSL Manager Bill, VK4FW, informs OPDX and its readers to please note
the new address for all correspondance effective immediately:
Bill Horner, PO Box 513, Nambour 4560, Australia.

Alex, YO9HP, was active from Oman as A45WD in last week's CQWW SSB
Contest. QSL via YO9HP.

USI NEWS. Look for members of the Sandusky Radio Club, W8LBZ, to be active
November 7-9th from Kelley's Island (USI OH-001L) located in Lake Erie,
Erie county, Ohio. Activity will be on 40 and 20 meters, mostly SSB, using
the club callsign. QSL via the bureau for DX stations or direct (with SASE)
to: Sandusky Radio Experimental League, Inc., 2909 West Perkins Ave.,
Sandusky, Ohio 44870, USA.

V26, ANTIGUA. Paul/WY7I and Steve/K7LXC will be active as V26DX during the CQWW CW DX Contest as a Multi-Single entry. They will be there between November 28th and December 1st. They will be operating on all bands CW.

V31, BELIZE. Rumen, LZ1MS, informs OPDX that he has been active as V31LZ since mid August this year. He is a visiting Professor during this academic year (August 2003-April 2004) at the newly established Galen University in San Ignacio, Cayo district. He is using TS-870S (100w) and a trap vertical antenna 14 AVQ Hy-Gain on 40/20/15/10 meters. Rumen is active mainly on CW but there is some activity on SSB as well. He prefers the DX frequencies +/- QRM, the only exception is the 40m band where he prefers the lower end of the band. QSL via his son, Vasco Gechev, LZ3RZ: P.O. Box # 1, 1756 Sofia, BULGARIA.

VK9C, COCOS-KEELING ISLAND. Hisashi/JA1KJW and Kunio/JA8VE will be active as VK9CJ and VK9CV, respectively, between November 27th and December 7th. Activity will be on 160-10 meters CW/SSB/RTTY. Look for them to also be active in the CQ World Wide DX CW Contest (November 29-30th) as VK9CJ. QSL via JA1KJW.

VK9X, CHRISTMAS ISLAND. Charlie, W0YG, is now active as VK9XG unitl November 8th. As mentioned in earlier bulletins, Charlie's main priorities will be the low bands on CW (particularly 160/80 meters) plus some digital modes activity on the HF bands. For 80 meters, watch around 3506 kHz starting about 1045z and again at 2130z. Watch 20/15 meters for CW and RTTY activity at other times. Bernd, DF3CB, is reportedly providing online logs and will be uploading them regularly to the VK9XG Web site at: http://www.df3cb.com/vk9xg/

WEB SITE URL CHANGE. John, K3WWP, informs OPDX that his Web site (K3WWP's Ham Radio Activities) has had its URL changed. John's Web page (now in its eighth year of operation) includes the following:
DX QSL Routes ** Operating Tips
QRP Rigs Info ** CW Contest Calendar
Daily Propagation Info ** Your CW Stories
Teens and CW ** Monthly polls
Categorized Quality Links ** MUCH MORE
Please visit John's Web page at: http://home.alltel.net/johnshan/

WP4, PUERTO RICO. Daniel, WP4F, will be active in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/Single Band (40M) entry. QSL via WP4F.

XU, CAMBODIA. Peter, NO2R, has received his callsign/license and will be active as XU7ACY from Sihanoukville, January 5-12th. Activity will be on 160/80/40 meters exclusively. QSL via K2NJ.

ZK3, TOKELAU. Silvano, I2YSB, informs OPDX that he, Flaviano/I2MOV, Carlo/ IK1AOD and Marcello/IK2DIA will be active from here beginning February 13th and ending February 25th. Activity will be on 160-6 meters CW/SSB and possibly RTTY. The team is looking for your input on your needs and wants from Tokelau, and a survey is available at their Web site at: http://www.qsl.net/i2ysb

QSL Manager for DIRECT cards go via I2YSB. QSL Manager for BUREAU cards go via IK2DIA.

Too funny. I hope you can get those two racist pigs off. Charles and
Daniel have been jacking around for months now.

Now that their addresses are being posted I am sure someone will blow
the whistle on them.

Jackie

2780. 3 X-class flares in less than 24 hours... and counting...

Newsgroup: rec.radio.amateur.dx
Date: 2003-11-03 13:21:23 UTC
From: nw7us@hfradio.removethispart.org
Message-ID: <3fa65594.4193157@news.donobi.net>
Source record: 8514
Cross-posted to: alt.ham-radio.hf,alt.ham-radio.ssb,rec.radio.amateur,rec.radio.amateur.dx,rec.radio.shortwave

At the time of writing this bulletin, there has been three X-class flares in less than 24 hours. The first was an X8.3 flare from region 486 on 2-XI-2003, at 1725Z. Then, today (3-XI-2003) at 0130Z there was an X2.7 flare from region 488, followed at 0955Z by an X4.3 flare from the same region.

The CME associated with the X2.7 flare probably will not reach Earth. A radio burst was associated with the X4.3, indicating a possible CME for this flare, as well. However, due to its position, it is doubtful if this CME will impact Earth.

At the moment the geomagnetic conditions are quiet, with the The north-south interplanetary magnetic field component (Bz) remaining positive. There is a flow from a small coronal hole in the sun's southern hemisphere that is expected to arrive now. It is hard to know if it has arrived due to the loss of ACE data due to the proton storm. The proton event associated with the X8.3 flare continues, and is extended somewhat by these new flares, masking some of the readings we use.

The CME associated with the X8.3 flare will glance us sometime late on 3-XI-2003 to mid 4-XI-2003. We expect a possibly strong geomagnetic storm in the next 24 hours, as a result.

The solar 10.7-cm flux is starting to drop, but is still high enough to support propagation on the high HF frequenies. The low bands will suffer somewhat when the Kp index starts to rise later today due to shock expected from the CME, and from the flow from the current coronal hole.

Region 486 and 488 are rotating around the western limb of the sun by 5-XI-2003, and flaring should quiet down somewhat. Until then, some additional C, M, and X flare activity is possible. The coronal hole activity, however, will continue through this week, at least.

Bz changes sign in a few minutes so I don't know that it matters on
the scale of a report. It's whatever tangle of field lines the solar
particles are carrying at the moment, not something large scale.

Charged particles can't cross field lines, and the particles aren't
going to stay put, so the field lines go with them. That's mathematics
for you.

Of late the OH2BU Cluster has been difficult to reach for long periods of time as well as the spot search tool has returned no data for known good calls.

Anyone here know of the troubles or whatever for this site?

Thanks...

Another person who is nostalgic about the 9-11 attack, who wants to see the "action" moved back here in the U.S., instead of remaining over there in Iraq.

The children and other innocent people who were vaporised in the twin towers do not count, I suppose. Brenda Ann wants us to pull our troops out so that we can have more of that action here in the U.S...

I'll have to disagree with that kind of thinking. Sorry, Brenda Ann!

Charlers Brabham, N5PVL

Thanks for the link Alan. I was aware of Zogby's poll, but I hadn't seen his summary of the findings. Not too much cause for comfort if you ask me, and these results were from a poll conducted in August before the dire events of recent months. I sure hope Zogby follows up with more current data.

I think what the Iraqi people are telling Zogby is that the coalition should leave Iraq to the Iraqis. They do not want Saddam's jackboot replaced with the yolk of occupation, however benevolent our intentions may seem to be. They don't want a theocracy, nor a secular democracy. Least of all do they wish a government imposed upon them by a governing council handpicked by overlords. What they want most of all is the departure of foreign troops.

The choices confronting us are not attractive. If we leave prematurely Iraq almost certainly will descend into chaos and civil war. The likely outcome of this eventuality is the de facto partition of Iraq into three parts, a Kurdish state in the north, a Sunni entity in the middle, and a Shiaah state in the south with close ties to Iran. This outcome will immeasurably heighten tensions in the region if civil war doesn't lead to regionalized conflict first. Saddam, brutal and evil though he was, at least kept the lid on this pot.

On the other hand, if we stay, our troubles likely will increase. As it would be political suicide for Bush to increase our presence on the ground, something the Democrats just now are trying to goad him to do, we will have to make do with current force levels, and they are insufficient. There is no possibility to send more American troops until the election is over. And I will bet that whichever party takes power in 2004, no matter what they say to get elected, that party will send more troops, not bring them home.

The wild card is how much longer the American public will tolerate 300 soldiers KIA and 2000 wounded (read maimed) every six months, not to mention the exorbitant financial costs of occupation. I suspect that patience is beginning to run out, but that it is not yet exhausted. That may not happen until another administration has tried and failed to manage the occupation. I do believe that by then we will have a mandate to do the right thing and bring the troops home.

Regards,

Grumpus

You're putting words into my mouth, Charles. I said nothing of the sort.
It's (unfortunately) far too late to pull our troops out of Iraq, the course
must be stayed... what I have a problem with is Mr. Rumsfelds lassaiz-faire
attitude that our troops must die...

And, for the last and final time, Iraq and Saddam Hussein had nothing to do
with 9/11.. even Bush has admitted to this now.. get over it.

Last I knew, unless the Republican oriented college that I went to was
wrong, that on the political spectrum, the Libertarian party was more to the
right than republicans.....

>
> Not as extreme as the "Right Wing" [Ultra-Conservative Christian]
> segment of the Republican Party.

Religious affiliation does not necessarily mean right wing.... I am sure
there are some Jews and people of other religions that think "more to the
right" as well.

>
> Or, not as extreme as the "Left Wing" [Socialist Secularist
> Anti-Religion] segment of the Democrat Party.

Not to defend them, but I believe that some of them at least believe that
just because one is of, say for instance, the christian faith, that thier
own religion is not wromg, even if it does not align with the christian
faith.

>
> Even these extremes from both ends of the political spectrum to some
> degree 'believe in basic human rights': Although their definition of

Probably..... And I am quite sure that alot of people would fit in a few different places on the political spectrum, assuming and thinking the spectrum is a flat straight line going left and right..... (for linear thinkers)

Yes, I think we are all aware of what you said. My post was in response to what you said.

(Duh!)

> It's (unfortunately) far too late to pull our troops out of Iraq, the course
> must be stayed... what I have a problem with is Mr. Rumsfelds lassaiz-faire
> attitude that our troops must die...

Mr. Rumsfelds' attitude is the correct one, Brenda Ann. Obviously you have no clue about why a senior commander would speak that way and blame your failure to understand on poor Mr. Rumsfeld. This is unfair, because most adults are very clear on why there will be casualties when our troops deal with dangerous situations.

Remember that if Mr. Rumsfeld talked down to the lowest common denominator, defense department briefs would sound like you had accidently tuned into "Sesame Street". Mr. Rumsfeld speaks out as an adult, to adults. To understand him, you'll have to grow up and be a big girl.

>
> And, for the last and final time, Iraq and Saddam Hussein had nothing to do
> with 9/11.. even Bush has admitted to this now.. get over it.

Get over what? The 9-11/Iraq "connection" was brought to us by a liberal political commentator who works for the NY Times a year or so ago, as a straw-man to attack when he had nothing legitimate to complain about. On the other hand, the Iraq/terrorist connection, including correspondence and regular meetings with with Bin Laden have been proven multiple times. I suppose that you can hang onto your bogus view by sticking your head into the sand if you want to, but after all of this time, it would probably be best if you just get over it.

Fortunately, your opinions have no effect whatsoever on anything that will be done in connection with planning the war in Iraq, so if you are most

comfortable believing that it's all just the "vast right-wing conspiracy" causing all this trouble for oil money, and that the vile, underhanded raghead terrorists are just innocent "freedom fighters", you are welcome to be just as ridiculous as you want to be.

When you talk anti-american bullcrap that directly endangers our troops by encouraging and giving comfort to the people who are trying to kill them, guys like me will slap you down for being the kind of fool who gets people killed with thier ignorant comments.

I think you will find each terrorist cell or organization is connected
in more ways than just one. They all have one goal in mind, either
the distruction of Western Civilization, or pushing Israel into the
Sea.

>I swore to myself I wouldn't get involved in this thread, but, being
>attracted to Ham Radio because of the supposed international handshakes, I'm
>a sucker for trying to get along with the rest of the world.

Saddam and OBL just didn't become threats to civilization the moment
9/11 happend. Liberals in this country and around the world, and the
United Nations were too busy going ga-ga over their respective Liberal
socialist leaders each of which didn't give a damn for 12 years.

What Bush is doing is taking care of all the foreign policy cans
Klintoon kicked down the road while he was President of these The
United States of America. I know this tears at Liberals, and the 9
Democrat Presidential wannabe's. They had their chances, and they
ignored the threats.

There is a growing mindset in this country, most particularly the
pacifist left, that we should become an isolationist nation. LOL

Good grief. Like that will ever stop terrorists in their tracks.

IMHO, that is what the plan has been all along. Kick Iraqs ass, get rid
of So Damn Insane.(Still working on that one). And suck the ragheads into
the hell storm.

Of course the powers that be could never admit that. Because if they did
the Democrats would be all over them. But in the meantime we are getting
rid of the enemy....And guess what? It ain't in Boston, or New York, etc.

2807. Major X-Class Flare at 1955Z 4-XI-2003

Newsgroup: rec.radio.amateur.dx
Date: 2003-11-04 21:43:12 UTC
From: nw7us@hfradio.removethispart.org
Message-ID: <3fa81d15.11447899@news.donobi.net>
Source record: 8541
Cross-posted to: alt.ham-radio.hf,alt.ham-radio.ssb,alt.ham-radio.vhf-uhf,rec.radio.amateur,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.shortwave

At 1955Z, 4-XI-2003, an X-class flare peaked from region 486. Initial data from GEOS 12 indicates that the flare is an X18, while GEOS 10 shows it as X17. However, there is speculation (i.e., Thomas Giella (KN4LF), others) that it might be much stronger, as this event saturated the sensor for 11 minutes. I have viewed preliminary images of this very bright and significant flare, and it is truly amazing.

If the flare is larger than the X17 flare from recent activity, this will become one of the two most powerful flares recorded. The flare has caused extensive radio blackout conditions on most of the HF radio spectrum. Ground wave communications is not significantly impacted, nor is line-of-sight VHF and above.

A type II Radio Emission began at 1942Z 4-XI-2003 with an estimated velocity of 1268 km/s. Interplanetary type II bursts are statistically strongly associated with fast CME and interplanetary shock waves (Cane, Shelley & Howard 1987). Thus, there is a chance that we will have at least a glancing blow from the side of the possible CME associated with this new flare. I will update when more data is known.

I'll go one step further; not only do the democrats show
typical lack of spine in the war on terror, but they would
have this country set back the clock on everything we've
done and do crawling to the United Nations in apology.

I don't think there are many voters that feel this reflects
how they feel. Furthermore, more and more republicans
are taking seats on various levels of government through
the states... I don't see any grass-roots growth of
yellow-bellied liberalism at all.

Agreed, as long as you don't interpret the "no 9/11 -- Iraq" connection to mean that Saddam's government was not allies with Al Qaeda.

From the beginning, the war has been about two things:

The widely-publicized (and amazingly enough -- true, despite the conspiracy nonsense) reason for the war was our genuine concern that Iraq had weapons of mass destruction (indicated, not just by US intelligence, but Russian and several others -- including the U.N.'s people) and that they would give them to Al Qaeda to strike covertly at civilians in America.

No sitting president could allow that to happen. Something had to be done about it right away -- our citizens were at risk. When our allies in the U.N. refused to take action, we had to go it alone.

The second reason for the fall of Iraq is that a strong democracy needed to be instituted somewhere (besides Israel) in the Middle East, if we were ever to change the horrible status quo over there. If the institution of democracy in Iraq is successful, kingdoms like Jordan, Syria, and Saudi Arabia will fall, and their people will enjoy true freedom for the first time in centuries.

I could also argue that it has also kept hordes of terrorists flocking to Iraq (instead of New York) to attempt to kill Americans, but we were basically accomplishing the same thing in Afghanistan (though I hear it was tougher for them to get there).

By the way, B.A., you have an amazing depth of knowledge on radio. I really enjoy your posts.

Yep.... they were KEENLY aware of Osama back in the Reagan administration days..... believe it or not it goes back that far! Ole Ollie North brought it to that administrations attention and nothing was done.

I typically agree more with the Libertarian parties' ideals, except for the drug policies..... As a former user (knock on wood, 10 years and 2 months drug-free) and also dealing with people that are users in the emergency services related fields, I have absolutely no use for any drug not prescribed by a doctor.

Stinger,

YES - The FIRST usefulness of "IRAQ" is that it has become a Terrorist
Magnet.
IMHO: Most Americans for what ever reason or politcal leanings would
simply say. (If Asked the Question and Given the Choice.)
? Is it better to "Fight" Foreign Terrorist, Over there in Distant
Lands, or to Fight Them Here in Our Homeland the USofA ?
[ ] Fight Them Over There (IMHO would get 99.73% of the votes.)
[ ] Then Fight Them HERE! (IMHO would get 00.27% of the votes.)

The SECOND 'usefulness' of "IRAQ" is the Leason for the Rest of the
World; that Peace with the USofA is better than Opposition and War
with the USofA.
- The UN, the French, the Germans ETC will not help you if the USofA
decides to Deal With You [.]
- - Speaking Softly and Carrying a Big Stick works better in todays
real world.
- - - If there is a Terrible Example of what the Big Stick can do to
others.
= = = = Iran and North Korea are both more understanding of what the
USofA; Can and Will Do If Necessary.

NOTE: The Leason of the USofA in Vietnam and the USSR in Afganistan
is that the USofA 'stayed-the-course' in Vietnam for Twice as Many
Years and Paid Four Times (4X) the "Price in American Lives"; as the
USSR was willing to do in Afganistan.
- - - The USofA will Pay the Price of using it's Big Stick.

The THIRD 'usefulness' of "IRAQ" is every Terrorist that goes to Iraq
is one less Terriorst that goes to Israel to Kill and do Damage there.

The FOURTH 'usefulness' of "IRAQ" is the quite and progressive
movement for modernization and change in the Governments and Political
Systems of the neighboring states in the region.

Yes. It has three branches of government (legislature, executive, and courts).
You don't have to be Jewish to be a citizen, but you do have to be Jewish to
become the executive.

Actually a representative republic. Three year olds have no vote and
voters vote for representatives, not laws.

And if drugs were legalized, would you feel the same way or would you
start using again? An adult has an inalienable right to determine
the contents of his or her body, for better or worse.

2820. Debt, Vacations, Fun? MAKE MONEY NOW!!!!!!

Newsgroup: rec.radio.amateur.dx
Date: 2003-11-05 15:04:40 UTC
From: Nice Person <iamnicehelpme@yahoo.co.uk>
Message-ID: <bob3i8meg1@hercules.btinternet.com>
Source record: 8404
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.digital,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio

Follow the directions below and in two weeks you'll have up to
$20000.00 in your PayPal account. There is a very high rate of
participation in the program because of its low investment and high
rate of return. Just $5.00 to one person!

THAT'S ALL !!!

If you are a skeptic and don't think the program will work, I urge
you to give it a try anyway! It REALLY WORKS! Why do you
think so many people are promoting it ?

LOOK AT IT THIS WAY: If the Program is a total failure for you and you
never get even $1.00 in return, your total loss will
be the $5.00! If you are not yet a paypal member, there is no risk at
all!!! If the Program is only moderately successful for
you, your PayPal account will have several hundred dollars deposited
into it within the next few days! If you actively
participate in the Program, you could have up to $20,000.00 in your
PayPal account within two weeks!

Now let me tell you the simple details.

Getting Started!!

If you're not already a user of PayPal, the very first thing you need
to do is go to PayPal and sign up. It takes two minutes
and Pay Pal will deposit $5.00 in your account just for becoming a
member. That makes this program's total cost $0!!! Follow
this link to open your PayPal account:

https://www.paypal.com

Now log into your PayPal account, and send the PayPal account of the
person listed in Position 1 $5.00 PayPal will ask you to
select type. (Select "service" and put "$5.00 donation" for
subject.) When person in Position 1 receives notification of your
payment, you can simply copy this page and change the names in
position #1 & #2 & #3 as instructed. Remember, only the person
in Position 1 on the list gets your $5.00 donation. Send them a
donation then remove #1 PayPal account from the list. Move the
other two accounts up & add your Paypal account to #3 position. After
you have retyped the names in the new order,

IMMEDIATELY send the revised message to as many people as possible.
PROMOTE! PROMOTE! The more you promote the Program, the
more you will receive in donations!! That's all there is to it.
You are reading this message in usenet, and usenet is the best way
to spread the word about the program. Post this message to AT LEAST
200 groups in usenet(there are over 20, 000), after you send the 5
dollars to the person at #1. This will guarentee you a profit from
this program. The more groups you post it to, the more money you will
make!!!

When your name reaches Position 1 (usually in less than a week) it
will be your turn to receive the cash. $5.00 will be sent
to your PayPal account by people just like you who are willing to send
$5.00 dontation and receive up to $20,000 in less than
two weeks. Because there are only (3) names on the list you can
anticipate 80% of your cash within two weeks.

Anytime you find yourself short on cash just take out your $5.00
donation program and send it to 50 prospects. Imagine if you
sent it to 100 or even more. Most people spend more than $5 on the
lottery every week with no real hope of ever winning.

IMPORTANT!!! IN ORDER FOR THIS PROGRAM TO WORK, YOU MUST BE HONEST. DO
NOT ADD YOUR EMAIL IMMEDIATELY TO THE #1 POSITION, AND MAKE SURE TO
SEND YOUR 5 DOLLARS TO THE PERSON AT #1. IF EVERYONE WHO TRIED THIS
DIDN"T SEND THE MONEY, THEN NOBODY WOULD MAKE A DIME. 5 DOLLARS IS A
VERY SMALL INVESTMENT, ESPECIALLY WHEN YOUR ABOUT TO MAKE MANY MANY
MANY
TIMES THAT AMOUNT. IF WE ARE ALL HONEST, THEN WE ALL MAKE LOTS OF
MONEY!!

REMEMBER, you add your email to the #3 spot, and then move everyone
else
up 1(deleting the person who was formally in the #1 spot, and who you
should have sent your money to). DO NOT add your email to #1 when you
start this program. If everyone did this, then NO ONE would make a
cent.

THIS PROGRAM WORKS - JUST TRY IT

POSITION # 1 PAYPAL Account: lamsmo@aol.com

POSITION # 2 PAYPAL ACCOUNT: pepsiholic44@aol.com

POSITION # 3 PAYPAL ACCOUNT: bunnylovemedo@yahoo.com

Integrity and honesty make this plan work.
Participants who actively promote this program will average between
$8000
and
$12000 and receive the donations within two weeks.

This is not a chain letter. You are simply making a donation of $5.00
to another person. The Program does not violate title

18 section 1302 of the Postal and lottery code.

Remember -TIME is of the essence. YOU can choose to live Paycheck-to-Paycheck or live FREE from FINANCIAL BONDAGE. Become a part of the donation program and help people help people.

This program is about helping each other!

Success is a journey - Not a destination!

Start Your Journey TODAY!!!!

> Does anyone know if they will QSL card-for-card via the bureau without the
> 10 IRC ?

Hi,

I just received the info : ON7FF is not member of UBA association on Belgium
but only of a regional (local) VRA club. So No QSL via buro according ON4UN
(yes this is the famous low band world expert expert), president of UBA.
ON7FF can, if he wants, ask once a year all his QSLs to UBA but UBA will not
spontaneously send him his QSL, if there are.

That means that you pay or you will never receive his QSL. A pure swindle,
like do V51AS !

A very bad practice that all the ham community has to disapprove of course,
the UBA Pdt too.

2823. The "word" on the super X-class flare of 4-XI-2003

Newsgroup: rec.radio.amateur.dx
Date: 2003-11-05 20:09:51 UTC
From: nw7us@hfradio.removethispart.org
Message-ID: <3fa9585e.92172996@news.donobi.net>
Source record: 8407
Cross-posted to: alt.ham-radio.hf,alt.ham-radio.ssb,alt.ham-radio.vhf-uhf,rec.radio.amateur,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.shortwave

I have just finished a talk with Christopher Balch from the Space Environment Center, NOAA, regarding the super flare from 1955Z, 4-XI-2003. This flare saturated the instruments on the observing satellites for about 13 minutes, during the peak of the flare. This has made an accurate measurement of the flare's intensity difficult. The instruments stopped at X17.4.

The scientists and engineers who designed the original sensor equipment back in the 1970's had events that caused saturations at much lower levels. They redesigned things to handle X17-class events, thinking that it would be enough. This time, it was not.

Since we do not have any accurate record of flare intensity prior to the 1970's, our perspective of this latest series of flares is somewhat limited. Certainly, X-class flares of this magnitude are not regular events. But, they certainly are not unheard of. To pull out a rough estimate, but with very little confidence on this number, on how often we might see such activity, we think this is something we could see every 20 to 40 years.

Currently, as I write this, the Space Environment Center, who is the official "last word" on what a flare's classification becomes, is finalizing their analysis on this super flare. Chris has obtained two likely candidates: Using a standard log-normal fit analysis, the flare was X25. Using a result from an individual from the University of Colorado, Boulder, who analyzed HESSI data on the event (http://hessi.ssl.berkeley.edu/), the flare was an X28. The SEC has a procedure that Chris is finalizing, and validating. He will announce the final reading later today. Most likely, this flare will be somewhere between the X25 and X30 levels.

Certainly, the geomagnetic storming of the last few weeks is one of the highest in many years. It is officially number six on the scale of intensity in the last 30 years. The two major sunspot groups, the number of flares, and the CME activity makes this period the most active and intense of this solar cycle. We have witnessed a truely spectacular historical moment.

What's coming down the line? I usually base my forecasts on a 27-day solar rotation period. What happens today in terms of geomagnetic activity is possibly what will occur 27 days from now. Of course, sunspot and coronoal hole activity might decline duing that rotation period. The outlook is that in about 5 to 10 days, a sunspot group that had a lot of activity is going to rotate back around and start to influence space weather. But the

big question is: Will these huge sunspot groups that just left us retain enough energy to last the 27-day rotation, to deliver another period of extreme solar weather?

NASA is planning to launch in November 2005 the "Stereo Mission" (http://stereo.jhuapl.edu/mission/overview/overview.html), which will place an observing space craft leading the Earth's orbit, and another space craft trailing the Earth, such that they will be able to see around the sun at what is coming and what has went. This certainly will become a major tool in our forecasting of space weather, and propagation.

I will post my propagation forecast on http://prop.hfradio.org/ late today.

Huge amount snipped.

Bear in mind that Zogby is of arab extraction and has shown mild (ahem) bias in these matters in the past. I take all Zogby with a grain of salt when dealing with arab/Israeli matters.

> And if drugs were legalized, would you feel the same way or would you
> start using again?

Nope.... I have absolutely no desire to ever use again. In fact, the smell
of marijuana now makes me naseaus (sp.?)

An adult has an inalienable right to determine
> the contents of his or her body, for better or worse.

Yeah that is true..... to a point, unless it starts to affect me. A person
using while operating any kind of vehicle has the possibility to affect me.
I have dealt with this many times on the emergency services side. Also,
another effect is if I have to pick up slack because a person either went on
a "bender" over the weekend or the night before, I SHOULD NOT have to pick
up that slack. But unfortunately today, that is the way that things work.

I cannot find one viable reason why to use any drugs at this point in my
life unless prescribed by a physician for medicinal purposes. (The only two
drugs left I have yet to kick are caffiene and nicotine..... but working
on that.)

The Coronal Mass Ejection (CME) from the X25+ flare of 4-XI-2003 should arrive anytime, today. It will be a glancing blow, yet there is an expectation that it will be strong enough to trigger a major geomagnetic storm. Then, tomorrow or Saturday the Earth may be exposed to a fast solar wind stream from a small low-latitude coronal hole, now rotating in geoeffective position. This can maintain active to minor storm conditions for one or two days. The Polar Cap Absorption (PCA) event is still active, but decreasing, possibly ending by the end of 6-XI-2003. However, if shock-accelerated protons increase the >10MeV proton flux due to the arrival of a CME later today, the PCA could be extended for another one to two days. This will shut down over-the-pole and high-latitude propagation paths.

Solar activity has dropped over the last day, and the background X-ray levels are finally down in the B range. This is making it better for the lower bands. The 10.7-cm flux is decreasing, as well, so the highest HF bands are less likely to propagate.

Alcohol is legal as it should be. Drinking and driving is illegal as it should be. Illegal alcohol in the 1920's was very good for organized crime just as illegal marijuana is very good for organized crime today.

```
The CME from the X28 flare (4-XI-2003) has arrived
at 1937Z 6-XI-2003. The deviation was a moderate
31 nT at the Boulder, CO station. We expect the
Kp index to increase, possibly as high as 6. Right
now, the Kp is 5. Some moderate Auroral activity
might result for the next 12 hours.

More at http://prop.hfradio.org
```

The best way to get off of cigarettes is to start smoking cigars.
The best way to get off of coffee and soda pop is to drink cold water in a bottle.

The object is to replace one pacifier with another. Cigars are easy to
quit.

2836. FS - Kenwood TS-950SD

Newsgroup: rec.radio.amateur.dx
Date: 2003-11-07 00:07:44 UTC
From: Wayne <wfaris@inebraska.com>
Message-ID: <3FAAE250.F4FDC1C2@inebraska.com>
Source record: 8420

Some financial downturns have forced me to give up my baby. I have a Kenwood TS-950SD that I need to part with. This is the top of the line predicessor to the TS-950SDX. In the 2 1/2 years I have had this rig I have worked over 200 countries (confirmed over 120) and I am not even a hardcore dxer. The thing works 100% and in appearance is a 9+. The only flaw is that it is missing the cap off the REC/SEND switch (missing when I got the radio).

For those of you not completely familiar with this rig, this is a 100+ watt competition grade hf rig covering 10 - 160 meters. It has an external dsp unit (comes as a factory installed option bolted to the bottom of the rig) and internal antenna tuner. It has true dual receive making switching between vfos a breeze and makes working split quite easily (even on the wide splits on 40 meters). For complete detail on the specs, please check the reviews on arrl.net (QST Product Reviews) or on eHam.

I will also include the Kenwood IF-232C interface for computer control of the rig. The price includes the operating manual but no microphone.

I am asking $950 obo plus shipping from 68507 (Lincoln, NE).

==========

Charles, just like the other technical old wives, as usual you've got it all wrong.

May I refer you to the grand-master himself - Sir Isach Newton. The measurement standard is NOT the head of a pin - it is the point of a NEEDLE which differs by an order of magnitude in smallness.

I was referring to the American standard, of course, since American politics were involved.

Over here, we've had them dancing on the heads of pins for quite a while, over 150 years. Maybe it's the rich foods and leisurely life-style over here that makes it necessary for us to have a little bit more room for our angels.

PRESS RELEASE

Peter I Dxpedition Team

Nov. 7, 2003

The Peter I Dxpedition team has decided to postpone their Dxpedition to Peter I Island, Antarctica until January 2005. A last minute glitch developed in the transportation plan, even as the team was preparing to meet in Atlanta to train and to pack the sea container for shipment. Weather windows precluded a rescheduling for 2004.

No one is more disappointed than we are, but the 2005 expedition will be bigger and better! Our team is intact, our permissions are not a problem, and the expedition equipment including 6 Arctic shelters, flooring, antennas, masts, kitchen equipment, power cables and generators, coax, etc. are all in storage in Atlanta.

We wish to thank all of our sponsors for their support; look for additional updates in the spring.

For the team,

Bob, K4UEE and Ralph, K0IR

A representative republic would probably be a democracy, depending
on whether it had separate legislative, executive, and court systems. The
United states is a republic, and it is a democracy, and it has majority rule
by representative government.

Amateur Radio Newsline™ Report 1369 – November 7, 2003

Amateur Radio Newsline report number 1369 with a release date of Friday, November 7, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Rain brings the California wildfires under control but ham radio stays on the job. A report from the scene on Amateur Radio Newsline report number 1369 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: CALIFORNIA WILDFIRE COMMS WINDING DOWN

The Southern California wildfires are on their way to full control. This as the winter rains come early to the region. As a result, many hams who had been full time fire communications volunteers have gone back to their regular jobs and ham radio emergency communications efforts are winding down. Others are still on the front lines and now its time for assessment. Gordon West, W-B-6-N-O-A, spent most of last week at a Red Cross Shelter in the city of Fontana. He takes a look at the contributions made by the regions Amateur Radio communicators:

--
Audio report only. Hear it by downloading this weeks audio newscast file at http://www.arnewsline.org
--

Emergency service officials agree that having ham radio made a big difference in successfully handling this disaster situation. (ARNewsline(tm))

**

RESCUE RADIO: REPEATERS LOST IN SOCAL WILDFIRES

We all heard the grim statistics of the homes and businesses were destroyed by this years California wildfires over a million acres of land has been scorched. But there is one total that the mass media won’t report. That’s the number of ham radio repeaters knocked off the air by the blazes. While exact call signs are not yet available, we did ask reporter Matt Lechleiter, W6KGB, to find out which radio sites were most affected.

--
It's estimated that close to 30 repeater or remote base systems have been affected by the recent Southern California firestorm. These systems are either off-air, were before switching to backup power, or were destroyed by the fires. The number of systems actually destroyed by the fires is unknown - we'll follow

up on this in a subsequent report.

Communications sites affected include Oat Mountain just north of Los Angeles, Sunset Ridge and Heaps Peak to the East, and Mount Otay near San Diego to name a few. Each of these major sites lost power due to one of the fires. News reports say that it could be over a month before power is restored to these locations. Until then, battery and generator power are keeping the commercial and amateurs two-way systems on the air.

There are also several repeaters that are believed to be safe but which are still off the air. This is because they live at more remote mountaintop sites that also lost electrical service to the flames. And just like the more accessible sites that I mentioned, it might be a quite a while before commercial power is returned.

For the Amateur Radio Newsline, I'm Matt Lechliter, W6KGB reporting.

--

If you are a Southern California repeater operator whose system was affected by the firestorms, or if you know of one that was, please send the details to us. We will include it in an upcoming report. Our address in cyberspace is nerwsline@arnewsline.org (ARNewsline(tm))

**

HAM RADIO IN SPACE: NEW GEAR FOR THE ISS

Radio gear from some well known ham radio manufacturers is in space. This, as the group known as Amateur Radio on the International Space Station announces the delivery of the so-called Phase 2 ham equipment to the ISS. Norm Seeley, KI7UP, has the details in this report:

--
A Russian Progress supply rocket has delivered a Kenwood TM-D700E, dual band transceiver to the International Space Station. The installation of this new radio will mean a significant boost to the power output of the ARISS station from 5 watts to 25 watts.

The Chairman of Amateur Radio on the International Space Station is Frank Bauer, KA3HDO. He says that the software for the D700 has been programmed for five modes of operation. These are for standard F-M phone, crossband repeater, APRS, packet and an emergency mode. Bauer predicted that APRS probably will be the default mode when a crew member is not actively using the ham station.

Next up will be gear from Vertex-Standard, the Yaesu brand folks. Bauer says that a Yaesu FT-100D, some SSTV equipment, along with new headsets, will be taken to the space outpost on Progress Flight 14P. Look for it to launch in January.

But says Bauer, that will be the endof the transport of any more ham radio gear for quite a while. At least until the space shuttle returns to flight in September 2004.

But that in itself could be a blessing in disguise. KA3HDO says that the equipment still on the ground will be tested this month at the Service Module facility in Moscow. This will permit making sure that the Phase 1 and 2 systems are compatible. RF testing will also take place.

According to Bauer, current plans call for the current Expedition 8 crew of Mike Foale, KB5UAC, and Alex Kaleri, U8MIR, to install the new hardware after ground tests are complete. Previous crews already installed four Amateur Radio antennas to cover HF, 2 meters, 70 cm and microwave frequencies.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP.

--

What about hams on the ground getting more chances to talk to the crew on the ISS? Bauer says he's been working with U-S and Russian space officials to have them dedicate a few additional hours each month for operation and amateur station maintenance. (ANS, ARISS K7CCC)

**

HAM RADIO IN SPACE: SPAIN SCHOOL CONTACT A BIG SUCCESS

Still with news of ham radio on board the International Space Station, word that the Ourense, Spain school contact on October 23 was very successful. 75 children and 25 parents gathered at Ceip Seixalbo school as European Space Agency astronaut Pedro Duque answered sixteen questions in Spanish using the ARISS radio system. All nationwide radio, TV broadcasters, and newspapers were present. Duque has since returned to Earth along with the Expedition 7 crew. (ANS, ARISS)

**

RADIO LAW: HAM ACCUSED OF AIRPORT SECURITY BEACH GETS CONGRESSIONAL SUPPORT

The ham who is accused of breaching airport security has gotten some unexpected congressional support. Amateur Radio Newsline’s Mark Abramovich, NT3V, has the rest of the story:

--
Leading Democrats have openly criticized federal authorities for prosecuting Nathaniel Heatwole, W-Zed-3-A-R. Hes the ham who admits to planting banned items on airliners, allegedly to show flaws in airport security. And some in congress think he is almost a hero for pointing out the Transportation Security Authority's inability to properly protect airline travelers.

Minority Leader Nancy Pelosi is quoted in print as saying: " "I don't think he had criminal intent. I think what he was trying to do was to show how exposed we are and what our vulnerability was, and he tried to tell TSA and he gave a trail to them."

Pelosi said that if theres any penalty imposed, it should be some kind of community service. And Representative Ed Markey, a powerful Democrat from Massachusetts agrees. In fact, Markey says that any community service sentence imposed on Heatwole should be with the TSA. And Markey adds that TSA officials should listen to him so that they know exactly how to prevent a terrorist from doing the very same thing.

And even the Republicans are getting into the act. Representative John Mica of Florida is chairman of the House aviation subcommittee. He said that prosecutors should concentrate on people who actually pose a threat, adding that Heatwole should not be the fall guy.

None of the politicians are not trying to excuse Heatwole’s action, but they more and more are beginning to agree with Pelosi and Markey who apparently believes that the punishment should fit the crime.

For the Amateur Radio Newsline, I’m Mark Abramowicz, NT3V, in Philadelphia.

--

Heatwole is headed back to court on November 10th for a preliminary hearing. What was not expected is the level of support of some in congress and the obvious pressure that puts on prosecutors working on the case. (From published news reports)

**

RADIO LAW: THE BPL WAR - THE ARRL VS. MANASSAS VA.

The ARRL has put officials in Manassas, Virginia, on notice that the League will act on behalf of its members. This, to ensure full compliance with FCC regulations when the city's Broadband over Power Line system starts up in a few months.

Manassas is a suburb of Washington, DC. The League said that it was responding to media reports that Manassas has approved plans for a citywide B-P-L rollout in the near future. As such, ARRL Executive Vice President David Sumner, K1ZZ, has faxed the Mayor of Manassas to point out the potential for RF interference from and to any Broadband over Power Line data distribution system. (ARRL)

**

ENFORCEMENT: FCC ISSUES 2ND LARGEST FINE IN HISTORY

Meantime, the FCC has proposed issuing the second largest fine ever for on a broadcast indecency issue. Amateur Radio Newsline’s Bruce Tennant, K6PZW, has the details:

--
The FCC wants to force Infinity Broadcasting to pay a fine of $357,000. This, for airing a shock jock radio segment in which a couple was said to been

involved in the most intimate of human experiences in New York City’s famed St. Patrick's Cathedral.

According to news reports, the FCC proposed record forfeiture is in response to complaints from the public following an August 2002 broadcast of the "Opie and Anthony" show and aired over thirteen Infinity owned radio stations. The nationally syndicated show was canceled a week later and hosts were fired.

Four commissioners voted for the fine. The fifth said the agency should have taken even stronger action. He said that the FCC should have gone after Infinity's radio licenses and taken their stations off the air.

Infinity has 30 days to pay the fine or appeal. The company has indicated that it will use the legal recourse.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, in Los Angeles.

--

If upheld the amount paid would be second only to the $1.7 million dollars Infinity paid in 1995 to settle several cases against shock-jock Howard Stern. (FCC)

**

ENFORCEMENT: USERS RESPONSIBLE FOR REPEATER INTERFERENCE

Users and not the operator of a repeater are responsible for interference problems to another New Jersey repeater system. This is the gist of a September 12th letter to Andrew Woerner, K2ETN, who operates a repeater bearing his callsign.

Back on July 7th the agency notified Woerner that it had received complaints that his repeater, operating on the 146.355/146.955 MHz channel pair, was causing interference to the coordinated W2RAP repeater on the same frequencies. The complaints alleged that Woerner’s repeater was previously coordinated but that it has relocated since the coordination was issued.

The FCC requested that Woerner provide information in response to the complaints. He did, and in a follow-up letter, the FCC said that it has reviewed his information as well as detailed reports provided by the Metropolitan Coordination Association and the Area Repeater Coordination Council.

The FCC says that coordination does not appear to be an issue in this case. Rather, the interference problem seems to result from users of the K2ETN repeater, which is located in Northern New Jersey, attempting to access that repeater from locations in Southern N/ew Jersey. As such its repeater users who are interfering with the W2RAP repeater and not the person running the K2ETN machine.

The bottom line. The regulatory agency says that this situation does not appear to warrant its intervention. Instead its calling on everybody to work together to minimize any interference to the W2RAP machine. (FCC)

**

ENFORCEMENT: FCC PROPOSES $120,500 FOR ANTENNA STRUCTURE VIOLATIONS

Meantime, its the fine of all fines for radio tower violations. This, as the Federal Communications Commission releases a Notice of Apparent Liability on October 31st. One proposing a $120,500 forfeiture against SpectraSite Communications, Inc., of Cary, North Carolina for safety-related violations of the Communications Act and the Commission's antenna structure rules.

Specifically, the FCC is going after SpectraSite for its failure to register and light its antenna structures following an investigation conducted by the Commission's Norfolk, Virginia Field Office.

The FCC says that the amount of the proposed fine represents the statutory maximum available. The Commission says that it decided to propose a significantly higher forfeiture than generally used in such cases because SpectraSite has a prior history of antenna structure rules violations. It says that SpectraSite has received three previous forfeitures in less than three years for at least 13 instances of failure to comply with the antenna structure rules. (FCC)

**

RADO LAW: EMDERGENCY OFFICIALS CONCERNED ABOUT PUBLIC ACCESS TO "MIRT"

Emergency responders are concerned that MIRT, or mobile infra red transmitters are falling into the wrong hands. Mainly, into the hands of people not willing to obey traffic laws.

A mobile infra red transmitter allows personnel aboard emergency vehicles responding to emergency calls to quickly change specially-equipped traffic signals in their favor. That was fine until Internet websites began offering the same devices for use by the public for around $300 a pop.

Unlike radar jammers and certain laser detectors that emit radio signals, the mobile infra red transmitter and other signal changers send out a beam of invisible light. Since light is not controlled by the FCC the devices do not run afoul of the agency's rules.

Needless to say that this is causing concern for those who rely on the technology for legitimate needs. Don't be to surprised if states begin enacting their own laws to control the sale and purchase of the units.

More on the situation and the device is in cybrspace at www.detnews.com/2003/commuting/0310/26/a01-307303.htm and http://www.themirt.com (CGC, others)

**

COMMUNICATIONS CRIMES: INDUSTRY VS. IDENTITY THEFT

Microsoft and other technology giants have launched an industry alliance to thwart identity theft and boost confidence in e-commerce. The Coalition on Online Identity Theft will campaign to improve e-commerce record-keeping, beef up Internet security and enforce penalties against identity thieves. The

formation of this group comes in response to growing concern over the growing tine of identity theft crimes and government pressure on industry to help to thwart it. (Published news reports)

T-HUNTING NEWS: THE BIRDS OF FALL

If you are into hidden transmitter hunting, listen up. This one is for you. Keeping track of over 300 migrating radio tagged birds. Joe Moell, K0OV, is here with the details.

--

Since 1998, you've heard me reporting on hams and scanner fans tracking Burrowing Owls that migrate from Canada to southern states and Mexico. Researchers are so impressed by the capabilities of hams to do this sort of thing that they are asking for help with other critters. Right now, we're starting our biggest ever project, with more birds and more states involved. Nick Myatt of the Arkansas Cooperative Fish and Wildlife Research unit has radio-tagged 360 American Woodcock in Minnesota, Wisconsin, and Michigan, and he wants hams to help him find out where they're going. They're heading out now, and the list of possible stopover and destination states is big, including Southern Minnesota, Southern Wisconsin, Southern Michigan, Iowa, Illinois, Indiana, Kentucky, Missouri, Eastern Kansas, Eastern Oklahoma, Arkansas, Tennessee, Mississippi, Alabama, Louisiana, and Eastern Texas. If that's where you live or travel, please check my Web site for the list of active frequencies, all between 150 and 152 MHz.

Also at this time, Dave Sherman, a Biologist with the Ohio Division of Wildlife, is looking for help in keeping track of two radio-tagged Sandhill Cranes that should be leaving Ohio about the time you hear this. More information, including the frequencies, is on the Web. Go to www.homingin.com

Besides the frequencies, you'll learn how to identify the special characteristics of a radio tag signal, and you can subscribe to an e-mail list for fastest notification of these studies. That's homingin -- one word -- homingin.com

From southern California, this is Joe Moell K-zero-Oscar-Victor, for Amateur Radio Newsline.

--

Again, more information is at Joe's website. Its in cyberspace at www.homingin.com. And remember: homingin is one word. (K0OV, ARNewsline(tm))

**

NAMES IN THE NEWS: QCWA SEEKS NEW G.M.

In other news, word that Jim Walsh, W7VLN is resigning as the General Manager of the Quarter Century Wireless Association and the groups Board of Directors is looking for a replacement. Among the responsibilities are attending all meetings of the QCWA board, keeping full records for the organization and conducting the general correspondence. A solicitation for nominees is on line. You will find it in cyberspace at www.qcwa.org/manager.htm (QCWA)

**

CONFERENCES: 30TH ANNUAL EASTERN VHF/UHF CONFERENCE

The 30th Annual Eastern VHF/UHF conference will be held next April 16th to the 18th, at the Radisson Hotel in Enfield, Connecticut. Planners say that the conference has been moved to the spring time to help alleviate numerous conflicts with other ham radio activities and vacation schedules in August. Guest speakers, proceedings, articles and overall volunteers are being solicited to help out. Prize donations are also being solicited from vendors and members. More information is available from conference chairman Bruce Wood, N2LIV, by e-mail to bdwood@erols.com (VHF Reflector)

**

BEACON NEWS: C6AFP COMING BACK ON THE AIR

Steve Rutledge, N4JQQ says over the VHF Reflector that the C6AFP beacon in grid square FL16, should be operational soon. This, thanks to W4WSR who rebuilt the old one that WZ8D originally supplied.

That one took a lightning hit last summer. Rutledge says that he was able to salvage the RF board but that was it.

Rutledge thanks C6AGN, whose Q-T-H the beacon now lives at. This is in Coco Bay, Green Turtle Cay, Abaco, The Bahamas. He says that Bill should be back on the island on or about the time this newscast hits air. Hopefully we will hear the beacon sometime later this month. (VHF Reflector)

**

INTERNATIONAL - INTRUDER WATCH: PIRATES OF THE PACIFIC

On the intruder watch scene, VK6XW in Albany Australia reports over 130 of them in the ham bands in recent days. The majority are foundd on 20 meters and appear to be Indonesians, with the rest being Asian Intruders including a number of fishing boats. VK6XW says that the boats also use Amateur Radio VHF frequencies for ship-to ship communication.

Meantime, Chris Wright, VK2UW in Lighthouse Beach New South Wales Australia reports on other pirates in the Pacific. This group is using Amateur Radio calls such as VK4ZLY, several Zed L calls and American calls -- portable VK.

These are also on 20 meters and Chris says that they have become a major headache to a number of regularly schedule ham radio nets. (Q-News)

**

DX

In D-X, word that XV9DT is active as 3W22S now until the 31st of December. The special callsign is to celebrate the 22nd South East Asian Games, hosted by Vietnam. (GB2RS)

Also, HB0/HA0HW/P and two other stations will be operating from a location 1350 meters above sea level in Liechtenstein through the 10th of November. The three operators will be active on 160 to 10 meters, with an emphasis on the low bands. Modes used will be CW, SSB and RTTY. QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: NYC HAMS RUN THE RACE

Kenya again ruled the New York City Marathon but it was ham radio that kept the race running. Amateur Radio Newsline's Henry Feinberg, K2SSQ, takes a look at the November 2nd event and the radio amateurs who kept it moving along:

--

Steve Mendelsohn, W2ML: "When people say 'why do you do it' my answer is always the same. I'm in it for the T-shirts."

--

And after 27 years as Communications Director for the New York City Marathon, Steve Mendelsohn W2ML, has to have quite a collection. But Mendelsohn is also the first to tell you that he is only a small part of a big ham radio organization that keeps all the races within the New York City Marathon moving. And 2003 was no exception:

--
Mendelsohn: "At about 8 o'clock we went to the actual starting line at the Verrazno Narrows Bridge and Alan fired the air-horn that's starts the race for the athletes with disabilities. And, 15 minutes after that it was the start of the wheel-chair race; and 15 minutes after that was the start of the hand-cranked race and fifteen minutes after that the elite women. And finally, at 10:07 our operators climbed into vehicles -- because we maintain control of all of the vehicles on the course for safety purposes -- and we use Amateur Radio to do it -- and down the course we went.

At the other end, we climbed out of the vehicles; everyone went to do their next assignment and from the time that the male winner cross the finish line at roughly 12:15 p.m. until the time that we closed down the Family Reunion at 6:30 at night and started to tear down, 411 hams worked with the other 12,000 volunteers to make this the smoothest, best marathon ever."
--

The Alan that Steve referred to is Race Director Alan Steinfeld, W-2-T-N. They were but two of the 400 plus Amateur Radio volunteers who came out this year. And Mendelsohn says that the hams were kept very busy, especially in assisting in medical communications as runners fell by the wayside:

--

Mendelsohn: “We had people went down virtually everywhere on the course. The hams were there with the doctors to help and provided a great deal of medical communications back to the Family Reunion area. This allowed the families to know that a runner had dropped out: That they may have been taken to a hospital or that they were simply going home.”

--

Mendelsohn says that between 800 to 900 pieces of health and welfare traffic was passed between 10:07 a.m. and 4:40 p.m. He also says that 2003 was the years of APRS at the New York City Marathon. Ill have that part of the story next week.

With part of the course of the New York City Marathon in sight, I’m Henry Feinberg, K2SSQ, reporting for the Amateur Radio Newsline.

--

As for the race results. Kenya’s Martin Lel, running his first ever marathon won the Mens division. He timed in 2:10:30 beating out defending champion Rodgers Rop. Meantime Margaret Okayo smashed the course record. She won the race for the second time after crossing the line in 2 hours, 22 minutes, 31 seconds, shattering her own record by almost two minutes.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Jim Damron, N6TMW, and I’m Jeff Clark, K8JAC, saying 73 and we thank you for listening. Amateur Radio Newsline(tm) is Copyright 2003. All rights reserved.

GS,

"The US is a democracy.
Any country is a democracy,
which has a legislature,
an executive,
and a supreme court."

I see you have ADDED to your 'original definition' of a "Democracy"
:o)

But, All of the Countries, Nations, Systems

* Had Equality Before the Law - As Defined by Their Laws.
- - - In Cuba - Fidel just place 1000s in Prison - For Thinking Wrong.
- - - In Iran - Citizens have Equality before Civil Law and "The
Faithful" may be 'judged' before Shari`ah (Islamic Religious) Law.
(What could be more Equal?)

* Had the Right To Vote - And The Responsibility to Vote.
- - - In Iraq - Saddam was recently Re-Elected by 99.46% of the Vote
and 99.73% (Nearly Everyone) Voted.
- - - The Peoples "Democratic" [Republics] always have Higher Voter
Turn-Outs than the USofA, Canada, The UK, EURO-Land, Japan and other
so called western democracies. These Peoples Democratic Republics are
evidently more democratic then the USofA an the others western
democracies.

* * Think of the USofA:
- - - Jimmy Carter has had to "Monitor" elections in the USofA.
- - - Look at the last Presidential Election in the USofA and the
Missed Votes in the State of Florida.

2860. NW7US Propagation Update: 8-XI-2003 (fixed)

Newsgroup: rec.radio.amateur.dx
Date: 2003-11-08 14:09:46 UTC
From: nw7us@hfradio.removethispart.org
Message-ID: <JO6rb.1224$jS2.863@news.randori.com>
Source record: 8444
Cross-posted to: alt.ham-radio.hf,alt.ham-radio.ssb,alt.ham-radio.vhf-uhf,rec.radio.amateur,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.shortwave

A weak shockwave from the glancing blow of the coronal mass ejection from the X28-class flare of 4-XI-2003 was recorded at about 1900Z 6-XI-2003. It only produced minor to major storm conditions that passed after a few hours.

As I write this update, the geomagnetic activity is slightly active due to the influence of a small coronoal hole. The IMF (Interplanetary Magnetic Field) has been somewhat orientated toward the south (with a Bz reading that is negative), so this has elevated the geomagnetic activity. This geomagnetic activity will continue for a few days. It will mostly degrade over-the-pole and very high-latitude propagation paths, and slightly degrade the lower HF frequencies.

The proton event that we've been having is pretty much over, though, so the polar paths are better than they've been for many days, even with the elevated goemagnetic activity.

Here's an interesting note: on 6-XI-2003, two B-class flares were recorded. These unusually long flares are indirect echoes caused by giant flares still occurring from those two huge sunspots, but from the other side of the sun! This is an indication that we'll want to watch for the return of these sunspot groups and their possible continuation of high intensity flaring, when they rotate back into view in about 10 days.

Propagation this weekend should be fair to good for most paths, on low HF all the way up to about 21 MHz. Frequencies above 21 MHz will have weaker propagation on many paths, as the 10.7-cm flux has decreased again to below 100. Predicted average flux is 90 and 86 for today and tomorrow.

Heh - close! Not too much in the way of solar activity, right now. Just some solar wind enhancement from a small coronol hole, and the related geomagnetic activity. With a moderate solar flux, we're back to the "average" DX that is typical of the declining phase of this solar cycle.

Another top-posting wad of blather from a civics-deficient mind. Somewhat understandable, however, since you are deriving your wisdom from the US Department of State. Looking at your reference, I am amazed to read the verbal back-flips about what they think a democracy ought to be. I'm further amazed at how they do anything to avoid calling a "representative" democracy a republic. No wonder our foreign policy is a crock of shit; we officially can't understand what we are!

A democracy may or may not have morals, may or may not protect the rights of minorities, and is practically unworkable for groups beyond a certain size. And once you modify a democracy, by adding modifying conditions, it likely isn't a democracy anymore.

You were not happy with destroying the packet radio newsgroup?
You and your toadies post to everything on almost every
mainstream newsgroup. When are you going to stop?

You are the troll, whose killfile expires on me every 30 days
or I did not killfile you for a certain newsgroup.

There use to be nothing but on topic information here until
you showed up.

Your buddy W4NTI did not refute the charges on eham with any
effectiveness. He merely attempted to attack the credibility
of the accuser. He could offer no real rebuttal to the story.
Why don't you blast him about it for awhile in email and leave
us alone?

Bill

Per Websters Dictionary;

Democracy

1. Rule by the people.
2. A community so governed.
3. The quality of being democratic.

Republic;

A state in which the sovereign power is vested in representatives chosen by the people.

Constitution;

The system of fundamental laws of a nation or society.

Thus, we are indeed, a Constitutional Republic.

We vote for and elect REPRESENTITIVES. These folks are 'supposed' to vote in congress, either state or federal, what the electorate wants.

We are a representitive form of government.

A true democracy is one where everyone gets a vote, and the majority wins.

Can you imagine how much fun it would be to have to vote on every single issue, local, state, federal? There wouldn't be enough time in a lifetime to do it.

Our representitives are 'supposed' to base their lawmaking on the CONSTITUTION. Obviously this is not working.

What is happening is the judiciary of APPOINTED, not elected, judges are actually making the law.

In reality this country should stand up and revolt. We are NOT following our constitution.

So...what sort of government do we REALLY have?

Don't bother, Dan. The guy is from wig city. Having no identity or character
of his own, he leeches off of his betters. It's best to think of his wild
claims and exaggerations as symptoms of his mental state, a cry for help. -
Then ignore them.

FO&A.

This is why some many so called 'democrats'
do not like the Pledge of Allegiance.

For those simple words
"I Pledge of Allegiance to the Flag
of the United States of America,
and To The REPUBLIC For Which It Stands...

http://history.vineyard.net//pledge.htm
http://home.att.net/~poofcatt/july.html
http://www.homeofheroes.com/hallofheroes/1st_floor/flag/1bfc_pledge.html

I Proudly Stand with My Hand over My Heart and Head Held High:

"I Pledge Allegiance to the Flag
of the United States of America,
and to the REPUBLIC for which it stands:
one Nation under "GOD", Indivisible,
With Liberty and Justice for ALL."
- - - amen, Amen. AMEN !

God Bless America - Just an old Boy Scout ~ RHF
.
.
Does anyone remember the "American Creed" ?

"I believe in the United States of America as a Government of the
People, by the People, for the People; whose Just Powers are Derived
from the Consent of the Governed; A Democracy in a Republic, a
Sovereign Nation of many Sovereign States; a Perfect Union, one and
inseparable; Established upon those Principles of Freedom, Equality,
Justice, and Humanity for which American Patriots Sacrificed their
Lives and Fortunes.

I therefore believe it is My Duty to My Country to Love it; to Support
its Constitution; to Obey its Laws; to Respect its Flag; and to Defend
it Against ALL Enemies."

Now that we established who the biggest American patriot is, when do we move on to the dick measuring contest? The rules are the same as in the patriotism game: he who shouts the loudest, wins.

2875. NW7US Propagation Update for CQ WW CW Contest Weekend

Newsgroup: rec.radio.amateur.dx
Date: 2003-11-09 03:23:31 UTC
From: nw7us@hfradio.removethispart.org
Message-ID: <Sqirb.2829$jS2.265@news.randori.com>
Source record: 8309
Cross-posted to: alt.ham-radio.hf,alt.ham-radio.ssb,alt.ham-radio.vhf-uhf,rec.radio.amateur,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.shortwave

The solar activity that took us by surprise during the end of October and beginning of November 2003 has me revising my outlook for the CQ WW CW contest period of November 29 and 30. I am now expecting conditions to be a bit rougher than I forecast in my column. Using the 27-day solar cycle as a guide, we are looking at Low to High Normal conditions. Low- and mid-latitude paths will be good, while high-latitude and polar paths will be poor to fair. There is a slight to moderate chance that the major sunspots will return with enough flare activity to cause daytime radio blackouts during the weekend.

The predictions right now call for a maximum Kp index of 3 for both days, and an estimated Ap index of 15. The low geomagnetic activity forecast is very conservative, though, since I still expect the sunspots to hold enough punch to create coronal mass ejections that will elevate the geomagnetic activity. As you know, the more active the geomagnetic field, the more likely the ionosphere will recombine, lowering the MUF. The 10.7-cm flux is expected to be between 160 and 170, since the sunspots will have returned.

Therefore, I expect that the higher bands will be poor to good, depending on the path: Trans-equitorial paths (N/S) will be the best, while polar paths will be the worst. The middle HF bands will be fair to good. If flaring occurs with enough intensity, the nighttime low HF bands will be degraded, too.

Those operating in low-latitudes will fair the best, to be sure. But, that is typical, during any condition. Those who will be at high-latitudes will certainly have a challenge. But, that is what CW is all about, right? I'll keep a watch on things, and post an update as we get closer to the contest weekend.

Lives and Fortunes.

I therefore believe it is My Duty to My Country to Love it; to Support
its Constitution; to Obey its Laws; to Respect its Flag; and to Defend
it Against ALL Enemies."

.....

Good thoughts. Trouble is that the Socialist Democrats care not for these beliefs.
The greatest threat to our nation today is the touchy-feely political correctness movement being fomented by these hand-wringers.

--
"Throughout history, it has been the inaction of those who could have acted; the indifference of those who should have known better; the silence of the voice of justice when it mattered most; that has made it possible for evil to triumph."

Danny and Chucky are in need of some serious help. Common knowledge....

Bob

The persons in need of immediate help are the whiny-assed baby-like adults
that have a problem with Dan.
Dan did nothing wrong. He was honest.
He made a comment about "Ragheads". So what? He didn't hide behind the
cowardly Political Correctness shield.
You babies took it upon yourselves to chastise Dan for his choice of words.
What gives YOU the right?
Did Dan's choice of words cause you little politically correct babies to
fill your diapers? If so, too damned bad!
Dan is in no need of "some serious help" as you posit. The opposite is
true...it is YOU that needs to rethink your ideas.
Liberals are an odd sort...they claim to support freedom of speech...so long
as it is supportive of their ideology. They make no bones about trying to
stifle the ideas of others when it does not agree with their opinions.
Let's see...I will go for the shock value here...yes, Ragheads are a threat
to us...Muslims are involved in a religious war against us. Muslims/Ragheads
are convinced that it is their calling to kill us with any means available.
It is the duty of our Armed Forces to kill them before they visit upon us
another World Trade Center slaughter.
Dan...hats off to you. It is time we stood up to these heathens and call a
spade a spade.
During Clinton's 8 years in office 59 Americans were killed in terrorist
bombings. Clinton did nothing. He even ignored the first attack on the World
Trade Center.

I stand behind our President and our troops who are makng a stand.

Back to you, Bob. Want to wring your hands and whine?

I don't think "they" have a problem with Dan, or myself either. I think that they are anti-ham trolls, out to disrupt these newsgroups with off-topic bullshit, any way "they" can.

That's just a theory, of course, but it fits the facts. Notice how they multi-post to ham radio newsgroups only? It's a troll, who should be reported to his ISP I suppose, since he won't take a hint and buzz off. (sigh)

Geomagnetic activity is increasing, now, due to the
influence of fast wind coming from the coronal hole
located in the central meridian of the Sun. The
rest of today's geomagnetic activity will be unsettled
to active (up to a Kp of 5). This will degrade the
higher HF bands for the next two days. By 11-XI-2003,
a large coronal hole which is rotating into
geoeffective position will inhance the solar wind
further, causing active to minor geomagnetic storm
conditions.

Three new sunpots have appeared on the Sun (Catania
numbers 86, 87, and 89). These are now growing and
have what is known as a "beta magnetic configuration."
The may become a source of flares, at least C-class at
this time, causing some minor radio degradation on the
lower HF bands on the sunlit side of the earth.

The 10.7-cm flux is now expected to rise, again, with
these new sunspots. Expected flux levels are 93, 95,
and 98 for today through Tuesday. But, with the
increased geomagnetic activity, the higher bands will
still suffer.

Another moron to add to the pile.

How can you support Bush when he and the bin Laden family had oil
business dealings going back to the 70's?

Why did we give Osama bin Laden millions of dollars to fight the
Russians in Afganistan?

Why was Saddam Hussein awarded the keys to the City of Detroit in
1980?

Why did they blow up the World Trade Centre when there was 1000 other
buildings in hundreds of other countries to choose from?

Because of racist morons like you, thats why. Want some more apple
pie?

Less than 1% changed the president in the last election.

It is a republic because we have the electorial college to do the actual voting instead of having the population as a whole to do the voting. Even if the college did vote in porportion of the people in their state, some states have a larger percentage of the votes. This way it is possiable for a president to have the most votes of the people and still not be elected president.

Also congress does the voting on the laws. It would take forever to get anything done if a country the size of the US had the whole population voting on every Bill in congress. Sometimes this does not seem like a bad idea :-)

Strangely, Netscape 7.1 didn't catch that one.

I have a list of every ZC4 operator for the last 15 years (as I am the ZC4 awards manager) - unfortunately though, ZC4RR is a new one operating from the Western Sovereign Base. I will also check up and try to find some info for you Graham.

However, it is worth looking for ZC4CW (Geoff) he is pretty active and can also active the Eastern Sovereign Base Club callsign (ZC4ESB) on request.

I've now been back over a year and still the QSL's pile in lol

Steve ZC4BS ZC40BS ZC4BBS and now plain old G4KIV

People don't like the "modified" pledge, because it brings
the Pope and the King of England into the Allegiance.

Meaning...YOU don't like it, not the "people" you speak of.
The Pope? My, oh my. You really ARE off the wall, aren't you?

Another moron to add to the pile.

How can you support Bush when he and the bin Laden family had oil
business dealings going back to the 70's?
/
The same way idiots like you can support a rapist who gave top-secret
missile technology to a nation that is sworn to go to war with us.
/

Why did we give Osama bin Laden millions of dollars to fight the
Russians in Afganistan?

/
Why did Clinton accept hundreds of thousands of dollars from the Communist
Chinese?
/

Why was Saddam Hussein awarded the keys to the City of Detroit in
1980?

/
Why did Clinton pardon convicted felons who had "donated" monies to his
libraryl?
/

Why did they blow up the World Trade Centre when there was 1000 other
buildings in hundreds of other countries to choose from?

/
Because they didn't get it right the first time they tried. And they got
away with it because Clinton was a spineless pussy.
/

Because of racist morons like you, thats why. Want some more apple
pie?

/
Sure. I like apple pie. Make it a double helping.
What is your favorite...cream puff?

Yes, a cat cannot be a dog. The two terms are mutually
exclusive by the purest of definitions. (If this was a
democracy, Gore, having won the popular vote, would be
president.)
--
73, Cecil http://www.qsl.net/w5dxp

That is debatable. Especially considering the huge amount of voter fraud the Democrats were found to have instigated.

Ohio/Penn DX Bulletin No. 634

The Ohio/Penn DX PacketCluster
DX Bulletin No. 634
BID: $OPDX.634
November 10, 2003
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, W1CU, W2RE, NG3K, W3UR & The Daily DX, K4UEE, N4AA & QRZ DX, W4WX, N5FG, K8YSE, K0IR, CE6TBN, CO8TW, DL/VE3ZIK & contesting.info, DL1EK/DL7VOA & DX Newsletter, G3SXW, G3XTT, GI0DVU, JA1ELY, JI6KVR & JA-IOTA Islands News, JT1KAA, LA7DFA, LX3DX, LZ3XV, MW0USK/MW3USK, OH2BH, OM3JW, SP9FIH, YL3AD and ZS4BS for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 2nd/November, through Sunday, 9th/November there were 234 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, AP, BV, BY, C3, C5, C6, CE, CE0A, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, J8, JA, JD/m, JD/o, JT, JW, JY, K, KH0, KH2, KH3, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T30, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V6, V7, VE, VK, VK9C, VK9N, VK9X, VP2E, VP2M, VP5, VP6, VP9, VQ9, VR, VU, XE, XU, XW, XZ, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/n, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3B9, RODRIGUES ISLAND. In a press release by Don, G3XTT, the following are excerpts from that announcement: "The Five Star DXers Association (FSDXA) is pleased to announce 'Project Star Reach', a large-scale DXpedition to Rodrigues Island, 3B9. FSDXA, closely linked to CDXC (Chiltern DX Club), the UK DX Foundation, is the group which brought you

the very successful 9M0C DXpedition to the Spratly Islands in February 1998 and the subsequent record-breaking D68C DXpedition to the Comoros in February 2001. Yaesu have kindly agreed to be Principal Sponsor, and will be providing ten complete state-of-art stations consisting of FT-1000MP MkV Field transceivers and Quadra VL-1000 linears. The centrepiece of Project Star Reach will be a major DXpedition to Rodrigues Island, to take place next March/April..... The callsign 3B9C has already been assigned, and the plan is for an operation encompassing over three weeks of operation, including four weekends. The first members of the team will arrive in 3B9 on Tuesday, March 16th, 2004, and expect to spend the first two to three days installing antennas and equipment. Operations will commence before the weekend. Station breakdown will start on Monday, April 12th, though operations may continue for a further day or two after that......." They state there are two main and several subsidiary objectives. Their main goals are to provide the possibility for every amateur radio station in the world - even those running QRP or a very simple antenna - to make at least one contact with 3B9C; and to enable top DXers to put 3B9C in their log on as many bands and modes as possible. It should be possible for top DXers active on all bands and on all main modes to work 3B9C on at least 20 band / mode slots! One of the subidiary goals is to be one of the first major DXpeditions to link fully with the ARRL's "Logbook of the World" initiative. The 3B9C also announces that the operation will have up to fifteen high-power HF stations active simultaneously when band conditions allow. Activities will encompass SSB, CW, RTTY, PSK31 and, as appropriate, FM. There will also be satellite activity and possible EME. Large monoband antennas will be used on all bands, including a full-size two-element Yagi for 30m. There will be capability for working simultaneously on more than one mode on 10, 15, 20 and 80 meters when these bands are open. On LF they will use two phased pairs of Titanex verticals on 80m, one pair for CW and one for SSB. 40m will rely on their tried and tested 4-square array. 160m operation will utilize the well-known Titanex verticals, with various loops and Beverages for receive. Full details of the equipment and antennas will be given in a subsequent bulletin. The multinational team is still being formed, but already includes many well-known callsigns, as well as some up-and-coming DXpedition operators. So far, team members include DL7AKC (Jens), EI5DI (Paul), G0MRF (Dave), G0OPB (Tony), G3NUG (Neville), G3BJ (Don), G3IZD (Ivan), G3NHL (Chris), G3RAU (Derek), G3SED (Mike), G3WGV (John), G3WKL (John), G3XTT (Don), G4FRE/WW2R (Dave), G4JKS (Hilary), G4KIU (Nigel), G4TSH (Justin), G4VXE (Tim), GU4YOX(Bob), JA1RJU(Kazu), JH4RHF (Jun), KF7E (Jim), M0DXR (Mark), M0GMT (Daniel), N7CQQ (John), NK7C (Pat), and W3EF (Maury). They are seeking donations and contributions from sponsors to help defray the very significant logistics costs of this DXpedition. Details for donating funds and the complete press release can be found on the 3B9C Web page at: http://www.fsdxa.com/3b9c

3Y0/P, PETER I ISLAND (DXpedition Postponed!). In a press release by Bob/K4UEE and Ralph/K0IR dated November 7th, the following announcement was released: "The Peter I DXpedition team has decided to postpone their DXpedition to Peter I Island, Antarctica until January 2005. A last minute glitch developed in the transportation plan, even as the team was preparing

to meet in Atlanta to train and to pack the sea container for shipment. Weather windows precluded a rescheduling for 2004. No one is more disappointed than we are, but the 2005 expedition will be bigger and better! Our team is intact, our permissions are not a problem, and the expedition equipment including 6 Arctic shelters, flooring, antennas, masts, kitchen equipment, power cables and generators, coax, etc. are all in storage in Atlanta. We wish to thank all of our sponsors for their support; look for additional updates in the spring....."
For the team, Bob, K4UEE and Ralph, K0IR

4X/4Z, ISRAEL. On November 15th, operators Eliyahu/4Z5NB, Dov/4Z4DX and Shlomo/4X6ZK will operate a whole day activating different regions of Israel for the Holyland program. They will start around 0400z from G-11-HS and will go through the following regions: HS, HD, JN, YZ, KT, HG, ZF, AK, HF. Main activity will be at the HG region but they will activate different regions while driving from one region to another. Frequency will be 14265 kHz and probably 40 meters for local stations. They hope conditions will cooperate.

4U1, UNITED NATIONS HQ. Ray/W2RE and Frank/W2IX were active from 4U1UN this past Sunday, November 9th. Activity was on both CW and SSB on all HF bands including WARC bands (if time permits). Hope you had a chance to work them.

5U, NIGER. Roger, G3SXW, informs OPDX that the VooDoo Contest Group will be active this year from Niamey, Niger in the CQ World-Wide DX CW Contest on November 29th-30th. Their callsign will be 5U5Z. This will again be a large Multi-Multi effort, field-day style, with seven 1KW stations and many antennas, covering 160-10 meters. The operation will be CW only. QSL cards should go to G3SXW. The operators will be Lee/G0MTN, Don/G3XTT, Fred/G4BWP/5U7WP, Cook/G4PIQ, Vince/K5VT/5U7VT, Mike/KC7V/5U7MF and Lee/KY7M/5U7LF. Operators will be active before the contest using their own with personal callsign while testing antennas. They will be active on the WARC bands if time permits. There will also be short operations from Burkina Faso (XT2) while in transit. QSLs for all contacts other than 5U5Z should be sent to the home callsign of the operator.

8P5, BARBADOS. Tom, W2SC, will make a short contest trip to here between November 28th and December 1st. He plans to be active as 8P5A in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/All Band/Low Power entry. QSL via NN1N.

9N, NEPAL. Three JA operators will be active from Katmandu, Nepal, between November 16-22nd. They are Noboru/JA2AAU/9N7AU, Takashi/JA2ALN/9N7LN and Yasu/JA9LSZ/9N7SZ. They will operate on 40-6 meters. A 6m beacon will be on 50.100 MHz. They will have two HF rigs with FL-2100B and a 6m rig. Their antennas are: Dipoles for 40m and 30m, a 5 element beam for 20-10m, and a 5 elemnet beam for 6m. QSL via their home callsign to the JARL Bureau or direct to the addresses below:
JA2AAU - Kanno Noboru; 1785-61 Shikata, Shikatsu, 481-0004 JAPAN
JA2ALN - Takashi Yamada; 1-90 Nishishiga, Kita-ku, Nagoya, 462-0058 JAPAN
JA9LSZ - Yasuhiro Yahara; P.O.Box 111, Fukui, 910-8691 JAPAN

9N, NEPAL. Janusz, SP9FIH, will be in Kathmandu from November 13th until December 6th. He hopes to get a licence for the 40, 20, 17 and 15 meter bands. QSL via SP9FIH: Janusz Wegrzyn, box 480, 44-100 Gliwice, Poland.

9Y, TRINIDAD AND TOBAGO. Members of the Bavarian Contest Club (BCC), Mike/DL1HCM and Heye/DJ9RR will be active as 9Y4ZC in the CQ World Wide DX CW Contest (November 29-30th) as a Multi-2 category. QSL via DL1HCM (QSL via the bureau is preffered). Outside of the contest, they will focus on the low bands and the WARC bands on CW, and depending on their preferences other modes (RTTY, PSK).

BQ9P DVD/VIDEO AVAILABLE. Yuki, JI6KVR, informs OPDX that a BQ9P video is now available (DVD or VHS [PAL/NTSC]) showing the "Major challenges" the BQ9P team went through just to air this rare entity. The video also shows some of the beauty of the island as well as some historical information. This video makes you appreciate the BQ9P team's hard work as operators and their devotion to DXing. The DVD/VHS video is available for 25 USD (plus shipping - different in each region) at the following Web site at: http://www3.ocn.ne.jp/~iota/newpage64.htm

BW4, TAIWAN. Artyom, UA3VCS, will be active as BW4/UA3VCS in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/Single Band (15m)/ Low Power entry. QSL via home callsign; CBA or Bureau.

CO, CUBA. Look for Eduardo, CO8LY, to be in the next CQWW CW Contest as a Single-Op/All Band/Low Power entry. QSL is via EA7ADH. Also, look for Juan, CO8TW, in the contest as a Single-Op/Single Band (160m)/Low Power entry. QSL is via IZ8CCW, and the log will be available after the contest at: http://www.qsl.net/co8tw/

CN, MOROCCO. Jim, W7EJ, will be active as CN2R in the CQ World Wide DX CW Contest (November 29-30th) as a possible a Single-Op/All Band/High Power entry (or maybe a Single-Band 80 or 40 meters depending on conditions). QSL via W7EJ.

E2/HS, THAILAND. Look for the following Thai stations to be active in the CQ WW DX CW Contest:
HS4BPQ/9 - Single-Op/Single Band (20m)/Low Power. QSL via E21EIC
E20HHK - Single-Op/All Band/Low Power. QSL via E21EIC

EA6, BALEARIC ISLANDS. Once again a group of Spanish operators will activate EA6IB during the CQ World Wide DX CW Contest (November 29-30th) as a Multi/Single entry. QSL via CBA.

HI8, DOMINICAN REPUBLIC. Hiro, JA6WFH, will be here on business for the next year. He expects to receive his license and operate as JA6WFH/HI8, possibly starting between the end of November and December. More details are forthcoming.

IOTA NEWS.....
AF-073. A large scale DXpedition with international operators will activate the Tunisian Island of Kerkennah Island between November 19th and December 2nd. Look for twenty operators with five stations on the air to sign TS7N. Activity will be

CW/SSB/RTTY/PSK31/JT6M/JT44 on 160-6 meters. They will feature one station that will be operated by XYLs ONLY! TS7N is the only Tunisian station with a license for 6m and the digital modes! They also plan to participate in the CQ WWDX CW Contest as Multi-2 entry. QSL via DL9USA. The DXpedition's main objective is the further development of amateur radio in Tunisia. Two transceivers and several antennas will be given to the Tunisian amateurs as a donation. Further information can be found on their website: http://ts7n.tk

EU-048. Francois, F5JNE, will be active from Belle Ile en Mer Island (DIFM AT15) from November 17-24th. His activity will also include SSB activity on 40 meters from two Forts which count towards the French Castles Award as follows:
November 22nd - Fort of Port Maria (DFCF 56015)
November 23rd - Fort des Kerdonis (DFCF56016).
His activity between the 17-24th will be CW on 40 and 20 meters in the afternoon, starting about 1300z. Other reference numbers are: French Departments Award (Morbihan, 56) and French Provinces (Britanny). QSL via the bureau or direct CBA.

OC-201. Jonathan, W1CU, will be on vacation and will be active as as ZL/W1CU from Waiheke Island from November 30th through December 2nd. This will include "Day 2" of the CQWW DX CW Contest. He will operate from ZL1DD's QTH and activity will be on all bands CW/SSB (whatever is open). Unfortunately, Jonathan's operating time will be limited.

OC-235. A disappointed Jon, DU9/N0NM, reports that he will not be able to use his callsign 4D71NM from the Mindanao's Coastal Islands during the CQWW DX CW Contest. Instead, he will use 4D71/N0NM. His operating entry was not mentioned.

SA-086. The Atacama Desert DX group (Operators XQ1IDM, XQ4ZW, CE1URH, CA2WUI, CD0906 and CE6TBN) will be on the air as 3G2D from Damas Island (DICE ICE-201), November 26-28th. Activity will be on 160-6 meters on CW, SSB and RTTY and BPSK31. They will try to have 3 stations on 24 hours a day. QSL Manager is CA2WUI (P.O.Box 1037, La Serena, Chile). More info is available at: http://www.qsl.net/3g2d

JW, SVALBARD. Erling, LA5RIA, is going to be active as JW5RIA from Bear Island (EU-027) from the end of November until June 2004. He will be active on 160-6 meters CW/SSB and the Digital modes. QSL is preferred via the bureau. JW5RIA's Web site can be found at: http://www.qsl.net/la5ria

KP2, U.S. VIRGIN ISLANDS. Daniel, T93M, will be active as KP2/N4EXA in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/Single Band (15m)/Low Power entry. QSL via DJ2MX.

KP2, U.S. VIRGIN ISLANDS. Curt, W3HQ, will be active as W3HQ/KP2 between December 3-11th. Activity will be CW only on 40/30//20/15 meters. QRP operation for all station; will accept SKED with DX (non-UA) especially Asia and Oceania. Curt's E-mail address is: fclambert@infonale.com
QSL via W3 Bureau.

OH0, ALAND ISLAND. Team OH2U < http://www.oh2u.com > will activate OH0Z during the CQ World Wide DX CW Contest (November 29-30th) as a Multi-Multi entry. QSL via OH5DX. The OH0Z station's Web page is at:
http://www.qsl.net/oh0z

P4, ARUBA. Jose, CT1BOH, will be active as P40E in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/All Band entry. QSL via W3HNK. Visit the Web page at: http://www.qsl.net/p40e/

QSL INFO AND NEWS.....
Bill, W4WX, from the Florida DXPedition Group, reports that the team made it back from San Andres where they were 5J0X in contest. He states, "We want to thank everyone that worked us during our stay on the island. Thanks for all the support received. Elli Print has donated QSL cards. They will be in color and we should receive them in three months or so. They will go out as soon as received."

JT1KAA reports that the JT QSL Bureau address has changed. Please send QSL to: MRSF, P.O.Box 830, Ulaanbaatar-24, Mongolia.

Per-Einar, JX7DFA, has recently sent over 4000 QSLs for Russia and the Ukraine via Bureau. Anyone still needing a QSL card from JX7DFA can get one back via the bureau by sending E-mail (with the QSO's data to: la7dfa@qsl.net
JX7DFA's Web site is at: http://www.qsl.net/la7dfa

OUCH! Stephane, LX3DX, informs OPDX and its readers that his harddrive crashed and all QSOs during the DOK and CQWW Contest, as well as his 6 meter QSOs during the Aurora last week are "LOST". His last backup was on October 17, 2003.

NOT THE MANAGER! Jim, GI0DVU, informs OPDX that he has once again started to receive QSL cards via GI4GTY for YO5TP. He states, "Whilst I am the QSL Manager for GI4GTY (a club station) neither I nor GI4GTY have any relationship with YO5TP. Could you please advise OPDX readers that QSL cards for this station should not be sent to GI4GTY or GI0DVU."

Steve, OM3JW, informs OPDX that he received the simple YI9X QSLs from the printer, but they are not too good. So, he will wait for the full color QSL that is expected to be received at the end of November. Be patient please!

T32, EASTERN KIRIBATI. Gary/KH6GMP and Tuck/KH6DFW will be active as T32I and T32BI from here between March 1-8th. During their time there, they will also be active as T32I in the ARRL DX Phone Contest (March 6-7th) as a Multi-Single entry. Activity outside of the contest will be on SSB and as much RTTY as possible during the precontest time. QSL T32I via direct to KH6GMP (QRZ.com address is OK) and QSL T32BI via direct to KH6DFW (also,

QRZ.com address is OK).

TK, CORSICA. Ted, S51TA, will be active as TK9A in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/All Band entry. Before the contest he will be active as TK/S51TA or possibly another TK callsign.

TO4, EUROPA (Last Update). Dany, F5CW, reports that the operation is still a go, and on November 3rd, he shipped 250 Kg of equipments from Roissy CDG Airport to St. Denis, Reunion Island. The Europa team will leave Paris late November 15th and arrive in St. Denis, Reunion, at about 1030 AM (local time) on the 16th. The Europa team consists of: Dany/F5CW (CW), Eric/F5JKK (6 meters), Jean-Louis/F5NHJ (digimodes, 6 meters, SSB), Freddy/F5IRO (SSB) and Pascal/F5PTM (CW). ADDED NOTE TO CONTESTERS: Please keep in mind to add in your CTY file that TO4WW and TO4E are for FR/E or FR/J (Europa/Juan de Nova).

TO6, MARTINIQUE (Also J7). Serge, F6AUS, is on vacation from here and is active with the special callsign TO6M for the next few weeks before going to Dominica (J7) for the CQWW CW Contest. QSL via F6AUS.

SPECIAL EVENT. Look for the special callsign 4N25K to be activated to celebrate 25 years of activity from the radio club "Novi Beograd", "Radio-section KOZARA". Look for them on all HF bands. QSL via YU1SB.

SPECIAL EVENT. A group of amateurs from the Boland Amateur Radio Club are going to operate a special event station over the weekend of November 21-23rd from the Sutherland Observatory in the Northern Cape Province of South Africa. The purpose is to make amateurs aware of the largest Telescope in the Southern Hemisphere. The station will be identified by the callsign ZS1SALT (acronym South African Large Telescope) and will operate from approx. 1100z Friday, November 21st until 1000z Sunday, November 23rd. All HF frequencies will be used, and the station can be worked on Phone, CW and digital modes. A special QSL card will be sent to all amateurs who have made contact. Only direct QSL cards will be accepted to: P.O. Box 273, STRAND, 7140, Republic of South Africa. For additional information on the project, please visit the website: http://www.salt.ac.za
Also, visit the Boland Amateur Radio Club Web site as well at:
http://www.qsl.net/zs1bak

TY, BENIN. By the time you read this, Vladi, LZ3XV (aka 5N0EVR), should be active as TY/LZ3XV in Cotonou, Republic of Benin. His activity will mainly be the AO-40 satellite, and we are not sure if he will be on HF. The length of his stay is also unknown. His grid locater will be JJ16fi.

V26, ANTIGUA (Update). As mentioned in OPDX.633, Paul/WY7I and K7LXC will be active as V26DX during the CQWW CW Contest. QSL via KU9C. Paul informs OPDX that their activity outside the contest will be on 80-10 meters for sure and possibly the WARC bands as well as 6 meters. Operations will "probably" be all CW.

VK9C, COCOS-KEELING ISLAND (Update). Members of Yamato ARC (JA1ZEK) Sasi/JA1KJW and Kuni/JA8VE will be active between November 27th and December 7th. JA1KJW will be VK9CJ and JA8VE will be VK9CV. They will operate on all HF

frequencies 160-10 meters, CW/SSB/RTTY. JA1KJW/VK9CJ hopes to participate in the CQ WWDX CW Contest and the ARRL 160M Contest. During the contest, JA8VE/VK9CV will be active on SSB/RTTY. Their equipment is: Two K2/100 and two ALS500 amplifiers. Antennas are: HEX beam for 20m to 10m and DP/LW for 160m to 30m. QSLs via JA1KJW to the JARL bureau or direct to:
Nakayama Hisashi; 1-17-8 Shibuya, Yamato, 242-0023 JAPAN

VK9X, CHRISTMAS ISLAND. A very disappointed Charlie, W0YG (VK9XG), is now QRT. He has been on the 160/80m bands every night/morning, but the QRN has been terrific and the conditions abysmal - making QSOs also hopeless. Steve, VK6VZ, who has kept the "Top-Banders" informed states, "It should be noted that Charlie probably had the largest 160/80m collection of antennas used on Christmas Island since the DL expedition to the islands in the mid-late 1990s, employing inverted vee dipoles at 50 meteres on top of a crane, a 60'-plus Force 12 vertical antenna and phased pennants for reception..... As Charlie is essentially a single man low-band DXpedition, just imagine how much effort this operation has taken and if you feel disappointed, just imagine how he feels." Charlie writes: "If anyone else wants to try their hand out here, be my guest. I have almost a complete station here less amplifier and transceiver. Hopefully someone will hit it here when this antipodal QTH will produce results back to the States. However, I want to warn anyone coming this way, be prepared for heat, humidity, solar flares, crabs and sweat. Nothing here comes easy. That only formula - energy input equals results achieved - certainly does not apply on Christmas Island." The VK9XG Web page with news, online log search and pictures can be found at: http://www.df3cb.com/vk9xg

WP4, PUERTO RICO. Operators Aris/WP4DX, Angel/NP4CQ, Pedro/KP4SQ, Trabert/NP4Y and possibly others will be active from Rio Grande as WP4DX during the ARRL 10-Meter Contest (December 13-14th) as a Multi-Single entry. QSL via WP4F.

XU, CAMBODIA. A group of Slovak operators Jaroslav/OM3TZZ (ex-SU9ZZ), Robert/OM1KW, Jaroslav/OM3TA and Milan/OM1ATT will be active November 26th through December 3rd, as XU7ACZ, XU7ADC, XU7ADA and XU7ADB. Their activity will be CW/SSB/RTTY on 160-10 meters. QSL via his their home callsigns. They will be active in the CQWW DX CW Contest as XU7ACZ. QSL via OM3TZZ.

XU, CAMBODIA. Jack/ON4AJT and Wim/ON6TZG are currently active as XU7AJT and XU7TZG, respectively. Their length of activity is unknown. The two operators did activate Koh Poah (AS-133) this past week. Over the past weekend, activity from them seems to be centered on 20 meters CW/SSB. Watch around 14195 kHz around 1430z. QSL for both stations via ON4AJV.

YI, IRAQ. Curtis, MW0USK/MW3USK, from Usk, Wales, informs OPDX that he just received a quick note from Darran, M1DAZ, who is on active duty with the British Forces Broadcast Services in Iraq, and he has obtained official authority to operate with the callsign YI9DAZ. Darran will be active around the bands for the next couple of weeks using a Yaesu FT-100 and an Atas aerial from South Iraq. Most operations will be PSK31. PSK31 is being used so Darren does not disturb his roommate who is the presenter of the early

morning radio show. He should occasionally be able to put in some time on other modes though! QSL info at this time is via Darran's homecall M1DAZ. It is quite possible Darran will be one of the first U.K. amateurs from YI active on PSK31...

YL85, LATVIA. Janis Vanags, YL3AD, Chairman on the Board of LRAL, informs OPDX that more than 20 Latvian stations are using the special prefix YL85 during the month of November to celebrate the Republic of Latvia's 85th anniversary. A special award is available to celebrate this anniversary by making QSOs on the HF bands as follows:
10 contacts for YL stations * QSOs can be made with the same
5 contacts for EU stations event station, but must be on
3 contacts for DX stations. different band or mode.

Respectively, on VHF/UHF and SAT: 5 contacts for YL stations
3 contacts for DX stations.
Copies of the LOG are welcomed by Mail to: LRAL, Box 164 LV1010, Riga, Latvia. Award Managers are: YL2HA and YL2NS. Stations who request the award will receive a special marked "YL85 Award" on the envelope. The cost of the award is: 5 IRCs or equal in Euros or USDs.

ZA1, ALBANIA. Martti Laine, OH2BH, sent out a press release this past week titled "UNIQUE AMATEUR RADIO PROGRAM OPENS IN TIRANA, ALBANIA". The complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin, but here are a few short excerpts (edited) for non-subscribers: "This coming Sunday (November 8th), an International Amateur Radio (IARU) Region 1 supported course in Albania will commence under the sponsorship of Mr. Spartak Poci, the Minister of Telecommunications and in cooperation with the Polytechnic University of Tirana. Thirty-four third and fourth year students will begin a five-week course of study culminating in a CEPT license examination. A unique part of this program is that Amateur Radio is being integrated into the regular University course offerings using an advanced Radio Society of Great Britain study package as a reference. Each week of this program in Tirana will benefit from the efforts of invited professional educators from the amateur radio community of specific countries. The countries involved in this five-week program will be Albania, Finland, Germany, Hungary, Israel, Japan, Macedonia, Spain, Sweden and the United States. In total, some fifty amateur radio operators, drawn mainly the DX and contesting communities, will travel to ZA-land. The core organizing team consists of 4X6KJ, DL6LAU, EA1QF, G3LQP, I2MQP, K7WX, OH2BH, OH2PM, and ZA1B. During this five-week period, ZA1A will be active on many bands and in a variety of modes while demonstrating amateur radio to local telecom and education administrators, as well as to the students. Multiple locations will be used and several Yaesu donated stations may be active at the same time. After the course, all equipment will be serving the amateur community. During the first week, you will find in Tirana: I2KMG, I2MQP, EA1QF, OH2BE, OH2BH, DL6LAU, DL7AJA, G3OKA, G3LQP and Z35M." The progress of the entire project can be followed on the Internet at: http://www.za1a.com
QSL ZA1A via OH2BH.

ZC4, UK SOV. BASE AREAS ON CYPRUS. Geoff, ZC4CW, will be going contest crazy over the next few months. He will be active in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/Single Band (160m) entry from CQ Zone 20. Also, Geoff will be active in the ARRL 10 Meter Contest (December 13-14th) and the ARRL 160 Meter Contest (December 5-7th) as a Single-Op/High Power/Mixed Mode entry. QSL all operations via G3AB.

ZL1, NORTH COOK ISLANDS. By the time you read this, Vladimir, UA4WHX (aka AC4LN, H44VV and T20VB), should be active on Penryhn Atoll (OC-082) in the North Cooks until November 15th. Victor, ZK1CG (aka ZK1USA), was expected to pickup Vladimir at the airport in Raro on Friday, November 7th, and then take him to the airport Saturday morning for his flight to Penryhn. Victor states, "He will be staying with Warwick, ZK1WL, so should have a good signal from North Cooks. I think his callsign will be ZK1/AC4LN. Do not know why he got this callsign but will ask tomorrow when I pickup his license in town. Normally visitors get a 3 letter suffix." ADDED NOTE: OPDX checked before going to print and found Vladimir is now active as ZK1/AC4LN. Activity has been on CW on 40/30/20/17 meters.

> maintain our freedoms, that some feel they have to try to belittle them?

Uhm... because "a basic love for our country", much like any other love,
is supposed to be shown by actions and deeds, not by words, pledges and
by worshipping flags, politicians and deities. Especially not by straw
man arguments on why "so called democrats do not like the Pledge of
Allegiance". Words mean shit and nationalism is the last refuge of a
scoundrel.
And now, back to that other game: I claim 15 inches. What do you say? It
must be true, since I claim it. Waiter, another round!

So much for what?

You whined about RHF posting patriotic notes (you were wanting deeds, etc....pretty silly, since this IS a newsgroup), saying that words weren't enough to profess love (of country) -- I mentioned poetry, which is a great way to do so. In fact, I found RHF's post and some of the links therin pretty inspirational.

But you just seem to want to bitch about him posting it.

Even your call sign looks like you're crying.

and there-in lies your problem. A republic is a merely how a majority is achieved. A Democracy is how the government is formed. The existence of a legislature, an executive, and a supreme court, are the only things that identify a Democracy (each with their checks and balances). A Democracy can have a direct vote, or a representative vote.

A Republic is a tamed cat, a direct Democracy is a wild cat. The dog would be an executive who tried to manipulate the Supreme Court, or other federal courts.

IQ has nothing to do with it, and MENSA membership would make her
a handicapped person in my book, as who would want to brag about such
a thing.

If enough people wanted to change things, I believe 16 year olds could be
free to vote, but then they must also be free to draft into the military, or
other service to the country.18 year olds got the right to vote because they
were dying for their country. Your niece would have to show cause.

I personally think that only those who are 18 and above, and are not on
Social Security should be allowed to vote.

I can't really agree with you about the "no Social Security" idea, Gene. My father is 76 and is still one of the sharpest, clearest thinkers that I know. Also, I could not imagine telling someone with the military service of Chuck Yeager that he couldn't vote.

I assume your idea is that if they're on an entitlement program, they shouldn't be voting -- the principle being that "any system that robs Peter to pay Paul can always count on the support of Paul." I agree, that is a problem.

We have greatly wavered from the voting system of our forefathers. You used to have to be male, a substantial landowner, a veteran, or a combination of the above to vote. Of course, now we've gone too far -- in California, any illegal immigrant that doesn't mind showing their new driver's license and lying to a voter registrar will soon be able to vote.

There should be some sort of educational requirement for voting. I've heard plenty of radio stunts where they send a reporter out to ask people on the street who (as an example) Dick Cheney is, and about one in six knows that he's the vice president of the United States. If these people are voting, that's a travesty.

I disagree with the campaigns the continually say "go vote." If you can't do it as an informed citizen, please don't.

I don't get your post? What does Clinton have to do with this? We
already know he was an idiot too. All American presidents are fools,
just like you.

Please play nice people.

Look at your current thread topic and then look at the list of newsgroups
you are crossposting into. Then remove any newsgroup in your reply where
this thread is completely off-topic.

If this leaves you with no groups remaining, oh well. (Pick one newsgroup
to sacrifice and converge on it.)

Jackie, the sad fact is each of the Clinton statements is (as you also indicate) true.

Unfortunately the ridiculous statements you made are not.

"<<SNIP>>
> > How can you support Bush when he and the bin Laden family had oil
> > business dealings going back to the 70's?

Should they have a crystal ball? I know of no such deals, however, because the Bush family invested in domestic oil in central and southern Texas. I do know that the Bin Laden family controls one of the largest Middle-Eastern construction companies. If they did build a refinery overseas in the 70's, it would not surprise me if they did business -- especially since Usama Bin Laden didn't activate Al Qaeda until the late 80's.

> > Why did we give Osama bin Laden millions of dollars to fight the
> > Russians in Afganistan?
> >

We didn't. However, we did supply weapons to an opposition faction of Afghanistan freedom fighters that eventually splintered into several warring factions. Years later, one of these factions became the Taliban, which eventually allied with Al Qaeda, years after the Russians had gone. The northern Afghan freedom fighters allied with our troops to help overthrow Al Qaeda and the Taliban.

Because Cleveland managed to outbid them?

I can find no evidence of this, even on the urban legends page at snopes.com. However, knowing something of the Democrat shenanigans in the city politics of Detroit, it wouldn't have surprised me...

Find out what happened to Socrates and get back to us. I don't
remember Athens having a supreme court.

Your posting is irrelevant. If *any* citizen is prohibited from voting
on each and every law, it is not a pure democracy. You are prohibited
from voting on each and every law.

FO&A,

I guess, I Owe Everyone an Apology.

It is No Longer COOL to Love My Country.
- - - Hell Cool isn't 'Cool' anymore !

Today's Definition of a Patriot seems to be:
- - Someone Who Criticizes the USofA and Disparages Our Leaders.

I 'resist' this Change because I grew up in a time when
- I was Proud to Be a Boy Scout
- - A Matter of Personal Honor.
- - - But Does Personal Honor, Matter Anymore ?

Today the Boy Scouts are Labeled as Bigots.
- - - And some go so far to call them a HATE Group.

Once Again I Apologize for Loving My Country.
- - - And having Faith in Our Leaders.

But any warm body is not necessarily a citizen. The democracy can create rules, democratically approved, which limit the participation in the society. If you do not abide by the rules, you may become ineligible to continue participation within the democracy. Indeed, the simple democracy can do anything it (collectively) wants. Therein lies the reason for modifying a pure democracy with a set of fixed rules (possibly called a constitution).

In the first place we are a "Republic", remember the pledge "and to
the Republic for which it stands".which is ruled by a "Representative
Democracy", not a pure democracy.

How is it that the same people who love to quote the "N", word to show how enlightened they are, figure that they have the right to denigrate Southerners with impunity?

I suspect that with your supercilious attitude, you have to look down on someone. Ergo, find a group that is not protected by politically correct speech and stereotype them.

Your sophomoric rhetoric is trite and boring, I suspect your total experience with 4 land has been what you have garnered from the liberal media via TV or movies.

I do note that the most egregious violations of civil rights occur in places other than 4 land...

Many of us lost ancestors in the war of northern aggression, the flag is a source of pride to a people that resisted the imposition of unfair tariffs, made it illegal to import Africans, and wanted to protect their homes. The Stars and Bars are a point of pride, and the strains of Dixie (written by a damyankee) played on a town square warms our heart.

Whatever happened to the free speech that was banded around like a
three-dollar whore when this whole thread started by a Southerner
denigrating other cultures? Or is this just another Limbaughesque
fakery: free speech applies to only what we like and drug wars don't
apply to white middle-age millionaire hypocrites.

> I suspect that with your supercilious attitude, you have to look down on

There is no such thing as a "group that is not protected by politically
correct speech". It is a figment of your imagination and the result of
mistaking paraliberals' bullshit for what liberals stand for. Sort of as
if I assumed all conservatives were moral freaks like Ashcroft and Santorum.

> Your sophomoric rhetoric is trite and boring, I suspect your total

Yes, it must be that damn liberal media: Fox News, CNBC, every Christian
channel anywhere, every Hz on AM, the Washington Post, etc.

Wait, I'm confused... Are you complaining that you can't legally import
slaves anymore or that the aggressors' flag is a point of pride?

If I have any say in this, a patriot is someone who, among other things, applies critical thinking to the actions his country is taking (and let's not make a mistake of equating a group of corrupt politicians with the whole country) and has a courage to make a stand against the obvious mistakes that his "Leaders" are making, especially when the "Leaders" are waging wars in the interest of a foreign power and contrary to the interests of ours. Supporting "Leaders" at all cost leads to tyranny.

> Today the Boy Scouts are Labeled as Bigots.
> - - - And some go so far to call them a HATE Group.

You tell me:

From Webster, bigot (noun): a person obstinately or intolerantly devoted to his or her own opinions and prejudices.

Prejudice (noun): 1 injury or damage resulting from some judgment or action of another in disregard of one's rights; especially : detriment to one's legal rights or claims
2 a (1) : preconceived judgment or opinion (2) : an adverse opinion or leaning formed without just grounds or before sufficient knowledge b : an instance of such judgment or opinion c : an irrational attitude of hostility directed against an individual, a group, a race, or their supposed characteristics

Wrong again, Walt.

I assume you're talking about Lord Baden-Powell, who some believe was a "repressed" homosexual.

Lord Robert Baden-Powell did not found Boy Scouts of America (or Girl Scouts), but he founded the larger scouting movement that began in England and upon which scouting programs worldwide are based.

Nice try.

Evading the straightforward question duly noted. It is interesting,
though, that all those parents screaming against admitting fairies into
the Boy Scouts don't think twice before sending their boys to the
Pedof... pardon me, Catholic church. Makes you think...

How is that an evasion? It's the truth (and thank you for helping to illustrate my point with the Roman Catholic Church).

The Boy Scouts organization have made their wholesome policies perfectly clear and have defended them sucessfully in court.

However, the Roman Catholic Church chose to ignore their own policies, cover up transgressions, and betray many of their members (and have been very, very unsuccessful in court). If they had been true to their faith, they would never have had any trouble.

By the way, Zoran -- I'm sorry for the harsh words earlier -- I was pretty pissed off with the way you trashed RHF for expressing his love for his country. We now live in a country where in some neighborhoods displaying the American flag is considered a vulgar irritation to others. I saw your sarcasm at his post as more of the same wrongheaded thinking.

Whatcha say we talk about radios?

If I have any say in this, a patriot is someone who, among other things, applies critical thinking to the actions his country is taking (and let's not make a mistake of equating a group of corrupt politicians with the whole country) and has a courage to make a stand against the obvious mistakes that his "Leaders" are making, especially when the "Leaders" are waging wars in the interest of a foreign power and contrary to the interests of ours. Supporting "Leaders" at all cost leads to tyranny.

> Today the Boy Scouts are Labeled as Bigots.
> - - - And some go so far to call them a HATE Group.

You tell me:

From Webster, bigot (noun): a person obstinately or intolerantly devoted to his or her own opinions and prejudices.

Prejudice (noun): 1 injury or damage resulting from some judgment or action of another in disregard of one's rights; especially : detriment to one's legal rights or claims
2 a (1) : preconceived judgment or opinion (2) : an adverse opinion or leaning formed without just grounds or before sufficient knowledge b : an instance of such judgment or opinion c : an irrational attitude of hostility directed against an individual, a group, a race, or their supposed characteristics
---
Since the Boy Scouts specifically refuse membership to atheists and homosexuals, what does that make them?

WA7AA

Answer: Free to make their own choices of association.

Reading comprehension challenged?
I will break it down for you.

See Dick with the Confederate flag.

Jane said "It was illegal to import slaves under the constitution of the confederacy."

Spot said " The war was about unfair tariffs against the South and aggression by the Northern invaders."

Dick said "Even blacks fought on the Southern side to protect their homes."

Jane said "You mean all those people that said it was about slavery are wrong?"

Spot said "You got it Jane"

I forgot you were educated in the land of fruits and nuts and humbly apologize for writing beyond your grade level.

The issue being discussed is not whether they're free to make their
choices, but whether excluding people based on religion and sexual
orientation makes them bigots. Pay attention.

> Spot said "You got it Jane"

Seems to me you have problems reading. I never said the US civil war was about freeing slaves - we'll put that excuse in the same bin from which you pulled out the "blacks fought on the Southern side to protect their homes" bullshit. Yes, that same bin that is the source of "imminent danger", "nuclear weapons program", "terrorist connection", etc.

> I forgot you were educated in the land of fruits and nuts and humbly
> apologize for writing beyond your grade level.

Wherever I was educated really makes no difference to what you wrote in your previous post:

>>>Many of us lost ancestors in the war of northern aggression, the flag is
>>>a source of pride to a people that resisted the imposition of unfair
>>>tariffs, made it illegal to import Africans, and wanted to protect their homes.
>>>The Stars and Bars are a point of pride, and the strains of Dixie (written
>>>by a damyankee) played on a town square warms our heart.

So you see my dilemma: on one hand you're stating that the North was the aggressor against the innocent Southerners who just wanted to protect their homes, and on the other you're supporting the exact same war White House is waging in Iraq. Not to mention that defending a regime that was based on slavery in this day and age is really, oh how shall I put this... idiotic. So there's my position - I don't have a problem with Southerners, only with the ones still fighting for their precious Dixie that was built on human misery. Sorry - it must be my education.

Well, by substituting an irrelevant answer to a clear question. For example: John X murdered 20 women - what does that make him? The red herring answer is: a perfect father because he raised five great children.

> The Boy Scouts organization have made their wholesome policies perfectly
> clear and have defended them sucessfully in court.

The issue is very gray and the only reason they've been successful (5 to 4 in the Supreme Court, btw) is that atheists and homosexuals in this country (the only one among the Western nations, btw.) are still considered abnormal by the Christian majority. Had they excluded blacks or Jews, for example, no "private organization" status would help them in the outrage they would raise. Read up on the "public accommodation" issue in this case and realize that the Boy Scouts are indirectly funded by the public.

> By the way, Zoran -- I'm sorry for the harsh words earlier -- I was pretty

There's no need to apologize - it's a free country and sometimes some of us learn something new in the process. My primary reason for getting involved in this pathetic thread is that I hate hypocrisy and inconsistency. So when the political discussion inevitably turns into the bashing of liberals, ACLU, etc. for their alleged anti-Americanism, I can't keep quiet. In my opinion, the average ACLU volunteer is a bigger American Patriotï¿½ that ten thousand Limbaugh wannabes. Also, as a sort of an impartial observer, I can say that the biggest problem of the US partisan voter is that he sees the other party as a devil incarnate, and his own as an infallible moral beacon. Hence, this entire thread.

> Whatcha say we talk about radios?

Yeah, but the dx conditions suck lately.

Hi

I will be monitoring 50.230MHz and 144.230Mhz during the Leonids meteor shower from 17/112003 to 20/11/2003 most evenings and mornings. I will be using WSJT/JT44/JT6M weak signal software and am keen to attempt contact via meteorscatter with stations in Northern New South Wales and Queensland as from Melbourne I believe this to be to optimum range.

50.230MHz using JT6M
144.230MHz using JT44

Please contact me for any arranged attempts.

Cheers

The large coronal hole that was predicted to move into geoeffective position by 11-XI-2003 has indeed, affecting the solar wind. The solar wind has been elevated since 10-XI-2003, with a consistantly southward orientation (Bz is negative) in the interplanetary magnetic field (IMF). The solar wind stream is expected to continue at this higher speed for the next few days, with a high possibility that the IMF will remain orientated southward. This will cause the geomagnetic field to remain at least active, but most likely at minor to major storm levels (at least a G2-level geomagnetic storm, Kp levels between 4 and 7).

The Ap is expected to continue to rise, up to a possible 70, during the next few days. But, the 10.7-cm flux is also rising a bit, with 95, 98, and 100 expected from today, 11-XI-2003, through 13-XI-2003.

There have been a series of B-class flares from the new sunspots (498, 499, 500). This has caused very minor degradation of the middle HF bands in geographical areas directly facing the sun. Type-II radio emissions have been recorded, as well, indicating minor coronal hole mass ejections (CME), further enhancing the solar wind stream.

As I write this, the first M-class flare peaked at 1351Z 11-XI-2003, at about M1. It is unclear to me yet where this flare came from. It might have been from region 500, or, highly possible, from the now-returning sunspot region 484 (we saw activity from this one several weeks ago). The possible return of large active regions that contributed to the high activity of the last 3 weeks is expected between 11-XI-2003 and 16-XI-2003, starting a new surge of flaring activity for several weeks. In the meantime, the very large coronal hole should be the main source of Earth disturbances.

Overall conditions, then, on HF will be poor to fair. The high geomagnetic activity for a period of many days will degrade or even shut down polar and high-latitude paths, while leaving mid- and low-latitude propagation paths only marginal. There will be exceptions to this across paths of sunlight, due to the higher flux levels. VHF conditions could be enhanced due to the active aurora conditions and elevated geomagnetic activity.

So how much pot did KE4TEW give Riley to get his license back?

Read below, if you can read.

TAMPA, FL: The FCC has requested that General class licensee James W. Dale, KE4TEW, retake the General class examination elements under the supervision of FCC personnel by July 30, 1999, or his license will be canceled.

At:

http://www.arrl.org/news/stories/1999/06/23/1/

TAMPA, FL [UPDATE]: The FCC notified James W. Dale, formerly KE4TEW, on August 3, 1999, canceling his General Amateur Radio license. The FCC had notified Dale on June 18, 1999, requiring him to retake his Amateur Radio examinations prior to July 30, 1999, under the supervision of FCC personnel in Tampa, Florida. According to FCC Attorney Riley Hollingsworth, K4ZDH, Dale failed to appear for reexamination, and his license was consequently canceled. Hollingsworth also warned Dale about continued operation of radio transmitting equipment.

At:
http://www.arrl.org/news/stories/1999/08/11/2/

Now, the "Miracle"

TAMPA, FL [UPDATE]: The FCC notified General licensee James W. Dale, KE4TEW, on September 28, 1999, that it was reinstating his Amateur Radio license with a short-term renewal date of September 29, 2000. Dale had failed to appear for reexamination after being notified by the FCC on

June 18 to retake his Amateur Radio examinations prior to July 30, and his license was canceled on August 3, 1999. FCC Legal Adviser for Enforcement Riley Hollingsworth said the FCC has "since reviewed and accepted" Dale's detailed response and his explanation for failing to appear for retesting. Hollingsworth said the FCC was reinstating Dale's General license "pursuant to our agreement with you," but the FCC letter did not elaborate. Hollingsworth told Dale that if there are "no valid complaints about your use of Amateur Radio" over the next year, he may apply for a routine license renewal at the end of his current term.

At:
http://www.arrl.org/news/stories/1999/10/07/5/

Thus, KE4TEW, a convicted felon who jammed HF frequencies for years while id'ing, did not show up for a retest. Why? That's easy. He paid for his license. Then Riley does what he has done with the others who did not show up, he cancels the license. Good Riddance to this nuisance. Then almost two months later, Riley reinstates the license, WITHOUT THE ORIGINAL RETEST!!!! "Pursuant to our agreement with you" What the hell does that mean?? In other words, even though we know you are not qualified to be on the air, go ahead anyway???? What the hell kind of enforcement is this? It's biased enforcement, Riley's trademark style. So what was the agreement? Harass people on the Internet 24/7? Continue to jam the Liberty Net? Is he paying Riley a monthly fee to be on Amateur Radio? Riley's little slush fund. Did TEW give Riley a large amount of illicit drugs? What was it that made Riley reinstate this known drug dealers ticket that was fraudulent in the first place? Maybe Riley does Rita on weekends?

If you are wondering what kind of ethics violation Riley committed in granting TEW's ticket back under the table contact the Inspector General of the FCC as several already have. Ask Mr. Feaster to add your name to the ethics probe of the KE4TEW case. Then one day you too will know how to bribe an FCC official and make him make unethical decisions on your behalf.

Feaster, H Walker III OIG (202) 418-0476

Time for me to follow an old Southern expression, when arguing with a Jackass - make sure he is not doing the same. On that note I conclude further response to your inane rantings.

Worked VK9CYL on 10M CW a couple days ago.
Have been listening for her for quite awhile, and occasionally
heard an ESP level signal. However on the 7th around 0100Z
the signal came up to S1 for 15 or 20 minutes. Hooray!

Have been staying out of this, but your Leninist historical revisionism is
too much. Having lost ancestors on BOTH sides, I calls that conflict the War
of Stupid Secession. And while Dixie is a bright & lively tune, it's sound
should forever evoke memories of the dark heart of the Confederacy.

In the RTTY contest this weekend, I worked VK, ZL,
and FO (Tahiti) on ten--sure was a pleasant surprise!
Also worked Guam for the first time, in CQ WW SSB,
with my new antenna.

I just put up an off-balance dipole; the leg that runs
a bit south of due west is 160 feet (around 50 meters),
and I was hoping for a bit of directivity toward the
Pacific. It's a tough haul from the eastern coast of
the USA, with a barefoot transceiver and low wire
antennas. So far, I'm pleased with it. Now I need
to see if I can point it further north and finally
get China in the log! ;-)

This should also link to Senate and House sites that will
allow you to find and contact your representatives in both chambers.

>
<snip apology for bringing up said important subject>

I was moved by the OP, and intend to follow up because I feel
this issue to be worth my time. Apparently others who post here would
much rather argue about the merits of the current Executive branch
administration. I suggest that all followers of this hobby should be
concerned, and further that the program should be defended on its
clear merits.

By all means, talk politics, and decide amongst yourselves, or
at least for yourself which candidate/party (recalling that there
-Are- more than two choices) best supports you, but in the meantime,
see about finding ways to make plain the merits of attention paid to
"space weather".

Be well, and may all for whom you care prosper.

Continental Electronics Has a New Owner
Broadcast transmitter manufacturer Continental Electronics has a new owner.

Few people in the broadcast industry took note this week when it happened, but the Dallas-based company was part of the $543 million purchase of Integrated Defense Technologies Inc. by defense electronics supplier DRS Technologies Inc., headquartered in Parsippany, N.J.

The transaction was completed following approval by a majority of IDT stockholders, the buyer said.

A Continental spokesman told Radio World Online Thursday that the impact of the sale on Continental is not yet known; but, he said, "I think it can only be positive." Continental has 140 employees.

The company has had a varied ownership history. Continental was founded in 1946 by James O. Weldon and later became part of LTV Corp. In 1972, Weldon bought it back.

In 1985, the company became a division of Varian Associates; in 1990, it was acquired by Tech-Sym Corp., which was bought in turn by IDT in 2000.

DRS, the new parent company, employs 5,700 people. Its announcement of the acquisition of IDT did not mention Continental. A spokeswoman did not immediately return a call about the company's plans for the broadcast marketplace.

Mark S. Newman, DRS Technologies' chairman, president and CEO, said in a statement, "This transaction has enhanced our content on key U.S. Army and Navy weapons programs, contributed a significant new base of U.S. Air Force programs and greatly expanded DRS's intelligence agency business, creating a formidable, defense electronics industry competitor."

I hope the company isn't using that name, since there is a
telecommunications company officially named IDT in Newark, NJ. I
worked for them for a while. They love to litigate.

Please excuse me, once again I have erred in the eyes of a 6 Lander by placing truth in front of political correctness.

It might interest you to know that after the surrender of Lee, Lincoln requested the White house band to play Dixie.

I am always amazed how enlightened liberals can reduce a complex war to a single issue. If you choose to do so, make sure it is the correct single answer. The war of Northern aggression was about money, slavery did not have a damn thing to do with it.

Lincoln's emancipation proclamation had no standing in a seceded South and was made in the hopes that it would foment an uprising of the slaves, thus requiring the use of Southern troops for quelling the uprising rather than fighting the Northern troops.

But Ed, let me not confuse you with the facts.

Oh my, tarred as a "6-Lander"! How cutting! And quaint, since the "6"
designation is a result of a Federal bureau licensing organizational plan,
and you Southern boys are always so distrustful of Federal schemes. Looks
like them Washington boys are already inside your head.

Playing "Dixie" might have been a diplomatic gesture of kindness; it also
might be viewed as the ultimate "screw you".

Slavery was the basis of the South's wealth, the ultimate cheap labor.
Claiming that money was the true basis for the US Civil War is like trying
to link the Holocaust to the cost of soap in Bavaria. And the South didn't
want to simply continue slavery, they wanted to allow it to be expanded to
new states as they joined the Union. Slavery wasn't the single issue, but it
was the ultimate trigger to a train of events that had been being avoided
for 30 years. If slavery wasn't the prime issue, then why wasn't the Civil
War fought between the Union and say, Indiana, Illinois, Wisconsin,
Minnesota and Michigan?

The Emancipation Proclamation was obviously unenforceable, as it applied
only to those states currently in rebellion to the Union. How about that,
Lincoln takes the moral high-ground, foments trouble within his adversaries
territory, and causes the adversary to waste precious manpower on internal
suppression. Impressive even after 150 years.

You divine that I'm a "liberal." You're obviously invoking the same powers of political acumen that typified the train wreck that was the Confederate Government. The Great Speeches of Jefferson Davis could be inscribed on the head of a pin with a magic marker!

Dixie is dead; get over it, or accept irrelevance.

It's nowhere near the San Andreas fault, which is far to the East in the
Imperial Valley.

The bureau of meterologies rain radar web site was indicating that the Melbourne metro area was having wide spread light rain this morning (15/11/2003) however the skies were crystal clear. I have read recently that this phantom rain may be caused sporadic e returns. Has anyone anymore clues?

Hi,

Interesting. We see light rain indicated on radar here quite often. Been
wondering what might cause such, just had not investigated.

It's a phenomenon known as Anaprop (Anomalous Propagation).
Decent software modelling can usually factor it out. BUT not always!!

OK, this thread must be dead, as Mr. Jeswald, of Anniston, the main irrational protagonist, has resorted to looking me up on QRZ and is one step from posting my address.

The half of my family that hails from the North has handed down a legacy of the appreciation of fine killing equipment, while my Alabama heritage yields me the willingness to use them. I'm pretty sure that the carcass that goes bump isn't gonna be mine. Y'all come out now, bring Bubba too; the dogs are always hungry!

Oh yeah, re the faults. Some day, we are gonna have some mighty fine Atlantic ocean-front property out here.

Don't shoot me down if this is not exactly correct.
AFAIK it's an atmospheric condition caused by discontinuities in the
temperature profile (i.e. it doesn't get colder as you go up). These layers
act as a duct for the radar beam and once it follows this path the returns
can be much stronger than normal, giving the impression that the target (in
this case, rain droplets) is very much bigger than it actually is.
I'm not up on the theory, but I have seen plenty of evidence of the effect
in real life.
A few years ago AnaProp used to be a real pain for those trying to interpret
weather radar images, but software can get rid of most of the anamolous
effects nowadays. All very clever stuff and way above my head!
I'm sure that a search for Anomalous Propagation will provide you with a
much more detailed (and probably more accurate) answer.
Hope that helps.

The answer is pretty simple Ed, weather conditions.

First all the slaves were brought in by Yankee traders. It was against the law in the South to import Africans.

The problem with using slaves in the North was the short growing season and a population that must be housed and fed during the unproductive months. This made slavery a net loss situation in the North. The folks up North had no problem with slavery when the cotton was shipped to mills in the North. The problem started when the South shipped the cotton to England and other countries direct. This put the Northern mill workers out of jobs and caused the North to impose unfair tariffs on Southern products.

Slavery as an issue did indeed exist as an issue, but MONEY was the real issue. Had the South continued to supply cheap materials to the North, slavery would still be in vogue.

Excuse me gotta to go, my cell phone is playing Dixie, have to answer it...

Their passage from Yankee ports to the Southern States was guaranteed
by federal law, i.e. it was illegal to interfere with the transfer of
slaves through the Northern States.

If you have slaves, you can get them to do more than raise plants. Ever hear
of construction, mining or manufacture? All labor intensive, but obviously
beyond the imagination of a Southern slaver.

SNIP

> Slavery as an issue did indeed exist as an issue, but MONEY was the real
> issue. Had the South continued to supply cheap materials to the North,
> slavery would still be in vogue.

Based strictly on economics, how could you possibly claim that the North
found it cheaper to prosecute the Civil War than to accept higher-priced
cotton? And following your logic, the South would have been economically
devastated with the development of synthetic fabrics, so they could have
tried secession maybe around 1925?

I think KGK is right on the money.
Remember that our weather radar is C band, something around 4GHz, so
ionospheric conditions are going to have minimal effect, and besides, the
radar beam is sent out closer to the horizon than 'up in the air'.
There was moderate tropospheric ducting around Bass Strait yesterday, and I
suspect it was this that caused the false returns.
I recall working on some microwave links across Bass Strait some 7 years ago
and watched with some facination the spectrum of the base-band output after
a long over water hop being affected by tropospheric ducting - notches in
the BB rolling up & down, enhancements, fades etc. The phase-equalizing
networks were working overtime, too. This was at low 4GHz, and to a much
lesser extent 6 GHz.

Thas right....I was just wondering if he was really in the land of the
fruits, you know how it is with these ham calls these days.

Dan/W4NTI

Ed is waaaayyyyy out there in the land of fairies and home of the liberal.

Make good sense. I have carried out a bit of a search of the web with the information that you supplied and the below url is a general overview of Anomalous Propagation. To carry this discussion a bit further I guess its far to say that this effect may be a useful indicator for tropo work on vhf and above.

http://www.theweatherprediction.com/habyhints/247/index.html

Thanks for the help.

Cheers

Peter VK3YSF

Here we usually call it ducting, and temperature inversions.
It can occur at almost any height, but *usually* within 5000 AGL
Aurora can also cause problems but would be much easier to filter out.
Aurora imposes a modulation on the signal where ducting and inversions
don't normally. Aurora also occurs in the ionosphere while ducting
and inversions are close to the ground, relatively speaking.

When you discover you are receiving high VHF and UHF stations on your
TV set is most likely an inversion or ducting.

BTW, either can prevent normal reception of nearby stations in some
circumstances.

I've heard stations from several hundred miles out on my mobile rig,
yet could not hear them on the stacked array at 130 feet.

Quisiera saber informacion sobre como poder escuchar conversaciones de moviles, hace tiempo con la emisora de 2 mts se escuchaba los moviline, ahora creo que emiten entre 900 y 1800, ¿se pueden escuchar en esas frecuencia ¿ estan codificadas y no se escucha?

Necesito informacion....

Gracias de antemano.

Good idea, Ed.

It's an ignorant waste of hot air that would be better spouted off at
rec.radio.amateur.policy , where off-topic, non-ham garbage like this
belongs.

Oh, and I wanted to ask: Is it true that they call California the "cereal
bowl state" because once you get past the fruits and nuts, the only thing
left are the flakes?

Just wondering!

Imagine if today's liberal press had covered WWII, when we were losing
an average of 309 people A DAY....

after several MONTHS of conflict in iraq, we JUST hit #400, and while it's
a tragedy and all war is dreadful, we already have thrown out the tyrant
that
was in *that* nation.

We would never have made it past the beaches of normandy had CNN,
MSNBC and the rest of those yellow bellied leftist news organizations had
been around then as they are now.

Clint

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 9th/November, through Sunday, 16th/November there were 219 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4U1U, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, J8, JA, JT, JW, JY, K, KG4, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S9, SM, SP, SU, SV, SV/a, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, VE, VK, VK9C, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/n, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

5R, MADAGASCAR (Top Band Activity!). George, W8UVZ, reports that Ake, 5R8FU, is expected to start to be active again during his sunrise on 160 meters. As many of you remember, he tried often on 1834 kHz just before his sunrise during the winter months in the northern latitudes during the past couple of seasons. Ake says he is again on 160m near his sunrise calling CQ on days that he would seem to have better propagation. George states, "In prior years, he started about 20 minutes or so before his

sunrise (now near 0207z) through the 5R sun up. More often he would then QSY to 3513 and work those who could hear him on 80 meters. I don't believe this will be a DAILY routine since sunrise is in the 'wee' hours during Madagascar summer. But Ake was pretty faithful to days when he thought condx might be favorable."

5X, UGANDA. Milton, W6QE, informs OPDX that his dear friend Dr. Terry Wassell, K3JT, is now on the air from Uganda licensed and operating as 5X1X. Terry works for the Centers of Disease Control and Provention (CDC) and is doing statistical research on African Viruses. Terry will be there for approximately 6 weeks and is active on the low bands, particularily on CW. Check 40 meters in particular (after 0300z and again after 1930z). He will also be active during the CQWW CW Contest. QSL via K3JT. OPDX did some QSN checking and found that Terry is also active on 20 meters RTTY. Watch around 14083-86 kHz between 1800-2100z. Also, watch 15 meters CW before 1800z.

9H3, MALTA. Ingo, DJ5CL, reports that a crew of operators will be active as 9H3WW during the CQ World Wide DX CW Contest (November 29-30th) as a Multi-Two entry. QSL via DJ5CL (Bureau). The crew (list not provided) will be active before and after the contest (November 26th-December 2nd). Their activity will be on 160-6 meters on CW, SSB and the digital modes. Operators will use their own individual 9H3 callsign. All QSOs will be confirmed 100% via DJ5CL.

AH2, GUAM. Operators Toshinobu/JI3ERV, Mikawa/JR7OMD, Atsushi/JR8VSE and Kanji/JH0USD will be active as AH2R in the CQ World Wide DX CW Contest (November 29-30th) as a Multi-Single entry. QSL via JH7QXJ. PLEASE DO NOT send QSL to Guam mailing address or the Guam Bureau. QSL via JA Bureau or direct is OK.

AP, PAKISTAN. Zeljko, 9A4NA, will be guest operator at the Asad's, AP2AUM, station for the CQWW CW Contest and will try to make some QSOs. It all depends on how much free time he will have. QSL via 9A4NA.

BW3, TAIWAN. Tatsuhiko, JD1BKQ, will be active as BW3/JD1BKQ during the CQ World Wide DX CW Contest (November 29-30th) as Single-Op/All Band/ Low Power entry. QSL via JR3PZW.

CT3, MADEIRA ISLAND. Ken, W8LU, who was recently active as IS0/W8LU from Bosa in Sardinia (IOTA EU-024) from October 22-27th, will be on the air from Santana on Madeira Island (IOTA-AF014) as CT3/W8LU from November 25th to December 2nd. Activity will be on all bands on CW only. QSL both operations via his home callsiign. Ken also mentioned that he will be active in the CQWW CW Contest as a member of the CT9L team (See OPDX.630).

DS0, SOUTH KOREA. Operators Sung/HL1XP, Robin/HL1IWD, Seong-Joo/DS1BHE, Kang/DS2AGH, Lee/DS2BGV, Yoon/6K2AVL and Maeng/6K2BYF will be active as DS0DX during the CQ World Wide DX CW Contest (November 29-30th) as a Multi-Single entry. QSL via HL1XP.

FM, MARTINIQUE. Boris, T93Y, will be active as FM/T93Y from FM5BH's QTH on Martinique Island (IOTA NA-107), November 25th through December 2nd.

His main goal is to participate in the CQ WW CW Contest as a Single-Op/ All Band/Low Power entry. He will operate CW, SSB and RTTY before and after the contest. Watch the WARC bands and the usual RTTY frequencies. QSL via T93Y: Boris Knezovic, P.O. Box 59, Sarajevo BA-71000, Bosnia and Herzegovina, or T9 QSL Bureau. For more information about this operation, visit the Web page at: http://www.t93y.com/fm2003

HI8, DOMINICAN REPUBLIC (Update/Correction). Hiro, JA6WFM (not JA6WFH as mentioned in OPDX.634), will be here on business for the next year. He has applied to Dominican Communication Bureau for the license and has requested the callsign HI8J. His license permission may take two weeks to receive.

HS0, THAILAND. Sam, HS0ZDY, in Bangkok, plans to be active in the CQWW DX CW Contest as a Single-Op/Single Band (15m) entry.

IOTA NEWS.....
AS-117. Shigeo, JA4TI, is/was expected be active from Inuno Island between November 16-17th. Inuno is also good for the JIIA (Japanese IOTA Islands Award AS-117-066). He will use the callsign JA4TI/4 and will operate on the HF bands SSB. QSL via his home callsign.

EU-011. (You have time to plan to work this one!) Richard, G7GLW, Secretary for the Cray Valley Radio Society (CVRS), reports that the CVRS will be operating from the Isles of Scilly, July 21-26th, 2004. M8C/P is the proposed callsign for the IOTA Contest (July 24-25th). All other times the operators will use homecall/p. The will be active on all bands CW/SSB and the Data modes. The operators will be G0VJG/Nobby, G4BUO/ Dave, G7GLW/Richard, G0FDZ/Chris, 2E0ATY/Ralph and M3CVN/ Simon. QSL Manager will be G4DFI.

OC-159. By the time you read this, Vladimir, UA4WHX (aka ZK1/AC4LN), should be QRT from Penryhn Island (North Cook Island) and is back in Rarotonga (as of Saturday afternoon, November 15th). Victor, ZK1CG, informs OPDX that Vladimir will try and go to Mangaia Island to the southeast of Rarotonga for a week or so. This is a RARE IOTA (Position 21' 55 South and 157' 55 West -- Grid Square BG18AC). Look for him possibly Monday morning (Flights to Mangaia Island are Monday, Wednesday, Friday and Saturday mornings).

J43, GREECE. Wolff, DJ5JH, in Peloponnese, informs OPDX that he will be active as J43J in the CQ WW DX CW Contest (just like in the phone portion) as a Single-Op/Single Band (20m) entry. QSL J43J via the Bureau to DJ5JH.

JT1, MONGOLIA. Naran. JT1BV, informs OPDX that he will participate in the CQ WW DX CW Contest as a Single-Op/All Band/High Power entry. QSL via his QRZ.com address.

KG4, GUANTANAMO BAY. Tip, N4SIA, informs OPDX that he will be making a trip after the first of the year to here and will provide all the details

very soon. He does have the callsign KG4AS. Stay tuned!

KP2, U.S. VIRGIN ISLANDS. Mark/K4MCE and Dave/N4KZ will operate the special events station N4Z from St. Croix, December 30th through January 5th. Their activity will be on 160-6 meters SSB and CW. QSL via N4KZ.

P4, ARUBA (Contest and Lighthouse Activity). Ken/K6TA and his XYL Kay/K6KO plan to be very busy on Aruba between November 26th and December 17th. Look for them to be active as P40K and P40TA. Their activity also includes the following contests:
P40TA - CQ WW DX CW Contest (November 29-30th) as a Single-Op/All Band/High Power entry
P40TA - ARRL 160 Meter Contest (December 5-7th) as a Single-Op/High Power entry
P40K - ARRL 10 Meter Contest (December 13-14th) as a Multi-Single entry
While on Aruba, they plan to visit some of the lighthouses on the island. Look for some activity from the California (Hudishibana) Lighthouse (ARLHS reference ARU-001) and Ceru Colorado Lighthouse (ARLHS reference ARU-002). QSL both P40TA and P40K via WM6A, direct only.

PJ4, NETHERLANDS ANTILLIES. Peter, PA3CNX, will be on holiday from here between November 20th and December 15th and is expected to be active as PJ4/PA3CNX from Bonaire (SA-006). Activity will be on the HF bands. His preferred frequencies are: 3790, 7070, 14210 (14328 for Dutch skeds), 28440, 29580 (FM) and 6 meters, if open, he will be on 50110 kHz. QSL via the bureau to PA3CNX or direct via the callbook address (QRZ.com).

PZ5A PHOTOS. The first photos from PZ5A operation are now available on the MDXA Web page at: http://www.mdxa.org/pz03_photos.html

QSL INFO AND NEWS.....
A61AJ QSL UPDATE: George, K2UO, reports that he has logs up until the 5th of November 2003 and that DIRECT A61AJ QSLs are being answered DAILY. HOWEVER, there are quite a number of cards being held due to missing log data. These will be processed as soon as the missing logs are received. The bureau cards are also being processed as time permits and about 1,000 have been processed and will be mailed shortly. K2UO is the QSL Manager for North/South/Central America, Caribbean and all U.S. posessions. DJ2MX is QSL Manager for Europe/Asia/Africa/Pacific.

Ken, W8LU/DL7FLU, informs OPDX that all known requests for QSO confirmations with KL7Y (Silent Key) have been mailed. This includes requests that were sent to KL7Y, direct or via the Bureau, or to other QSL Managers, including himself (W8LU). Ken believes he has all KL7Y logs with the exception of his contest logs prior to 1994. Ken will be happy to respond to any requests for a QSL for KL7Y. Please submit your request either direct or via the bureau.

Trond, LA9VDA, reports that Bureau cards for OJ0LA can be requested via E-mail. Send an E-mail (with your QSO information) to: la9vda2003@yahoo.no

Please do not send cards via the bureau if you request a card via E-mail.

TP6CE was active over the past weekend by the radio club TP2CE (Council of Europe). QSL via F6FQK. QSO is valid for the Council of Europe Radio Club Challenge. See rules on the Web site: http://ewwa.free.fr

QSL TU0PAX via TU2CI. Activity took place this past weekend on November 15th. This special event was active to celebrate the "Peace Day Commemorative in Cote d'Ivoire (Ivory Coast)."

SPECIAL EVENT (Meet the real Santa before December 24th!). Juha, OH9MM, reports: "As we all know the real Santa Claus comes from Finland! Santa Claus Land (OH9SCL) will be again active during this December from the Artic circle." This year there will be a special activity period between 17th of December and the 21st of December. Operation will be on 80-10 meters CW/SSB/RTTY/PSK31/SSTV. The main focus of digital modes will be during the weekend. The persons willing to help Santa this year are: OH2BH, OH2NWG, OH3BHL, OH9KL, OH9MDV, OH9MM, OH9RJ and OH9VC. QSL is via OH9UV.

SV/A, MOUNT ATHOS. Monk Apollo, SV2ASP/A, was heard this past Saturday on 20 meters SSB. He was first active on 14227 kHz around 0613z and then later on 14200 kHz around 2320z.

VP2V, BRITISH VIRGIN ISLANDS. Maciek, WQ7X (ex-SP8EST, SP5EST), will be active as VP2V/WQ7X now through November 24th. He will be operating CW and SSB on the HF bands. Over the past week, he was active mainly on 80 and 40 meters CW starting around 2130z (also after 1000z). He was also active on 75 meters SSB. QSL via his home callsign.

XV, VIETNAM. Kunihiko, JE7IDA, will be active as XV2NA for the CQWW DX CW Contest (November 29-30th) as a Single-Op/All Band/High Power entry. QSL via JE7IDA, bureau or direct.

YV0, AVES ISLAND. "The Daily DX" reports that the tenth most wanted DXCC entity will be activated in late January or sometime in February by Radio Club Venezolano (RCV). This operation will coincide with the RCV's (YV5AJ) celebrating their 70th anniversary in 2004. Activity is expected to be on all bands and modes, including operations on 6 meters, SAT, digital modes (RTTY, PSK, SSTV) and possibly EME. They also plan to have a YL operator for the YL chasers. The callsign will be annouced at a later date. More details are forthcoming.

3015. Not enough height/clearance for a Log Periodic - any suggestions?

Newsgroup: rec.radio.amateur.dx
Date: 2003-11-17 02:24:11 UTC
From: Je Forget <je.forget@frenchconnection.fr>
Message-ID: <BBDD9B7A.3B08%je.forget@frenchconnection.fr>
Source record: 8298

Okay here's the deal,

I would absolutely love to put up a Log P, but lamentably my tower is only 42' to the thrust bearing, and if I put up even the smallest Tennadyne T-6, the 38' (2x19') rear element would severely overhang not only the neighbors yard, but their house as well. (they are 24" from the lot line.)

My other concern is ice. That is to say, when it ices up (as it will inevitably do several times each winter) the longer elements could droop to the point where they could strike his roof, mine, and a nearby tree. (heck, the balance between peace among neighbors and a decent antenna system sure is frustrating...)

So, I have to keep it small, but I would like it to cover more than the usual 20-15-10 devices, and still have some level of performance. (gee, while I'm at it, let's have it defy gravity, be completely invisible, and guarantee a 5/9 copy to even the remotest corners of the globe... but seriously folks, I need some real life testimonials here!)

I have a brand new TH3JR (purchased 5 years ago) still in the unopened box, but I'm thinking 'more bands' would be nice.

I found a local place that has some interesting antennas, but I find few references to them and their performance on the web. (that's not to suggest they are not good devices, heck, they could be a well kept secret little gem.) Here's a link to the one I'm looking at:

http://www3.sympatico.ca/tgmc/mq-2.html (the actual antenna)
http://www3.sympatico.ca/tgmc (general home page - links to antennas)

It's quite compact, and a very different configuration from anything I've seen elsewhere, but I have never heard of anyone using one.

So, what's out there that's small and yet delivers decent performance with 20-17-15-12-10 in mind?

Any helpful firsthand experience passed along would be very much appreciated!

Pat, VE3PMK

(I'm slowly getting spam under control, so please post replies here. Thanks!)

Hi,

Do you remember the marvellous electrogolden plate badges ?
For memory http://www.astrosurf.com/lombry/Radio/badge.jpg and
http://www.eham.net/reviews/detail/2668

Many many amateurs asked me where to find now such badges... sorry but
nowhere ! But...
I am currently in the way to conclude new "contracts" with US company very
interested in this business. At least three of them would like to
commercialize such badges (custom die, 24k gold, electroplate, engraved in
blue navy, 5 lines for text, pin/flap on back, etc), but this is still under
discussion.

First of all, I would like to know if YOU should be interested in buying
such a product, price about $70, delivery time about 8-10 weeks.
I do not need your name or any order but simply an idea of the number of
people or club station that such a product could interest at short delay.

To avoid spam, send you feedback using my website form :
http://www.astrosurf.com/lombry/post.htm

Thanks in advance

Thierry

3026. NW7US Propagation Update: 18-XI-2003

Newsgroup: rec.radio.amateur.dx
Date: 2003-11-18 16:57:09 UTC
From: nw7us@hfradio.removethispart.org
Message-ID: <Dbsub.5299$yn.4829@news.randori.com>
Source record: 8160
Cross-posted to: alt.ham-radio.hf,alt.ham-radio.ssb,alt.ham-radio.vhf-uhf,rec.radio.amateur,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.shortwave

Old solar sunspot region 486 (now numbered 506?) is rotating back into view on the solar disk. At 1011Z 18-XI-2003, it produced an M4.5 flare, showing that it will play a significant role in space weather over the next week. Region 486 was the origin of the historic X28 flare of 4-XI-2003.

The other giant sunspot groups 493, 487 and 488 are also coming into view as they rotate from around the far side of the sun. Remember, these groups were the origin of many M- and X-class flares during the end of October and the beginning of November 2003. Do they hold enough punch to continue the strong flare activity we saw before? It does appear that they are complex enough to continue producting moderate flares, as we are seeing quite strong activity on the eastern solar limb.

Region 501 continues to have a structure that is capable of additional M-class flares. Already, today, this group produced 3 M-class flares, and the forth seems to be associated with the old, returning region 486. Sunspot region 501 will remain with us for the rest of the week.

At the same time, the large coronal hole that has continued to influence the geomagnetic activity is moving toward the edge of the sun, and will rotate out of view soon. The solar wind speed is slightly decreasing as a result. The orientation of the Interplanetary Magnetic Field is now mostly northward in its orientation (Bz is positive), so this has helped quite the geomagnetic activity, but not by much.

Speaking of coronal holes and coronal mass ejections: A CME was detected from a flare from region 501. This CME will at least partially impact Earth in the next 24 to 36 hours. This will elevate the already disturbed geomagnetic activity.

High Frequency propagation is expected to be fair to good for the next 12 hours or so. The slight lull in the geomagnetic activity has helped overall conditions, and there is an increase in the 10.7-cm flux level. This is causing a slight improvement over most low- to mid-latitude paths. But, conditions will become rough as we see an increase in X-ray flare activity as well as the arrival of new CMEs. HF propagation will be poor over the high-latitude regions (there is a chance of returning proton-event causing X-ray flares from the old regions now rotating into view), and poor to fair over the mid- and low-latitude paths.

The highest frequencies will have short and weak openings, with the strongest being on paths between north and south stations. The middle frequencies will be strong and reliable for the next 12 to 24 hours, but will experience degradation with the return of the flaring and geomagnetic activity. Low frequency propagation will be fair for the next 12 hours, then degrading with increased geomagnetic activity and flares.

X-ray flares cause short-term radio blackouts on the sunlit side of the Earth that can last mere minutes (with weaker flares) to several hours (with major flares). CMEs can cause geomagnetic storms, which cause the ionosphere to recombine (causing the ionosphere to lose its ionization). This causes the maxiumum usable frequencies to fall as much as 50% of normal. Having both X-ray flares along with geomagnetic storms can close HF down completely.

I will continue to monitor solar weather, and will post updates as events warrent. A full discussion is on-going at http://hfradio.org/forums/ - and live data is organized for your browsing at http://prop.hfradio.org/

Hello !
I'm looking for any circuit to control my yaesu FT-857
I don't want to buy the CAT system box, I want to build
the interface.
The main purpose is to control the radio with the logging
software I use (DX4win and CT).
If you have the circuit or know about any web page where
it might be please send me an e-mail.
I've search a litle on the web but mostly I find are
advertisements about radios with CAT system, not the interface
wiring !

Thanks !

Amateur Radio Newsline™ Report 1370 - November 14, 2003

Amateur Radio Newsline report number 1370 with a release date of Friday, November 14, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Internationally sponsored ham radio training begins in Albania, UOSat-14 goes QRT for good and ARISS honors the late Roy Neal, K6DUE, with an on the air -- space to ground event. The details on Amateur Radio Newsline report number 1370 coming your way right now.

(Billboard Cart Here)

**

BREAKING NEWS: AUSTRALIA TO BE CODE FREE

The Australian Communications Authority has announced to QNEWS that as of January First 2004 CW will no longer be a requirement for Amateurs to operate on the HF bands. From Monday November 17th, the ACA website will have the press release under the signature of Dr. Bob Horton. Full details on next weeks Amateur Radio Newsline report. (Q-News)

**

RADIO EDUCATION: AMATEUR RADIO PROGRAM OPENS IN ALBANIA

We told you a few weeks ago that it was going to happen and now it has. Ham radio training is now available in Albania. Jeramy Boot, G4NJH, in the U.K. takes an in-depth look at the new internationally sponsored training program:

--

A unique amateur radio program started in Tirana, Albania the 9th of November. Thirty-four third and fourth-year university students began a five-week amateur radio course using RSGB study material as the reference books.

The course will culminate in CEPT license examinations. It is being run in cooperation with Mr. Spartak Poci, the Albanian Minister of Telecommunications, and the Polytechnic University of Tirana.

A unique part of the program is the way in which amateur radio is being integrated into the regular university courses. The course will not only teach amateur radio up to the RAE Full-license standard, but also the role of amateur radio in society, QSL'ing practices and successful Dxpeditioning.

During the five-week period, ZA1A will be active on many bands and modes while demonstrating amateur radio to local telecom and education administrators, as well as to the students. Multiple locations will be used and several stations may be active at the same time. After the course, all the donated equipment will serve the amateur community.

Jeramy Boot, G4NJH, in Nottingham, the U.K.
--

This unique, one-of-a-kind ham radio training program is supported by Region 1 of the International Amateur Radio Union. Additional assistance comes from several national ham radio societies, the Northern California D-X Foundation, Vertex Standard, Fluidmotion Corporation, Malev Airlines and the Rogner Europark Hotel in Tirana Albania. (RSGB, OH2BH)

**

RESTRUCTURING: SWEDEN MAY GO CODEFREE

Sweden could be next nation to drop the Morse requirement for ham radio licensing and end C-W testing.

The November issue of the Swedish national amateur radio society's magazine, QTC, says -- and we quote: "Soon - very soon - the requirement for knowledge of C-W for High Frequency band access will be dropped for the country's would-be amateurs and current Class 2 amateurs".

SM0SMK is the President of the Swedish national society. He says that they hope the Morse code test requirement will be removed at the end of the year. (GB2RS)

**

HAM RADIO IN SPACE: OSCAR 14 GOES SILENT

One of ham radios most popular emergency communications Easy Sats has gone Q-R-T. This with word from the Surrey Space Center that U-Oh-Sat Oscar 14 has finally reached the end of its mission after an amazing 14 years in day to day service.

Launched in January of 1990, U-Oh-14 was the first 9.6 kilobit per second amateur digital communications satellite. It literally pioneered the packet satellite or PacSat concept.

After about 14 months on-orbit, U-Oh-14 was switched to commercial frequencies for humanitarian service by an organization called Satelife. It was used by them until 1997 when it was returned to Amateur Radio service and configured as an F-M repeater in space.

A failure of one of the cells of its on-board battery supply is keeping the entire pack from recharging from the satellites solar array. This causes the transmitter to shut down shortly after it is commanded on. This situation lead to the decision by controllers to terminate the

micro satellites mission after more than 72,000 orbits of the planet. (RSGB)

**

RADIO HONORS: ARISS TO CELEBRATE THE LEGACY OF ROY NEAL, K6DUE

The Amateur Radio on the International Space Station team will be honoring the memory and the legacy of the late Roy Neal, K6DUE. This, with an operating event involving the crew on the orbiting outpost and hams on the ground. Amateur Radio Newsline's Norm Seeley is here with the details:

--

In a joint release, Frank Bauer, KA3HDO and Sergej Samburov, RV3DR of the ARISS International team say that the event is being held to commemorate Roy Neal's vision and dedication. This, in the development of manned Amateur Radio space communications.

And as a celebration of Roy's contributions ARISS has requested that the current I-S-S crew take to the airwaves the weekend of November 29th and 30th to communicate with as many ground based amateur radio operators as they can. After the initial two days, the operation will continue through the month of December using both voice and packet.

Ham radio from the International Space Station signals will be on the usual frequencies. These are 145.80 MHz as the worldwide voice and packet downlink. That's where you listen.

The worldwide packet radio uplink channel is 145.99 MHz. 144.49 MHz is the voice uplink for the America's and the Pacific while 145.20 MHz is where to call if you are in Europe, Central Asia and Africa.

Roy Neal, K6DUE, died last August 15th due to complications following heart valve replacement surgery. He is very much missed by everyone in the world wide ham radio community especially by us here it the Amateur Radio Newsline where he was a friend and colleague.

The full text of the ARISS International release about this special operation commemorating Roy Neal's contributions to manned ham radio in space is now at our website. That URL is www.arnewsline.org. Scroll down to the new "This Just In" area and you will find it there.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.

--

According to Bauer and Samburov hams making contact with the Roy Neal Commemorative Operation will be eligible for a special certificate. More ham radio in space news later on in this weeks report. (ARISS)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W9EAR repeater of the EARS Repeater Network serving Indiana, Kentucky and Illinois.

(5 sec pause here)

**
AN ARNEWSLINE(tm) EDITORIAL: AN ANONYMOUS NOTES OR E-MAIL PLEASE

I'm Bill Pasternak, WA6ITF, with a short editorial comment. Actually, its more of a reminder that the Amateur Radio Newsline does not accept anonymous letters and e-mail as valid information or story leads.

Every so often, a letter or e-mail will arrive making all sorts of claims. It might deal will allegations that a ham radio test session is corrupt, or identifying someone as the purported jammer of a net or that a ham is doing business over a local repeater. This past week we received two such notes. One claimed that a repeater was discriminating against a group of individuals. The other claimed corruption in the management of a ham radio convention. Both had something in common -- they were unsigned. And here's our policy in dealing with unsigned correspondence. Ready?

(Sound of actual letters being torn up and toss in the trash basket.)

That's right, you just heard me rip it up and toss it in the garbage can. And the reason is simple. If the person sending the letter or the e-mail does not have the courage to sign it, then the chances are that he or she is attempting to use us and you in a personal vendetta. And friends, we are not going to let ourselves or you to be used in someone's private war. That's been our policy since our days as the Westlink Radio Network and it is still our policy today.

The bottom line. If you are going to send us information you must provide identification and be ready to take responsibility for your words and actions. I you are not willing to do so, please save us the time and effort of doing this -- and tossing it in the trash.

This has been an infrequent Amateur Radio Newsline editorial. In Los Angeles, I'm Bill Pasternak, WA6ITF. (ARNewsline(tm))

**

ENFORCEMENT: ALLEGED TOWER UNBOLTER CAUGHT

A follow-up to a story we aired two weeks ago about a man trying to unbolt power transmission towers in three western states. He has now been captured.

According to news reports, the suspect is identified as Michael Poulin. He claims that his actions illustrate how vulnerable the power grid might be to acts of terrorism. At airtime, charges against him are pending. (Published news reports)

**

ENFORCEMENT: IRLP HARASSMENT

A pair of mid-West hams are being asked to explain their actions their on the air activities. The FCC's Daryl Duckworth, NN0W, tells us who and why:

--

Duckworth: "Two Oklahoma amateurs; Johnny Adams, KD5QJG, of Dell City and Jack Stokes, KE5KR, of Oklahoma City have been queried regarding complaints of deliberate interference and harassment of repeater users on W5QO, 144.650 and 145.250 MHz."

--

The FCC says that at the time the incident occurred, the W5QO repeater was functioning as an IRLP node. Adams and Stokes were given 20 days from the day that they received the FCC's letter to answer the charges. They were also warned that failure to respond could result in the revocation of Amateur station license and suspension of operator privileges. (FCC, RAIN)

**

ENFORCEMENT: HEY YOU LEFT THE RADIO ON

The FCC also wants to know why a ham may have walked away from his car with his rig running as a cross band repeater. Again, the FCC's Daryl Duckworth, NN0V:

--

Duckworth: "A complaint of two hours of interference on September 16th, coming from an amateur transceiver unit, in a car, unidentified, unattended, and operating in crossband mode has prompted the Enforcement Bureau to inquire of the vehicle's owner, KG6QKR, Angel Carballo, of Freemont California. The vehicles was located at Hamilton and Bascon Avenue's in San Jose (California) at the time of the interference to 145.23 and 146.94 MHz."

--

Like Adams and Stokes, Carballo was also given 20 days from the date he received the FCC's letter to file a response. (FCC, RAIN)

**

RADIO LAW: A CLARIFICATION ON EQUIPMENT SEIZURES

Phil Kane, K2ASP, says in the CGC Communicator that the FCC does not confiscate equipment.

Kane, now an attorney in Oregon is the retired District Director of the FCC in San Francisco California. He says that he served many times as an on-scene supervisor during events such as the recent raid on an unlicensed broadcaster where equipment was taken. According to Kane,

seizures are made by the U.S. Marshal Service executing an order of the Federal District Court. Any items taken are held pending court action of forfeiture of the equipment to the Government.

According to Kane, the FCC agents on scene are there only as technical experts. They identify to the Marshals what equipment falls under the purview of the seizure warrant. (CGC)

**

RADIO RULES: THE FEDS ON FRS

Federal government entities have been authorized to purchase and operate radios certified by the FCC in the Family Radio Service. This, according to the May 2003 Manual of Regulations and Procedures for Federal Radio Frequency Management.

The manual says that pursuant to Part 95 Subpart B of the FCC Rules and Regulations, government users will be accorded the same privileges as non-federal users. Also, since FRS users must share each channel and no user is assured protection from interference caused by another authorized user, federal entities may not purchase and operate F-R-S radios for planned communications operations that safeguard human life or property.

The Manual of Regulations and Procedures for Federal Radio Frequency Management is a great publication that has a ton of useful information. The only drawback is that it costs $342.00 new. However it is available for viewing and download, chapter by chapter, at www.ntia.doc.gov/osmhome/redbook/redbook.html (CGC)

**

HAM EDUCATION: NEW ON-LINE HELP FOR INSTRUCTORS

The American Radio Relay League's Field and Educational Services branch has announced a new resource for active Volunteer Instructors. Titled the Online Instructor Primer, it's a new compilation by Linda Mullally, KB1HSV, that's jam-packed with helpful tips, links, and tutorials sure to help instructors eager to try new ideas and approaches. More information about it is at the ARRL website. Just take the link to www.arrl.org/FandES/ead/instructor/oip (ARRL)

**

NAMES IN THE NEWS: PATRIOT NAME CHANGE

Turning to this weeks names in the news. Word that the Patriot DX Association has changed its name to the New England DXCC with a new mission. That of fostering participation in DX'ing and the DXCC program.

The group has also announced the creation of a new operating event called the N-E-D-X-C-C Challenge. According to an October 27th press

release the purpose of the Challenge is to stimulate on-the-air operating activity among club members to make contact with many DXCC countries as possible during the prescribed activity periods. More information is on the web at www.nedxcc.org (Via e-mail)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: SOUND OF A BLACK HOLE

From the science page this question. Did you know that the voice of a black hole is a deep, deep bass? In fact, its 57 octaves below middle C. It is and Jim Meachen, ZL2BHF, has more:

--

The Chandra X-ray Observatory has picked up sound waves for the first time from a cluster of galaxies 250 million light years away. Astronomers at the Institute of Astronomy in Cambridge, England, discovered the sound waves while analyzing the Chandra images of the Perseus cluster. This is an immense grouping of galaxies held in formation by the powerful tug of a super massive black hole.

Andy Fabian is a professor at the Institute of Astronomy. He says that a close study of the fine detail collected by Chandra shows ripples in the X-ray pattern that are caused by sound waves excited by the energy from the black hole.

Fabiam says that the sound produced by the black hole is a B flat, the same pitch as a key near middle C on the piano. But the song of the Presses Black Hole is 57 octaves below that middle C. This is a tone or frequency more than a million, billion times deeper than the limits of the human ear,. Fabian says that makes it the lowest note known in the universe.

For the Amateur Radio Newsline I'm Jim Meachen, ZL2BHF, in New Zealand.

--

Scientists expect more insight on this as the experiments progress. (Science Today)

**

EMERGING TECHNOLOGY: NEW FRACTILE ANTENNA DESIGN

Engineers at Pennsylvania State have developed innovative design methods for a new class of antennas. One composed of an array of fractal-shaped tiles that offer anywhere from a 4 to 1 to 8 to 1 improvement in bandwidth compared to their conventional counterparts.

According to Space Daily, the new broadband antennas are composed of irregular but self-similar, repeated fractal-shaped unit tiles called "fractiles." These "fractiles" cover an entire plane without any gaps or overlaps.

While fractal concepts have been used previously in antenna design, the Penn State research team are the first to introduce a design approach for broadband phased array antenna systems. One that combines aspects of tiling theory with fractal geometry. (ANS, Space Daily)

**

HAM RADIO IN SPACE: AMSAT UK DONATES TO LAUNCH FUNDS

AMSAT-UK is funding the development of two new amateur radio satellites by donating œ10,000 to each of two projects in the USA and Germany. In accordance with their constitution, at their meeting on Saturday October 25th, AMSAT UK decided to make an immediate donation of œ10,000 to the AMSAT North America's Project Echo Launch Campaign Fund.

Also at the meeting AMSAT U-K decided to earmark another œ10,000 for transfer to AMSAT Germany to support the Phase 3 Express project. This, when a suitable component for funding can be identified.

Project Echo satellite is due to be launched next March 31st. The Phase 3 E Express ham satellite is likely to get a ride to orbit in the 2005 to 2006 time frame. (ANS)

**

BEACON NEWS: UK PROP BEACONS BACK ON

If you are a microwave D-X'er, listen up. This one is for you. It comes from the United Kingdom and says that two of that nations highest frequency beacons are back in full time operation.

Both are part of the South Coast microwave beacon complex. GB3SCX operates on 10 GHz and GB3SCK on 24 Ghz. The two units are again operational following a major rebuild. Both have had their output power increased, raising them at least 10 dB above their previous levels. And there's more.

GB3SCK has been retuned to transmit on 24,048.905 MHz in order to comply with the new 24 GHz bandplan, which will come into force at the beginning of 2004. Also, the GB3SCC which is on 5760.905 MHz has had its keying duty cycle adjusted. It now transmits callsign and location details, followed by plain carrier for a total of 45 seconds. It then stops transmitting for 15 seconds to permit cooling before resuming its operation. Reception reports on any of these beacons go to John Fell, G0API, at his Callbook address. (GB2RS)

**

DX

In D-X, MW0USK reports over QRZ.com that M1DAZ, who is on active duty with the British Forces Broadcast Services in Iraq, has obtained official authority to operate with the callsign YI9DAZ. Darran will be active around the bands for the next couple of weeks using a Yaesu FT-100 and Atas aerial from the Southern part of the country. Most of his operation will be on P-S-K 31 so that he does not disturb his room mate who is the presenter of the early morning radio show. QSL direct to M1DAZ at his home address. (qrz.com)

F6BUM will be active on CW, SSB and RTTY from various regions of Peru. This, between the 5th of November and the 5th of December. He will be using the callsign OA, followed by a district number, stroke F6BUM. (GB2RS)

Also, three operators from Japan will be active from Kathmandu, Nepal, between the 16th and 22nd of November. The callsigns will be 9N7AU, 9N7LN and 9N7SZ. They will operate on 40 to 6 metres using two HF rigs and a 6-metre rig. (GB2RS)

And, a VHF DXpedition to La Palma in Square IL18, should be active through November 19th. This, with DJ6JJ and DL1EJA operating during the ARRL EME Contest and scatter during the Leonids meteor shower. Their station is reportedly using use high power to four 12-element Yagis with full elevation control. For all of these operations please QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: THE TECH SIDE OF THE NYC MARATHON

And finally this week a look at two other ham radio aspect of the New York City Marathon. The way hams organize and the technology that they use. Here's Henry Feinberg, K2SSQ:

--
Last week Communications Coordinator Steve Mendelsohn, W2ML, told us that it takes 411 radio amateurs to keep the New York City Marathon moving along. This week W2ML says that it also takes a lot of well organized ham radio networks to keep the messages flowing:

--

Audio only. Hear the newscast in mp3 at www.arnewsline.org

--

According to Mendelsohn, ham radio communicators are aided by a lot of modern technology. Its science that literally gives them a leg up on the contestants:

--

Audio only. Hear the newscast in mp3 at www.arnewsline.org

--

And this year ham radio expanded the use of its own kind of digital positioning technology:

--

Audio only. Hear the newscast in mp3 at www.arnewsline.org

--

According to Mendelsohn, it's human beings -- trained ham radio communicators that makes for a smooth race.

In New York, I'm Henry Feinberg, K2SSQ, for the Amateur Radio Newsline.

--

Next week, how it all gets put together. Please be with us. (ARNewsline)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2003. All rights reserved.

3031. NW7US Propagation Update: 20-XI-2003

Newsgroup: rec.radio.amateur.dx
Date: 2003-11-20 16:14:09 UTC
From: nw7us@hfradio.removethispart.org
Message-ID: <iL5vb.699$QF5.105@news.randori.com>
Source record: 8165
Cross-posted to: alt.ham-radio.hf,alt.ham-radio.ssb,alt.ham-radio.vhf-uhf,rec.radio.amateur,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.shortwave

A severe geomagnetic storm is in progress at this time. As I write this bulletin, the planetary K index (Kp) is at 7. The Aurora Index is at 10 (maximum). The Bz (horizontal component of the Interplanetary Magnetic Field) is strongly negative (oriented southward), at -55.1 nanoTeslas. This stormy geomagnetic activity is causing strong ionospheric recombination, decreasing the maximum usable frequencies on all radio link paths. HF propagation at all latitudes is poor.

This geomagnetic storm is a result of the arrival and passage of a coronal hole mass ejection from 18-XI-2003. The solar wind speed increased from 430 km per second to 750 km per second, with a very strongly negative horizontal IMF component. Whenever the Bz is negative (whenever the horizontal IMF component is oriented southward), the IMF combines with the magnetosphere in such a way as to create geomagnetic disturbances and ionospheric storms. Aurora is also a typical result of such interaction.

This geomagnetic storm is expected to continue through the end of 20-XI-2003. Additional CME arrivals may continue to keep the geomagnetic activity high.

At 0747Z, 20-XI-2003, a flare peaked at M9.6, further causing degradation of the HF propagation, on the sunlit area of the Earth. Continued C, M, and possible X flares are possible today and for the next week. The major sunspot groups from the end of October and the beginning of November have and are returning into view, increasing solar activity.

Today's HF propagation outlook is poor. While the 10.7-cm flux is climbing, the continued geomagnetic storm will significantly degrade higher frequency propagation. The moderate to major flare activity expected will also degrade mid-HF frequencies. Nighttime propagation on low to mid HF frequencies will also suffer, as the E-layer will be significantly recombined, decreasing its MUF.

VHF propagation via Aurora, Aurora-E, and Trans-equitorial propagation (TEP) will be fair to good. I welcome reports, if any, of your success on VHF during this period.

More information as events warrent will be posted in follow-up bulletins. Live information is on-going at http://prop.hfradio.org/ and a discussion is at http://hfradio.org/forums/

A severe geomagnetic storm (G4) is in progress due to the
arrival of coronal hole mass ejections related to the
returning sunspot group 484, now numbered 501. Some
reporting stations show a K index of 9. The current
planetary K index (Kp) is 8 and the Aurora index is 10.
This is expected to possibly increase to a Kp of 9,
a geomagnetic storm level G5, through the day. HF
conditions are poor. MW conditions are poor.

Visual Aurora is possible today at low-latitudes.
Aurora-mode propagation (Au and Au-Es) is possible and is
already reported. Visual Aurora is occurring now in night
regions, and is possible to occur tonight during darkness
in the Western Hemisphere (e.g., North America).

More information as events warrent will be posted in follow-up
bulletins. Live information is on-going at

A new version of APRSPoint is available. It incorporates a lot of new changes and enhancements and works with both MapPoint 2002 and 2004. MapPoint 2004 was just released by Microsoft and is available as part of the package. It contains lots of new additional map data for North America and Europe. You are welcome to visit http://www.aprspoint.com/ for details. Thanks.

Too much light pollution here in Northeast PA, couldn't see a damn
thing even during that mega flare we had a few weeks ago.

I went out on that one, but it was too late in the evening.
Apparently the best time is not much after local sunset.

I'm glad I finally saw one, but it sure felt wierd looking at the northern
lights, in the south!

Why not try a dipole with open wire feeder and ATU in the shack. It will
work on any frequency althou the efficiency will drop on the lower bands.
The length can be random - depending on availabel space.

Howdy,

The high geomagnetic activity that occurred during the passage of the coronal hole mass ejection (CME) from 18-XI-2003 has decreased, and remained at low levels for the last few reporting periods. At the same time, the 10.7-cm flux is greater than 170. Solar wind speed at the time of this writing is just over 550 km per second, with a slightly negative interplanetary magnetic field horizontal component orientation (the Bz is -2.8 nT). This has led to fair HF signal propagation, with normal propagation conditions over low-latitude paths, fair propagation over mid-latitude paths, and fair to poor propagation over high-latitude paths.

The coronal mass ejection observed in association with the M9-class flare of 20-XI-2003 is likely to glance the Earth's magnetosphere during the later half of 22-XI-2003 UTC. This CME should combine with an anticipated high coronal hole solar wind stream to produce further minor storm activity. The expected elevated solar wind speed is a result of a coronal hole that is now in a position where it is spewing plasma directly into the Earth's direction. The combination of the higher solar wind speed and the glancing of the arriving CME will lead to active to minor storm levels from late 22-XI-2003 UTC and into 23-XI-2003 UTC. There is a slight chance of the geomagnetic field to reach major storm levels at some latitudes during this weekend.

The 10.7-cm flux levels are expected to continue to rise slightly to a maximum of about 200 over the next day or so. The >10MeV proton flux levels have been remaining moderate. According to the POSE observations at the time of writing this bulletin, however, there is a very little polar cap proton presence. When very energetic protons (>10 MeV) produced by processes at the sun and interplanetary space arrive at Earth and enter the atmosphere over the polar regions, ionization is greatly enhanced at altitudes below 100 km. Ionization at these low altitudes is particularly effective in absorbing HF radio signals and can render HF communications impossible throughout the polar regions. Since we are not seeing significant wide-spread proton activity right now over the poles, E-layer ionization is mostly normal at these high latitudes.

The big sunspot groups from late October and early November, now numbered 501, 507, and 508, are quite a bit smaller this time around. However, they do have enough magnetic complexity to produce M-class flares. There is a sixty percent chance of an M-class flare, and a fifteen percent chance of an X-class flare. Most of the flares expected will be in the C-class range. This will mostly impact the lower frequencies on the sunlit side of the Earth.

HF propagation conditions will continue to be fair to normal for most of today (22-XI-2003 UTC), but will slightly degrade late in the day and into Sunday. Late Sunday, conditions may improve slightly, and then by Monday should again be mostly normal over all latitudes except for some degradation over the poles.

VHF propagation is expected to be quiet with very slight chance of any Auroral. However, there might be a slight chance of some F-layer openings, and of transequatorial propagation during the afternoon and evening hours local time. There have been some reports of Sporadic-E, but openings are expected to be rare.

More information as events warrant will be posted in follow-up bulletins. Live information is on-going at http://prop.hfradio.org/ and a discussion is at http://hfradio.org/forums/

I don't believe you need to build a level converter -- you just need to wire up a cable to connect your PC's RS232 port to your FT-857. The pin-outs are given in your FT-857 manual.

73,

Dave, AA6YQ

Amateur Radio Newsline™ Report 1371 - November 21, 2003

Amateur Radio Newsline report number 1371 with a release date of Friday, November 21, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Australia says goodbye to the Morse code and the FCC says hello to a new way to regulate interference. Find out the details on Amateur Radio Newsline report number 1371 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: AUSTRALIA GOES CODE FREE

Australia is joining the no-code revolution. Q-News Graham Kemp, VK4BB is down-under with the details:

--

The Australian Communications Authority (ACA) is reviewing regulatory and licensing arrangements for the amateur service. A discussion paper was released in August 2003, and public meetings were held in 10 cities around Australia. As a result of this extensive public consultation process, the ACA has decided to discontinue the Morse code proficiency requirement for the amateur service.

Background: Article 25 of the Radio Regulations of the International Telecommunication Union sets out the international arrangements for the amateur service.

The World Radiocommunication Conference (WRC) held from 9 June to 4 July 2003 in Geneva fundamentally changed Article 25. The changes to Article 25 have provided the ACA with an opportunity to review and simplify the current regulatory and licensing arrangements for the amateur service. In August 2003 the ACA released a discussion paper that looked at the changes made to Article 25, as well as exploring future options for the amateur service in Australia.
Morse code proficiency requirement to be removed As a result of an extensive public consultation process, the ACA has decided to discontinue the Morse code proficiency requirement for the amateur service. This decision was made considering public comments at the meetings and initial analysis of submissions to the discussion paper.

The ACA will make interim changes to legislative instruments which will immediately allow access to privileges previously available only to those satisfying Morse code proficiency requirements. The ACA is in the

process of amending the amateur radio licence conditions specified in the Radiocommunications Licence Conditions (Amateur Licence) Determination No. 1 of 1997 to reflect this decision. The amendments will give holders of Intermediate and Limited Amateur licences access to the same frequency bands as Unrestricted Amateur licensees; and holders of the Novice Limited Amateur licence access to the same frequency bands as Novice licensees.

The interim arrangements are expected to come into force on 1 January 2004.

I'm Graham Kemp, VK4BB, of Q-News Australia for the Amateur Radio Newsline.

--

More on this in future Amateur Radio Newsline reports. (Q-News: Note: Print version is expanded from audio report)

**

RADIO LAW: FCC LOOKING AT NEW INTERFERENCE STANDARD

Turning to regulatory news here at home, word that the FCC is looking at another way of determining what it calls acceptable interference levels. Termed "interference temperature," the Commission says that this is a new model for addressing interference that takes into account the actual cumulative R-F energy from transmissions of spectrum-based devices. It would also set a maximum cap on the aggregate of these transmissions.

To test the potential usefulness and applicability of this approach the agency has issued a Notice of Proposed Rulemaking. FCC docket item 03-289 seeks comment on various technical rules that would establish procedures and use the interference temperature model on a limited basis in the 6525 to 6700 MHz and portions of the 12.75 to 13.25 GHz bands.

According to the FCC, the "interference temperature" approach may facilitate more intensive use of the radio spectrum, creating the opportunities for new services and improving the predictability of any interference to existing services. The current approach for managing interference focuses on specifying and limiting the transmit powers of individual spectrum based devices. What impact the adoption of an "interference temperature" standard might have on Amateur Radio operations has yet to be determined. (CGC Communicator, ARNewsline(tm), other published reports)

**

REGULATORY NEWS: FCC APPROVES WIRELESS INTERNET IN HAM SPACE BAND

The FCC has turned down an ARRL request to keep so-called wireless Internet connections out of the 5.650 to 5.670 Gigahertz to avoid interference with the Amateur Satellite Service. This, as the regulatory agency makes another 255 MHz of spectrum available for Wi Fi use. Bill

Pasternak, WA6ITF, reports:

--

In a Report and Order in ET Docket 03-122 released on November 18th, the FCC says it was taking action to alleviate crowding in existing wireless Internet allocations. Also, that it wanted to align wireless Internet connectivity here in the United States with the rest of the world.

Amateur Radio has a secondary allocation from 5.650 to 5.925 Gigahertz. That includes a 20 Megahertz wide satellite downlink segment from 5.830 to 5.850 Gigahertz.

An ARRL Bulletin says that back in September the League expressed concerns about the potential for interference from these wireless devices to Amateur Radio space operations. But in releasing its decision, the FCC says that its dynamic frequency selection and transmitter power control requirements should be adequate to protect amateur operations. This, even though the FCC admits that they are not specifically designed to do so.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

In rendering its decision the FCC said that it was not persuaded that it should either add to or modify its proposed rules as requested by ARRL. The Federal government itself is the primary user of the entire band. (ARRL Bulletin, FCC)

**

RADIO LAW: FCC COMMISSIONER'S OFFICE CLARIFIES HER "BROADBAND NIRVANA" REMARKS

The office of FCC Commissioner Kathleen Abernathy has expressed regrets that her remarks in a September speech may have failed to make her concerns about potential interference from Broadband over Power Line sufficiently clear. Responding to complaints from the ARRL and individual amateurs, Abernathy's Senior Legal Adviser Matthew A. Brill said that her office is sorry that the Commissioner's remarks may have been interpreted as suggesting an absence of concern over harmful interference.

The ARRL Letter says Brill has assured the League that ensuring that B-P-L and all new technologies avoids causing harmful interference to licensed R-F users is important to Abernathy. Brill termed it as a bedrock position for the Commissioner.

Last September 22nd, in a speech to the United Powerline Council's annual conference Abernathy expressed personal enthusiasm for B-P-L calling it a Broadband nirvana. That position was quickly challenged by the ARRL and others in the ham radio community. (ARRL)

**
BREAKING NEWS: EARTH HIT BY SEVERE GEOMAGNETIC STORM

A severe G-4 class geomagnetic storm is in progress as we go to air. This, due to the arrival of coronal hole mass ejections related to the returning sunspot group 484, now numbered 501 astronomers.

Thomas Hood, N-W-7-U-S, is the Propagation Editor for C-Q Magazine. In a November 20th posting to the V-H-F Reflector, Hood says that some reporting stations show a K index of 9. The current planetary K index is 8 and the Aurora index is 10. This means that there could be visual Aurora is possible at low-latitudes.

What does this mean to ham radio operations? During the storm HF conditions are poor. So will those on the Medium Wave broadcast bands. But in the world of 50 Mhz and above anything could happen and usually does. Keep your ears open, your radio on and enjoy it while you can.

Now long will this geomagnetic storm last and are more sunspots on the way? Ongoing information is in cyberspace at http://prop.hfradio.org and on the W6YX VHF Reflector.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF. (VHF REflector)

**

ENFORCEMENT: HAM ACCUSED IN WISCONSIN INTERFERENCE CASE

A peason described by authorities as a Wisconsin ham has been arrested and charged with some high tech interference to public service communications. Amateur Radio Newsline's Bruce Tennent, K6PZW, has the rest of the story:

--

The Wisconsin State Journal reports that a ham radio operator is being accused of interfering with emergency radio channels in the city of Madison over the past nine months. According to the Journal, authorities charge that twenty-five year old Rajib K. Mitra, a University of Wisconsin Madison student, may have broadcast audio from pornographic movies over the Madison Police Department airwaves.

The news article describes Mitra is a ham radio operator with a degree in computer science. He was arrested Thursday November 13th after police showed up at his apartment with a search warrant looking for radio and

computer equipment and pornographic audio.

According to a Madison police spokesperson, the interference usually left the radio system dead for stretches from a few seconds to about 20 minutes but never on a regular schedule. Al Schwoegler, the Madison Communication Operations Supervisor said that this intermittant operation added to the difficulty of tracking the source.

The interference came at times when police were dispatched on calls. Authorities believe that the person jamming may have monitored police radio traffic.

Helping to track down Mitra was Ralph Pellegrini. The newspaper article identified Pellegrini is a ham operator and technician for Sprint PCS who assisted police. Authorities approached Pellegrini for assistance when they thought the interference might be coming from a Sprint cellular tower. Pellegrini in turn gave a lot of credit for Mitra's capture to those he termed as the Madison radio guys. He notes that they were able to hunt down Mitra in a city R-F environment that's pretty bad.

Mitra was in the Dane County Wisconson jail as of Friday November 14th. He has been tentatively charged with 16 felony counts of computer crimes and could also face federal charges, according to Madison police.

For the Amateur Radio newsline, I'm Bruce Tennant, K6PZW, reporting.

--

Authorities hope that Mitra's arrest will end months of frustrating interference to their radio communications system. The complete story is on-line at http://www.madison.com/wisconsinstatejournal/local/61321.php (Wisconsin State Journal, QRZ.com, others)

**

ENFORCEMENT: SKYWARN INTERFERENCE

The FCC has told an Indiana ham that he is to stay off of a 2 meter repeater dedicated to emergency alerting operations. This, in a letter to Christopher Smith, KC9CAU, of South Bend.

In the note, the agency says that it has received a complaint about Smith's on the air operation on a repeater system participating in the St. Joseph County Skywarn system. The complaint alleges deliberate interference and harassment to the repeater and refusal to refrain from attempting communications on that system.

The FCC's letter tells Smith that it expects him to abide by any demand that he stay off the repeater, as well as any other repeater where such request is made by a repeater control operator or the system licensee. Smith was given the customary 20 days from the date of the FCC's letter to reply. (FCC)

**

ENFORCEMENT: ECHOLINK EXPLANATION SOUGHT

A Florida ham has some explaining to do for comments made over a linked repeater system. The FCC's Daryl Duckworth, NN0W, explains:

--

Duckworth: "An inquiry went to WA3QCV, Timothy Horvath, of Flagler Beeach, Florida, concerning operation on two repeaters: WB2IXR at 157.015 Mhz and KG4IDD at 145.47 Mhz that are linked through the Echolink system. The inquiry involves alleged threats and obscene language."

--

The FCC also gave Horvath 20 days from the date of its letter for him to respond. (FCC)

**

RADIO LAW: ANTI-PIRACT BROADCAST FLAG APPROVED

The government has approved a new anti-piracy system that will theoretically make it harder for computer users to illegally distribute digital TV programs on the Internet. This, with the goal is to speed the transition to higher quality digital broadcasts and ensure such programming remains free.

The five-member FCC voted unanimously to allow a "broadcast flag" to be added to digital programming to block broader distribution on the Internet on November 4th. Broadcasters and the movie industry had urged the Federal Communications Commission to take such action, while consumer groups said it will force some people to purchase new electronics. (FCC, others)

**

ON THE MOVE: HF NET RELOCATING TO IRLP

Call it a sign of the times we live in. This as Tom Mc Glinn, KO6HA, reports over QRZ.com website on big change for a long established high frequency net that's taking to a different way to communicate.

Mc Glinn says that due to the urban lifestyle of many of the members of the USS Hornet Amateur Radio Club, the group has decided to move its weekly Net from 80 Meters to repeaters that are interconnected using I-R-L-P. That's the Internet Radio Linking Project which permits the world wide interconnecting of repeaters over the World Wide Web.

According to Mc Glinn, the net has been conducting tests and they have worked out most of the bugs involved with such a move. Once completed, the U-S-S Hornet Net will hold the weekly gathering in the San Francisco Bay Area using the facilities of the 147.210 repeater in near-by Oakland. Those outside the area we will be linked in using the I-R-L-P

Western Reflector.

Mc Glinn adds that anyone on the planet who has I-R-L-P access to link to the Western Reflector Subchannel 1, node 9251, on Mondays at 2030 Pacific time is invited to check in on the Net. He says that you do not need to be a member of the club to take part. (QRZ.com)

**

CONFERENCES: CSVHFS IN ONTARIO CANADA NEXT JULY

The Ontario VHF Association and the Toronto VHF Society will be hosting the 38th annual Central States VHF Society Conference. The dates are July 22nd to the 25th at the Delta Meadowvale Resort and Conference Center in Mississauga, Ontario, Canada.

2004 marks only the second time that this conference has been held outside of the USA. More information and a registration form will be available shortly in cyberspace at www.csvhfs.org and www.ovhfa.com (VHF REflector)

**

HAMVENTION 2004: AWARD NOMINATING PERIOD OPENS

Meantime, the planners of Hamvention 2004 say that the nominating period is now open for its Radio Amateur of the Year, Technical Excellence and Special Achievement awards program. The Radio Amateur of the Year is described as that special person who has made a long term commitment to the advancement of amateur radio. A well-rounded individual who has contributed most of his or her lifetime to our hobby in some very outstanding way.

A nominee for the Technical Excellence award should be a person who has made an outstanding technical advancement in the field of amateur radio. Something like a revolutionary new equipment design or mode of operation that has impacted positively on the day to day operation of many hams.

Last but by no means least, a nominee for the Hamvention's Special Achievement is the kind of special person who has made an outstanding contribution to the advancement of amateur radio. This award is usually given to a respected amateur who spearheaded a single significant project.

Documentation is beneficial. Magazine articles, newsletters, newspaper clippings, videos, etc. will better inform the Awards Committee of your candidate's accomplishments. All materials become the property of the Hamvention and cannot be returned.

The nomination deadline is January 31 2004. You can fill out the on-line form found at www.hamvention.org by clicking your mouse on the words award nominations. Printed nominations go to the Awards Committee, Hamvention 2004, PO Box 964, Dayton Ohio, 45401.

And oh yes. The deadline for all submissions is January 31st, 2004 (Dayton Hamvention)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

NAMES IN THE NEWS: KB2GSD VS. WJMK - PART 2

A follow up to an earlier story involving retired CBS newsman Walter Cronkite, KB2GSD, and a Florida television production company that he says misled him and tarnished his reputation. This, when it persuaded him to appear in videos that promoted prescription drugs and other products.

The company, WJMK, filed suit last September after Cronkite tried to end a contract he had signed to appear as the host of a series of videos, including some called American Medical Review. In their legal brief responding to the WJMK action, Cronkite's lawyers say WJMK had assured him that the videos would be educational and would not promote corporate products. These are claims that his lawyers say Cronkite subsequently learned were false.

An attorney representing W-J-M-K, says that Cronkite's charges had no merit and that Cronkite's lawyers were trying to disparage the other side in the media. Meantime, KB2GSD has filed a counter claim seeking $25 million in damages from WJMK. (Published news reports)

**

NAMES IN THE NEWS: LONG TO AMSAT JOURNAL

Ed Long, WA4SWJ, is the new Editor in Chief of the AMSAT Journal. A licensed amateur since 1970, Ed holds a BSEE from West Virginia University and an MBA from Duke. He is currently employed by SPX Process Equipment in Delavan, Wisconsin. He can be reached by e-mail to wa4swj@amsat.org (AMSAT-NA)

**

EMERGING TECHNOLOGY: SAFETYCAST BROADCAST TO YOUR CAR

Police or fire engines may soon be able to override the radio in your car. This, as Jacksonville Florida based SafetyCast announces that it will soon test a new mobile alert system. One that will allow a police officer or ambulance driver to take over a car radio within a distance of about 1000 feet and broadcast a brief alert tone and warning message.

Emergency services officials are praising the development. They claim that there is a warning crisis because motorists in today's sound-proofed vehicles can't hear sirens, or just aren't paying attention.

But the CGC Communicator reports hearing from one engineer who's worried about the Special Temporary Authority the FCC gave for the trial. He says his studios and E-A-S receivers are located 100 feet from a highway and one block from a hospital. He feels that SafetyCast might jam an Emergency Alert System messages that are coming in. (CGC Communicator)

**

SPACE: FRENCH AND RUSSIAN LAUNCH ACCORD

France and Russia approved an accord intended to pave the way for the eventual launch of Russian rockets from a French launch pad in South America. The agreement, signed on November 11th is the first of its kind between Russia and a European Union country and is a step toward the launch of Russian Soyuz-ST rockets from the E-S-A Kourou launch pad in French Guyana. Most ham radio satellites are orbited from the Kourou facility. (Published reports)

**

INTERNATIONAL - HOLLAND: RADIO NETHERLANDS BROADCAST CHANGE

Radio Netherlands says that its shifting the frequency of its Dutch language transmission to the Far East, East and Southeast Asia at 1300 U-T-C. This broadcast can now be heard on 7 point 380 MHz. The reason for the change is to avoid interference to the transmission. (Media Network)

**

DX

In D-X, word that ON4LAC, is active portable 3B8 from Marutius through November 23rd. His activity has been mainly on 20 and 15 meters using SSB and PSK, but is expected to be on RTTY as well. He will leave Msrutius and head to Reunion Island to be active as FR5 stroke ON4LAC during the period of November 26th and December 15th. After this activity, he will head back to Mauritius and will be active again between December 17th and 27th. QSL direct to his home callsign. (OPDX)

Also, K5LB has announced that he will be going to Swaziland next March and is looking for several operators to tag along. His plans include a trip through the Kruger Game Park. If interested, contact him at frosty1@pdq.net (OPDX)

**

THAT FINAL ITEM: VOLUNTEERISM AND THE NYC MARATHON

For the last two weeks New York City Marathon Communications Coordinator Steve Mendelsohn, W2ML, has been sharing with us the behind the scenes

story of how 411 hams move the race along. In our final part in this series Henry Feinberg, K2SSQ, takes a look at the volunteers that make it all hapen:

--

The ham radio communications effort for the New York City Marathon is volunteer driven. And, as with any event, volunteers do come and go. We asked the lead volunteer, Steve Merndelsohn, W2ML, to explain how this situation gets covered:

--
Audio only. Hear the newscast in mp3 at www.arnewsline.org
--

It's primerally the local clubs that supply the volunteer ham radio communicators. W2ML says that he has a special way of introducing them to what Marathon communications is all about:

--
Audio only. Hear the newscast in mp3 at www.arnewsline.org
--

And speaking about volunteers, we asked Steve what about his own role in all this. How much of his life does he devote to setting up this all volunteer communications effort? His answer may astound you:

--
Audio only. Hear the newscast in mp3 at www.arnewsline.org
--

And there you have it. An insiders look at the massive all volunteer ham radio communications network that literally runs the New York City Marathon. It's a view that only someone who has been there every year since Amateur Radio has been involved, can give.

For the Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ

--

Our thanks to Steve Mendelsohn, W2ML, for sharing his experiences with us, and with you.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying Happy Thanksgiving, 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2003. All rights reserved.

3044. NW7US Updated Forecast for CQ WW CW weekend

Newsgroup: rec.radio.amateur.dx
Date: 2003-11-23 17:29:00 UTC
From: nw7us@hfradio.removethispart.org
Message-ID: <t76wb.5367$x07.3781@news.randori.com>
Source record: 8178
Cross-posted to: alt.ham-radio.hf,alt.ham-radio.ssb,alt.ham-radio.vhf-uhf,rec.radio.amateur,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.shortwave

Here is my updated predictions for the CQ WW CW contest weekend (29-XI-2003 UTC and 30-XI-2003 UTC):

The solar activity that took us by surprise during the end of October and beginning of November 2003 has me revising my outlook for the CQ WW CW contest period of November 29 and 30. I am now expecting conditions to be slightly degraded compared to the forecast conditions published in the CQ Magazine. (See my latest "Last Minute Forecast" chart at http://prop.hfradio.org/)

Using the 27-day solar cycle as a guide, we are looking at Above Normal on day one, to High Normal conditions on day two of the contest weekend. Low- and mid-latitude paths will be good, while high-latitude and polar paths will be fair.

The predictions right now call for the planetary A index (Ap) to be 10 on 28-XI-2003 and 29-XI-2003, and 15 on 29-XI-2003. (Some predictions called for the Ap to remain at 15 for both contest days, making day one only High-normal conditions). The 10.7-cm Flux is predicted to be at least 165 to 180 on 28-XI-2003 and 29-XI-2003. On 30-XI-2003, the flux is expected to fall to about 160. A maximum planetary K index (Kp) of 3 is expected for both days.

Polar geomagnetic forecasts are calling for unsettled conditions for trans-polar and high-latitude propagation paths. This will make over-the-pole contacts more challenging.

Will solar flares play havouc on the bands during the daylight hours during the contest? The sunspot regions, 507 and 508, pose the most risk for flare activity. Both have beta-gamma magnetic configurations. Old sunspot region 498 is expected to return from around the sun on day one, but will still be on the very edge. It is predicted to have a beta configuration, so 498's flare risk is low.

A note about magnetic configurations of sunspot groups: Sunspots classed as "beta" groups are simple bipolar regions. "Beta-gamma" sunspot groups are more complex and

consist of an irregular mixture of magnetic polarities.
The "delta" magnetic configuration only occurs when two
closely-spaced, opposite polarity umbrae appear within a
single penumbra. This characteristic implies that magnetic
field gradients are high and that respectable levels of
magnetic shear may exist around the two opposite polarity
umbral spots. Sunspot regions that possess the "delta"
configuration are the most potentially volatile and
flare-prone active regions. Some of the most powerful
solar flares in recorded history (including the rare
white-light flares) have issued forth from complex sunspot
regions containing magnetic delta configurations.
The most complex magnetic configurations of sunspot groups
is known as a beta-gamma-delta magnetic configuration.
(More information:
http://sidc.oma.be/edu/classification.html) I expect that
there will be minor flare activity from these regions
over the contest weekend. This will impact the highest
bands (10 to 15 meters).

Therefore, I expect that the higher bands will be poor
to good, depending on the path: Trans-equitorial paths
(N/S) will be the best, while polar paths will be the
worst. The middle HF bands will be good over most paths.
The low HF bands and the MW band will fair nicely, since
the backgound X-ray levels are expected to be in the
B-class range, and very little geomagnetic activity is
expected.

Those operating in low-latitudes will have the best
propagation into most areas of the world. All stations
will have a slight challenge for any over-the-pole
paths. Mid-latitude stations should otherwise have
good conditions, while high-latitude stations will have
fewer higher frequency openings.

I'll be watching things closely, and will update my
predictions if warrented. You can find the latest
version at http://prop.hfradio.org/

Happy DXing!

The Ohio/Penn DX PacketCluster
DX Bulletin No. 636
BID: $OPDX.636
November 24, 2003
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, K2FF, KF2TI, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, N5FG, KH6BZF, K8YSE, N9AG, W9DC, WN9O, N0JK, CX7BY, DL/VE3ZIK & www.contesting.info, DL1EK/DL7VOA & DX Newsletter, DL2FAG, EY8MM, F5CQ, F5NQL & UFT, HS0ZDZ, JE7IDA, JI6KVR & JA-IOTA Islands News, SP9FIH, SV1DKL, UA0FZ, UR5WCW and VA3RJ & ICPO for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 16th/November, through Sunday, 23rd/November there were 229 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9X, 9Y, A2, A3, A4, A5, A6, A7, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J6, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH5, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T5, T7, T9, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4U1U, UNITED NATIONS HQ. Operators Ray/W2RE, Frank/W2IX and Seppo/OH1VR are expected to be active from 4U1UN beginning November 29th during the CQWW DX CW Contest. They are tentatively scheduled to be active for about 10-12 hours. Activity will be on 80-10 meters, if possible, 160 meters. ADDED NOTE. PLEASE beware that there has been some PIRATE activity over

the past week. Activity for 4U1UN is usually announced before an operation takes place.

6Y, JAMAICA. Kevin, WN9O, informs OPDX that Mike/WO9Z, Don/W9IU and himself will be active as 6Y5/homecall from February 28th to March 14th. Activity will be on 160-10 meters, including the WARC bands. The group will also be active as 6Y8Z during the ARRL SSB Contest. QSL via W9IU (direct).

6Y, JAMAICA. Art/N3DXX and Steve/KN5H will be active as 6Y6X in the CQ World Wide DX CW Contest (November 29-30th) as Multi-2 entry. QSL via KN5H.

9M4, WEST MALAYSIA. Champ, E21EIC, reports that he will not be active from Thailand in the CQWW CW Contest as first announced, but he will join the team of operators HS0ZDZ, 9M2/G3TMA, VK8AV, 9V1UV and possibly others as 9M4JB for the contest. Operating class will be Multi/(something). QSL via E21EIC. ADDED NOTE. Also, look for special event station 9M4SEA to be active from the 31st annual South East Asia Net Convention (SEANET) in Johor Bahru, Malaysia, November 27-30th. QSL via E21EIC. Visit the Web page for more details at: http://www.seanet2003.com

9N, NEPAL. Janusz, SP9FIH, is active as 9N7WE from Kathmandu until December 6th. He informs OPDX that his suggested frequencies are: 7073 or 7056, 14195, 18145 and 21295 kHz plus/minus QRM. Janusz also mentions a good time for USA is on 20 meters between 1200-1400z. For EU, on 40 meters between 2200-0000z. Also, he will try to look for the US on 40 meters, split about 1300z. QSL via SP9FIH.

9Y4, TRINDAD AND TOBAGO. Babs/DL7AFS and Lot/DJ7ZG will be active as 9Y4/DL7AFS and 9Y4/DJ7ZG now through December 6th from Tobago Island (IOTA: SA-009). They will be active on the usual DX frequencies (80-6 meters), mainly on SSB, RTTY and PSK. QSL via DL7AFS (direct to: Baerbel Linge, Eichwaldstrasse 86, D-34123 Kassel, Germany) or via the DARC Bureau. For more details, please visit the Web page at: http:\\www.qsl.net\dl7afs

BQ9P STORY. Yuki, JI6KVR, informs OPDX that the release of the BQ9P Pratas Island DXpedition Story is now updated on the BQ9P Web site at: http://www3.ocn.ne.jp/~iota/newpage64.htm

C56, THE GAMBIA. Andy, G0VUH, will be active as C56/G0VUH from January 16-30th. He is expected to be on every day and during the nights on all bands. He will have a big beam from 20-10 meters and two verticals that are combined for 80 meters. QSL via the home callsign G0VUH.

CX, URUGUAY. Raul, CX7BY, in Montevideo, plans to be active in the CQWW DX CW Contest as a Single-Op/Single Band (20m)/High Power entry. QSL via CBA.

DX HOLIDAY DINNER. Floyd, N5FG, informs OPDX and its reader: "Holiday Greetings to you and your family. This year's Magnolia DX Association DX Dinner will be held on Saturday, December 6th at Montana's in Gulfport.

Montana's is on Airport Road (off 49 toward the airport.. just south of I-10). It will start PROMPTLY at 6 P. M. (Please be on time) This year's program will be the PZ5A 'GOPACK' operation for the CQ WW SSB Test. We WILL have some GREAT DOOR PRIZES for the raffle tickets, and, of course, MY usual "interesting door prizes". For those that are not familiar with Montana's, they have a LARGE buffet with plenty of "meat items " and veggies as well as seafood, including shrimp etofee. The price this year will be same as last year-- 15.00 USD and that includes your meal, tax, and tip and drink, as well as the entertainment. If you can attend, please send me your check for 15.00 USD for each attendee in your party. Please send this in as soon as possible, as I need to give a guarantee.. THANKS I hope everyone that came last year to the DX Day will return and bring a friend and those that have not been to a DX Dinner lately, I hope you will be able to attend this great evening of DXers talking DX. Look forward to hearing from you real soon. THANKS! 73/DX Floyd, N5FG"

EY8, TAJIKISTAN (160m/Contest Op). Nodir, EY8MM, reports that he is planning to operate 160 meters the night before CQWW CW Contest and the morning after the contest (0000 until his sunrise). He will use a Delta vertical on 55m tower. Skeds are welcome via E-mail at:
nmt@at-communication.com
Nodir states, "Unfortunately no 160m in the contest itself because I am planning SO SB 80m entry (vertical quad North to South and another quad East-West)."

HC8, GALAPAGOS ISLANDS. Jon, N0JK, states, "The HC8N station will be active on 160m November 24th through December 1st. I plan to be active in the evenings from local sunset at 0000 utc to European sunrise, and again in the morning 1100 - 1200 utc, plus all night in the WW CW. K5KA installed a sloping dipole last year that appears to have about 5 dB gain over the existing 1/4 wave vertical to Europe. We plan to install a second sloping dipole to improve the signal to the far East and Japan."

HH2, HAITI. Craig, AH8DX, will be active as HH2/AH8DX in the ARRL DX Phone Contest as a Single-Op/All Band/Low Power entry. QSL via AH8DX (QRZ.com address).

HZ, SAUDI ARABIA. Tom, SM0CXU, will be active as HZ1AB in the CQ World Wide DX CW Contest (November 29-30th) as Single-Op/Single Band (15m) entry. QSL via K8PYD.

IOTA NEWS.....
AF-051. Leo, 3XY1L, will try to be active as 3XY1L/p from Rooma Island on November 30th. It will be a one day operation only on 10 meters between 1100-1600z.

NA-027. Len/VE9MY and Linda/VE9GLF will again be active from Newfoundland (CIsA NF-001 for the Canadian Islands Award) between now and December 1st. Look for them on the usual IOTA/Island and DX frequencies.

SA-086. (Update) The Atacama Desert DX Group that will be on the air as 3G2D from Damas Island IOTA (DICE ICE-201) will also activate the lighthouse (LH 0029) between November 26-28th. Activity will be 160-6 meters with 3 stations. QSL Manager is CA2WUI: P.O.Box, 1037 La Serena, Chile.

J3, GRENADA. Paul, J37KF, will be active in the CQ World Wide DX CW Contest (November 29-30th). Entry class is not known. QSL direct to address on QRZ.com.

J6, ST. LUCIA (Op Needed!). The J6DX team is looking for an additional opetor for their 2004 trip. This is a two week vacation style trip for the WPX RTTY (M/S) and ARRL CW (M/M) contests. The scheduled dates are February 11-25th. If you are interested in accompanying them, please contact Scott N9AG/J68AS for more information at: scottal@erinet.com

KH8, AMERICAN SAMOA. Lee, KH6BZF, sent out the following press release on November 20th: "Amateur Radio continues to grow with new Amateur Radio associations ready to join the IARU-International Amateur Radio Union. On November 4th, 2003, a formal meeting of the new 'American Samoa Amateur Radio Association' (ASARA) was held. Larry Gandy, AH8LG, was elected president of ASARA. Ms. Uti Gandy, KH6FO, was elected Secretary/ Treasurer and Lee R. Wical, KH6BZF, was made the liaison officer. All the members present at the founding meeting voted to apply for membership in Region III of IARU. The growth of Amateur Radio in central Pacific and the size of IARU will support the future of Amateur Radio World wide. Amateur Radio operators World-Wide should welcome the entry of ASARA into Region III of IARU..... JOHN, K1ER, Adviser ASARA"

LX, LUXEMBOURG. Les, G3VQO, will be active as LX/G3VQO in the CQWW DX CW Contest as a Single-Op/All Band/Low Power entry. On November 28th, look for Les to be active in the evening on 30 meters (10.1 MHz). QSLs are 100% via bureau or eQSL.

NJDXA OFFICERS FOR 2003-2004. The North Jersey DX Association (NJDXA) is pleased to announce the elected officers for 2003-2004:
President Rich Gelber, K2WR
Vice-President Steve Adell, KF2TI
Secretary Steve Saposnick, KB2ENF
Treasurer Gene Ingraham III, N2BIM

NP4, PUERTO RICO. Felipe, NP4Z, will be active in the CQ World Wide DX CW Contest (November 29-30th) as Single-Op QRP from on top of 4,000 ft mountain using 55 ft verticals and wires. QSL via WC4E.

QSL INFO AND NEWS.....
George, KP2/K2ZZ, reports that his new QSL Manager is W1QJ. George is very active from U.S. Virgin Island mainly on HF. He was heard this past week on 10 meters (28410 kHz) after 2130z.

Were you one of the lucky ones to work KH7U/KH5 from Palmyra Island this past weekend? QSL via the KH6 Bureau or direct to KH7U. Kimo/KH7U and Pat/NH6UY were on the island to perform their annual maintenance on the island's electronic equipment, for the Nature Conservancy. They

are expected to be on the island until November 24th.

R1, SOUTH SHETLAND ISLANDS. By the time you read this, Oleg, UA1PBA, should have arrived at the research base Bellingshausen on King George Island. Oleg is expected ti be here for about 1 1/2 years. He will be active as R1ANF.

RS0, ASIATIC RUSSIA. Vlad, UA0FZ, will be active as RS0F in the CQWW DX CW Contest as a Single-Op/All Band/High Power entry from Zone 19. QSL via W3HNK.

SOUND BITE NEEDED. Glenn, K2FF, reports, "As you know K2FF (PZ5FF), KD5CQT (PZ5CQ), and W5UE (PZ5UE) spent a week in Suriname in October and also activated PZ5A in the CQWW SSB Contest. Well, when we got back home we realized that we got everyone on tape EXCEPT Randy - PZ5UE. So, what we are looking for is the possibility that anyone anywhere out there worldwide might have captured a piece of PZ5UE's CW operating on tape (i.e., cassette, DVD, wav file, etc). We are trying to incorporate it along with the others into an official presentation scheduled for early December. So, does anyone have PZ5UE (CW) captured on tape?" If so, please contact Glenn, K2FF, at: K2FF@aol.com
Also, visit the Web page at: http://www.mdxa.org/pz_2003.html

SU9, EGYPT. Tom, N9NC, will be active as SU9NC during the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/All Band/Low Power entry. QSL via OM2SA.

SV5, DODECANESE. Stathis, SV1DKL (very soon SV5DKL), informs OPDX that he will participate in the CQWW DX CW Contest as SV5RDS and as a Single-Op/ Single Band (40m)/High Power entry from the Dodecanese Radio Society. The antenna system to be used is 4 x half-wave slopers. He will also use a Kenwood TS-870S, a HF linear amp and complete logistics support. QSL SV5RDS via the bureau.

T32, EAST KIRIBATI. Operators Larry/N2WW, Bill/K0MP, Barry/N0KV, Greg/W0ZA, Tim/N0ZM, Paul/NO0T, Cheryl/N0WBV and John/KT0F will be active on Christmas Island (OC-024) from November 24th through December 8th. This will include a Multi-2 entry in the CQWW DX CW Contest as T32WW. Outside the contest, operators will use the own individual T32 callsign. Look for the following callsigns: T32KV - Operator Barry/N0KV. QSL via CBA.
T32MP - Operator Bill/K0MP. QSL via N0KV.
T32N - Operator Paul/NO0T. QSL via CBA.
T32TF - Operator John/KT0F. QSL via CBA.
T32WW - Operator Larry/N2WW. QSL via N0KV.
T32YL - Operator Cheryl/N0WBV. QSL via KT0F.
T32ZA - Operator Greg/W0ZA. QSL via CBA.
T32ZM - Operator Tim/N0ZM. QSL via CBA.

TO4, EUROPA. By the time you read this, the TO4E team should have arrived at Europa by the way of the Navy boat "La Grandiere". They should also be active and are expected to be on the air until December 15th. Plans are to have three stations on the air and their activity will include

the CQWW DX CW Contest (as TO4WW). BAD NEWS for YL chasers. It was announced this past week that they will NOT have a YL operator with them as first announced. LAST MINUTE UPDATE: Before going to print, Rafik, F5CQ, Co-organizer Europa 2003, sent out a press release that the team would not unload the equipment until the end of the morning on Monday because of the high tide. He believes they will not be on the air until Tuesday morning. Remember, the TO5E Europa Web page is at: http://europa2003.free.fr/

TS7, TUNISIA (IOTA Op). A very large international team of operators are now active as TS7N from Kerkennah Island (AF-073) until December 1st. With 20 operators and 5 stations active, look for activity is to be on all bands 160-6 meters CW/SSB/RTTY/PSK31. They also plan to be an entry in the CQWW DX CW Contest as a Multi-2 class. QSL via DL9USA. For more details, please visit their Web page at: http://ts7n.tk

VK9L & VK9N, LORD HOWE AND NORFOLK ISLANDS. Babs/DL7AFS and Lot/DJ7ZG will be active from Lord Howe Island, February 16-27th, and from Norfolk Island, February 29th through March 13th. The callsigns will be announced later. Activity will be on 80-6 meters on SSB, RTTY and PSK. QSL via DL7AFS (direct to: Baerbel Linge, Eichwaldstrasse 86, D-34123 Kassel, Germany) or via the DARC Bureau. For more details, please visit the Web page at: http:\\www.qsl.net\dl7afs

VP9, BERMUDA. Paul, K1XM, will be active as VP9I in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/All Band/Low Power entry. QSL via KQ1F.

XV, VIETNAM (Correction to OPDX.635/Update). Kunihiko, JE7IDA, informs OPDX that it is not he that will be active as XV2NA in the CQWW DX CW Contest but Naoki, JE7RJZ. However, Kunihiko is the QSL Manager. Naoki will be staying in Ho Chi Minh for his job from from November 27th to December 1st. He is a journalist of a local Japanese TV station. Kunihiko told OPDX that Naoki may be active as XV2NA only during the CQWW CW Contest period, November 29-30th because of his job. QSL via JE7IDA, bureau or direct.

YB0, INDONESIA. Pri, YB0ECT, will participate in the CQWW DX CW Contest as a Single-Op/All Band/Low Power entry. QSLs for YB0ECT are via K5ZE ONLY.

ZD8, ASCENSION ISLAND. Jim, N6TJ, will once agin be active as ZD8Z from here between now and December 2nd. He will also take part in the CQWW DX CW Contest as a Single-Op/All Band entry. QSL via VE3HO direct.

You will find an article that might be of interest to you at the ARRL website. It is called "Everything You Ever Wanted to Know About Computer Interfacing" and is available in PDF.

There is an interface board that can be used for Yaesu, and if you want to buy one it is available from FAR circuits on the web.

I am not familiar with your model of Yaesu, so I don't know if you can hard wire it as suggested or not.

I do know that the interface in this article is easy and cheap to build. I used the interface described in the article for my Kenwood TS-440 with grear results.

If you cannot find the article, or if you are not a member I can send you the file as an email attachment if you like. It is about 1.5 meg.

The one I prefer is the Yaesu ham radio map, which they give away at ham
conventions along with logbooks and baseball hats. Drop 'em a note,
they will probably send one right out to you. If they don't, let me
know -- I have a couple of spares.

I "feel your pain," Wayne. That's why I use Gravity as my news reader. The ones that post that stuff go instantly into the twit filter, and since I download headers only rather than full messages, I mark as ignored those which don't belong and "watch" those that are. Makes for very efficient newsgroup reading. Search Google for "Tom's Gravity Pages" and you will find all the details.

Indeed. AC6V (Rod Dinkins) has done a huge job of putting together a
huge site with links to just about anything in the radio hobby that you
can imagine!

Well done, Rod!

Source record: 8187

Donn Sinclair <wy5i@worldnet.att.net> wrote:
> Anybody have QSL Route/Address for T32TF? 73.

From the SM3CER site:
"EAST KIRIBATI - T32WW, T32MP, T32KV, T32ZA, T32ZM, T32N, T32YL and T32TF
OC-024
from Christmas Island by N2WW (T32WW, QSL via N0KV), K0MP (T32MP, QSL via
N0KV), N0KV (T32KV, QSL hc), W0ZA (T32ZA, QSL hc), N0ZM (T32ZM, QSL hc),
NO0T (T32N, QSL hc), N0WBV (T32YL, QSL via KT0F) and KT0F (T32TF, QSL hc)
on all bands including CQ WW DX CW Contest as T32WW."

I was complaining to my wife about not hearing any new
ones, much less working any, until I heard T32KV on 20
meter phone Sunday night. (And doing a GREAT job of working
the pileup.) Wasn't sure if T32 was a new one for me until
I logged it--sure put a new spin on the weekend for me! ;-)
One of their group was handing out a bunch of QSOs on 15-m
RTTY last night, too.

We have recently updated the DNS address for the cluster which
resulted in a few days when some users could not log in. The changes
should be virtually now complete and the cluster should provide a very
reliable service.
Access is available from the website, which also provides the manuals
to download and many dx link sites or login by telnet in the usual way
http://www.gb7mbc.net
telnet gb7mbc.spoo.org port 8000

We hope to provide the best possible service and hope you find the
cluster and inbuilt databases a valuable aid to good dxing!

Hello Hans,

Back in the DX frame again and QSLing is one of the hazards. I paper QSL 100% but also upload all my logs to LoTW and eQSL hoping to ease the burden. It isn't helping as I get about a dozen in the mail every day. Just took delivery of 3,000 cards and have shipped out about 500 in a week so probably will need more.

JA's are chronic QSL'ers but hey, they must need the paper or they wouldn't be sending them.

Printing QSL's in JA must be a lucrative endeavor. Those guys sure do send
a lot of cards.

And MOST coincidentally, while I'm sitting here reading this, I faintly hear
an OK1R-something calling you on 160, around 1825.45 or so. Would love to
bag 9V1 on 160, but my inverted-L ain't gonna make the trip (even if I could
hear you which I can't!).

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW DX CW Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 21st/November, through Friday, 28th/November there were 246 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A2, A3, A4, A5, A6, A7, AP, BV, BY, C2, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FH, FJ, FK, FM, FO, FP, FR, FR/e, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH5, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T31, T32, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9L, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XZ, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

6Y, JAMAICA. Tom, N6BT, will be active as 6Y8A in the CQWW DX CW Contest as a Single-Op/Single Band (80m)/Low Power entry. Also, Mike, WA6O, will be active as 6Y9A in the CQWW DX CW Contest as a Single-Op/Single Band (15m)/Low Power entry. QSL both operations to WA4WTG.

7X, ALGERIA. Con, DF4SA, informs OPDX (just before going to print) that he will be active from the Algerian's Amateur Radio Association (ARA) club station, 7X2ARA, in the CQWW DX CW Contest as a Single-Op/All Band/ Low Power entry. The QTH is downtown Algiers City. The equipment will be a TS-570, using their existing multi-band vertical (40-10m) and a wire vertical for 80/160 meters (which Con installed on the roof). QSL 7X2ARA (only for this period of November 21-30th) to DF4SA by the bureau or (with sufficient return postage) direct to: Cornelius Paul, Adelberger Weg 3, D-73104 Breech, Germany.

9M2, WEST MALAYSIA. Masaru, JI1ETU, who has been active as 9M2/JI1ETU, will be going QRT at the end of December. He can usually be found on 40 meters CW after 1400z (or later after 2200z). Masaru has also been active on 20/17/15 meters CW. Please send QSL to the JARL Bureau via JI1ETU or send direct to: Masaru Funakubo, 2-10-11 Tsujidou-Motomachi, Fujiwara, Kanagawa, 251-0043 JAPAN.

A6, UNITED ARAB EMIRATES. Ghis, ON5NT, informs OPDX that A61AJ will be active in the CQWW CW Contest, operated by the UN WFP operators Mats/SM7PKK, Robert/S53R, Dane/S57CQ, Mike/PA5M and himself. Eugene/N2AA is also flying in to strengthen the team. Please remember to QSL to the new QSL Managers (since early October 2003) as follows: K2UO (for North, Central, South America, Caribbean, US territoriesin the Pacific) and DJ2MX (rest of the world). In the mean time all logs before October 2003 have now also been transferred to both managers. ADDED NOTES (by Ghis): "Due to our actual workload at the WFP, the IOTA operations from AS-021 and AS-124 are postponed until Feb/March 2004. All of us will still be in Dubai anyway at that time. I will have received the YI/ON5NT (multicolor picture) cards from the printer on my return home on December 20th, and they will be mailed out immediately."

AH2, GUAM (Update). Members of the Guam Contest Club will be on the air as AH2R during CQWW DX CW Contest (November 29-30th). This time they set a target as the Oceanic leader in a Multi-OP Single-TX category and World Op 5. Also, they are trying to build an Oceanic record in this category. Operators are: Aki/JI3ERV/NH2C, Toshi/JR7OMD/WI3O, Hiro/JH0USD/KH2VO and Sam/JR8VSE/NH2N. QSL via JH7QXJ (direct, see QRZ.com) or JA bureau. Please DO NOT QSL via the KH2 bureau. Sunrise/Sunset: 2040/0750z.

B4, CHINA. David, BA4RF, will be active as B4RF in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/Single Band (40m)/High Power entry. QSL via the address on QRZ.com.

CASTLE ACTIVITY. Look for Antonio, I0SBA/p, to be active November 29th from Palazzo del Governatorato o Currito di Capranica (DCI reference VT-092, for the Italian Castles Award) and Torrioni e Cinte Murarie Medioevali di Capranica (DCI reference VT-093). Activity will be on 40 and 20 meters SSB only beginning at approximately 0800z. Both references are located

in the Region of Lazio, Province of Viterbo (VT) and WW Locator JN62CG.
QSL to I0SBA, direct or via bureau.

CX, URUGUAY. OPDX was informed by Raul, CX7BY, that the following stations
will be active from Zone 13 in the CQWW DX CW Contest. Look for:
CX5BW - Operator Pedro - 28 MHz HP - QSL via CBA
CW4A - Operator Ari, CX5AO - 21 MHz LP - QSL via EA5KB
CX7BY - Operator Raul - 14 MHz HP - QSL via CBA
CX9AU - Operator Dan - 7 MHz LP - QSL via KA5TUF
CX1JJ - Operator Mariana - AB LP - QSL via EA5KB

DXCC NEWS.....
Wayne Mills, N7NG/1, Manager Membership Services Department of the
ARRL, announced this past week: "After receipt of the necessary
documentation yesterday (courtesy of Bill, W9VA), ZW0S, the St. Peter
and St. Paul Rocks operations of April 2001, February 2002, April and
September 2003 and a planned visit from November 26th to December 19th,
2003, by PS7KM (See ZW0 below) are approved for DXCC credit."

Also, the recent operation of 3C0V from the Island of Annobon has been
approved for DXCC credit.

IOTA NEWS.....
RARE IOTAs TO BE ACTIVATED. Ian, 9M2/G3TMA, and two other operators
are planning a trip to two rare Borneo IOTA destinations in
late March/early April 2004. The two islands are:
OC- 165 Pulau Satang Besar (9M8)
OC- 184 Pulau Muara Besar (V8)
Ian has already carried out a survey on Pulau Satang Besar,
and the available antenna space on the beach does not look
particularly good for some of the more populated amateur areas
of the world. However, operation will be on SSB and CW,
including WARC bands. Further details of the operation will
be available in the early part of 2004.

NA-102. Members of the A.C.R.A Guadeloupe ARS will be active on December
13-14th from the Gosier Islet as TO7ACR. Activity will be on
HF/VHF bands CW/SSB, plus 6m. Operators mentioned are: FG5CK,
FG5DN, FG5GG, FG5BC, FG5AS, FG5GP, FG5GP, FG1JD and SWL Isaac.
Other references are: WAZ-08, DIFO FG016 and LH 0142.

OC-NEW. Johan, PA3EXX, will be active as VK4WWI/9 from Cato Reef in
the Coral Sea Islands Territory South Group, December 2-6th.
Actiity will be on 80-10 meters CW/SSB. QSL via his home
callsign.

JY8, JORDAN. Operators Helgert/JY8YB and George/JY9QJ will be active as
JY8B in the CQ World Wide DX CW Contest (November 29-30th) as a Multi-
Single entry. QSL via DL5MBY.

LU5, ARGENTINA. Javi, LU5FF, will participate in the CQWW CW Contest
as a Single-Op/Single Band (10m)/Low Power entry. The QSL Manager is
EA7JX.

PIRATE ALERT. Wally, LZ2CJ, informs OPDX that there has been an unknown operator using the callsign, ZA1MM, making QSOs and giving out as his QSL Manager LZ2UU. Wally states, "THAT THIS IS NOT TRUE! His friend Danny, LZ2UU (LZ0A and VP8/LZ2UU), is NOT a manager for any ZA station. Please spread the word and let the DXers know about this pirate. A lot of QSLs are arriving at Danny's post office box and of course Danny can not send them any QSLs for the illegal QSOs made by ZA1MM pirate."

PT5, BRAZIL. Ron, PY2FUS, is pleased to inform that PT5A (former ZX5J) will be active during the CQWW CW Contest this weekend on all bands as a Multi-Multi station. He also mentioned that he will be one of the TopBand operators. The PT5A setup this year includes beverages beaming NA, EU and OC. For those interested in seeing some pictures, please take a look at the ZX5J link at: http://www.inepar.com.br/araucaria

QSL INFO AND NEWS.....
Vance, N5VL, reports that he has started mailing out the CY9A cards; however, not the RTTY QSOs at the present time and also the Bure cards (which will not be mailed intil later). Vance states that if you just sent a card with no return postage, your card will be in the Bureau cards.

Han, DS2GOO, reports that the logs for the last activity from Soan Island (AS-085) (by members of PDXC Nov. 2003) are now available online at: http://ds2goo.karl.or.kr/log.htm

NEED A V51AS QSL? Bob, K8BL, informs OPDX that he had a rough time getting QSLs from Frank, V51AS, over the last few years for 3 new band QSOs. Five attempts have not gotten through to him and Bob was ready to give up, but sent a bare QSL to him with a request that Frank E-mail Bob with instructions due to his mail being emptied/stolen. He finally got Bob's bare QSL (Bob guesses it was because there was nothing about it worth stealing). Below are his instructions for a better chance of getting your QSL through to him. Frank, V51AS, states, "In V5, IRC are not accepted. Please send 2 USD and registered mail. Sorry for very bad postworkers..... Send to P.O. Box on QRZ.com."

CQWWCW QSL ROUTES. Zik, DL/VE3ZIK (4N1DX), informs OPDX that the latest QSL info from the CQWW DX CW Contest will be published next Thursday, December 4th at: http://www.contesting.info

R1, ANTARCTICA. Oleg will be active as R1ANC from Novolazarevskay Base (WABA UA-08, IOTA AN-016) for only 6 days between November 27th and December 3rd. Suggested frequencies are:
CW - 3510, 7010, 14010, 21010 and 28010 kHz
SSB - 3610, 7071, 14160, 21260 and 28460 kHz. QSL via ZS1OIN (QRZ.com) or via R3AR.

RRC ACTIVITIES. Members of the Russian Robinson Club (RRC) are planning a unique mountain radio expedition into Africa to the highest apex of African continent - mountain of Kilimanjaro (5985m) in Tanzania. The team plans to climb to the top of Mount Kilimanjaro and erect the Russian Robinson Club flag. The team will consist of RW3GW, RW3GU, RZ3EM, mountain

climber Gennadi Khryukin (g.Lipetsk) and video operator and journalist - Boris Mamlin (g.Novosibirsk). The expedition is planned to take place between December 2-17th. Also, look for them to be active from the United Arab Emirates as A61AR during the evening of December 2nd to 3rd and December 16th to 17th. From Tanzania, they will use the callsign 5H3GW and also 5H3AA (EK6DO), 5H3RK (VK4VB). The climb to the summit of Mount Kilimanjaro will take 8 days, while the descent taking 2 days. QSL via operator's instructions.

SILENT KEY. It is with sad regret to announce the passing of Bill Pickard, WA5PAE, on the morning November 23rd. Bill, known as "PICK", was a Vice President of INDEXA (as well as Information Session staff member), and a member of the DXAC for the Great Lakes Division. Jay Slough, K4ZLE (member of the Southwest Ohio DX Association), reports, "Pick was in seemingly good health until earlier this summer when he experienced shortness of breath while on vacation. Upon returning home to West Chester, OH, he was diagnosed with pulmonary fibrosis . In spite of aggressive treatment, the fibrosis developed extremely rapidly and resulted in his death due to asphyxia." OPDX and its readers would like to send out our deepest sympathy to his family and friends. Pick is survived by his wife, Ethel Pickard, two daughters and several granndchildren. Condolences may be sent to Ethel at: 8063 Pepper Pike, West Chester, OH 45069.

TG0, GUATEMALA. Operators Ron/N0AT, William/W0OR, David/W0FLS and Vladimir/ N0STL will be active as TG0AA in the CQ World Wide DX CW Contest (November 29-30th) as a Multi-Single entry. QSL via TG9AXF: Edgar Morales, P.O. Box 57, Mixco 01957, Guatemala.

TI5, COSTA RICA. Operators William/TI2WGO, Jorge/CX6VM, Philip/N0KE, William/N0ZA, George/W1XE/0 and David/OK1DTP will be active as TI5N in the CQ World Wide DX CW Contest (November 29-30th) as a Multi-2 entry. QSL via W3HNK. ADDED NOTE: The TI5KD station has beverages working on 160 on 80 meters.

TO4, EUROPA. The TO4E team is now active and should be active as TO4WW for the CQWW DX CW Contest weekend. Floyd Gerald, N5FG, East Coast USA Pilot Station for TO4E/TO4WW, reports that Rafik, F5CQ, has lost E-mail contact with the FR/E team on Europa due to malfunctioning PSK (??) equipment. This means that unless they are able to get the problem fixed, there will be no updates or skeds sent to the pilot stations. This also means they will not be able to upload any logs to the on-line log on the web site. All the antennas are not installed yet, especially for the low bands. However, they think that they will be ready with the antennas before the contest. Flo, F5CWU, Editor of "La Gazette du DX", also provided OPDX with the following update on the latest news from Europa (dated Nov. 27th): "Tonight, I (F5CQ & F5IPW) spoke with Dany F5CW on 20m and I asked him why the team has to QRT so often. He told me that they must QRT due to restriction with the generator, probably due to a lack of gas, even if the propagation is so good. The team will not have the possibility to work around the clock exept during the CQWWDXCW (QRV 24/24).
Here is the schedule of their operation:

from 0400-0730z
from 1000-1030z
from 1300-1330z
from 1515-1945 or 2000z
Tommorow, Friday Novembet 28th, they will finnish to setup the low bands RX antennas. During the CQWW, the TO4E callsogn will be used on the WARC bands." Remember, the TO4E Europa Web page is at: http://europa2003.free.fr/

V47, ST. KITTS AND NEVIS. Larry/KJ4UY and his fiancee Mel will be leaving Orlando on December 2nd for St. Kitts/Nevis. They will be taking a ferry to Nevis on the 3rd and Larry will start operating as V47UY then. The weekend of December 6th, Larry plans to operate in the TARA RTTY Sprint, the PSK31 Death March and/or the ARRL 160 meter Contest. He states, "I will probably do all to give others a new multiplier and just have fun doing it." On the weekend of December 13th, Karl, V44NK, and Larry will be operating the ARRL 10 Meter Contest using the callsign V47UY. As this is Larry's first vacation in 2 years, it is also not all radio. They will be doing some scuba diving and plan on taking a side trip to St. Barts. He will, however, be on the air as much as possible. Please, QSLs for USA stations go to KJ4UY with return postage and for everyone outside the USA, QSL to KJ4UY direct with return postage or via the bureau. All QSLs are answered 100%. He is hoping to give the deserving a new country or new band/mode country. They will leave December 16th.

ZA, ALBANIA (Press Release - QSP from Martti, OH2BH):
News From Tirana On A Rainy Wednesday
November 26, 2003
A memorable second week came to an end when the U.S./ARRL delegation headed by K7WX and K9LA departed Tirana with many fond memories and new friendships they were taking back home. The group accomplished several objectives, among them relations to Telecom authorities and academics at the University as well as student contacts with many soon-to-be amateur radio licensees.
On the radio side, several U.S. callsigns were aired specifically on 75/80M and PSK 31, resulting in the radio side,to many too be thousands of QSOs, such as 4,000 on 75/80M, including 1,000 to the U.S. and reaching even the West Coast over the long-haul greyline. The 160M activities will continue through the efforts of Robin, WA6CDR. The theory exam was conducted today Wednesday with 33 students getting a passing mark on the CEPT 1 level. Now the course will move on to pure amateur radio related subjects under the leadership of Uli, DJ2YA, while John, G3OKA, will head back to the UK after a job well done. Britain's RSGB deserves credit for their support of the first part of the program. The Albanian authorities released the callsign ZA1UT (University of Tirana) symbolizing this program. Another wave of lecturers have now arrived representing Finland and Germany for the following week. You will soon find DJ2YA, DL3DXX, DL6LAU, OH0XX, OH2BH, OH2KI, OH2PM, OH2TA, OH2UA as well as K3NA, K6RLE and WA6CDR on the bands.
The Albanian Amateur Radio Association (AARA) will launch a multi-multi effort for CQWW led by their ZA1B, ZA1D, ZA1E, ZA1I, ZA1S, ZA1Z and others assisted by their foreign guests. You will hear the ZA1A team

appearing during the contest period. A special event QSL card can be obtained for all callsigns active during this program from:
Project Goodwill Albania 2003
P.O. Box 73
02380 Espoo, Finland
or, via OH2BH

ZC4, UK SOV. BASE AREAS ON CYPRUS (Callsign Change). Geoff, ZC4CW, has announced that he has received the contest callsign, ZC4T. So. look for him to be active with the new callsign in the CQWW DX CW Contest, ARRL 10M Contest and the ARRL 160M Contest. QSL is still via G3AB.

ZF, CAYMAN ISLAND. Pete, N2LM, will be active as ZF2PD on Grand Cayman Island (NA-016) from December 28th through January 8th. Activity will be 80-6 meters CW/SSB. Requests for QSL cards can be sent to his home callsign, N2LM.

ZW0, ST. PETER AND ST. PAUL ROCKS. Karl, PS7KM, plans to be active as ZW0S from St. Peter and St. Paul Rocks (SA-014) between November 26th and December 19th. QSL direct to PS7JN: Joaquim das Virgens Neto, Rua Carlos Serrano 1969, 59076-740 Natal RN, Brazil.

The following stations are expected to be active in the
CQ World Wide DX CW Contest (November 29-30th, 2003)

Thanks to Bill, NG3K, for providing OPDX readers the following consolidated listing of the participants in the 2003 CQWW CW Contest. For a more detailed listing in HTML format, please visit the Web page at:
http://www.ng3k.com/Misc/cqc2003.html (By callsign)

Amateur Radio Newsline™ Report 1372 – November 28, 2003

Amateur Radio Newsline report number 1372 with a release date of Friday, November 28, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Australia plans a celebration to welcome no-code, a New Zealand ham plans an Amateur Radio replacement for a frequency standard station and the U-S-A is on the verge of banning unsolicited junk e-mail. Find out the details on Amateur Radio Newsline report number 1372 coming your way right now.

**

RESTRUCTURING: WELCOMING NO CODE “DOWN-UNDER”

Last week Australia’s decided to abolish code exams on the 1st of January. Now its planning a world-wide on-the-air celebration as 2003 gives way to 2004 and Morse testing disappears. Jim Linton, VK3PC, has the story and an invitation for you to take part:

--

On New Year's Day 2004 Australian radio amateurs will gain access to the High Frequency bands using licenses that don't require the passing of Morse code telegraphy tests. The Wireless Institute of Australia invites the world's amateur radio fraternity to join an on-air celebration of this special occasion.

To celebrate the event, there will be a "WIA Welcome to HF QSO Party" beginning at 0001 Australian Eastern Daylight Time and conclude at 2400 UTC on New Year's Day - a total of 35 hours. The VK radio amateurs appearing on HF bands for the first time can be identified by three-letter VK callsign suffixes that begin with the letters H, T, U, X, Y and Z.

WIA amateur stations will be on air to join the HF QSO Party, and these have two-letter callsign suffixes "WI" or three letter suffixes starting with "WI." Listen for the call "CQ WIA Welcome to HF QSO Party".

For the Amateur Radio Newsline, I’m Jim Linton VK3PC.

--

Many in Amateur Radio have been campaigning for years to have code tests removed as a license requirement to operate on amateur bands below 30 MHz. For Australia this will happen on the 1st of January, 2004 with this very special on-the-air celebration.

(DO NOT READ. Find out more by e-mailing hfqsoparty@wiavic.org.au (Q-News))

**

INTERNATIONAL - NEW ZEALAND: A PROPOSAL TO REPLACE VNG

Still down-under, word that well known "Digital Modes" Amateur, Murray Greenman, ZL1BPU, has proposed that New Zealand and Australian hams put together a network of simple and inexpensive transmitters. This, to provide a high accuracy Standard Frequency Service to replace the VNG standards station that has now gone QRT. Amateur Radio Newslines Jim Meachen ZL2BHF is in Auckland with the details:

--

Amateurs in the South Pacific have for many years relied on VNG transmissions as a prime source of accurate frequency reference. With the closure of VNG in December 2002, the sole remaining precision signal source in our area is WWVH, in Hawaii. Unfortunately the WWVH signal quality in the South Pacific is generally too poor for reliable use, either to zero beat a simple calibrator, or using more sophisticated computer based techniques.

ZL1BPU says that a series of tests over the last two years has shown that simple low power carrier transmissions on the 80m band would fulfill most of the requirements of a Standard Frequency Service:

--

Greenman: “Using simple HF transmitters that I've designed, we have confirmed that low power transmissions are very useful, for both calibration and propagation study, up to at least 3000 km range.

Anyone can monitor these signals, using a stable receiver and freely available software to look for small frequency shifts that accompany each propagation path. Classic effects such as multiple paths with different refractive indices for different signal polarization’s are easily observable.

Doppler shift is particularly marked around sunrise and sunset. Observing these signals gives a better understanding of propagation, which is the key to accurate on-air frequency measurement.”

--

The Service now operates on a test basis with transmissions from a high precision local reference on an exact kHz point 80m frequency using a carrier power of 1-5W. The Transmissions are identified in Morse every 30 minutes. Operation is from a different geographical location each weekend. Transmission times are announced and coordinated beforehand by e-mail.

Reporting from Auckland New Zealand I'm Jim Meachen ZL2BHF for Newsline

--

ZL1BPU adds that these are privately owned, operated and attended test transmissions, not beacons. Establishing a Standard Frequency Service formally, perhaps under the auspices of the NZART, might be considered in the

future. (NZART News)

**

COMMUNICATIONS LAW: HOUSE PASSES ANTI-SPAM LAW

Here in the U-S-A, Congress has moved closer to passing the first-ever federal protections against unwanted commercial e-mails. This, with the House passing a bill on Saturday, November 22nd that would impose new limits on sending direct advertising offers -- commonly called spam mail.

Approved on a 392 to 5 vote, the measure would prohibit senders of unsolicited commercial e-mail from disguising their identity by using a false return address or misleading subject line. It would also prohibit bulk mailers from harvesting addresses off websites and require such e-mails to include a mechanism so recipients can indicate they do not want future mass mailings. Penalties for failure to comply could be up to five years in prison in some circumstances.

The House bill largely mirrors ant-Spam legislation the Senate approved last month. Supporters hope that slight differences between the two measures can be resolved before Congress adjourns for the year. The Bush administration says that it supports the anti-spam efforts. (Published news reports)

(5 sec pause here)

**

RADIO LAW: THE FCC ON PRIVACY OF INFORMATION

The FCC has put in place a temporary policy that will keep the public from knowing who is facing enforcement action by that agency. Amateur Radio Newsline’s Bruce Tennant, K6PZW, picks up the story:

--

Don’t look for names and call signs of alleged regulatory violators to be released by the FCC anymore. At least not for a while. This is because the agency has revised the format in which it's supplying the media and the public with information regarding alleged regulatory scofflaws, including those in the Amateur Radio service.

The revised temporary policy is based on privacy concerns within the FCC. Until further notice, the agency says that it will only provide the location where a violator lives along with a very brief synopsis of the action taken.

Following a policy review now taking place the FCC says it will announce a new privacy policy for all future information releases.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

No timetable has been announced for the privacy policy review to be completed. (FCC)

**

ENFORCEMENT: NO MORE ADS AND WE RENEW YOUR LICENSE

And without mentioning any name or callsign, the FCC has acted in a pending non-certified radio equipment marketing case. This, as a Tomah, Wisconsin, licensee is informed that renewal of his Technician license would be granted on the condition that he permanently remove from the World-Wide-Web certain information.

The FCC says what it wants removed includes any advertisements for, or references to, the sale of transmitting equipment that operates, or is intended to operate, on frequencies in the Citizens Band service. Also references to gear for any other radio service requiring the use of certified transmitting equipment but which has not been certificated by the regulatory agency.

If he says O-K, he gets his ticket renewed. If he refuses to comply, the FCC says that his renewal will be designated for hearing before Administrative Law judge. (FCC)

**

ENFORCEMENT: PA REPEATER PROBLEM

The FCC has also warned a Lewistown, Pennsylvania, Extra class licensee that he must heed the request by a repeater owner to stay off that system and that technical problems with his own repeater must be corrected immediately.

And in an Order issued by Philadelphia FCC office that licensee was told that his repeater could not operate under automatic control until further notice. He was also requested to provide operational information about the repeater, including names and addresses of control operators. (FCC)

**

ENFORCEMENT: TOWER VANDAL FACES 27 MONTHS IN PRISON

And you can just about write the words "the end" to the case of a Washington man accused of tampering with more than 20 high voltage power towers in four western states that we have been reporting on. 62-year-old Michael Poulin has admitted the charges and has entered a plea bargain agreement with federal prosecutors. As a result, he will serve no more than 27 months in prison. He also faces a possible fine of $500,000. Without the plea agreement he could have been sentenced to jail for up to 10 years. (CGC)

**

RADIO LAW FOLLOW-UP: THE NEVADA HIGHWAY PATROL VS THE FCC

Some enforcement news of a different kind by way of the Reno Gazzette Journal and the C-G-C Communicator. Both bring word that the Nevada Highway Patrol has turned over a 255 page investigative report and 2,500 pages of supporting documentation to that states Attorney General's office. The Attorney General will now consider the possibility of criminal charges will be determined in connection with the police agency’s use of a radio system on frequencies for which it holds no licenses.

As previously reported, the highway patrol launched the investigation earlier this year when it was discovered that it didn’t have the proper licenses to operate the $14 million communications system built for it in 2000. The FCC has threatened to fine Nevada and block the states future license requests if the Nevada Highway Patrol does not quickly abandon use of the unauthorized frequencies. (CGC)

**

WITH THE ARRL: 2004 ELECTION RESULTS

The ARRL has announced that Frank Fallon, N2FF, retained his seat as Director of the League's Hudson Division. This, by defeating Vice Director Steve Mendelsohn, W2ML, by a vote of 1933 to 1470.

Ballots were counted November 21 at ARRL Headquarters. The Hudson Division's was the sole contested seat in the current director-vice director election cycle.

Incumbents running in the Central, New England, Northwestern and Roanoke Divisions ran unopposed and were declared elected. Joyce Birmingham, KA2ANF, was the lone candidate for the vice director's seat that W2ML vacated to run for the division's top spot and was also declared as elected.

And don’t look for as many League elections to take place in the future as in years past. These candidates were elected to serve three-year terms of office that begin at noon on January 1, 2004. The change from two year to three year terms was instituted by the ARRL Board a few years ago. (ARRL)

**

REQUIRED READING: SURGE PROTECTION - SEPARATING MYTH FROM FACT

If you think that $2.98 bargain basement power strip will protect your ham gear from power line spikes, you could be in for a rude and very expensive awakening. This is the gist of a feature article in the December issue of Popular Communications Magazine titled Surge Protection: Separating Myth From Fact.

The author is Popcom Editor Harold Ort, N2RLL. In it, Ort takes you on a mind boggling journey into the world of powerline surge protectors. He tells you why power surges take place and what really works to protect your station -- and -- what does not.

The article is must reading for any ham that operates his station from mains power. You can find Popular Communications on many newsstands worldwide or subscribe over the web at www dot popular dash communications dot com. (ARNewsline(tm))

**

INDUSTRY NEWS: ROHN ANNOUNCES ASSET PURCHASE AGREEMENT

Amateur Radio and telecommunications industry tower manufacturer ROHN Industries has announced that it's entered into an asset purchase agreement. This with SPX Corporation which is described as a global, multi-industry company.

According to the ARRL Letter, ROHN filed for Chapter 11 debtor-in-possession relief in the US Bankruptcy Court for the Southern District of Indiana on September 16. The deal, if approved by the court would include ROHN subsidiaries that are party to the bankruptcy proceeding. (WA6KLA, ARRL)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WITH ARNEWSLINE: YOUR INPUT NEEDED

Amateur Radio Newsline will be holding its annual Board of Directors meeting in early December and those in charge want to find out what you would like from us in 2004 and beyond. If you have any ideas on how to improve the newscast, the Young Ham of the Year Award, funding, or any aspect of our operation, we welcome your thoughts. E-mail is best. You reach us at newsline@arnewsline.org. (ARNewsline(tm))

**

HAM HELP: DX SOUND BITE NEEDED

Did you have a tape recorder running the weekend of the CQ World Wide SSB contest? If you did then Glen Lowery, K2FF needs to hear what you have.

The reason? Well, it seems that Daryl Goldman, KD5CQT, and Randy Becnel, W5UE , spent a week in Suriname in October. Goldman operated as PZ5CQ while Becnel was on as PZ5UE. The duo also activated PZ5A in the contest.

Anyhow, when the team got back home they realized that they had recorded everyone on tape except PZ5UE. And now there is a presentation planned for early December and audio of Becnel in QSO is needed to complete the show.

If you happened to be listening in and have the one missing station recorded, please contact Glen Lowery by e-mail to k2ff@aol.ccm Everyone involved will be very appreciative if one of you can help out.

More is on the web at www.mdxa.org/pz_2003.html (OPDX)

**

EMERGING TECHNOLOGY: CELL PHONES WILL POSSESS LOCATION-BASED BEHAVIOR

According to a report on the National Institute of Standards and Technology website, your cell phone may one day be able to adjust its behavior or call handling based upon where it determines you are located. Such phones could, for example, advise you of the closest bank, dial the nearest emergency specialist or automatically forward your calls while you're in a conference room. The N-I-S-T website carries many other interesting stories too. Its updated regularly and is in cyberspace at www.nist.gov (CGC)

**

HAM RADIO IN SPACE: ARISS GEAR PASSES PREFLIGHT TEST

Some exciting news on new ham radio hardware slated to be carried to the International Space Station. We have more in this report:

--

ARISS International Chairman Frank Bauer, KA3HDO, reports that he and other members of the USA team just returned from Russia where we they were supporting a series of meetings and tests at the Energia facility.

According to Bauer, the primary reason for the US team visit was to complete the testing of the Phase 1 Ericsson 2 meter and 70 cm radios, along with the Phase 2 Kenwood D 700 radio system using a set of flight identical ARISS antenna systems.

The tests were performed in the KIS facility at Energia that houses all their flight equipment. Inside the KIS is a flight equivalent Service Module. The good news is that the group not only successfully completed the end-to-end testing of the Kenwood and Ericsson radio systems but the SSTV system as well.

The successful completion of these end-to-end tests was a requirement by the Russian team. This, to clear these radio systems for use in the on-orbit Service Module.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP.

--

By the way, the International Space Station celebrated its fifth anniversary in Earth orbit on November 20th. (ARISS)

**

ON THE AIR: NEW SPANISH LANGUAGE IRLP REFLECTOR

A Spanish language reflector has come to the Internet Repeater Linking Project. This, with word that Reflector 9201 is in full operation and all users with Spanish skills are invited to join in the fun.

Jay Santiago, KP4EOP, is the operator of node 7040. He and the Chicago based Asociacion Iberoamericana de Radio Aficionados are the people behind the project. They say that 9201 is not closed to non-Spanish speakers. Rather it is a place in ham radio cyberspace where the Spanish language will be primary.

Up until now, IRLP- has been dominated English and French speaking nodes and reflectors. This left a large portion of the worlds Spanish only speakers out of communications over the very popular repeater linking system -- a problem that’s now been corrected thanks to the Asociacion Iberoamericana de Radio Aficionados. (K9DC)

**

PROPAGATION TECHNOLOGY: NEW SOLAR FLARE THEORY

The recent series of solar storms to hit Earth may be caused by the sun's iron-rich interior. So says one solar researcher who theorizes that the sun's core is made of iron rather than hydrogen.

Dr. Oliver Manuel is a professor of nuclear chemistry. He believes that iron, not hydrogen, is the sun's most abundant element. And, in a paper accepted for publication in the Journal of Fusion Energy, Manuel asserts that the standard solar model which assumes that the sun's core is made of hydrogen has led to misunderstandings of how such solar flares occur.

As ever ham knows, these flares can play havoc with high frequency communications while turning some VHF frequencies into world-wide D-X bands. (ANS and Space Daily)

**

DX

And speaking about DX, word that OK1TN will operate portable KP2 from St. Thomas in the Virgin Islands through the 13th of December. If you make contact, QSL as directed on the air.

Also, K3JT is active as 5X1X from Uganda for the five or six weeks. Sorry. No other information on this operation is available at this time.

Lastly, the Council of Europe Radio Amateur Club, has launched a competition open to all radio amateurs. This, to commemorate the 18th anniversary of its establishment in June 1986. The challenge involves sending a list of all contacts made with their club station TP2CE using its various special prefixes before the end of June 2004. Complete rules can be found on the Internet at ewwa.free.fr

(This weeks DX news provided by OPDX, GB2RS and Modern DX’er)

**

THAT FINAL ITEM: T-HUNT TIME AGAIN

And finally this week, whether you're young or old, you could become a champion at hidden transmitter hunting. It's time to start training now, as you'll hear in this report from Amateur Radio Newsline's Joe Moell K-Zero-Oh-V

--
USA's best on-foot hidden transmitter hunters will be heading west next summer. The fourth annual USA ARDF Championships will begin June 16 near Santa Barbara, California. Get ready for practice sessions followed by separate days of intense competition on the two meter and 80 meter bands. Medals will be awarded in nine age and gender categories, following the rules of the International Amateur Radio Union.

The competitive courses are open to anyone of any age, experienced or not. Here's your chance to learn from experts like Jay Thompson W6JAY, Newsline's Young ham of the year. He was a medal winner at this year's Championships in Ohio.

These USA Championships will take place just in time for final selection of Team USA members who will travel to the Czech Republic for the ARDF World Championships in September.

Event sponsor for 2004 is the Santa Barbara Amateur Radio club. General Chair is Marvin Johnston KE6HTS, a member of USA's first team to the World Championships back in 1998 and winner of medals at the last two USA Championships.

The official Web site of the 2004 Championships is now being prepared, announcing the location of event headquarters, rules and technical details. Meanwhile, you can find out all about championship direction finding, and how your can have events in your home town, at the "Homing In" Web site, www.homingin.com

You'll learn the rules for this fast-growing sport, meet some of the current champions, get equipment suggestions and find out how to get on an e-mail list for the latest radio-orienteering news. That's homingin, one word, homingin.com

From southern California, where we have regular on-foot foxhunts and everyone is invited, this is Joe Moell K-Zero-Oscar-Victor for Amateur Radio Newsline.

--

Again, for more information take your web browser to www.homingin.com (K0OV, ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). 3066. CQ WW highlights & lowlights

Newsgroup: rec.radio.amateur.dx
Date: 2003-12-01 02:43:40 UTC
From: Doug Smith W9WI <w9wi@invalid.invalid>
Message-ID: <3FCAAAE2.2030106@invalid.invalid>
Source record: 8200

Highlights:

- Evening Russians on 20. Some of them are amazingly weak, but they're all good at the code and *persistent*. They never give up. And they sure make things interesting.

- The "bottomless pit" of Canadians Sunday afternoon. Every time I thought we were about to run out of people to work, another handful of VE3s, VE6s, and VE1s would show up.

- Likewise for Spain. I think I worked *every* Spaniard who knows the code on Sunday afternoon.

- New ones on 80. TG0AA, PV8DX, ZA1A, Z32XX all in countries never before worked on 80. Getting awfully close to that 5BDXCC.

- European opening on 40 at noon EU time. Worked a bunch of G's, DL's, and Scandanavians between 1030 and 1200z. Didn't expect to hear anything except the Americas and Japan at that hour.

- VK6's worked - VK6LW on 40, VK6DP on 20. VK6 is about as far as you can possibly get from Tennessee without being on a ship.
==========

Lowlights:

- Murphy. Antenna switch that wouldn't switch to 160 and wouldn't stay switched to 40 or 80. Worked the last half-hour of the contest on the 2nd radio Windom because the remote switch wouldn't reliably select the 40m rotatable dipole.

- People who don't know what country they're in. I'll pick on N0IW because he was the one op persistently lid enough when I was enough not-in-a-hurry to listen.. DX station kept sending "JA2? AGN" and every time he did, N0IW dumped in his call. I'm sure he wasn't the only lid who didn't know what country he was in...

- Intentional-QRM frequency thieves. At least three stations tried to steal my CQ frequency. Yes, I'm certain they weren't cases of propagation changes or people who couldn't hear me.

Worst case involved 9Y4ZC. 20m was open *everywhere* - I was getting answers from Europe, all of Russia, Japan, Australia, Africa, and South America. Someone sends a "QRL?" *dead on* my QRG - I respond with a CQ - and he starts CQing anyway. After 2-3 minutes, I realize I'm not going to be able to hear callers anymore and slide up about 700Hz.

At which point ZC spins his antenna north & comes up about 40dB.

You're going to have a REALLY HARD time convincing me he didn't know I
was there. Too bad there's no way to gather reliable evidence for a
disqualification....

==========
Lowlights aside, **I LOVE THIS CONTEST**!

Had a great time myself. I too had some wonderful highlights.

- Worked Iceland, Tunisia and the Faroe Islands. This is the first time EVER that I've heard any of them on the air in any mode. And worked the Iceland station on a 10 meter band that was largely closed down at the time. Also worked several other new countries for me.
- Worked the Russians over the pole and yes they are good. I was amazed at what they could pull out but I didn't do too bad either to pull them out. Here in Michigan, their signals were very distorted.

Of course the lowlights
- Stations that abandon you if they don't get your call on the first try
- Stations that seem to be deaf. They are hitting you at 10 over 9 but can't seem to hear you at all.
- Stations that don't listen to what the DX is asking for.

Although I only worked 114 stations, I had a great time. I wish my CW were stronger as some of those stations were incredibly FAST. At least one of them was going at not less than 40wpm and I'm only good to about 20. But one can catch the call sign one letter at a time if need be.

Onward and upward to next year.

Nice catches!

Never heard the Faroes. (I've worked them before but didn't hear 'em in
this contest) Iceland is a particularly tough path, one which I didn't
work on 10 this year. (did get 'em on 15 and 20)

It goes to show that the most interesting DX happens on the bands that
you don't think are open!

> - Worked the Russians over the pole and yes they are good. I was amazed at

Likewise here, regarding the distortion. One has to expect that. I
think that's part of the appeal - the Russians *sound like DX*. Unlike
the 30-over-9 German stations who sound like they might be in the next
state<grin>.

> Of course the lowlights
> - Stations that seem to be deaf. They are hitting you at 10 over 9 but
> can't seem to hear you at all.

A lot of this is QRM. If the frequency was clear on their end, they'd
log you immediately. But there's someone within your skip zone (or
5,000 miles the other side of the DX) trying to steal their frequency,
and they can't hear your 569 signal over the 599+20 QRM.

Doesn't make it any less frustrating on this end!

Yep, especially in this contest one can!

Please call anyway. Send "QRS PSE" if you feel it's necessary. Many of
us ultra-high-speed folks will happily slow down for an extra QSO,
especially on Sunday afternoon!

3071. FT 1000 MP - Need your opinions

Newsgroup: rec.radio.amateur.dx
Date: 2003-12-01 16:47:21 UTC
From: spam.for.the@buerotiger.de
Message-ID: <bqfrap$225uud$1@ID-31.news.uni-berlin.de>
Source record: 8105

Hi there,

hope you all had a great CQWW contest - we at DF1LX certainly did and worked a couple of the regulars from this newsgroup as well. Doug even comes back when addressed with his name and not his callsign ,-)

I wonder what your experience with the FT-1000MP is, which is the rig we used during the contest. This was a first for us, so far we have used a trusty FT-990 for that.

To be quite honest: I found the FT-1000MP a dreadful rig for CW in many respects:

- The side tone is ugly and hums badly
- QSK simply sucks, both in terms of signal quality (clips) and audio quality.
- As soon as you got more than three stations calling with signals above 559, the receiver sound completely overloaded and produces a non-distinguishable signal mess.

Let me try to explain the last part:

On my trusty TS930 ist is easily possible to have a wall of 20 or 30 really loud stations and yet be able to pull out a really weak one that somehow manages to not zero-beat on any of the big signals. On the FT-1000, however, this is flat out impossible; what you hear is a porridge-like mess of audio with no chance of pulling out weak ones. We tried all combinations of filters (this particular FT-1000MP is completely loaded with INRAD-filters), DSP, notching, shifting etc., but the result was the same.

Given that four operators had exactly the same feeling I am curious to learn what other operators have to say about it, in particular operators with some pile up or contest experience.

How do you manage in pile-ups? Seriously, the thought of spending hour after hour on working a pile up with this rig simply gives me a headache, whereas the thought of doing the same thing with my trusty 930 merely makes me want to have even more pile ups.

I had actually planned to go shopping for a new rig, but after that contest I feel that my money is a lot better spent on getting the 500 Hz-INRAD filter for my TS930 and add the PIEXX digital board upgrade which makes the rig computer controllable.

Any comments?

Peter Lemken
DF5JT

Berlin

ObContestPeeve: CT by K1EA is a great piece of software that does anything a contester needs. I only wish someone had instructed Ken on usability. Next contest will be done with TLF, the free Linux-clone of TRLog. No more network CRC-errors, lost QSOs, and weird keyboard functions. It's been nice to work with CT for more than 10 years, but it's definitely time to move on to something better.

I just started on hf bands and i usiing now a FD4 from Fritzel and I hear
all goods things about the G5RV.
Is that so, works it's also great on 10 and 15m?
I have not to much space for a full size beam but a mini beam works also
good I think. But most of beginners started with a wire like a G5RV???
If I buy a G5RV is that with a Balun or without a balun what's the best??

Hvaing used a MP MkV for over a year I dont understand . Your rig must
have a problem or you must have put in some strange settings for the variosu
parameters.
I have found the Mp to be super radio in pile ups. On low bands with EU
signals 20-40 DB over S9 I use the attenuator .It makes a big difference.

>all goods things about the G5RV.
>Is that so, works it's also great on 10 and 15m?

Works better than a dummy load, but probably not much better than (or
as good as) a dipole.

How 'good' an antenna works is relative to the antennas the operator
has previously used. If you a) never had an HF antenna, or b) used
only a long wire, your opinion would probably be that it's 'great'. If
you had previously used 5 x 5 x 5 monobanders on the high bands, your
opinion would probably be that it sucks.

I've used lots of wire antennas, and it's been my experience that any
multiband wire antenna (like the G5RV) never works any better than a
simple half wave dipole, and most of the time they work worse. But the
G5RV has advantages - you can feed it with one coax and use it on many
bands instead of feeding five or six dipoles, and it takes up less
room than five or six dipoles.

I have the same problem you do, not enuff space for a tower and a good
antenna. One wire antenna that I have always like is a loop. It seems
to be a little quieter than other wire antennas, and it supposedly has
a tiny bit of gain over a dipole. It doesn't take up any more space
than a dipole, and you can mount multiple loops inside of each other
without much interaction between the different bands. So I made one
for 10/15/20 meters and it seems to work a bit better than dipoles I
tried and also much better than a mutliband vertical in the same
location. You can see a picture here:

http://kh2d.net/photos.cfm

>If I buy a G5RV is that with a Balun or without a balun what's the best??

Don't buy one. Make one. It's always more fun to use an antenna you
make yourself. Not to mention that it's a lot more fun to throw it
away because it doesn't work 'great' than it would be if you invested
100 bucks in it. RealHams(tm) never buy wire antennas. Here's some
info on how to make one:

http://www.astrosurf.com/lombry/qsl-g5rv-2.htm

If you are going to spend money, don't buy wire antennas. Buy
propagation. Because on a day with good propagation, you can work the
whole world with a very bad antenna, but on a day with bad

propagation, you can't work anybody with even the best antenna......

> Is that so, works it's also great on 10 and 15m?

Dave,

I use a G5RV with the center at about 9 meters high and the ends at about 4.5 meters high. The tuner un my 756 Pro II will tune all bands except 160 and 30 meters. 15 meters does give some problems but will tune. It works very well on 20 meters. The one I have is made by Van Gordon and uses 300 ohm twin lead instead of 450 ohm. I also have a Cushcraft MA5V vertical and the G5RV at lease 3 S units better on receive.

Yes it does work, not the best antenna in the world but has allowed me 1100+ contacts since February of this year.

It will be coming down as soon as the tower and beam go up.

Good luck,
Dave

I think this message should be read by every DXer in the world.

73 Rag LA5HE

Since the 1930's, there has been a long standing rule - Never
call a DX station on his XMT frequency.

Call him 50 to 300 Hz up - he will hear you even running a tight
filter.

This evening A61RA was on the low end of 40M CW. At least
12 to 15 stations were calling him on his QRG preventing most
folks from copying his return calls. Some stations were even
"beacon calling". Come on guys, if you are doing this, how are
you or anyone else going to hear him ??

Some stations went Up and worked him. The A61RA station
was answering calls both Up and on his QRG. This is not a
good habit. The A61RA Op should have specified Up if he
was going to listen for stations calling Up. This, of course,
created more confusion.

40M used to be known as the "gentleman's band" and for a
lot of the old Ops it still is. What does this mean ?? It means
if you call the DX once or twice, relatively in the clear, and get
no reply, you QRX and let another station try. After a few other
stations try, and some will be able to get through as they can
hear the DX, then you try again. As more stations make the QSO,
the QRM gets less, making it easier for you and others to get
through.

During the last ARRL CW DX contest, I actually heard stations
taking their turn, one by one, in calling and working a UA0 on 40M.
If one did not make it, he did a QRX and let the others try.

Courtesy, consideration, and a little common sense will go a long
way in getting you that DX QSO.

Well, from an ole CW fogey - thanks !!! Larry, K4WLS

3089. 22 echoirlp nodes installed by ian g0hlj

Newsgroup: rec.radio.amateur.dx
Date: 2003-12-04 22:25:31 UTC
From: g3zhi@hotmail.com
Message-ID: <3fd89d16.2141504@news.btinternet.com>
Source record: 8123

22 echoirlp nodes installed by ian g0hlj

hi all

so far ian g0hlj has installed 22 echoirlp nodes
they are all working fine

there has been no new irlp installs required due to a bad echoirlp
install by ian

adding echolink adds over 2,000 nodes/repeaters to your irlp box
which are located in many other parts of the world not covered by irlp

the installation is easy and takes about 15 mins

if requested your irlp node can be backed up first

echoirlp can be uninstalled or disabled if required

it is important though that as always if you are not sure what you
are doing please ask ian to change anything

echoirlp works great and i would hope to see every irlp node have
echolink added

as always if you have any questions please feel free to ask them

we welcome any questions here and all questions will be answered and
treated with respect

ian would be happy to inatall an echolink irlp node for you

please pass this information on

If I need to ask, I do. But since I'm not in to "win" or run up big scores,
I'd rather use it as an opportunity to get used to hearing higher speeds.
The CQ WW is good for that as the exchange is short and it's usually only
the call sign that's a little tricky as the other information (RST and zone)
are easy to anticipate and verify.

3092. NW7US Propagation Update: 5-XII-2003

Newsgroup: rec.radio.amateur.dx
Date: 2003-12-05 16:11:42 UTC
From: nw7us@hfradio.removethispart.org

Cross-posted to: alt.ham-radio.hf,alt.ham-radio.ssb,alt.ham-radio.vhf-uhf,rec.radio.amateur,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.shortwave

Howdy, Folks.

This weekend is quite active on the Amateur Radio bands. The ARRL 160-Meter Contest starts at 2200 on 5-XII-2003 UTC to 1600, 7-XII-2003 UTC, while the PSK Death Match starts at 0000, 6-XII-2003 and runs until 2400 7-XII-2003 on 80, 40, 20, 15, 10, and 6 meters. The TARA RTTY Melee runs from 0000 to 2400 on 6-XII-2003 on 80, 40, 20, 15, and 10 meters. There's also the TOPS Activity 80m Contest, which starts at 1800 on 6-XII-2003 and runs to 1800 on 7-XII-2003 in CW only on 80 meters. Finally, there's the QRP ARCI Holiday Spirits Homebrew Sprint that runs from 2000 to 2400 on 7-XII-2003 in CW mode only on 160, 80, 40, 20, 15, and 10 meters.

What is the propagation outlook on the High Frequency (HF) bands during this weekend?

Earlier, today (5-XII-2003 UTC), between 0100 and 0300, a weak shock wave was detected that indicated the arrival of the glancing blow from the coronal mass ejection from the prominence eruption on 2-XII-2003. The geomagnetic field activity increased to minor storm levels with a planetary K index reaching 6. Since, the geomagnetic field activity is remaining at the active (Kp of 5) level. After about 1200 UTC, the solar wind speed further increased, and the interplanetary magnetic field has remained moderately to strongly southward in its orientation. This will continue to keep the geomagnetic field active to somewhat stormy.

There has been no clear influence of the small coronal hole that is now situated moving closer to the western limb of the sun. However, another large coronal hole is moving into a position that will directly increase the solar wind speed and therefore possibly influence the geomagnetic activity starting today. This coronal hole, originally numbered CH66 and now numbered CH71 by Jan Alvestad, was geo-effective in previous 27-day solar cycles. The leading edge of the coronal hole is now at the central meridian. Soon, the solar wind speed will become even stronger, with the possibility of strongly negative (southward) interplanetary field orientation as this coronal hole moves fully into a geo-effective position.

The geomagnetic field is expected to be quiet to active on 6-XII-2003, increasing to minor storm levels, off and on, from 7-XII-2003 through 15-XII-2003. This will cause the highest HF

bands to become degraded and unreliable. At the same time, we don't expect much flare activity, so the middle to low HF bands will be in fair to good condition.

That means that conditions on HF this weekend will be fair to good for most of the contests and for general HF activity, except on the highest bands. Long distance low frequency HF, below 2 MHz, propagation along east-west paths over high and upper middle latitudes will remain poor, while propagation along long distance north-south paths will be fair. Above 2 MHz, to about 18 MHz, should be fair to good over most low- to mid-latitude paths, but somewhat degraded over the polar paths. Frequencies above 18 MHz will be degraded, with at least a fifteen-percent depression of normal maximum usable frequencies.

I will continue to monitor space weather and propagation conditions, reporting updates at http://prop.hfradio.org/ - the NW7US Live Propagation Center.

Happy DXing!

Amateur Radio Newsline(tm) Report 1373 - December 5, 2003

Closed Circuit Advisory

This is a closed-circuit advisory, and is not for re-transmission. Repeat, not for broadcast.

This is Andy Jarema, N6TCQ, Newsline Support Fund Administrator. As we move into the holiday season, we ask that you include Newsline on your list of giving. This is the first request we've made since April, and we'll be back in the following weeks to thank everyone that helped in that campaign. But with support in the months since that campaign only averaging between $200 and $250, and with our normal monthly expenses of between $600 and $800 each month to bring you the latest news on Amateur Radio, you can see where the math is headed.

The address for the Newsline Support Fund is Newsline, PO Box 660937, Arcadia, CA 91066. If you missed that, it will be given again at the end of today's newscast. And now the latest news:

**

Amateur Radio Newsline report number 1373 with a release date of Friday, December 5, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams in space fail to show up for a highly publicized operating event while hams on the ground save a life. Find out the details on Amateur Radio Newsline report number 1373 coming your way right now.

(Billboard Cart Here)

**

ON THE AIR: ISS ASTRO-HAMS A NO-SHOW FOR K6DUE COMMEMORATIVE EVENT.

What if you planned a party but your host never showed up to open the door and turn on the music. This is essentially what happened to the ARISS folks the weekend of November 29th and 30th in regard to the kickoff of its NA1SS special event tribute to the life of Roy Neal, K6DUE. But it was not completely unexpected. Amateur Radio Newsline's Norm Seeley, KI7UP, has the rest of the story:

The event was to get underway on Saturday, November 29th during as the space station passed over the US West Coast. ARISS International Chairman Frank Bauer, KA3HDO, says that Expedition 8 Commander Mike

Foale, KB5UAC, had even been supplied with a list of potentially good radio passes and the frequencies where to call the I-S-S had been published world wide a few weeks ago. Stations on the ground were even asked to keep their Q-S-O's as brief as possible so that the greatest number of hams possible could make contact with the space travelers.

And so it was that hams world wide were ready to honor K6DUE by making contact with the station in space that his years of effort helped to create. But over the entire weekend there were no reports of voice contacts with either Foale or his crewmate Alex Kaleri, U8MIR. Nor was the RS0ISS automated packet robot station activated either.

Why the crew was a no-show remains a mystery. Frank Bauer is certain that Foale knew about the event. In fact a message was received from KB5UAC that said he would try to be on the air for about 2 passes each weekend of December for the event. Bauer also received confirmation that final information regarding this past weekend was uplinked to the ISS crew on Friday, November 28th.

Bauer says that ARISS has discussed the situation with NASA. He says that there are two events that could have kept Foale from getting on the air. The first revolves around a broken exercise treadmill that KB5UAC reportedly spent a lot of his own time fixing this past weekend. The other is the widely reported crushing noise heard by the crew last week. It was in the aft end of the Service Module and its possible that the crew might have gotten instructions from the Russian team to determine the cause. This is being checked out.

Either way, Bauer reminds everyone that last weekend was only the kickoff and that the event commemorating K6DUE's contributions to manned ham radio space operations and that the event continues through the end of the month. He also says that ARISS will alert the ham radio community of potential opportunities for contacts as they become available.

For the Amateur Radio Newsline, Norm Seeley, KI7UP, in Scottsdale, Arizona for the Amateur Radio Newsline.

--

It should be noted that when it made the original announcement several weeks ago, ARISS said that crew participation in the event was completely contingent on the schedule of the on-orbit duties and other issues that might crop up on board the orbiting space station. (ARISS)

**

RESCUE RADIO: LA HAMS ASSIST CARDIAC VICTIM

Ham radio has helped to save the life of one of its own. This, as members of a Southern California repeater respond to a users call for assistance. Amateur Radio Newsline's Mert Garlick, N6AWE, has the details:

--
Almost every ham has heard of the Los Angeles 147.435 MHz repeater. Some call it notorious. Others have given it the nickname of "the animal farm" for the lack of discipline of its users. But on Sunday night, November 23rd, some of the tarnish turned to silver as bad manners gave way to human kindness and a life was saved.

--
Elmer: "We were all sitting around and listening to the radio as we usually do in an evening. All of the sudden, an individual keyed up a microphone whom we were all aware was having some health problems. One of our listeners, Alan Sanchez, KC6QXA, immediately noticed the distress in this persons vloice. He keyed up the mic and asked if he was OK. He indicated he was having some difficulty breathing and needed help. So, Alan immediately called Faith Gonzales who said to call 911 immediately because she was also very familiar with thisd gentlemans health problems
--

That's Gary Elmer is KG6DVO. He recently took over the system. And according to Elmer, the work of his users did not end there. While medical aid was in route, Mike Stavropoulos, KD6JTD, headed over to where the stricken ham lives. He helped him get up, opened the security gate for the paramedics and directed them to the apartment. Mike then followed the ambulance to the hospital and filled medics in on the hams condition.

Later that evening, the hospitalized ham went into cardiac arrest. He was revived by his doctors. Had he been at home the chances are that he would now be a silent key now. Gary Elmer says that he is very proud of his users:

--

Elmer: "You know we like to tear it up and cut up, and have a good time. And you know that some people might of the fun we have. And yes, we have been in trouble with the FCC, but you know, when called upon, we too can rise to the occasion as evidenced by the actions of those three amateurs the other night."

--

As we go to air Elmer says that the ham is still in the hospital recovering. More important he is alive thanks to his friends on the Los Angeles 147.435 MHz repeater.

For the Amateur Radio Newsline, I'm Mert Garlick, N6AWE, also in the City of Angels.

--

In past years the Los Angeles 4-3-5 repeater has received a lot of negative press. This time the press is positive because this time it and its users probably saved a life. (ARNewsline(tm))

**

COORDINATION: REVISED SOCAL 2-METER BANDPLAN NEARING APPROVAL

Still in the Golden state, December 6th was the date set for a vote on a revised 2 Meter bandplan proposed by TASMA, Southern California's Two Meter Area Spectrum Management Association. Amateur Radio Newslines Bruce Tennant, K6PZW, gives us a sneak peak:

--

Among the problems the revised bandplan seeks to correct is recognition of the work of neighboring coordination councils. TASMA has always officially acknowledged the Northern Amateur Relay Council of California, but not those serving the states of Arizona and Nevada. California shares borders and R-F with those states and the revised TASMA bandplan will provide for such political recognition.

Also to be considered will be frequency assignments for specific modes and updating the recognized manned space operations listings. This to conform the Southern California bandplan with the world in relation to current Amateur Radio International Space Station operations.

This revised plan is the product of 2 years of hard work by the regional coordination body written with significant input from the areas Amateur Radio community. It already received a thorough public review at the 2003 ARRL Southwestern Division Convention last September.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

For more information please visit www.tasma.org. (TASMA, ARRL SW Commuinicator)

**

Break 1

We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W6JW repeater serving Santa Clarita California.

(5 sec pause here)

**

RESTRUCTURING - SOUTH AFRICA: PROPOSED CHANGES TO LICENSE REQUIREMENTS AND PRIVILEGES

Another nation has taken the first steps in restructuring its Amateur Radio service. We have this report on what South Africa has done so far in welcoming codefree operations:

--

South Africa is taking a look at how to handle the question of Morse code testing until such time as it goes away and it looks as if it has an answer. It comes in a proposal to lower the Morse requirement from 12 to 5 words per minute. That is until applicants for the South African Zed U license will no longer need be tested for proficiency in Morse code.

Also proposed is the introduction of a new license class with the callsign prefix ZT. This license will not have any Morse code requirement. Rather, the holders of ZT licenses would have full VHF privileges and will be permitted to transmit with a maximum power output of 100 W on portions of the 160, 80, 40 and 15 meter bands.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN.

--

This interim solution would hold in South Africa until a final disposition on the future of Morse testing is made by that nations telecommunications regulators. (Q-News)

**

THE VEC PROGRAM: NEW GENERAL CLASS QUESTION POOL RELEASED

If you are planning to take a United States General Class written exam after next July 1st or know someone who is, then listen up. On and after that date tests will be based on a new set of questions just released by the Question Pool Committee of the National Conference of Volunteer Examiner Coordinators.

According to a news release from the committee, changeinclude the number of questions increased to 432 and release pf the pool in both Microsoft Word and ASCII text formats with no graphic files. Look for the new questions in cyberspace at www.arrl.org/arrlvec/pools.html. (W4WW, NCVEC)

**

RADIO LAW: COMPLAINT LEVELS TO FCC RISE

The United States FCC has released a report on the inquiries and complaints processed by its Consumer & Governmental Affairs Bureau during the third quarter of 2003. According to the report complaint activity increased within all major areas except cable during the third quarter.

The largest increase occurred within Radio and Broadcasting where a total of 19,920 indecency and obscenity complaints were received. Complaint activity was also higher in all five top wireless categories, with the largest percentage increases coming in the service quality and equipment section. Its all in cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-241435A1.doc (CGC)

**

ENFORCEMENT: YET ANOTHER TOWER FINE

The fines for tower related violations continue. The latest is an $8000 fine issued to the Barinowski Investment Company, L P. Barinowski is the owner of a tower located near Savannah, Georgia. It was cited for failure to clean and repaint its antenna structure to maintain good visibility. (FCC)

**

EMERGING TECHNOLOGY: NET-BY-PHONE NOW PLAYS MP3

The HandiHams say that there is now an MP3 file playback feature on the Net-By-Phone service that allows blind users who do not own a computer to access the Internet. This, by using a plain old vanilla telephone.

By way of example, a Net-By-Phone user accessing a website like Amateur Radio Newsline that has a link to an MP3 file can hear that file over the phone by simply selecting it. The system does not play the file right away, but it will download the file in the background and send you an e-mail when it is ready. When you retrieve the e-mail, the file will automatically play, just as a voice e-mail from a Net-By-Phone customer plays automatically.

Net-By-Phone is located in Chicago and is a fee based subscription service. You can find out more on the web at www.net-by-phone.com or call the toll free demonstration line at 1-800-358-7858. (HandiHams)

**

HAM TRAINING: TRAIN THE TRAINER

49 youngsters are now licensed hams and are the newest members of Pennsylvania's Trinity High School Radio Club. This, thanks to a program called "Train the Trainer" by Pete Di Volpi, K3PD, a teacher named Sean Barnes, N3JQ and the Harrisburg Radio Amateurs Club V-E Team.

TheTrinity High School Radio Club operators station KB3JAG. Barnes started the radio club so lower classmen could get exposure to the hobby before they attend his physics class. He notes that the schools physics program and the principals of amateur radio teend to integrate very well.

The Harrisburg Radio Amateurs Club is a Special Services club in central Pennsylvania. It has only 100 members, but has seen over 100 new licensees produced in the last two years from their V-E and Train the Trainer programs. Teachers that are interested in Sean Barnes curriculum can e-mail him to SeanBarnesPolo@aol.com (W3UU, K3PD)

**

HAMFESTS AND CONVENTIONS: FT.TUTHILL BECOMES WILLIAMS HAMFEST

The Ft. Tuthill Arizona hamfest has changed its name, its location and its date. Now the Williams Hamfest and ARRL Arizona State Convention, this premiere event will be held next July 2nd to the 4th, at the Williams Rodeo Grounds, Williams Arizona.

According to a news release from Mark Keshauer, N7KKQ, the move means that the hamfest sponsors can provide lower fees for tailgaters and campers, bigger spaces, a fireworks display and free admission. Most important, the famed Saturday night B-B-Q which is a staple of this show -- will continue. Sorry, that's not free but is among the best feeds found at any hamfest in the United States.

More information is on-line at www.arca-az.org/arca/images/press%20release (N7KKQ)

**

HAMVENTION 2004: THE YEAR OF THE CONTACT

Hamvention planners have announced that the theme for 2004 will be the "Year of the Contact," and they are starting out by improving their own. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the details:

--
According to Hamvention General Chairman Gary Des Combes, N-8-E-M-O, his team has been making numerous changes to the shows web site, This, so that things like exhibits, general admission ticket sales and Flea Market spaces can be handled on line and the necessary forms simply downloaded.

And yes, we did say Flea Market rather than Outside Exhibits. As regular listeners know, a number of years ago the Hamvention made the name change to Outside Exhibits. Only one problem. The ham radio public never bought in to that new upscale title.

Hams have always referred to the Hamvention Flea Market as -- well -- the Flea Market. So, taking a cue from the many radio amateurs who have responded to the Hamvention request for input, show planners have gone back to the future. Des Combes says that as of now, the Flea Market is the Flea Market, once again.

Gary Des Combes tells Amateur Radio Newsline that this is only the first of a number of "Going Back to the Future" changes that the public has asked for and that they will get. In fact, "Going Back to the Future" will be a sub theme during Hamvention 2004.

The dates are next May 14th to the 16th. The location is the HARA Arena in Trotwood Ohio just outside the city of Dayton.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, reporting.

--

Lots more information is on-line at www.hamvention.org. (Hamventionr)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAMS HELPING: THE NORTH POLE NETWORK

The holiday season brings hams a great opportunity. What better way could there be to introduce hospitalized children and their families to the magic of Amateur Radio--and to spread holiday cheer--than to arrange to have Santa visit them via Amateur Radio? Newsline's Joe Moell, K0OV, tells us about the North Pole Network.

--

Kids at Childrens Hospital of Orange County get holiday visits from clowns, carolers, firemen, baseball players and rock stars. But nobody is more welcome and anticipated than the ten Amateur Radio operators who arrive on the weekend just before Christmas. They come to establish a special ham radio link that makes it possible for patients to talk directly to the "real" Santa in his office next to the big toy workshop at the North Pole.

Members of the Hospital Disaster Support Communications System have been visiting children and adults in Orange County hospitals for over 25 years, and we think there's no better way than this to spread holiday cheer while showing our hobby in the best possible light.

Will your club be part of the North Pole network this year? If so, we have some suggestions for you. For instance, personalize each QSO. It would be easy to just put the mike in front of a little girl and instruct her to tell Santa her name and where she lives. But imagine how much better the QSO will be if Santa calls her by name right from the start. He's Santa Claus, so he should know! Before each year's North Pole Network session begins, the hospital therapists provide our North Pole station with the list of names for every room and bed, along with plenty of other tidbits about the kids that make good conversation starters for Santa.

You'll find lots of other hints for your best North Pole Network ever at our group's special Web site. The URL is long, but you can get to it with one click from the Hospital Disaster Support Communications System site at www.hdscs.org

The most important hint we have for you is: Don't miss the miracles. Every year, we have had at least one extra-special encounter that astonished families, staff and the hams. In a Santa QSO, children have spoken for the first time following brain trauma. Fevers have broken shortly after North Pole Network visits. A head injury patient started

to eat after being encouraged to do so by Santa, and so forth. We don't know exactly how much the personal contact with Father Christmas has aided in patients' recoveries, but we are always grateful that our hobby can add a little joy and holiday spirit to patients and their families.

Again, the Web spot to visit is HDSCS.org, short for Hospital Disaster Support Communications System. From southern California, this is Joe Moell Kay-zero-Oscar-Victor for Amateur Radio Newsline.

--

More on this and other ham radio holiday activities in the coming weeks. (K0OV, ARNewsline(tm))

**

INTERNATIONAL - AUSTRALIA: VK2BVS HONORED BY VK PRIME MINISTER

Australia's Prime Minister John Howard and Foreign Minister Alexander Downer expresses gratitude for Australian ham radio training in developing countries. This, by way of a certificate sent to Sam Voron VK2BVS in which the Australian Government expresses its gratitude to Voron for a valued contribution towards assisting developing countries to reduce poverty and achieve sustainable development.

The honor was bestowed on Voron for the six months he spent in Somalia where he organized an Amateur Radio training course. In addition to Howard and Downer, the certificate was signed by Dr. Brendan Nelson who is a member of Australia's Parliamentary House of Representatives. (QRZ.COM)

**

INTERNATIONAL - SWEDEN: NEW PAN-EUROPEN TV SHOW ON ITS WAY

Ham radio in Europe will soon have a TV show of its own. Jeramy Boot, G4NJH, is in Nottingham, the UK, with the rest of the story:

--
The Swedish-based 'Club-TV' wishes to establish a monthly amateur radio magazine programme to be transmitted via digital satellite TV to most of Europe. Club-TV wants to cover all aspects of amateur radio and thinks there is a number of amateurs around Europe who can handle a video camera and edit the result.

Videos of 10 to 20 minutes would be perfect. There is no cost involved other than the tape as the broadcasts receive commercial sponsorship.

During the past year Club-TV has carried out a number of tests and broadcast a couple of programmes. The transmission is via the Sirius 2 satellite at 5 degrees East with a Symbol Rate of 6667 and FEC 1/2.

Jeramy boot, G4NJH.

--

Jeramy says that inquiries go to Ben Jockert, SM6CKU, by e-mail to sm6cku@parabolic.se. (GB2RS)

**

ON THE AIR: NEW VHF/UHF PROPAGATION BEACONS NEAR ATLANTA

Back in the United States, Gary Bailey, WA4IOB, invites VHF operators to listen for his new 2 meter and 70 centimeter beacons. The transmitter are located in grid E M 73 near Snellville, Georgia about 25 miles east of Atlanta. The mode is CW on 144.285 MHz and 432.352 MHz with 2 watts output on each band. The 2 meter transmitter feeds a horizontal square loop. The 70-centimeter antenna is 4 half wave dipoles in a 90-degree horizontal quadrature configuration feedwith a 4-way power splitter. Both sign the call B B B W-A-4-I-O-B slash E M 73. Signal reports go to grb734@bellsouth.net (VHF Reflector)

**

DX

In D-X, LA5RIA will be active as JW5RIA from Bear Island until June of JW5RIA will operate on 160 to 6 metres CW, SSB and digital modes. Q-S-L as directed on the air. (RSGB)

Also, eight American operators are active from Christmas Island, East Kiribati, until the 7th of December. Call signs to listen for are T32MP, T32WW, and several others on all bands using all modes. They will have three stations with amplifiers and a large selection of antennas to pipe their signals worldwide. (RSGB)

**

THAT FINAL ITEM: A KILLER RENEWAL

And finally this week, the story of a ham who might have a hard time attending a license renewal hearing. Thats because he is in jail. Amateur Radio Newsline's Don Wilbanks, AE5DW, has more:

--

According to the ARRL Letter, the FCC has issued an Order to Show Cause to a Texas ham who is currently serving a 32-year prison sentence for the 1996 murder of his wife. The order released November 21st is the governments opening salvo in a hearing process that could end with the revocation of the Advanced class license of Roger Thomas Scaggs, W-5-E-B-C.

The FCC says that Scaggs' murder conviction raises very serious questions as to whether he possesses the requisite character qualifications to remain a Commission licensee. It also causes the agency to question whether his license should be revoked.

Scaggs is 64. He apparently was able to renew his ham ticket in the spring of 1998. This is the same year in which he was later convicted of murdering his wife. The FCC granted Scaggs' application for an

administrative update. In this case, apparently a change of address from Austin to Gatesville, Texas.

The FCC only recently became aware of Scaggs' murder conviction, which could keep him behind bars at least until he's 75. Assuming that Scaggs indicates that he will appear for or be represented at a formal hearing, the FCC will follow up with a Hearing Designation Order.

The session itself will be held before an Administrative Law Judge and would consider evidence concerning the effect of Scaggs' felony conviction on his qualifications to remain an FCC licensee. If no action is taken Scaggs license will next expire in 2008.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, in New Orleans.

--

Scaggs was given the customary 30 days to let the FCC know whether he plans to appear at the hearing. (ARRL)

Really? I'd have thought it would be an easier path from Europe than
from here.

Worked 'em 579 on 15m Tuesday noon USA time. (roughly 1800z)

That's what I thought, too. As a matter of fact, I spent quite some time chasing them, only missing few of their times of activity. That's the disadvantage of only running a vertical for all bands. No chance on 80 with that tiny stick, bad SWR on 30m and 20m seems to be their most disliked band, since I haven't heard them there at all.

3099. Working TO4E on PSK31

Newsgroup: rec.radio.amateur.dx
Date: 2003-12-06 21:39:22 UTC
From: dannyg40 <dannyg40@comcast.net>
Message-ID: <BBF78C89.1B6E3%dannyg40@comcast.net>
Source record: 8133

I'd like to pass along some tips that helped me work TO4E (Europa Island, FR/e) this morning on 20 meters via the long path from California on the PSK31 mode. The op was using a method of pileup management that I had not experienced before, despite years of sitting in pileups in other modes (CW, SSB, RTTY). This led, I believe, to some confusion at first (for this OM, for sure), and the PSK31 passer-by may not figure it out.

When TO4E says QRZ UP, he starts listening up a bit from his last contact. But when he finds a station to call, he moves his transmit frequency to that spot to answer the caller. When he says "stay on your own frequency," he means to send and receive on your transmit frequency after you call. I figured this out after calling him (up about 10Hz from his last contact) and heard nothing on his previous frequency -- but then I saw a signal on my transmit frequency (I was operating split in my software). Quickly clicking the receive marker to my own frequency, voila!, there he was, answering my call. From monitoring beforehand, I could tell he was jumping his freq, but I couldn't see the pattern (I couldn't hear most of the Europeans he was working, and the path is a long haul from this QTH with modest antenna -- oh yeah, and conditions were generally crappy, while being surrounded by PSK DeathMatch participants).

Here are points to remember (assuming they keep up this same modus operandi):

*The DX is not operating split
*The DX expects the next call to be on another frequency (which, in PSK31 doesn't have to be far away)
*Be ready to listen on your frequency for an answer
*If he doesn't answer your call, you have to hunt around to find him to see when he goes QRZ again
*If you see a packet cluster spot, by the time you get there, the DX has probably shifted frequency a little -- start hunting!

Despite the poor propagation ratings, today's long path opening on 30m CW and 20m PSK31 produced the first good-enough-to-call TO4E signals I've heard from the entire operation. The short-duration long path opening (1530-1630z) is my only chance (running barefoot [actually a huge 70w on PSK for this QSO], MA5B antenna, and steep hills nearby on the short path), so I was thrilled to enter another all-time new one into the log, albeit on an unexpected mode. Thanks to whoever it was (a DL, if I recall) who posted the sighting to the cluster to get me started in my search for a needle in a contest stack. Here's hoping I can pick up some other modes on 20m in the remaining days.

Good luck with the hunt.

3101. OH2AQ cluster instability of late?

Newsgroup: rec.radio.amateur.dx
Date: 2003-12-06 23:25:05 UTC
From: mike luther <mike.luther@ziplog.com>
Message-ID: <vt4pa592l1hae1@corp.supernews.com>
Source record: 8135

Anyone else notice what I see as an apparent instability in the OH2AQ Web cluster of late? Here it seems as if it is unavailable for long periods of time. As well, the automatic update for a given selection, like CW-DX for example, doesn't auto-update? You have to manually probe it for a reload for the frame?

Or is this a reflection of its popularity and demand, and we're just too fond of it?

Thanks!

W5WQN

3102. LoTW

Newsgroup: rec.radio.amateur.dx

Message-ID: <3fd22fc4$1@news.starhub.net.sg>
Source record: 8136

I recently updated my LoTW for both 9V1GO and G4VGO. Only 240+ hits for 7,900 QSO's for G4VGO, and thirty or so hits for 9V1GO (2K Q's uploaded). Is anyone using this service? It makes contest QSLing easy, and saves the direct QSL hassle if you are in a place nobody operates the lower bands (who QSLs at least).

Anyway, if you worked 9V1GO, your card is in the server.

73

Bob 9V1GO G4VGO

PS-Direct is OK also, turnaround is about three days when it gets here.

The OH2AQ cluster is a marvelous tool for DXers,
but it needs better management. If it can't get
better management, it should be discontinued,
because the erratic behavior of it is a pain in
the ass.

82,847 QSOs uploaded. (over dialup. I deserve an award<grin>)
3,494 QSLs. Including six for last night's 160m contest.

It does seem to be mostly a USA thing right now. I would hope that will
change when word spreads. I've seen it reported that authenticating a
non-USA license is a bit of a chore.

is no longer available, and the OPDX FAX number has been changed. I have noticed that some Web pages have not yet changed the information. So, Web masters "PLEASE" change your Web pages to the new header and the final credits. Contributors, please notice that OPDX has done away with the VOICE answering machine and now has a NEW fax number to send information. OPDX's new F A X number is: 1-419-828-7791 (F A X only!)
Thank you for taking note of these changes..... 73 de Tedd KB8NW

3D2, FIJI (Also, T30). Reports indicate that Hrane, YT1AD, is on the move again and heading to Fiji to team-up with Boban, YZ1AU, to operate in the ARRL 10 Meter Contest this weekend. Reportedly, Boban is already there. Their activity outside of the contest will be on 80-6 meters. The duo has one license already available to them (3D2AD), while the other one will be applied for upon arrival (possibly 3D2YU). Following their ARRL Contest operation, they plan to go to West Kiribati (T30). Their callsigns are unknown at this time. LAST MINUTE UPDATE/CHANGE: Boban, YZ1AU, is now operating as 3D2AD. The station on Fiji is fully operational, and will be there for ARRL 10 Meter Contest next weekend. The callsign, 3D2YU, is expected shortly. Meanwhile, Hrane (alone) is moving to West Kiribati (T30) on Tuesday and will be operating from there during the contest.

4L6, GEORGIA. Shota, 4L6AM, will be active in the ARRL 10-Meter Contest (December 13-14th) as a Single-Op SSB entry. QSL via the address on QRZ.com.

4W, TIMOR LESTE. Michal, OM2AQ, is now active as 4W2AQ from Timor Leste (East Timor) until December 18th. Steve, OM3JW, suggests/states to look for him everyday at 0900z on 28480 kHz. However, we spotted Michal on 15 meters on 21299 kHz between 1130-1330z. QSL via OM2AQ.

9V0 & VP8, ANTARCTICA. Alan, 9V1DX (aka VK0LD and ex-VK0MM Macquarie Island 2000), informs OPDX that he will be active from a temporary base camp in the remote Ellsworth Mountains in the Antarctic interior (approx. 2000 km due South of Peter First Island). He is there supporting a team of scientists and mountainteers climbing Mt. Vinson (highest mountain in the Antartic) from approx. December 15th to around January 10th (exact dates depend on the weather for the long, non-commercial flight in & out). His old callsign VP8PJ has been re-issued for life by the Falkland Islands Govt., and he will use it exclusively on PSK-31. The Singapore licencing authority has also issued him the special callsign 9V0A which he will use for CW and SSB. Alan will be as active as his work schedule permits. QSL route will be announced later. For more details, please visit the following two Web pages at: http://www.sarts.org.sg
http://www.geocities.com/vk0ld/2003.html

D2, ANGOLA. Ed Giorgadze, 4L4FN (aka P5/4L4FN), is now active as D2PFN. Activity will be on SSB and RTTY. He was spotted this past weekend on 15 meters RTTY (on around 21080 kHz between 1430-2030z) and SSB (on 21235 kHz after 1000z). QSL Manager is Bruce Paige, KK5DO. More information and an on-line log will be available on Paige's Web site at: http://www.amsatnet.com (click on D2 Angola)

CO8, CUBA. Raul, CO8ZZ, who was active in this past weekend's ARRL 160m Contest, states he will be active in this weekend's ARRL 10m Contest (December 13-14th) as a Single-Op/CW only/Low Power entry. QSL for both contests are via DK1WI.

E3, ERITREA (2004 DXpedition Cancelled!). Steve Wilson, G3VMW, has sadly informed the Northern Ohio DX Association (NODXA) and OPDX that he will be writing to all their sponsors very soon to advise them of the current situation in Eritrea. He states: "We have been told very recently by the Eritrean PTT that 'ALL amateur radio operation in Eritrea is temporarily suspended and that we should not be optimistic about a radio licence in February.' As you can imagine, we were devastated by this news and it has taken a couple of weeks to find out why the ban on amateur radio has happened. One of our crew has been in Eritrea for three weeks trying to sort out a licence and the place is crawling with UN staff. There is an ongoing border dispute between Eritrea and Ethiopia about a contested village, which may easily erupt into a full-blown war once again. The situation is very serious and the UN is trying to avert another war. All personal communications, including the GSM Cellfone system have been turned off. No amateur radio will be allowed in the foreseeable future. Regrettably, I have no choice but to cancel our planned operation for February 2004 and return all our sponsor's money. I would not be right to hang on to money that has been sent in good faith indefinitely in the hope that the situation might change. We may get the OK to proceed later in 2004, but there is no guarantee and we are faced with looking at an alternative location. I will return your check (NODXA's) and advise all our other sponsors in the next few days. You are the first group I have informed and it hurts!"

EY8, TAJIKISTAN. Nodir, EY8MM, will be active in the CQ 160 Meter CW Contest (January 24-25th) as a Single-Op entry. QSL via K1BV.

FO/A, AUSTRAL ISLANDS. By the time you read this, Vladimir, UA4WHX, will be finishing up his FO/AC4LN/m operation to Marquesas Islands (QRT December 9th) and will move on to Rurutu Island in the Austral Islands (IOTA OC-050) between December 10-12th. He will probably sign FO/AC4LN/a. He seems to favor 40 and 30 meters CW (There was some SSB reported on 40m). QSL to his home callsign.

HI9, DOMINICAN REPUBLIC. William, N7OU, will be active as N7OU/HI9 in the ARRL DX CW Contest (February 21-22nd) as Single-Op/All Band/Low Power entry. QSL via N7OU.

IOTA NEWS.....
AS-043. Osamu, JR1EEU, will be active from Aoga Shima Island (JIIA-AS-043-001) until March 2004. He plans to be active on the HF bands. QSL via direct or via bureau.

EU-109. Nigel, M3NJW, informs OPDX that the North Wakefield Radio Club will be operating under the callsign GX4NOK/P from the Island of Inner Farne (EU-109), off the northeast coast of England, April 17-18th, 2004. This is a rare opportunity, as the island is a National Trust bird sanctuary. Operation

will be on multiple bands/modes, and information will be
posted on the days of operation at: http://www.g4nok.org

OC-137
OC-171. Steve, G0UIH, is expected to be active again as VK2IAY/4
possibly from Dunk Island (OC-171) starting around December
9th for 5 days and Lamb Island (OC-137), December 16-18th.
QSL via G0UIH either direct or through the Bureau.

SA-027. To celebate the 500th anniversary of the discovery of the
Island of Sao Francisco do Sul, look for the special callsign
ZW5SF to be activated between December 15th and January 15th.
Activity will be on all HF bands CW/SSB. QSL via PP5CIT.

KH2, GUAM. Setsu, JL1UXH/KK2H, and his XYL Maki, 7L4FSR, will be again
on the air from Guam from December 16-23rd as KK2H/KH2. Setsu will focus
on working Europe and USA East Coast stations. He will be active on all
HF bands on CW and SSB. Online logs will be available during the operation
and will be updated on a daily basis at: http://kk2h.4th.jp
QSL via JL1UXH either via the JA Bureau or direct to his JA callsign.
Please do not send anything to the U.S. address of KK2H. All the direct
QSLs for the last November operation of KK2H/KH2 have been answered. The
bureau cards will be sent in the early part of 2004 in order to wait for
some more direct requests. Also, the log has been uploaded to the LoTW
(Logbook of The World) and already 38 QSOs have been matched out of 2,500
contacts.

PY0, FERNANDO DE NORONHA. Tony, PY0FT, will be active from December
15-26th. No bands or modes of activity were provided (Last year he was
active mainly on the digital modes). QSL via JA1ELY.

QSL INFO AND NEWS.............
The "ARRL Letter" reports this week that the ARRL's "Logbook of the
World" (LoTW) secure contact-verification database continues to grow.
So far, reports ARRL Membership Services Manager Wayne Mills, N7NG,
nearly 5000 users have uploaded logs containing some 25.4 million
Amateur Radio contacts. This has resulted in more than 1 million QSL
records. Signing up as a new LoTW user is simple. Visit the Logbook
of The World and read the "Getting Started" document, Mills said. He
advises new users to print it out to have the instructions handy. The
Web site is: http://www.arrl.org/lotw

BQ9P QSL STATUS. Steve, KU9C, informed the DX community this past
week that he should be seeing cards from the printer late this week for
BQ9P 2003. He has gotten the labels printed for cards received as of
December 4th. Steve guesses he will have most in the mail before the
end of the year or in the first week or two of 2004. PLEASE NOTE: Those
who chose to use the BQ9P envelope to include other cards that Steve
is QSL Manager for will likely be delayed.

Radio Club Ushuaia (LU8XW) in Ushuaia, on the Island of Tierra del
Fuego in Argentina, has designated Patrick Stoddard, WD9EWK, as their

new QSL Manager. The entries on the QRZ.com and Buckmaster for LU8XW now show WD9EWK as the QSL Manager, and the information for WD9EWK is correct at those Web sites as well as in the Radio Amateur Callbook since 1997. WD9EWK is also the QSL Manager for the special callsign, AY8XW, that was used in 2002. More QSL information by WD9EWK is also available at: http://qsl.wd9ewk.net/

NO LONGER A PIRATE. Mogens, OZ4ACK, informs OPDX that the callsign OZ9TR (former pirate according to some official databases) is now a legal station and is allowed to work on UHF/VHF and 6m.

QSL MANAGER CHANGE. QSL HB0/HB9LEY via JA1LZR. The QSL Manager used to be JH1BSE, but he had been SK. Please do not send any QSL requests to HB0/HB9LEY.

CLOSING THE LOGBOOK. Joe, JA1LZR, has finished replying to all QSL requests for the VP2V/N2AIR operation in 1984, and states he will not answer any more requests.

Ulli, DL5MBY, announces that the JY8YB online log has been updated to include QSOs up to December 2, 2003 (1210z - Also CQWWDX-CW Contest). You also can check on the status of your JY8YB, JY9QJ and JY8B QSOs on the online log at: http://www.qsl.net/dl5mby
There is also information available about QSLing.

TO4, EUROPA. The Europa T04E team is still active despite the rumor stating they are QRT. It is only a rumor, and they are expected to be active until December 16th. The team was a little tired during the first part of the week because of their participation in the CQWW DX CW Contest. Many have complained about the teams operating schedule. They want everyone to know that their activity would not be possible without the help of the French Army, and they must respect their order while on the island. Also, the generators on the island are under the control of the Military. The team does have a new operating schedule: 0600-0700z and 1515-1945z (They are trying to increase the length or split these periods.) The 5 operators are trying to have 4 stations active as much as possible during their operating times. A report (dated December 5th) from Rafik, F5CQ, states: "Since their arrival on the island, the team has completed 15300 QSOs with TO4E callsign: 5800 on SSB, 7700 on CW, 1800 on RTTY, 6 on 50 MHz (with ZS), plus 4000 contacts during the CW CQ WW Contest, as TO4WW." INTERESTING NOTE: Rafik, F5CQ, also reports that protected sea turtles have been a nuisance for the TO4E operation. Lowband antennas are installed on the beach, and each night the turtles knock them over and destroy the radials on their way from the ocean to the top of the beach to rest during the night. This means the team must then repair and reinstall the antenna systems on a daily basis. The Europa Web site is: http://europa2003.free.fr

TT8, CHAD. Allen, N5XZ, informs OPDX that it has take about a month after his arrival to receive a license in hand. However, he has received the callsign TT8XZ, thanks to the efforts of Dennis Carter, KE3TD, and Christian Berdjugin, TT8CB. He now has a HF radio in his room, but as of yet, no antenna. He is still working on that. They are going to try to set up a

mobile antenna on a mast with some radials. Allen will be on HF SSB only because the Motorola radio lent to him by the Security Manager, Christian, TT8CB, only has SSB. It will do CW with an accessory that they do not have. Allen told OPDX that if he comes back next year, he will be there longer and probably bring his IC-706, a keyer and maybe some sort of antenna. Keep your fingers crossed! He also mentioned that he is going to try real hard to spend at least a few hours in the 10 meter contest. Allen will be in Chad until December 19th. QSL via N5XZ.

VK DROPS CW AND CELEBRATES WITH QSO PARTY. On New Year's Day, Australian radio amateurs will gain access to the High Frequency (HF) bands using licenses that don't require the passing of Morse code telegraphy tests. The Wireless Institute of Australia (WIA) invites the world's amateur radio fraternity to join an on-air celebration of this special occasion. To celebrate the event, there will be a "WIA Welcome to HF QSO Party" beginning at 0001 Australian Eastern Daylight Time and conclude at 2400 UTC on New Year's Day - a total of 35 hours. The VK radio amateurs appearing on HF bands for the first time can be identified by three-letter VK callsign suffixes that begin with the letters H, T, U, X, Y and Z. Also, WIA amateur stations will be on air to join the HF QSO Party, and these stations will have a two-letter callsign suffixes "WI" or three letter suffixes starting with "WI." Listen for the call "CQ WIA Welcome to HF QSO Party".

VK9C, COCOS KEELING ISLAND. Look for Ken, JA1CMD (N4XJ), to be active as VK9CA from December 28th to January 2nd. Activity will be on 80-10 meters CW/SSB using only a 100 watts. QSL via JA1CMD or K4ST.

VK9L, LORD HOWE ISLAND. Look for Mark, VK2GND, to be active as VK9LD from December 25-31st. Suggested frequencies are (on or around): 14273 and 14195 kHz. QSL via VK2GND.

VK0, HEARD ISLAND. Reports indicate that Jim, VK9NS, is reporting that a "scientific multi-interest team of fifteen expeditioners" is preparing to leave for Heard Island in the coming days. Jim does not know if there is an amateur radio operator with this team. He also mentioned that there are plans to visit Heard Island on a regular basis every three year to study the island. Jim also mentioned that it has been 21 years since the HIDXA group has been to Heard Island (ed. WOW, has it been that long. Boy am I getting old fast!).

XU7, CAMBODIA. Peter, NO2R, informs the DX community that he will be active from Hiroo's (XU7ACY) shack in Sihanoukville, Cambodia, the first week of Februay 2004. He states he will be concentrating his activity on 160 meters. Meanwhile, Dick, N6FF, is now active as XU7ACB from here. However, Dick has lost his Kenwood transceiver which had a full set of CW filters and is now using an IC-706 which has NO CW FILTERS. He had to makeup an interface cable for the IC-706, and must key the amplifier separately with a foot switch. He should be active on the low bands. Dick will try to alternate between 80 and 160 meters every other day. On the higher bands you will find him on CW or RTTY, as time permits.

196 from 6800 uploaded to LoTW.
Mostly DX, fairly small number of NA.

Suspect low hit count might have something to do with the
fact that some of the QSOs I uploaded date back to 1954 ...

Don't forget to also upload to eQSL :-)

If I had any interest in running that net I would "go ahead" as you put it. But I don't have any interest in running it. Therefore if the people who are *are* running the net don't want to maintain it properly they should shut it down and forget about it. Or maybe they can persuade you to "go ahead".

Ok, I'm getting back active with my ham gear and while looking into a new antenna, discovered a new cable type being recommended here and there, RG-213. What is so much better about RG-213 than what I have used so much of over the years, RG-8? TIA. :)

The original RG-8 spec was superceded by RG-213 over 40 years ago, but they were pretty much the same cable, as I recall (although I don't think all RG-8 cables had non-contaminating PVC jackets). Since then, manufacturers have called all sorts of cable by the name "RG-8", including foam dielectric cable, different diameters, such as RG-8X, etc.

The QPL for the MIL-C-17 coax spec actually lists cables as M17/xxxxx, rather than RG numbers.

But it's a kludy interface, and the guys who run it, whomever
they are, have NEVER been responsive to anyone using it.

Bill, there are hundreds of cluster nodes you can telnet to,
spots are real time, you have filter options on some of them,
and most of them are up all the time (with the exception of
contest weekends, when the whole network chokes & croaks).

OH2AQ is feed by telnet clusters, so anything you see there
you'll see it somewhere else first.

Any spots you see on the web cluster you'll see on the
telnet nodes also.

Here's a list of 100 or so to get you started:

http://www.cpcug.org/user/wfeidt/Misc/cluster.html

I run two nodes which are on the list and you are welcome to
use them if you'd like.

The only suggestion I'd make is DON'T use the Windows telnet
program, it's garbage, get another telnet program like NetTerm,
or use the interface in your logging software if it has one.

Bob can answer that question for you, but since he's in a place
you need a card from, and he probably spends a lot of time on
the radio because people want cards from Singapore (or they just want
to give Bob a signal report, but that'd be a first), I'd suggest you
do the decent thing and send him a card direct, one way or the
other, and include some postage for your return card.

Bob shouldn't have to help pay for your QSL card collection........

I checked the card in my file
QSL was received via W4FRU
expedition by INDEXA
some of the ops:
9M2FK, 9V1YW, N7NG, OH2BH, AB6NJ
Hope this will help you out

Unfortunately this call was given out to another OM a few years ago.
So it is possible the original owner is a silent key.

In any case thanks for going to the trouble to look it up.
Appreciate it. Happy Holidays to you.

One of these days I find who has the logs and QSLs for 9M0S.

Hi,

I already see one drawback to this project. I am sure that thousands hams working from small entities will never confirm your "most wanted" QSOs as they are probably not connected to the Internet, but conversely, if you want to valide the most usual contacts, american stations, and other English spoken big DXCC (VK, G, etc) or big DX-peditions, this procedure should be useful.

For ON and LX I experimented very few denied. Theyr mainly occured this 2
last weeks but the service was again available a few hours later.
In average I find the service often accessible
In the meantime I made a connexion directly on a cluster like EA7URC.

Hi Peter,

There can't have a better rig... (or quasi).
Most if not all reviews and amateurs working with it (including Field version) are very happy with the Yaesu FT-1000 MP, mainly when using all its options, external DSP speaker, mike MC-60 or still better, etc
With its 200W PEP I practically do not more use my Kenwood TL-922 amp with it and I work without problems any pilup (of course I use a 3 ele beam too), and sometimes using both VFO
You more than probably experiment an hardware failure as stated others readers. It's pity for a rig at such a price :-((

Hi Lenio,

You right, for me it is not confirmed neither...
but this is not the last... I have dozen other DX-peditions and hams
contacted early 2003 - even in Europe where I life - and that I QSLed direct
that are not come back yet...
Comparing to 20 years ago, the delay to get the QSL back reaches and exceeds
today about 1 year if not more instead of 6 months...
Patience is a virtue, isn't it ? ;-)

I'm sure a lot more "QSL" managers will be found who will upload for unconnected DX, rather than do cards. Even do a bunch of typing.... Any HF packet links still running that these far away stations could use ?

Coalition Provisional Authority (CPA)
Ministry of Transportation and Communications

Iraq Amateur Radio License

In accordance with Coalition Provisional Authority Order 11 effective
9 June 2003, under the laws and usages of war, and consistent with
relevant United Nations Security Council resolutions, including
Resolution 1483 (2003), the frequency spectrum licensing authority in
Iraq is the Ministry of Transportation and Communications.

Under this authority, the amateurs listed herein are hereby authorized
to operate a station in the amateur service and amateur satellite
service anywhere in Iraq, and with full amateur privileges following
the amateur rules and regulations of Iraq as they may be written, the
Region 1 band plan of the International Amateur Radio Union, and the
Radio Regulations of the International Telecommunication Union, using
the call signs listed.
This license is effective on the date of this approval and expires
five years from such date.

I'm at a 10% hit rate . Of the 11700 QSOs I uploaded, I've had 1180 confirmed.

I've noticed the QSLs I got were mainly from CW and RTTY ops.

My guess is that these ops use computer logging. The SSB guys are not ? They still log by hand?

Who's old fashioned then ?

ha ha

I'm using AALog2, but I think this would apply to any logging program.
How are you supposed to log split band satellite contacts? I did it
by using 144/29 or 432/144 in the band, but they don't validate when
exported as ADIF for sending to LOTW.

Thanks,

Satellite and other repeater qso's are invalid for any
award purposes and the cards are therefore pretty
useless. You have not been in direct RF contact
with the station in question, so there is in fact no
qso to confirm.

Waste of time and effort, mate.

Young Nick

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter, K1XN & GoList, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, N4GN, KB5NJD, N5FG, N7OU, K8YC, K8YSE, WZ8D, AK0A, WD0M, 6Y5/4S7RO, 9V1DX, CE6TBN, DL/VE3ZIK & www.contesting.info, DL1EK/DL7VOA & DX Newsletter, E21EIC, F5CQ, F5CWU & La Gazette du DX, F5OGL, F5NQL & UFT, HG4I, I1JQJ/IK1ADH & 425 DX News, JJ1BDX, JI6KVR & JA-IOTA Islands News, OH2BH, PA9JJ, RW3RN, RW6HS, UA9XC, VA3RJ & ICPO, VK4APG and ZL2HU for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 7th/December, through Sunday, 14th/December there were 231 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9U, 9V, 9X, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FR/j, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J8, JA, JD/m, JT, JW, JY, K, KG4, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0S, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T30, T32, T33, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, VE, VK, VK9C, VK9N, VP2E, VP6, VP8, VP8/h, VP8/o, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

** IMPORTANT NOTICE/REMINDER ** The Ohio/Penn DX Bulletin now has a new FAX number. Contributors can now send/fax their DX information to the following number: 1-419-828-7791 (F A X only!)

6Y, JAMAICA. Ron, 4S7RO, is active as 6Y5/4S7RO and states that he is on 40 meters CW most evenings (between 2300-0500z). Before that time he can be found on 20 meters SSB or CW. QSL via G0IAS.

ARCTIC GRID EXPEDITION. Jeffrey/KG0VL and Justin/K9MU will depart St. Paul, MN, at 11:30 am on January 1st. Beginning January 3rd, the two operators will activate Grids EO16 and EO26 for the next couple of weeks. Operators will sign VE4/K9MU (from EO16) and VE4/KG0VL (from EO26). Their activity will be on HF, 50, 144 and 903 MHz. Liaison frequency is 7268 kHz (Days) and 3958 kHz (Evenings). Because of increased traffic on 7268, they will also monitor 7265 kHz (+/-). Their interesting travel plans and planned operation details can be read on the following Web page at: http://www.qsl.net/k9mu/ArcticGridExpedition.html

CDXA ELECTS NEW OFFICERS. John Scott, K8YC, and Editor for the Carolina DX Association, informs OPDX that at its Annual Meeting/Christmas Party on Saturday, December 6th, the Carolina DX Association elected its officers for 2004. Results of the elections are:
President: Ted Goldthorpe, W4VHF
Vice President: Tom Wright, N4HN
Secretary/Treasurer: Jim Miller, K4SQR
Editor: John Scott, K8YC
Cluster Manager: Joe Simpkins, K4MD
Associate Cluster Mgr.: Paul Sturpe, W3GQ
Webmaster: Wayne Setzer, WB4BXW
Thanks was extended to Bob Burton, N4PQX, for serving as Vice President in the past year and immediate Past President for the preceding two years. The evening of fellowship concluded with recognition of those members who participated in CDXA's annual "Contest Within A Contest" (C Whack for short) which provides a healthy intraclub competition for participation in the CQ Worldwide Phone and CW contests.

HC8, GALAPAGOS ISLANDS. By the time you read this, Mike, G4IUF, should be active from here again as G4IUF/HC8 until January 11th. Activity will be on 160-10 meters CW/SSB.

HG04, HUNGARY (Special Prefix). Tibor, HG4I, informs OPDX that he will be using the special callsign HG04HNY between December 10th and January 12th. The special event callsign, HG04HNY, stands for: The 04 as a call area is the last two numbers of newcoming year and the HNY suffix is the abbreviation of the phrase "Happy New Year". Activity will be on all HF bands (including the WARC bands) on the following modes: CW, RTTY, BPSK, SSB, (FM on 29 MHz). He will try to take a part in all HF contests during the activity period. The stations are valid as a separate multiplier in the HA-HNY activity contest. See the rules on SM3CER's contest sevice Web site: http://www.sk3bg.se/contest/c2004jan.htm
QSL via only direct (SASE) to HG4I: Mr Tibor Szabo, A.R.S. HG4I, H-2465 Rackeresztur, Budai u. 6., Hungary. ADDED NOTE: The special QSLs are ready to send. Please send the QSLs for former HG01HNY, HG02HNY and HG03HNY to the same address above.

HI8,DOMINICAN REPUBLIC (Update from OPDX.635). Hiro, JA6WFM, who will be working in the Dominican Republic for the next year, has been authorized

to operate as JA6WFM/HI8. He did not receive the requested callsign HI8J. More details and QSL route will be announced later.

HI9, DOMINICAN REPUBLIC (Update from OPDX.638). Bill, N7OU, informs OPDX that he will be in HI9-land from February 17-26th. Bill will be active on 160-10 meters before and after the contest, CW only. QSL via N7OU.

IOTA NEWS.....
EU-047. Juergen "Jo", DL1AB, will be active as DL1AB/p from Baltrum Island (N-06 for the German Island Award) between December 25th and January 2nd. Activity will be on 80 and 40 meters SSB. QSL via his homecall to the bureau.

OC-137. Steve, G0UIH, is expected to be active again this week as VK2IAY/4 from Lamb Island between December 16-18th. QSL via G0UIH either direct or through the bureau.

OC-265. Operators David/VK4GL and Peter/VK4APG have announced a possible activation of Cato Island using the callsign VK4GL/P between December 14-17th. Activity will be on 20 meters SSB. This is a low key single antenna station operation. Fishing may take precedence. QSL to VK4APG.

SA-032
SA-091. Marco, CE6TBN, will be active from Riesco Island (SA-091) January 12-15th and Wellington Island (SA-032) January 17-20th. Activity will be on 40/20/17/15/12/10 meters SSB. QSL via N1IBM. For more info, visit the Web page at: http://www.mdxc.org/ce6tbn/tour2004

LIGHTHOUSE ACTIVITY.....
Jim, K9BIG, will be activating a few lighthouses for the ARLHS Christmas Lights QSO party that runs from December 20th to January 5th. Look for Jim to sign K9BIG/p on 40-10 meters on or around the following suggested frequencies: 7270, 14270, 21370 and 28370 (+/- depending on QRM, nets, other activations etc.). He is also going to bring his portable 6-meter beam just for fun. Jim plans to activate the following lighthouses:
December 20th - Kenosha Southport Light, Kenosha, WI (ARLHS USA-912)
December 21st - Kenosha Pierhead, Kenosha, WI (ARLHS USA-416)
January 3rd - Windpoint Light, Racine WI (ARLHS USA-894)
January 4th - North Breakwater Racine, WI (ARLHS USA-682)
QSL via his home callsign (QRZ.com).

Deacon Dave, W1MCE, will be activating the Portsmouth Harbor New Hampshire Lighthouse (ARLHS USA-662) during the Lighthouse Christmas Lights QSO Party. Specific date is unknown, but he will be on 40 then 20 meters from the mobile. So, look for him to sign W1MCE/m. His total operating schedule is hoped to be 3 hours each day on 2 different days. He has a 1 1/2 hour commute to get there. All QSOs will be QSLed automatically. Please don't send Deacon Dave any QSL cards.

Jim, K5JIM, is expected or has plans to activate two Louisiana lighthouses located in the New Orleans area on the opening day of Lighthouse Christmas Lights QSO Party. The pair includes New Canal Lighthouse (ARLHS USA-536) and Port Ponchartrain (ARLHS USA-650). These will mark the 13th and 14th activations of 2003 for Jim. The tentative time of operation for New Canal is 1500z on Saturday, December 20th for two hours. This means his activity from Port Ponchartrain will start about 1800z. Both lighthouses are on Lake Ponchartrain. QSL cards will be available via K5JIM (QRZ.com address) with a SASE.

QSL INFO AND NEWS.....
Zik, DL/VE3ZIK (4N1DX), reports that the latest ARRL 10m Contest QSL routes will be published on Thursday, December 18th on the Web page at: http://www.contesting.info

The logs for the November 3G2D DXpedition to Damas Island (IOTA SA-086, DICE-201) are now available on the Mediterraneo DX Club Web site at: http://www.mdxc.org/logsearch.asp

The correct QSL route for A7/G0MKT is NM7H. You can send QSL cards either via the RSGB or ARRL bureau.

Champ, E21EIC/XW1IC, reports that he is no longer the QSL Manager for E20NTS. Champ was his manager for long time, but now E20NTS wants to handle his QSL cards by himself. So, send all direct QSLs for E20NTS, E20NTS/8 and E20NTS/P to E20NTS's address (Supote Saripan, 19/65 Moo 5, Soi Thensoun, Klong Thanon, Saimai, Bangkok, 10220 THAILAND) or via the Bureau. Champ also states that many people have been sending QSLs for HS9IFG/P and HS1CKC/P to him, but he is not the QSL Manager for them.

Vasil, RW6HS, states to QSL I1XJP to: Pietro Corradi, via Dante Alighieri 18, Ventimiglia, IM 18039 ITALY.

POSTAGE INCREASE FOR JA. Joe, JJ1BDX, informs OPDX that the postage for a letter or a card in an envelope up to 25-grams in weight costs 110 Japanese Yen for US/Canada, Europe, and Oceania (90 Yen for Asia, 130 Yen for Africa). Due to the recent exchange rate change, 1 U.S. Dollar or a Greenstamp is no longer sufficient to compensate the postage. (As of December 8, 2003, 1 U.S. dollar has a little bit lower rate than 108 Japanese Yen.) If you send a SASE from abroad, 1 IRC is strongly suggested rather than 1 U.S. dollar since it covers the highest price for a letter, namely 130 Yen. If you have no choice but to send U.S. dollars, include TWO Greenstamps instead of one.

Ken, K6LA, was active in the ARRL 10 Meter Contest this past weekend as VY2TT from Prince Edward Island. QSL via K6LA.

NOT THE QSL MANAGER. Roger, W3SZ, has been receiving a bunch of inquiries and even some QSLs for C6ALZ (who was active in the CQWW SSB DX Contest), and he states that he IS NOT the QSL Manager for this station. He has no idea where that information came from. He doesn't even operate HF and has never been out of the country. OPDX has tried

to find the manager, but NO LUCK!

Alex, RW3RN, informs OPDX that he is now the QSL Manager for C4M (in the CQ WW DX Contest 2003). He is also now the new QSL Manager for R3ARC/1 (July 26-29th, 2000) and R1NWS (July 29-31st, 2000) for activity from Vorony Island and Nemetsky Kuzov Island (both EU-147). Alex has received the logs from former QSL Manager (UA3BZ) and about 2500 QSLs (from bureau) + 200 envelopes. QSL via RW3RN, Alex Kuznetsov, Box 57, Tambov-23,392023 Russia. His E-mail address is: rw3rn@tmb.ru
Alex's (RW3RN-QSL-Service) Web page is at:
http://www.tmb.ru/~i011f/service.html

TI9M QSL STATUS. Bill, AK0A, reports that all cards received via direct and from the Bureau have been answered as of December 10th and mailed. So, if you're looking for a card, please resend to AK0A direct only. Stations who have sent via the Bureau wait a while and U.S. stations who have sent via the Bureau will have to resend direct.

NEW BUREAU QSL ROUTE FOR TX4PG. Silvano, I2YSB, reports that there is a new Bureau QSL for the TX4PG operation (and the next DXpedition to Tokelau ZK3). The QSL Managers of these two DXpeditions are now: I2YSB, directed QSL ONLY and M5AAV, QSL Bureau ONLY.

Photos of the recent V8AQZ DXpedition to Brunei are now available online at: http://www.mdxc.org/v8aqz

QSL MANAGER/ROUTE CHANGE. Please QSL WL7M via WD0M. Joe, WD0M (ex-WL7M), has moved from Alaska to Colorado, and will be happy to provide a QSL for all the fine folks who need one. Address is OK on QRZ.com.

QSL YA1BV via JA1PBV: Sadao Ito, 3-8-12 Baraki, Ishioka-city, Ibaraki, 315-0042 JAPAN

ZL7C QSL STATUS. Ken Holdom, ZL2HU (ZL4HU), Group Organizer/Team Leader/ QSL Manager, provides an update on the processing of QSL cards for the ZL7C Chatham Islands DXpedition in October 2002: "We began processing cards approximately one year ago and to date there have been 23384 QSOs replied to directly with a further 9267 via the bureau. This gives us a total of 32651 QSOs which have been replied to out of a total of 72,213. A 45% QSL rate in the first year. As of this coming Monday, December 15th, 2003, there will be NO unanswered QSLs on hand. Please do not flood me with E-mails about QSL cards sent via the bureau as we are all only too well aware that this system takes considerably longer than the direct method. If you have any questions regarding direct QSL'ing, I am only too willing to answer these. At the pesent time there is a 24 hour turn-around for direct QSLs for all of our three DXpeditions, ZL8RI in May 1996 (not for the pirate operations at later dates), ZL9CI in January 1999 and ZL7C in October 2002. Any other enquiries, comments etc. are most welcome. The Kermadec DX Association would like to take this opportunity of wishing you all a very merry Christmas and a very happy and enjoyable DXing 2004. Regards to all.... ..... Ken Holdom ZL2HU and ZL4HU

S9, SAO TOME. Charles, S9SS, also Station Manager for Voice of America's IBB Sao Tome transmitting station, has been trying to work North American stations on topband (160m). He states that this band is just too noisy. However, he will try again this coming Friday night (starting possibly around 1900z), conditions permitting. If you need him on the other bands, try 20 meters CW (after 0030z) or 10 meters SSB between 1900-2100z. Also, visit the following Web page at: http://groups.msn.com/s9ss/s9ss.msnw

SPECIAL EVENT. Andrey, UA9XC, informs OPDX that several stations will be active between 2100z, December 18th to 2100z December 21st, to celebrate 100th anniversary of Soviet Polar Explorer/Radio Operator Ernest Krenkel (RAEM). The following memorial stations will be active:
R1AEM - QTH Murmansk R6AEM - QTH Krasnodar
R3AEM - QTH Kolomna, nr Moscow R9AEM - QTH Vorkuta
R4AEM - QTH Votkinsk, nr Izhevsk R0AEM - QTH Norilsk
For all callsigns, QSL Manager is UA9XC: A.Pervacov, P.O.Box 73, Syktyvkar, 167023 Russia. QSL via the bureau, E-mail is OK (ua9xc@parma.ru). Also, look for station RAEM (QTH Sankt-Petersburg). QSL via RV1AQ. For details about Ernest Krenkel, visit the Web page at:
http://qsl.net/vu2msy/ernest.htm

TA1, TURKEY. Martin, PA4WM, is now active as TA1/PA4WM. His temporary work QTH is near Istanbul. Look for his activity to be mainly on the WARC bands and 40/80 meters on CW, RTTY and SSB. There is no operating schedule (due to his work), but look for him on most days in the early morning (0430z) and in the afternoon around 1500z (ed. We spotted him as early as 1330z). His equipment is a FT-100 and a G5RV antenna. QSL info can be found at QRZ.com.

TO4, EUROPA (Update). An announcement on Sunday states that the T04E Europa team will not be shutting down on December 15th, but will be active until December 18th. The team will continue to have four stations on the air as much as possible working the low bands and modes that is needed. The team does have a concern. A tropical depression is moving their way and may hit the island on Wednesday or Thursday. It was reported on December 10th that the TO4E team had logged 21851 QSOs (50% on CW, 39% on SSB and 11% on RTTY). The band totals are as follows: 3264 on 10m, 2239 on 12m, 6584 on 15m, 3203 on 17m, 2847 on 20m, 1825 on 30m, 1412 on 40m, 351 on 80m and 126 on 160m. They also mentioned that 4108 QSOs were made by TO4WW during the CQWW DX CW Contest. The Europa Web site is:
http://europa2003.free.fr

VK0, HEARD ISLAND (Update/Disappointing News). Last week we mentioned that Jim, VK9NS, is reporting that a "scientific multi-interest team of fifteen expeditioners" is preparing to leave for Heard Island in the coming days. However, Jim did not know if there was an amateur radio operator with this team. Alan, 9V1DX (aka VK0LD and ex-VK0MM Macquarie Island 2000), informs OPDX that he is on the Australian Govt. "permanent pool" of Communcation Engineers for expeditions to Antarctica. He has confirmed that he was originally slated to be the Communication Guy on the upcoming Heard Island short expedition; however, he could not make the start date this time around due to other commitments. The Communication

Guy going to Heard Island instead does not hold a radio amateur licence and is NOT interested in Amateur Radio. None of the other people on the expedition are licenced amateurs either, and nobody going to Heard knows Morse Code. They are due to depart for Heard Island just about around the time this was written. Allan states that there are only 3 VK0 licences active at the moment (himself, Rob. Sutton - who is not on the expedition and Finn Olsen - who is the Communication Guy going to Davis Station on the Antarctic mainland for 2004). If there is any "VK0 Heard Island" station on the air over the period of the expedition, it is almost certainly going to be a pirate, especially if it is operating CW. Allan states you can obtain info on the Heard Expedition and info on Australian Govt. Antarctic activities at: http://www.aad.gov.au
OPDX visited the Web site and found it very interesting.

ZA PRESS RELEASE (PROJECT GOODWILL ALBANIA 2003 - NEWS FROM THE 5th WEEK)
From Martti, OH2BH: Press Release, December 12, 2003 -- Cold winter weather was approaching Albania when this unique program reached its final day on December 12 amid numerous ceremonies and with warm memories from the past weeks. The program was unique in many ways - taking amateur radio to a university setting as another recognized subject while also staging an international operating event with thousands of QSOs on a variety of bands and modes providing university students, those soon-to-be hams of Albania, with a remarkable experience of seeing amateur radio in action and getting their hands on while studying the subject of amateur radio. Indeed, Friday finally saw these fine students of the Polytechnic University of Tirana taking their full license (CEPT A) exam under the watchful eye of the licensing authority ERT, Enti Regulatory I Telekomunikaciove of Albania. With these extremely capable 4th and 5th year students, the required CEPT passing grade of 65% was met and well exceeded by 95% of the students resulting in 39 new licensees in Albania and doubling the amateur radio population of this what once was a much sought-after country on radio.
While participating in the graduation ceremony, Ole Garpestadt, LA2RR, IARU Region 1 Chairman, congratulated the new licensees, welcomed them to the bands and credited the University and the program organizers with their success in conducting the program at Albania's leading university and succeeding in something that the IARU itself may have had only limited results with in similar undertakings. LA2RR also participated in final negotiations with Albanian authorities for their entry to CEPT and for the integration of the Albanian licensing regime to bring it into line with the rest of the CEPT world. This would provide visiting amateurs in Albania and Albanians abroad with CEPT based treatment, thus giving ZA operating privileges with no paperwork at all. No one could have expected such a scenario ten years ago when Albania stood at the top of all wanted lists the world over.
The Rector, Professor Perparim Hoxha, thanked the course organizers for bringing this extraordinary experience to the University and affirmed continuation of the program through Professor Sonila Agago, a local teacher associated with this program, who also passed the exam. The Dean of the faculty, Professor Gezim Karapichi, was in tears with emotion while assuring that the University Club station (ZA1UT) would have their best facilities

with a new Yaesu donated lineup of FT1000MP Field and Quadra System. The lead teacher, Ulrich Weiss, DJ2YA, presented a Yaesu FT847 to his best student, Eugelent Kola, with a passing grade of 94, and described this course as a highlight of his entire professional teaching career. With his final remarks, the Project organizer, Martti Laine, OH2BH, thanked all for their 5-week serious effort and warm friendships that had affected him personally in his long journey of activating ZA-land initially in 1970, breaking through with a full ZA1A combined training course and DXpedition in 1991 and now establishing amateur radio as another subject as part of the University curriculum. Martti was awarded with a "Senior Fellow of Polytechnic University of Tirana" honor at the graduation ceremony.
On radio, a big bang event will be conducted this weekend to say good-bye to those who followed the program during the past weeks and now want to wish the program participants a safe journey back home. The activity will be on many bands including the ARRL 10M contest with four stations at multiple locations, operated by DJ2YA, G3LQP, LA2RR, OH2BH, OH2PM, Z35M, Z36W, Z31GX and several local ZA operators. The program is set to be closed on Monday, December 15th, when all participants will be flying home to their missed families and a well deserved Christmas holiday. Albania is a Muslim country and Christmas decorations now dominate the scene to bring the Yuletide message to ZA-land. Merry Christmas to all the Deserving from downtown Tirana."

ZD8, ASCENSION ISLAND. Jim, N6TJ, will be active as ZD8Z in the ARRL DX CW Contest as a Single-Op/ALL Band entry. QSL via VE3HO.

Well, my last response didn't make it to the newsgroup, so I'll try
again. Basically, I agreed with the others who said there certainly
are awards for satellite qso's, but even if there weren't, the
question still remains:

What is the proper method of logging satellite qso's so they can be
converted to ADIF?

Thanks,
--

Hi,

Does anybody have recent QSL info for PX0F.
Worked this station in the CQ-WW CW contest.
Several old sources point to PY2KP. The info from PY2KP on QRZ.COM is not very recent, so is he still the manager? Have already sent him an e-mail, but no reply....

Jim

There isn't any proper method. ADIF only supports one frequency field,
so you can't save uplink/downlink frequencies unless you do it in
another field. If your logging program supports the field SAT NAME or
SAT MODE, use those. But don't be surprised if not many programs do
support those fields.

The ADIF spec is here:

http://www.hosenose.com/adif/adif.html

Put your transmit frequency in the frequency field and put the receive
frequency in any available blank field that won't confuse you. The comment
field would be appropriate as you can then indicate not only the frequency
but that it was a satellite contact.

Amateur Radio Newsline™ Report 1374 – December 12, 2003

LISTENER ADVISORY: PLEASE ASSIST IN THIS SURVEY

This is directed only to those who are not currently ARRL members.

Amateur Radio Newsline has agreed to help compile a survey which seeks answers for these two questions:

1: If you are not a member of the ARRL, why not?

2: If you were a member of the ARRL and quit, why?

If you are already an ARRL member, please do not reply as those conducting the survey only want to hear from those hams who never joined or who have dropped their membership.

Please respond by e-mail to hamvideo@juno.com before December 18th. And we sincerely thank-you for assisting in this survey. (The Producers)

**

Amateur Radio Newsline report number 1374 with a release date of Friday, December 12 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. A new study says that the Executive Branch should take over the duties of the FCC, hams in Australia could loose part of the 70 centimeter band and the K-6-D-U-E commemorative event is finally on the air from space. Find out the details on Amateur Radio Newsline report number 1374 coming your way right now.

(Billboard Cart Here)

**

RADIO POLITICS: STUDY SAYS WHITE HOUSE SHOULD REGULATE RF SPECTRUM

A new study says that its time for the White House to replace the FCC as the nations regulator of the airwaves. Amateur Radio Newsline’s Bill Pasternak, WA6ITF, is here with the story:

--

The Center for Strategic and International Studies is a private research organization that analyzes global issues. And in a recent report, it basically posed the rhetorical questions of -- what if the FCC went away -- and -- what if the Executive branch of the federal government -- the White House -- took over management of the nation’s airwaves?

Would it be better or worse for America? The Center says yes. That in its view, such a change would definitely improve the way the finite resource called electromagnetic spectrum is managed, but critics have their doubts. One told Amateur Radio Newsline: -- quote -- “You think the spectrum management is bad now, put it under the executive branch” -- unquote.

Be that as it may, the Center’s report called Spectrum Management for the 21st Century was recently presented to Representative Tom Davis. Davis is chairman of the House Committee on Government Reform and the report recommends a number of steps to stop what the think-tank describes as the increasing number of fights over existing spectrum space.

Among its recommendations are to develop a national spectrum strategy. Increase research support for technologies that make better use of the spectrum and the controversial one. Establish a spectrum oversight advisory board to implement full White House control of all spectrum related matters.

Davis said his committee will weigh the report’s findings, along with the results of five ongoing General Accounting Office reviews and a Presidential Spectrum Policy Initiative study commissioned last June. With all of this information for Congress to gather and digest, any change in who will regulate the nations spectrum is probably years, if not decades away.

With thanks to KC0DGY for bringing this to our attention, I’m Bill Pasternak, WA6ITF, for the Amateur Radio Newsline.

--

Currently, the Federal Communications Commission oversees commercial use of the electronic magnetic spectrum while the National Telecommunications and Information Administration handles all aspects of government use. Its far to early to speculate on what effect -- if any -- such a change might have on Amateur Radio.

More information can be found on-line at http://www.gcn.com/vol1_no1/mobile-wireless/24166-1.html (KC0DGY, GCN)

**

INTERNATIONAL - VK: 20 - 430 MHZ AT RISK IN VK-LAND

Australian hams may loose access to all of 420 through 430 MHZ. This, as demands in this part of the spectrum by non-amateurs increases.

Q-News reports on an e-mail from the Space & Terrestrial Systems Team at the Australian Communications Authority to the Wireless Institute of Australia’s Federal President Ernest Hocking, VK1LK, last Tuesday. It deals with an amendment that was made to the Australian radio regulations recently that prohibits the operation of amateur stations in the frequency band 420-430 MHz in certain locations. This, to minimize the risk of interference to that nations Fire Brigades Network and the Mobile Data Radio Service emergency services that operate in this frequency band.

VK1LK told Q-NEWS that he will continue to adopt the view that the Wireless Institute of Australia is looking for primary allocation in the 430 to 440 MHz

band -- or at least some part of it -- to protect ham radio interests. (Q-News)

**

INTERNATIONAL: BIG HAM RADIO EDUCATIONAL SUCCESS IN ALBANIA

Success reported for 33 students in an internationally sponsored Albanian Amateur Radio training project. We go across the Atlantic to Jeremy Boot, G4NJH, is in Nottinham the UK for the latest:

--
The following update on the unique amateur radio training course that is ongoing in Albania has been sent in by Martti Laine, OH2BH, in Tirana.

"A memorable second week came to an end when the US ARRL delegation headed by K7WX and K9LA departed Tirana with many fond memories and new friendships taken back home”

"The theory exam was conducted on Wednesday the 26th of November with 33 students gaining a pass at the CEPT 1 level. Now the course will move on to pure amateur radio related subjects under the leadership of Uli, DJ2YA, while John, G3OKA, will head back to the UK after a job well done.”

Britain's RSGB deserves credit for their support of the first part of the program. I’m G4NJH, in Nottingham.

--

Another wave of lecturers representing Finland and Germany has now arrived. Also, Albanian authorities have released the callsign ZA1UT. This is an acronym for the 'University of Tirana and is meant to assist in commemorating this extraordinary ham radio educational program. (GB2RS)

**

HAM RADIO IN SPACE: K6DUE OPERATING EVENT UNDER WAY

The K6DUE International Space Station Commemorative Event from the International Space Station is finally under way. What’s described as a challenging schedule kept the crew from getting on the air November 29th and 30th, but the ISS ham station was active during a pass on Saturday, December 6th. We have more in this report:

--
According to ARISS International Chairman Frank Bauer, KA3HDO, numerous hams across North America and Europe were able to contact with Astronaut Mike Foal, KB5UAC or heard the ISS ham radio station downlink. Those who did qualify for a special ISS Commemorative Certificate. Information on obtaining one is on-line at www.rac.ca/ariss

KA3HDO also reports that the Phase 2 equipment setup has been completed and the gear activated at approximately 11:20 UTC on December 8th. The new radio is a Kenwood D 700 dual band transceiver. It appeared to operate flawlessly but the packet operation was turned off after Russian controllers requested that the

crew power down the hardware while bilateral safety paperwork coordination is being completed. Bauer says that hopefully, this will be completed quickly and that the long awaited packet operation will be on the air once again.

For the Amateur Radio Newsline, Norm Seeley, KI7UP.

--

The event commemorates the contributions of the late Roy Neal, K6DUE, to manned ham radio space operations and continues through the end of the month. (ARISS)

LAW: HIGH TECH MUST FIGHT CYBERTERRORISM

The Federal government says that technology companies must cooperate in the battle against cyber terrorism. This, according to Homeland Security Secretary Tom Ridge who said that the alternative is to submit to government imposed security regulations.

Speaking at a recent two day conference sponsored by his agency, Ridge said that the enemies of freedom use the same techniques as hackers do and the nations industries must be as diligent and determined as the hackers."

The two-day conference was the first formal brainstorming session to draft security guidelines and a cyberspace attack warning systems. (Published news reports)

**

ENFORCEMENT: FCC AGAIN WARNS AERO ENTHUSIASTS ABOUT UNLICENSED OPERATIONS

The FCC is once again warning several hang gliding and sky-diving enthusiasts and the operators of a number of training facilities about the use of ham gear by unlicensed persons. Bruce Tennant, K6PZW, reports:

--

In a letter to sixteen such California based flying groups, the FCC’s Riley Hollingsworth says that the Commission is receiving an increasing number of complaints that users of these facilities are operating Amateur Radio equipment without a license. Hollingsworth specifically notes the use of hand-held radio transceivers as the biggest violation.

Hollingsworth says that while the FCC encourages the use of radio equipment for the safety of flyers, there are numerous alternative radio services that do not

require a license. These include the Family Radio Service and the Multiple Use Radio Service.

Hollingswoth adds that the use of Amateur Radio Transmitting equipment is also permissible as long as the users -- in this case the pilots and sky-divers -- are licensed in the Amateur Radio Service. Translated, they must have a ham ticket to put an Amateur band transceiver on-the-air.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

Hollingsworth's letter tells the groups that the use of radio transmitting equipment in a service where a license is required, without obtaining a license, is a violation the Communications Act and will result in criminal penalties. He says that fines normally range from $7,500 to $10,000. (FCC)

**

ENFORCEMENT: HOMEOWNERS ASSN MUST FIND INTERFERENCE

And a big win for a Pennsylvania ham that could be precedent setting. The FCC has written to the lawyer representing the Pine Ridge Community Association in the city of Stroudsburg. The note informs the counsel that his interpretation of the Community Association's obligations under Part 15 was incorrect and that the Association is required to investigate the source of its radio frequency interference to an Amateur licensee residing within the Association's property. (FCC)

**

AT THE FCC: CHANGES AT THE CGB

Still with the FCC, word that Louis J. Sigalos has been named Chief and Sherry Dawson has been named Deputy Chief of the FCC's Consumer Affairs and Outreach Division of the Consumer & Governmental Affairs Bureau. This bureau is responsible for conducting outreach to the American public on a broad array of telecommunications issues including the deployment of broadband services, the transition to digital TV, wireless phones and services including local number portability and much more. The Division also promotes public awareness of the Commission's strategic goals and initiatives through consumer advisories and fact sheets, consumer forums and participation in conferences and workshops. (FCC)

**

CHANGING OF HE GUARD: JULIAN HIRSCH

Some sad news. Famed technical writer Julian Hirsch, W2KFB, who spent most of his life testing the latest developments in stereo equipment and explaining them for Stereo Review magazine has died.

Hirsch was a graduate electrical engineer from Cooper Union University. He and Gladden Houck created the Hirsch-Houck Laboratories to test electronic equipment in 1957.

Hirsch went on to author more than 4,000 reports on stereo systems, speakers, turntables and other equipment until his retirement in 1998. He was 81 when he passed away on November 24th. (LA Times, other published news reports)

**

HAM EVENTS: HRU 2004 ON LONG ISLAND NY

Mark Sunday, January 18, 2004 at 8AM, for the fifth annual Ham Radio University. The event is being held at the East Woods School in Oyster Bay New York with special forums geared to the non-ham as well as the experienced ham radio operator. The focus will be hands-on with many demonstrations on just about everything including ham radio satellite communications, low power operating using radios as small as a tuna tin and the latest in emergency communications. There will also be a testing session for those who would like to take an FCC exam.

Again this year, Ham Radio University will be combined with the ARRL New York City and Long Island Section Convention. Talk-in will be provided on the W-2-V-L repeater on 146.85 MHz and using an access tone of 136.5 Hertz. For more information e-mail n2ga@arrl.org (K2EPM)

**

INDUSTRY NEWS: FREE SUB TO THE UNEMPLOYED FROM ATVQ

If you are out of work and would like to have something to read, has Amateur Television Quarterly Magazine got a deal for you. How about a free one-year subscription to their flagship magazine?

To qualify, you must be normally employed and not retired. Also, the offer is limited to the first 100 to apply.

To take advantage of this one time offer, send a letter by U-S mail requesting a free subscription and stating that you are temporarily out of work. The address is Holiday Offer - ATVQ, 5931 Alma Dr. Rockford, IL 61108.

Sorry, the magazine will not accept e-mail subscriptions for this one time offer. (ATVQ)

**

INDUSTRY NEWS: JVC TO CLOSE US VHS TAPE PLANT

A not so happy Christmass for some employees of JVC America. This, as the company announces that it will shut down its VHS tape production plant in Tuscaloosa Alabama by January 31st.

The reason given for the closure is the loss of the VHS market to Digital Video Discs. About 115 people will be laid off from the VHS tape plant closing. JVC already has compact disc and DVD plants in Tuscaloosa and Kennesaw, Georgia that employ about 550 people. (KB4KCH)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

ARNEWSLINE(TM) NEWS: WE THANK YOU

I'm Andy Jarema, N6TCQ with a list of people to thank.

It's been since March that we did this, and we were in big trouble financially at the time. The following is only the first half of who helped us in April:

George Jacobs W3ASK of Silver Spring, MD. He's the former Propagation and Space Communications Editor of CQ Magazine.

Benton Bonney, W4PE of Orlando

David Ziskind, KE4QLH of Atlanta

Joseph Bartzi, Jr., KC8DKF of Wadsworth, OH, who since became a recurring contributor

The Hiram's Ham Amateur Radio Society of Reynoldsburg, OH

Donald West, W9DEW of Fortville, IN

Paul Lebzelter, K8PFL of West Branch, MI

Michael Leahan, N9PQK of Sun Prairie, WI

Gary Harrison, K0BC of Bolivar, MO

Kent Stutzman of Newton, KS

George Ancell, N5LEZ and B&G Communications of Electra, TX

That wasn't everybody in April- we'll continue trying to catch up in the weeks that follow.

Finally, in the entertainment industry, oftentimes one of the biggest stars is listed at the end of the opening credits, such as: "and starring Martin Sheen as President Bartlett."

We at Newsline also have one of those: "and starring Roy Blanchard, N5YHS,” as an occasional, but extraordinary benefactor. Roy, you're amazing!”

Thank you to everyone. Your April response to our crisis was exceptional, and got us all the way to December. We promise to do our best to continue to earn your care and support.

A reminder that Newsline is a 501(c)(3), federally chartered, California non-profit corporation. FCC regulations prohibit us from telling you exactly how to support us, but that information is on our website at www.arnewsline.org.

I'm Andy Jarema, N6TCQ.

**

ON THE AIR: 6 METERS IS BIG IN KNOXVILLE

If you live near Knoxville Tennessee and like to operate vintage ham gear, listen up. This one is for you.

The Repeater Journal reports that a group of local hams have gone back to the future and created a new Six Meter Nostalgia Net that meets on 50 point 4 Megahertz -- or should we say Megacycles in this case. The gathering takes place every Thursday night at 8:30 P.M. local time and anyone with gear capable of running full carrier A-M is invited to take part.

And what if you are not into A-M operation? Well the same group also sponsors F-M and S-S-B nets on Sundays. The F-M gathering takes places at 9 P.M. on the 53.770 MHz repeater. Five minutes after the F-M net is secured the S-S-B net takes to the airwaves on 50 point 200 MHz.

And if that’s not enough, yet another Knoxville area 6 meter F-M net has just started up on the 53 point 610 MHz repeater. It meets on Thursdays at 8:00 P-M local Eastern U-S time. (Repeater Journal)

**

EMERGING TECHNOLOGY: RADIO RESEARCH: NAVY AND AIR FORCE AGREE ON NEW JOINT COMMUNICATIONS SYSTEM

The Air Force and Navy have agreed to merge their two formerly separate programs for the acquisition of improved radio systems. The result will be the development of a single family of radios designed to replace incompatible units in use across the services.

Called the Joint Tactical Radio System, this joint Air Force-Navy initiative is expected to produce more than 17,000 units. Initial deliveries of the new radios are expected to begin in late 2008. (Science OnLine)

**

INTERNATIONAL - CANADA: VE9HC RE-ELECTED

Radio Amateurs of Canada reports that Hugh Clark, VE9HC was recently re-elected Section Manager in the Maritimes Section. This, for a two-year term that will begin on March 1st, 2004. Clark ran unopposed eliminating the need for a balloted election. (RAC)

**

INTERNATIONAL - IRAQ: BAGHDAD COMES TO ECHOLINK

Ian Abel, G3ZHI, reports that Iraq is now on Echolink. Ian says that on December 4th he held a 90 minute cyberspace QSO with YI1SRA in Baghdad using the Echolink program. Laith was operating from an Internet cafe as full Internet access has yet to be widely restored in the city.

YI1SRA reported that he and fellow members of the Baghdad Radio Club are hoping to install a 2 meter repeater in the city. It would be linked to Echolink network allowing on demand around the clock contact with the city and provide communications back home for any foreign ham in Baghdad.

YI1SRA also now has e-mail. Messages to him go to laithtariq@yahoo.com (G3ZHI)

**

DX

In D-X, now its your chance to QSO the real Santa Claus on the air. This, as station OH9SCL is active from Santa Claus Land near the Arctic Circle. OH9SCL will take to the ham radio airwaves from December 17th through the 21st. Operation will be 80 through 10 meters on cw, ssb, rtty, psk31 and slow scan television. The digital modes will be primary focus durning the weekend hours. Santa’s ham radio helpers this year include Finnish amateurs OH2BH, OH2NWG, OH3BHL and several others. QSL via OH9UV. (Via e-mail)

Meantime, the ARRL says that its new Logbook of the World secure contact-verification database continues to grow. ARRL Membership Services Manager Wayne Mills, N7NG, reports that nearly 5000 users have uploaded logs containing some 25.4 million Amateur Radio contacts. This has resulted in more than 1 million QSL records to date. (ARRL)

**

THAT FINAL ITEM: BRINGING THE DEAD BANDS BACK TO LIFE

And finally, its that time of year that the V-H-F frequencies are pretty dead as far as propagation goes. So here's as idea from Terry Hosack, W-A-3-L-T-B, on how to bring them to life.

Terry suggests over the V-H-F Reflector that you download a copy of the W-S-J-T program for digital high speed meteor scatter, weak signal, trop and E-M-E. He says to be certain that you get all the current updates including the new JT65 mode.

Hosack says that other than skeds, activity may be found on 144.140 and 50.260 Mhz mainly during contest and activity periods. If you are on the East Coast just beam west. Conversely, if you live out West, beam to the East and you might be surprised at what you might hear.

Terry says to just put the program in the monitor mode and see if you can decode any signals. If you find an interest in the mode you can buy or build an interface to actually transmit and help bring the dead VHF bands back to life.

The following web site is used for Skeds and chat about WSJT and meteorscatter: http://www.pingjockey.net/cgi-bin/pingtalk (VHF Reflector)

Great news! Perhaps Haliburton could manage the spectrum in the usual
transparent way, with no cost to the tax-payer whatsoever and with no
paybacks to the politicians.

> Would it be better or worse for America? The Center says yes.

Good to see they made up their minds.

Is this idea stupid or crazy? I say yes.

ARRL requires the following fields for satellite QSOs uploaded to LotW:

1. CALL
2. QSO_DATE
3. TIME_ON
4. MODE
5. FREQ or FREQ_RX
6. FREQ_RX or BAND_RX
7. SAT_NAME
8. PROP_MODE (must be set to SAT)

See http://www.amsat.org/amsat/news/ans2003/ans03292.html for additional information.

Thank you Dave! Finally, someone who knows the answer. Ok, I guess
the best technique is to export from AALOG2, then edit the ADIF file
before signing.

Or you could import your ADIF into DXKeeper, which is free, provides the ability to capture the required fields (e.g. FREQ_RX, BAND_RX, SAT_NAME, and PROP_MODE), export them for upload to LotW, and (the best part) can automaticially download QSLs from LotW and update your logged QSOs to reflect these QSLs. DXKeeper tracks paper, eQSL, and LotW QSLs independently for each QSO, and generates reports that show progress by "confirmation kind".

DXKeeper is a member of the freeware DXLab Suite, which includes transceiver control, rotator control, realtime DX spot collection and analysis, world map display of the solar terminator and DX spots, propagation forecasting and monitoring, soundcard PSK31 and PSK63 with broadband decoding, soundcard RTTY using the MMTTY engine, and QSL route discovery (Pathfinder). All DXLab applications are free, and available via www.qsl.net/dxlab .

3158. Real QSL route for PY0FT

Newsgroup: rec.radio.amateur.dx
Date: 2003-12-18 01:35:35 UTC
From: "Dick, AA5VU" <aa5vuNOSPAM@arrl.net>
Message-ID: <aa5vuNOSPAM-269168.19355217122003@newssvr11-ext.news.prodigy.com>
Source record: 8092

On 17-Dec-03 at 2317z I worked PY0FT on 20 meters RTTY for a new one. As part of the exchange he said to QSL direct or via JARL buro. After the QSO, I went to QRZ and found the PY0FT address as

TONY IWAO TANIMOTO, PY0FT
A/C. RUA NICE CORDEIRO, NO.2600,
FERNANDO DE NORONHA, PE,
BRAZIL

Prepared the card and was ready to mail it then noticed the following blurb
in the ARRL DX bulletin on the AB5K-2 Cluster

> FERNANDO DE NORONHA, PY0F. Tony, PY8IT will be QRV as PY0FT from
> December 15 to 26. QSL via JA1ELY.

I am now really confused as the QRZ address for PY8IT is

TONY IWAO TANIMOTO, PY8IT
A/C. RUA ALMIRANTE SADOCK DE SA 7, APTO. 1203
CEP 22411-020, RIO DE JANEIRO - RJ,
BRAZIL

and JA1ELY is

TOSHIKAZU KUSANO, JA1ELY
P.O.BOX 8
KAMATA, TOKYO 144-8691,
JAPAN

Anyone know which 'direct' address is the correct address?

Dick, AA5VU

3159. NW7US Propagation Update: 18-XII-2003

Hello, Radio Enthusiast!

The very large coronal hole that has kept the geomagnetic field at active to minor storm levels is no longer in view. This is giving us a nice period of quiet geomagnetic activity, with the result being that we are seeing propagation that is more normal over most of the paths around the world.

A smaller coronal hole is currently near the central solar meridian and is expected to lead to minor geomagnetic storm conditions from Sunday, 21-XII-2003 onwards. Between now and then, it is expected that the 10.7-cm flux will climb a bit, perhaps as high as 130, while the planetary A index (Ap) should remain at or below 10. From 21-XII-2003 onward, the flux will gradually fall to about 100, with some elevation of the Ap index as the geomagnetic field becomes active again due to that coronal hole.

After 31-XII-2003, we.ll see conditions become a bit rougher, again. However, this is due to the coronal hole that we.re seeing, not because of any major flare. Between today and the first of the New Year, there is only a slim chance of any moderate flare, while there will be a good number of minor small flares (B- and C-class flares). There is also a small chance for a proton event from mid to late December. This might make over-the-pole propagation a bit tough.

At the time of writing this bulletin, the solar wind speed is at about 400 km per second, which is a normal speed, with only a slight southerly orientation of the interplanetary magnetic field. As of 17-XII-2003, the sunspot count is 92, and the 10.7-cm flux is 118. The Ap is 10, and the Kp (planetary K index) is 3.

This translates to some very good conditions for the High Frequencies (HF). Expected MUFs are normal, rather than depressed as we.ve seen for the last couple of weeks. The season is great for worldwide DX on HF, and this period between now and the New Year will offer great conditions for most of the time. The highest frequencies will have some long-range F-layer openings (since the flux will be above 100), but they will be short. Lower frequencies will propagate much better over most paths.

Come by and check out the online Propagation and Radio (SWL and Amateur) discussion forum, where a group of us are discussing the science and current events of space weather and propagation: http://hfradio.org/forums/

In addition, you can always get the latest live space weather and propagation information at http://prop.hfradio.org -- or with a WAP phone, at http://wap.hfradio.org/

Again, thank you! As it turned out, I had a copy (older, version 2)
of DXKeeper. I'll follow your advice. In fact, I perhaps should have
a closer look at DXKeeper and the rest of the suite as it seems to
have surpassed AALOG2 at this point.

Two different services -- two different call signs -- example
K6DAY is a Ham Call
KAF9118 is a GMRS Call

BTW KEV9506 was a CB call

So u use the assigned one on the band it applies to.

Apparently, the horse is the only animal that can have a major part of its body become detached and roam around unsupervised. Unfortunately these detached parts seem to be able to locate transmitters so they can shout their calls, call CQ, shout "up up", call each other "lids" (isn't there some saying concerning pots and kettles?), tune up amplifiers, etc, on a rare DX station's frequency. I suspect a lot of this may be from those who have already had the pleasure of working the DX and now feel the rest of us need it to be more challenging. It took me three days of trying to work T30M to finally know he had my call sign right because the QRM'ers and Megacycle cops always seemed to make their contribution when I thought I may be getting a call. Is the concept of split operation really that difficult to grasp for people who have presumably passed a relatively difficult exam in order to get their license?. This tirade is mainly inspired by today's contributions to the TO4E operation during the brief period I was finally able to *almost* copy them

Hello, Radio Enthusiast!

Currently, there is an elongated coronal hole in geoeffictive position on the solar disk. This coronoal hole is quite a bit smaller than the coronal hole of last week.

The solar wind speed is currently above 460 km per second, but the Interplanetary Magnetic Field (IMF) currently has a northerly orientation (the "Bz" is positive). There have been brief moments with the Bz going negative (the IMF orientation goes south), so we are seeing the geomagnetic field becoming more active.

Currently the planetary K index (Kp) is 3, down from 4. I am expecting this fluctuation to continue until Monday, with swings between active to minor storm levels.

This ultimately translates to slightly degraded ionospheric conditions, with the maximum usable frequencies (MUFs) just a bit depressed from normal. The highest HF bands suffer under these conditions, and mid-HF openings over high-latitude and polar paths become weaker, and of shorter duration. Again, by Monday, we should start to see conditions settling down and HF propagation becoming excellent. The 10.7-cm flux is above 120, so we'll be seeing nice higher-band HF propagation through the next week.

On VHF, I don't expect strong enough geomagnetic activity to trigger any Auroral-mode propagation. There might be a few periods of sporadic-E (Es) activity, however (we often see a return of Es during December and January). The current 10.7-cm flux is above 120, so I also do not expect any significant F-layer propagation opening on VHF.

Happy Dxing!

---

Don't be so quick to criticize people who call on the DX's frequency.
There are a few programs which one could have running in the background
that can inadvertently turn off the split function. I have had this
happen to me a couple of times and been called a lid by the Kilocycle
Kops. I'm not, but they're welcome to their opinion.

Once this happens a time or two, most ops will figure it out, but until
they do, put the blame where it belongs: Poorly written software.

One might argue that if one's software is turning off the split mode,
one needs to stop running that software, at least while calling
split-frequency DX. If my rig radiates a T4 signal with spurs every
1KHz, should I keep calling the DX because it's the only rig I've got --
or should I be fixing my rig?

Not that that justifies the screams of "UP LID" on top of the DX when
one makes that error. The "UP" stations are causing far more QRM than
the stations that inadvertently fail to engage split.

One that really bothers me is when the DX is working split but not
saying so. When each QSO ends with simply "TU" - no callsign, no
indication they're listening up. Often 10, 15 QSOs or more before they
ID and indicate they're listening up. It's not at all unusual for such
a pileup to collect 5-6 good DXers calling the DX on his own frequency -
and then a handful of "UP" stations.

(inevitably, when the DX does ID and indicate he's listening up, you
can't hear him because of the QRM from the "UP" stations!)

Apparently if you find your own DX, you're a lid. (instead of letting
the Cluster do it, so you can read the DX station's call and listening
frequency on the Internet)

Agreed, but my point was that the above is non-obvious. Once you figure out what's happening, you can control it. As I said, the real "lid" in this case is poorly written software.

Out of curiosity, and to help the rest of us avoid this problem, what software turns off the split function? Admittedly, with the TS2K, I usually use XIT instead of split, but I would like to know what software to avoid.

LogWindows does it, and there was another which I used once but have since abandoned (don't remember which). The problem occurs when you do not have the program running, the radio is already in split mode, and you start the program. When the program starts, it turns off split and if you don't notice it... you're a *lid*. :-)

> in order to get their license?

There is no test of operating on the exams. It's like giving out driver's licenses based on a multiple-choice test only. It would be nice if the license exams included making a real QSO, copying some signals on the air, figuring out DX prefixes, and busting a CW pile-up. Dream on!

Take a squint at the vanity HQ website sometimes and look at the vanity calls that even some Extra class hams have applied for - people ask for their names, they ask for A4, A5 prefixes, all sorts of crazy stuff. There's an Extra class person asking for A5NM, someone asked for an RM7 prefix, someone applied for SARK9S, others wants DA5246, DVRDWN, SARLAB and so on.

It's no wonder that when such ops get on HF and start to try to work DX, they are completely lost. I suppose many (some) of them figure it out eventually, but the exams could include some very basic stuff like this, esp. the ones for license classes that allow HF access.

Oh well,

Derek aa5bt (perhaps I should apply for A5BT, it's shorter...)

Derek, you have done an excellent job of enhancing the point I was trying to make. It seems that since licensing has become a matter of downloading or buying a copy of the question pool and memorizing the answers, that developing an understanding of the underlying principles and concepts has suffered. Unfortunately, courtesy and pride in operating skills has also suffered. Stupidity on a local level is annoying, but HF propagation makes it a world-wide problem.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 640
BID: $OPDX.640
December 22, 2003
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, K2MGA & CQ Communications Inc., NG3K, W3HC, W3UR & The Daily DX, N4AA & QRZ DX, W4WX, N5FG, K8YSE, K9LSB, N0AX, E21EIC, F5CWU & La Gazette du DX, F5NQL & UFT, G3XTT, I1JQJ/IK1ADH & 425 DX News, JI6KVR & JA-IOTA Islands News, LU1BCE, OH2BH, OM3JW and VA3RJ & ICPO for the following DX information.

SPECIAL EDITOR'S NOTE: Can you believe it! Another year is almost over. Anyway, my family (wife/OPDX's chief proof-reader Linda, Teddy [TJ] and wife Jessica, Katie) and I (KB8NW) would like to wish all DXers, Contesters and OPDX readers a very "Happy Holiday and Season's Greetings". Also, we would like thank the many who have contributed information over the year (there are too many to list). REMEMBER, without them there would not be an OPDX Bulletin. I would also thank the many who sent holiday greetings. I tried to answer some and wished I could answer each one of them individually, but it would take a huge amount of time. You would not believe the amount of E-mail I receive......
73 and Have a Great Holiday de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 14th/December, through Sunday, 21st/December there were 224 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FR/j, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J5, J8, JA, JD/m, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0S, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T30, T5, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, VE, VK, VK9L, VK9N,

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

** IMPORTANT NOTICE/REMINDER ** The Ohio/Penn DX Bulletin now has a new FAX number. Contributors can now send/fax their DX information to the following number: 1-419-828-7791 (F A X only!)

3B9, RODRIGUES ISLAND (Update). OPDX received an update/bulletin from Don Field, G3XTT, (3B9C Publicity Officer) on the upcoming Project Star Reach, a project focused around a major expedition to Rodrigues Island, with the callsign 3B9C, just before going to print. Since their last announcement, additional team members and several additional sponsors have come on board. The shipping container has now been packed (see photos on the 3B9C Website) and has begun its journey to Rodrigues. This container holds considerably more equipment and antennas than they took to the Comoros (D68C), including capability for 70cm (satellite and moonbounce). They really do intend to cover as many bands and modes as possible, not only to satisfy the demands of the many specialist groups within the ranks of amateur radio, but also to encourage those of you who do tend to specialize (whether in HF, LF, RTTY or whatever) to try something new. Excerpts from "Bulletin No. 2" state that the new team members are Robert/F5VHN and Eric/K3NA. Also, Project Star Reach intends to use this opportunity for educating non-DXers into the "how, where and when" of working DX. They are delighted that several major amateur radio publications recognize the importance of this in revitalizing our hobby from within, and have agreed to run articles ahead of the 3B9C operation, giving suitable hints and tips (which will, of course, be equally applicable to other expeditions as time goes by). Within the constraints of time and geography, they are also happy to entertain requests for club presentations along similar lines. Don Field, G3XTT, says, "Drop me an E-mail, and let's see what we can do." Don's E-Mail address is: g3xtt@lineone.net
One way they hope to encourage participation in Project Star Reach is by way of the Nevada Rodrigues Trophies. The Nevada Comoros Trophies offered as part of the D68C DXpedition for working band-slots were extremely popular with DXers, with the winners working D68C on 23 band-slots. Trophies were also available to clubs to encourage their members to be active and work D68C either from home or perhaps from the club station. During the 3B9C DXpedition they will be running the Nevada Rodrigues Trophies. The rules will be broader than those used for the Comoros, and there will be continental awards as well as awards for clubs outside the UK. There will also be special awards for newcomers to HF. Details will be available soon. The Project Star Reach is still looking for much needed funds to help pay for this DXpedition. The costs of procuring and shipping so much hardware are high - in the case of 3B9C, they estimate shipping costs alone to be in the order of $20k. They are looking for help from commerical, club and individual sponsors to help make this happen, rather than having the burden fall totally on the team members (who, of course, will make some contribution to the logistics costs, in addition to finding all their own

travel and accommodation expenses). Between now and March further bulletins will be issued, but you can already find out much more by visiting the Web site which is up and running at: http://www.fsdxa.com/3b9c

9V0, ANTARCTICA. Allan, 9V1DX, is now active as 9V0A from Ellsworth Mountain. He was spotted in 40 and 30 meters CW. Watch 7001 or 10108 kHz between 0130 and 0300z.

AP, PAKISTAN. Bob, AP2JZB, was active on 17 and 12 meters SSB this past weekend. Watch around 18119 and 24946 kHz between 1330 and 1500z.

CQ MAGAZINE ANNOUNCES NEW WAZ AWARDS MANAGER. On December 15th, CQ Publisher Richard Ross, K2MGA, announced the appointment of Floyd Gerald, N5FG, as CQ Worked All Zones (WAZ) Awards Manager, effective January 1, 2004. Floyd succeeds Paul Blumhardt, K5RT, who is stepping down after four years in the position due to increased work and family commitments. "We will miss Paul's dedication to WAZ and the CQ awards program in general," said Ross, "and we thank him for his many contributions. He sets an excellent example for his successor, and we welcome Floyd to the CQ 'family.' " The press release states, "Floyd Gerald, N5FG has been an amateur since 1972, and is an accomplished DXer. He holds many amateur radio operating awards, including 5BWAZ (200 Zones), #1 DXCC Mixed and SSB, CQ DX Honor Roll SSB and CW, 9 Band DXCC, and 6BWAS. He is also a founding member of the Magnolia DX Association. Floyd served as the manager of the W5 QSL bureau from 1998-2002. During his tenure, the W5 QSL Bureau was the first QSL Bureau to employ a website so users could check on their QSL 'accounts' on line. He's also served as CQ Awards and ARRL DXCC Checkpoint, and has been a QSL manager for several DX stations. Floyd is retired from the housing industry and lives near Wiggins, Mississippi, with his wife Sherry on their 5 acre antenna farm. CQ would like to ask WAZ applicants to delay sending applications (and cards) to Floyd until 1 February 2004, in order to allow for an orderly transition and transfer of records. We apologize for this delay, but feel that it will reduce confusion and possible loss of anyone's application during the transition. Applications and cards sent to K5RT will be forwarded to N5FG each month. After February 1, WAZ applications and cards should be sent to:
Floyd Gerald, N5FG, 17 Green Hollow Rd., Wiggins, MS 39577-8318.
The Worked All Zones awards are part of a comprehensive operating award program sponsored by CQ magazine, the world's leading independent amateur radio publication."

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, sent out the following press release: "The following is approved for DXCC credit:
Johnston Island KH3/KT6E - Only authorized persons are allowed to land on Johnston Island. Proof of presence at certain DXCC entities is required. Representatives of most operations are most helpful and cooperative in providing the necessary proof of presence and/or operating authorization as required. A very small number are not. Although no one has provided any information regarding that status of KH3/KT6E, some research on our part indicates that DXCC requirements have been met. Therefore, KH3/KT6E is accepted for DXCC credit."

FO/A, AUSTRAL ISLANDS. "The Daily DX" and "La Gazette du DX" are reporting that a Finish group will be active from here between January 5-19th. Their callsigns are not known yet. The team includes: Veko/OH1AWW, Jouko/OH1RX, Henri/OH3JR, Veijo/OH6KN and Kimmo/OH9MDV. Activity will be on all bands on CW/SSB/RTTY/PSK31. There will be a special emphasis on the low bands. More details are forthcoming, and the team plans to have a Web page.

IOTA 40TH ANNIVERSARY AWARD. Don Field, G3XTT, informs OPDX readers:
Just a reminder to IOTA enthusiasts (and would-be IOTA enthusiasts!) that IOTA 2004, the IOTA 40th Anniversary Awards Programme, starts on 1st January. A set of files for downloading is now avalable on the CDXC (Chiltern DX Club, the UK DX Foundation) Web pages, at:
http://www.cdxc.org.uk (follow the IOTA 2004 links)
These include a tracking spreadsheet that does absolutely everything you might need (my thanks to G3PMR and G3LAS for their work on this) or, if you don't want that level of complexity, there is a simple application form and lists of Premium Island Groups (by month) and Rare and Unnumbered groups qualifying for the DXpeditioners Awards. Remember that all applications must arrive in electronic form. No paper applications will be accepted. Full rules and a list of Frequently Asked Questions also appear on the Website, but questions may also be sent direct to me." Don Field's, G3XTT, E-mail address is: don@g3xtt.com
Any queries about the IOTA Programme as a whole should, of course, continue to go to the IOTA Manager G3KMA (g3kma@dsl.pipex.com) and general information about the IOTA Programme is available on the IOTA Web pages at: http://www.rsgbiota.org

KG4, GUANTANAMO BAY. Bill, W4WX, will be active as KG4DX from GTMO January 13-19th. He will operate the HF bands and 6 meters. QSL to his home call, direct with SASE or via LoTW.

KP2, U.S. VIRGIN ISLANDS. Kan, AB2RF, will be active as KP2/AB2RF from St. Thomas between December 26-31st. Activity will be on 80-6 meters CW/SSB/RTTY. QSL via AB2RF using the address on QRZ.com.

LIGHTHOUSE ACTIVITY.....
Remember, the "Lighthouse Christmas Lights QSO Party" is between 0001z, December 20th and 2359z, January 4th.

Warren, WM2Z, plans to activate the following lighthouses as WM2Z/m during the ARLHS "Lighthouse Christmas Lights" event: Horton Point (ARLHS reference USA-387), Long Beach Bar (USA-440), Orient Point (USA-606) and Plum Island (USA-633). Activity will be on 20 and 40 meters SSB. QSL via home call (QRZ.com).

Dave, K7HMP, plans to activate the Lightship Overfalls (ARLHS USA-573) as K7HMP/4, December 27th, sometime mid to late morning. Depending on propagation and contacts, later in the day, he will move to Cape Henlopen State Park and activate Harbor of Refuge (USA-366) and Delaware Breakwater (USA-222). Dave is also looking into the "Historic" lights at Cape Henlopen (USA-120) and the Cape Henlopen Beacon (USA-1186). If he can activate them from a similar location, he will; otherwise, he may move to a separate location for some short period of time. If all

goes well Dave may stay overnight and also operate on December 28th. Being a glutton for punishment, he will also have the data and log sheets ready for Fenwick Island Light (USA-283) if time and band conditions allow. Activity will primarily be SSB on 20 and 40 meters. QSL via his home call (QRZ.com).

In the framework of the official launching of the greatest steamship of the world "QUEEN MARY 2" built in French yards of the Atlantic in St. Nazaire (Department 44), a station will be active December 22nd from the lighthouse of the "Vieux Mtle" (DPLF reference PB-181 for the French Sea Coast Lighthouses award). Activity will run from 1200z until 1700z, using the calls F6IFC/P and F5OGG/P. Look for them on 14250 and 7044 kHz SSB, 14044 and 7024 kHz CW. A special QSL will be available for this expedition with the picture of the lighthouse and the QUEEN MARY 2. QSL for F6IFC/P via F6IFC. QSL for F5OGG/P via LX1NO.

NEW OFFICIERS FOR 2004. The Western Washington DX Club (WWDXC) have elected the following new officers for 2004.
President - Joseph Shinners, W7GTO
Vice President - Dennis Bowman, W7SNH
Secretary - Brian Moran, N9ADG
Treasurer - Marina Zuetell, N7LSL
Trustees - James Hadlock, K7WA
Robert Nielsen, N7XY
Richard Swanson, K7BTW
Mary Lewis, W7QGP
Joe Gregory, W7QN
Kirk Bellar, N7UK
The WWDXC would also like to invite everyone to the Pacific NW DX Convention to be held in Everett, WA, between July 16-18th. Details should be available soon on the club Web site at: http://www.wwdxc.org

QSL INFO AND NEWS.....
Steve, OM3JW, reports that the first batch of 7W4HI (AF-094) QSLs (that were receive direct) was expected to be mailed on December 19th, and another batch was expected to go out after Christmas. If you don't get a 7W4HI QSL at the end of January, send E-mail to Ivan, OM3CGN at: om3cgn@nextra.sk

Champ, E21EIC, is the QSL Manager for 9M0SEA (not Spratly Island), the special callsign used during the SEANET 2003 in Johor Bahru, West Malaysia. He is also the QSL Manager for 9M4JB the special callsign used during the CQWW CW Contest in West Malaysia.

Mac, W3HC, informs OPDX that he is the QSL Manager for new stations: XQ3WTR and CE3WTR.

Hiro, JA6WFM, now active as JA6WFM/HI8 says his QSL Manager is JA6VU (QSL direct only with SASE). Bureau cards will be handled after Hiro returns to Japan.

S2, BANGLADESH. Koichirco, S21YY, is active almost daily on 3507-3508 kHz sometimes starting at 1230z and as late as 1730z. QSL via JM1HXU.

SPECIAL EVENT. Look for Jack, K9LSB, to be operating as K9L from March 1-14th in celebration of 50 years as a licensed operator. K9LSB and members of the Hoosierland Amateur Mobile Systems will operate all bands and all modes from the home of K9LSB in Fort Wayne, Indiana. All QSLs go to K9LSB. (a SASE will get you a nice card in return). Equipment for the activity will be a FT-1000MP Mark V and a FTV-1000 6 meter transverter into an A3A at 65ft. He will use dipoles on everything else.

SPECIAL EVENT (Attention Prefix Hunters!). Carlos Beviglia, LU1BCE, Secretary of the Radio Club Argentino (RCA), informs OPDX that between January 4-15th, the RCA will participate in the 6th Andes Mountains Land Cross. It is made every year honoring the cross that General San Martin did leading his army to Chile during the American Independence War in 1817. The cross will be made as San Martin did by land on mules, through the mountains the same ways the army did, at an average height of 4500m. The RCA will provide the comunication for the event for the 300 participants who will divide into 6 columns, and spread off 750 kms. RCA will set up two HF stations at every camp point throughout the whole journey. The DX operation will be mainly on SSB/CW on all HF bands, and the callsign to be used is LS4M. Attention WPX hunters, the LS4 prefix has not been activated for many years (nearly 20). A special QSL card and award (5 QSOs any mode, any band) will be issued. QSL info is via LU4AA, bureau or direct.

T33, BANABA ISLAND (Update). Preparation for the 2004 Banaba DXpedition is on its way according to their Web page. Last week a team finalized the loading of the 20 foot container with approx. 4500 Kg of materials which is now on its way to Kiribati. They hope it will arrive there at end of February. They still mention that they still have 2 operator spots available (provided travel arrangements to Kiribati can still be arranged, flights are getting full). The first photos have been published on the "Pictures" section on their Web site, so you can get an impression of what is going to be transported to the island. The 2004 Banaba DXpedition Web page is at: http://www.dx-pedition.de/banaba2004/pictures-index.html
The team has put in many weeks of effort to prepare as much as possible so they don't loose any extra time on the setup of the station. They state all masts are ready to go; the SteppIR's are pre-mounted, the 6 and 30 meter beam is pre-mounted, all low band antennas are pre-cut, generators have had their first hours run and oil is replaced, ready to play, coax and control cables are all cut on right length with plugs, etc. Apart of possible problems with transportation delays, not much can go wrong now. They are all confident that the Banaba 2004 operation will be a successful one. They are still looking for addition funds. The transportation costs are much higher than expected. They had to buy a container because it was impossible to load it in 2 days which was expected from them in the first place.

TO4, EUROPA. Interesting week. On Wednesday, December 17th, an annoucement was sent out stating the TO4E team was "definitively QRT" because of

tropical cyclone CELA, and the team made about 32000 QSOs. The report stated that CELA's winds blew violently and the buildings on the island suffered. Roofs were torn off but nobody, neither the military detachment or the Europa 2003 team was injured. However, the report stated that radio equipment was damaged "a lot". The team was expected to be back on Reunion on Friday, December 19th. However, another delay took place and the team did not depart from the island. The team's departure has now been pushed back a few days, and they have obtained permission to continue using TO4E during this time. The TO4E team came back on the air Friday, December 19th. QSNs show that they were active on 20/15/12/10 meters. As this was being typed Sunday morning (1300z), no QSNs were reported. Please refer to the TO4E Web page for more details and updates at:
http://europa2003.free.fr/europa_infos-e.htm

TT8, CHAD. As mentioned in OPDX.638, Allan, N5XZ, is now active as TT8XZ using some type of Motorola radio which is very limited in accessing frequencies (he has to program each frequency in the radio). He was spotted this past week on 14130, 14195, 7050 and 7055 kHz basically between 1900-2000z. QSL via N5XZ.

YA, AFGHANISTAN. Johnny, LA5IIA, is now active as YA8G in Kabul for about the next 5 months. He was spotted this past weekend on 20/17/12 meters. Most of his activity will be on CW and some RTTY, with very little SSB. He is there as a UNICEF worker and plans to be active in his spare time. QSL via LA4YW. For more details and some interesting pictures, please visit his Web page at: http://www.qsl.net/la8g/YA8G.htm

Subject: FOR IMMEDIATE RELEASE - ZA Ham Course

Martti, OH2BH asked that the following be distributed this weekend.
****
IT'S NOW YOUR PLEASURE TO TAKE THE CHRISTMAS SPIRIT TO ZA-LAND AND FURTHER ENHANCE AMATEUR RADIO IN ALBANIA - ONCE THE RAREST COUNTRY OF THEM ALL

Project Goodwill Albania 2003 closed on December 15, 2003 as one of the richest experiences shared by more than forty (40) volunteer amateur radio operators who participated in the event at various times during a five-week program. The best of Albania's youth with their professors and associates were introduced to the joy of international amateur radio. Thirty-nine (39) new licensees are ready to join this great hobby of ours. Unfortunately radio equipment is currently out of reach for these new Albanian hams, and therefore it is reasonable that a collective effort should be launched.

We now seek your personal help to ensure that these licensees will soon meet us on the bands. Here is the recipe to make them active on the bands.

A: We all have old functional radio equipment around that will better serve these fine new licensees than us. It may be a unit that once served you so well that it can now travel to Albania and bring happiness to those you will soon talk to. Let's limit ourselves to fully functional transceivers, preferably solid-state, although your TS820s and TS830s and the like would go straight to the point.

B: If you have no spare equipment, your monetary support for buying a piece of ham gear is welcome. We target a small new transceiver priced at less than USD 1,000. A minimum donation of USD 100 will be processed through the Northern California DX Foundation (NCDXF) and it can be tax deductible to you.

Just search the web (http://www.za1a.com/help/help.htm) and you may wish to select your own future sponsored amateur radio licensee in Albania based on his/her picture and personal profile of individual interests. One day you may be talking to your selected friend in ZA-land and/or even visiting her/him in Albania. Upon receiving your pledge, we will be delighted to provide you with direct contact information - email, phone and postal address - so you or any of your friends can communicate with your selected Albanian ham. The actual equipment shipment may be consolidated within your country.

The First Albanian DX Convention will be organized in June 2004, and you will be personally invited to be there and meet your new ZA friend and others who responded to this call for help. I am looking forward to seeing many of you there and sharing the adventure and operating from ZA together with you.

Practical Arrangements

Please contact one of these Project Goodwill Albania 2003 representatives:
Angel, EA1QF (ea1qf@ure.es)
Roger, G3LQP (g3lqp@aol.com)
Yoichi, JP1NWZ (jp1nwz@cqpub.co.jp)
Uli, DJ2YA (dj2ya@t-online.de)
Carsten, DL6LAU (carsten.esch@appello.de)
Ole, LA2RR (la2rr@online.no)
Wayne, N7NG (n7ng@arrl.org)
Chip, K7JA (c.margelli@vxstdusa.com)
Carl, K9LA (k9la@arrl.net)
Warren, K7WX (k7wx@earthlink.net)
Mario, I2MQP (ari@micronet.it)
Max, I8NHJ (i8nhj@pagus.it)
Pertti, OH2PM (pertti.simovaara@pp.inet.fi)
Jim, VE1JF (74237.2073@compuserve.com)
Martti, OH2BH (oh2bh@sral.fi)

and you will receive instructions on how to proceed with your equipment donation.

In case of a monetary donation, please write your check to NCDXF, Project Goodwill Albania and mail it to Bruce Butler, W6OSP, 4220 Chardonnay Ct, Napa, CA 94558, USA or contact Bruce (w6osp@aol.com), for his instructions and advice.

We plan to get the equipment to Albania as soon as possible so that all the new licensees will be operational before the June Convention. Your callsign will be listed on the Honor Board which will be displayed at the new University club station (ZA1UT - University of Tirana). The University club station will be officially opened during the spring in time for the First Albanian DX Convention.

Best Season's Greetings - DX Is!

Martti Laine, OH2BH
Project Goodwill Albania 2003

I wonder who the FCC would cite as the operator in charge of the transmitter
if the software "caused" out-of-band operation... the licensed operator of
the transmitter, or the software that the licensee claimed was in charge of
his transmitter ? ;)

Now, now, guys. You know nothing is ever *their* fault. And people have been blaming their screw-ups on computers for over thirty years now.

Just a passing thought, I wonder if these people go around bragging about how their computer worked a rare DX? It seems only fair.....

Amateur Radio Newsline™ Report 1376 - December 26, 2003

Amateur Radio Newsline report number 1376 with a release date of Friday, December 26, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. A California city says NO to BPL, an earthquake hits the central California and Kids Day 2004 is just a week or so away. The details on Amateur Radio Newsline report number 1376 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: LOMPOC SAYS NO TO BPL

The City of Lompoc, California, has said NO to Broadband over Powerlines, and its a big win for ham radio. Amateur Radio Newsline's Bruce Tennant, K6PZW, has been monitoring the situation and has the details:

--

Paul Andreasen, K1JAN, said it this way -- quote: "Well, we won ONE at least!"

What Andreasen is referring to was a plan by Lompoc city leaders to deploy Broadband over Powerlines in that city and the work of the ham community to head it off.

Andreasen is the ARRL Technical Coordinator for the Santa Barbara Section and a ARRL Technical Advisor for the League's Southwestern Division. And he was one of the organizers of the movement to stop the deployment of B-P-L in the Lompoc area.

In an e-mail, Andreasen says that his group sprang into action when they learned of plans to permit powerline broadband. He presented city leaders with several studies and some facts on interference effects to and from other licensed RF users.

--

Andreasen: "I know the mayor so I stopped in one day and asked him. He said yes they were and I introduced him to some of the facts of radiation not only causing problems with public communications, the CHP, Amateur Radio, etc., but about it also causing problems with the BPL system (itself).

--

Meantime, Eric Lemmon, WB6FLY, made the California Highway Patrol aware of their efforts. The statewide C-H-P radio system operates on low-band F-M which falls right smack in the middle of the spectrum used by B-P-L.

And then they wait until December 17th for the newspapers to report the results of their City Council vote on the matter. The good news: No Broadband Over Powerlines in Lompoc. Instead, the City Council approved a rival, non radiating system that uses fiber optic technology.

But that's not all. The company that did the study for the planners was told by the City Administrator not to entertain any radiating methodologies at all. All because ham radio operators spoke up and provided proof that B-P-L could be hazardous to the regions R-F environment.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

Another quote from Paul Andreasen, K1JAN, kind of sums it up. "We not only win one, but a bureaucracy kept it's word!" (K1JAN, W6YN)

**

RESCUE RADIO: THE CENTRAL CALIFORNIA QUAKE

Meantime, about 90 miles North of Lompoc an earthquake measuring 6 point 5 on the Richter scale struck at 11:15 a.m. on Monday December 22nd. Centered not far from the famed Hearst Castle tourist attraction at San Simmeon. Ham radio was quick to respond as we hear in this report:

--

K6YR: "Various parts of the livingroom looked like the U.S. Army had gone through a Fedeey'n safe house. Just glass and food stuffs all over the place. It was pretty scary."

--
That's Rob Griffin, K6YR, the Section Manager for the area where the quake hit. He was describing what his own home looked like after the magnitude 6.5 temblor hit. But Griffin would have to put off clean-up chores because there was other work that needed to be done:

--

K6YR: By noon the San Luis Obispo Emergency Operations Center had called out the ARES and RACES operators, primarily supporting the Red Cross in opening shelters in Paso Robles and Oceana. Morrow Bay also had Red Cross shelters and we provided communications for the Red Cross because their cell phones just weren't functioning for the first 12 hours after the earthquake.

--

According to Griffin with cellphones down, another way to communicate was needed by emergency workers. Enter ham radio volunteers.

--

K6YR: "We had some come from as far as South county which includes Oceana, Nipomo, maybe even some from Santa Maria to help support the North county Paso Robles ARES area."
--

The city of Paso Robles was hardest hit. Part of the historic downtown area was destroyed and two people were killed. Griffin says that hams were on scene providing communications for about 24 hours. When we spoke to K6YR some were still there:

--

K6YR: " There are some Amateur operators still manning the county Emergency Operations Center. but my understanding is that the communications and support up at the Paso Robles Police Department has closed down for the timer being and it appears that the Red Cross has its communications which relies on cell phones back in operation."

--

The bottom line. It took the cellular providers about 12 hours to get service back to most of the stricken area. Meantime ham radio operators were there, doing what they do best.

For the Amateur Radio Newsline, I'm Burt Hicks, WB6MQV, reporting.

--

According to Cal Tech, Monday's temblor was the state's first deadly earthquake since the magnitude 6.7 shaker that hit Northridge California in 1994. (ARNewsline(tm))

**

RESTRUCTURING: VK TO GET REVISED AMATEUR RADIO SERVICE

Hams in Australia will soon have a restructured Amateur Radio Service. Some of the changes are coming soon Others are still being negotiated. Q-News Graham Kemp, VK4BB, is here with the details:

--

As reported, the Australian Communications Authority has decided to discontinue the Morse code proficiency requirement for the amateur service. The ACA will also remove the prohibition of third party communications to an amateur station in another country. If another country seeks a prohibition on such communications, this will be published and conveyed to the amateurs. To effect this decision, the ACA will need to amend the Radiocommunications Licence Conditions Determination No. 1 of 1997. Thats the Amateur LCD.

The ACA will directly inform the amateur community through established communication channels when the amendment has been made. The ACA will update the Amateur Internet Linking System consumer fact sheet to

incorporate changes to third party communication arrangements.

The ACA will continue to impose limits on the purity and stability of emitted frequencies, and maximum power limits on amateur stations in accordance with the ITU's requirements for transmitting stations. The ITU requirements will be incorporated into the ACA's public information doments in early 2004 to ensure that they are available to amateur licensees.

The ACA will maintain current requirements for use of a callsign while operating an amateur station, as contained in sections 8, 37 and 44 of the Amateur LCD. The ACA is still considering whether to permit the abbreviation of callsigns during emergency services operations and training. A decision will be announced by mid-2004.

The ACA will proceed with the proposal for Australia to participate in European Conference of Postal and Telecommunications Administrations - CEPT. While liaison with CEPT about T/R 61-01 can commence immediately, the licensing arrangements necessary to implement this will not begin until mid-2004.

The ACA is working through submissions about the remaining proposals, including the licensing structure, and expects to announce decisions by mid 2004.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of Q-News Australia.

--

Obviously for hams down-under, this is the start of something big. (Q-News)

**

Break 1

News never takes a holiday and neither do we. From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the K-9-K-E repeater serving Godfrey Illinois.

(5 sec pause here)

**

HAM RADIO EVENTS: KID'S DAY IS SUNDAY JANUARY 4

Its one of the two most important ham radio holidays of the ham radio year and its only about a week away. Of coarse we are talking about the first of two Kids Day operating events for 2004.

According to a recent ARRL Letter, the first Kid's Day of 2004 will occur on a Sunday. Next Sunday, January the 4th. And unlike most other on-the-air events, Kid's Day is not a contest. Rather its a time when

experienced hams open their hearts and their stations to invite kids in and put them on the air to experience the magic that is ham radio.

Kid's Day will run from 1800 to 2400 UTC, and there's no limit on operating time. The suggested exchange is a youngsters name, age, location and favorite color. Most operation will be found on 14.270 to 14.300, 21.380 to 21.400 and 28.350 to 28.400 MHz and local 2 meter repeaters.

Guidelines for Kids Day are available at www.arrl.org/FandES/ead/kd-rules.htm. And -- oh yes: If you miss this Kids Day operating event the next one won't take place until Saturday, June 19th. (ARRL)

**

HAM RADIO EDUCATION: IARU CONGRATULATES NEW HAMS

A top IARU official has welcomed Albania's newly licensed hams to the hobby. Bill Pasternak, WA6ITF, is here with more:

--

Ole Garpestadt, LA2RR, is IARU Region 1 Chairman. And while participating in the recent graduation ceremony for Project Goodwill Albania 2003, he took the time to congratulate the new Albanian licensees, and welcomed them to the bands.

Garpestadt credited the University of Triana and the program organizers with their success in conducting the training and succeeding in something that the IARU itself has had only limited results with. It should be noted that LA2RR participated in final negotiations with Albanian authorities for their entry to CEPT and bringing the Albanian licensing regime into line with the rest of the CEPT world.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF

--

One final note on Project Goodwill Albania 2003. Its organizer, the famed D-Xer Martti Laine, O-H-2-B-H, was awarded a "Senior Fellow of Polytechnic University of Tirana" at the graduation ceremony. In his closing remarks Liane thanked everyone involved for what he termed as their five weeks of serious effort. (Via press release)

**

HAM RADIO EDUCATION: 2004 - 2005 FAR SCHOLARSHIPS OPEN

Meanwhile, here in the United States, it's ham radio scholarship time again. This, with word that Foundation for Amateur Radio is providing applications for hams to apply for the 59 awards that it will administer for the 2004 through 2005 academic.

Right now, the foundation is inviting Amateur Radio licensees planning to pursue a full-time course of study beyond high school, and who are

either enrolled in or accepted for enrollment at an accredited university, college or technical school to compete for these scholarships. Awards range from $500 to $2500 with preference in some cases going to residents of specific geographic area or to those pursuing certain study programs.

The cutoff date is April 30, 2004. Application forms are available by mailing a request to FAR Scholarships, P.O. Box 831 Riverdale, Maryland. The Zipcode is 20738. (Foundation for Amateur Radio)

**

ELECTRONIC ASSISTANCE: REPAIRCLINIC.COM

A new Web site has been created to usher Americans away from their throwaway habits and into the world of yesteryear when we just kept it working.

Called RepairClinic.com, the cyberspac port provides aids for those looking to repair anything from a refrigerator or air conditioner to more complex devices such as microwave ovens. The site appears to derive most of its income by selling spare parts and factory manuals.

At the moment the site sticks to typical kitchen appliances. It does not provide advice on such items as radios, T-V sets, VCRs and other consumer electronics. At least, not yet. (Science Today)

**

RESCUE RADIO: THE LATEST TOWER TO COLLAPSE IS....

A 528 foot tower supporting antennas for WMGX and WYNZ in the Portland, Maine area collapsed on Thursday, December 11th. As reported on Scott Fybush's web site, the reason for the tower falling appears to be a guy wire that apparently snapped. The story, and a photo of the tower prior to collapse, can be seen at www.fybush.com/nerw.html Its not known if any ham radio repeaters shared this support structure. (CGC)

**

NAMES IN THE NEWS: VE1MR NAMED RAC RADIO AMATEUR OF 2003

Bill Elliott, VE1MR, has been named to receive the RAC Radio Amateur of the Year Award for 2003. Currently President of Halifax Amateur Radio Club, Elliott has been a Radio Amateur and a member of Radio Amateurs of Canada and its predecessor national organizations for over twenty years. Through that time, VE1MR has consistently and generously donated his technical and organizational skills to significantly promoting excellence in Amateur Radio and facilitating its public service role.

For a complete story on VE1MR's activities and the contributions which qualified him for this prestigious award, see http://www.rac.ca/new/canada.htm (RAC)

NAMES IN THE NEWS: JENNICAM GOING QRT

And, by the time you read this, Jennifer Ringley will have taken her famed jennicam.org webcam off the Internet and Q-R-T. This, after 7 years of her permitting the world to watch her life through a cyberspace eye.

Ringley was 20 and a student at a Pennsylvania college when she installed a web camera in her room and launched jennicam.org. That was in April of 1996 and over the years the cameras have followed her every movement 24 hours a day.

A self-described former computer geek who now lives in Northern California, Ringley has posted that her web cam was intended to be a fun way for her mom or friends to keep tabs on her. Also, that it was an interesting use for the digital camera that she bought on a whim in the bookstore.

Now, the site has a notice saying it will be closing on December 31st. No reason is given and Ringley has not respond to e-mail query's from the press. (Published news reports)

NEWSLINE NEWS: MORE THANK YOU'S WITH N6TCQ

Ladies and gentlemen, we end this year and begin the next by saying thank you to more listeners who kept the Amateur Radio Newsline on the air throughout 2003. Here's Andy Jarema, N6TCQ:

--
This week we have the second half of our list of people who helped us financially in the month of April:

Linda Reeder of Salt Lake City, Vic Hartpence, W7RKU of Sparks, NV, The Puget Amateur Radio Society of Kirkland, WA, The Quarter Century Wireless Association of Eugene, OR'. Bill Alexander, KR6G of Quincy, CA, Leo Halog, KR6EG of San Fransisco, Mark Lunge and the MSARC N6MPX Repeater System, San Leandro, Monthly contributor William Walters, WA2IBM, of San Jose, Monthly contributor Scott Hensley of the Area Communications Team, San Jose
SCATS, the Southern California Amateur Transmitting Society, in West Covina, Our good friend Dave Bell, W6AQ of Hollywood, And Newsline Staff volunteers who paid out-of-pocket to keep Newsline on the air.

Thank you to everyone. Your April response to our crisis was exceptional, and we promise to do our best to continue to earn your care and support. A reminder that Newsline is a 501c 3 California non-profit corporation. FCC regulations prohibit us from telling you exactly how to support us, but that information is on our website at www.arnewsline.org. I'm Andy Jarema,
N6TCQ.

--

More from Andy in future Amateur Radio Newsline reports. (ARNewsline(tm))

HAM RADIO AND SPACE: THE MARS EXPRESS

An amazing space DX record for ham radio. This as Charlie Suckling, G3WDG reports that he has successfully received the 'Mars Express' deep-space probe using his 3 meter dish antenna.

Mars Express has been on its way to the red planet since the 2nd of June and was scheduled to arrive on Christmas Day. The signal was earlier received on 8.4 GHz by James Miller, G-3-R-U-H, at the AMSAT D-L ground station in Bochum, Germany. This, when the probe was 107 million kilometers away on November 16th.

Although traveling at the speed of light, the signal took about six minutes to reach earth. The AMSAT D-L website has information on how amateurs can receive Mars Express.

The AMSAT-DL website at www.amsat-dl/pa5/reception_g3ruh.htm provides information on how amateurs can receive Mars Express. (GB2RS)

**

HAM RADIO IN SPACE: PC SAT UPDATE

AMSAT North America reports that P-C sat is doing fine and will continue in good sunlight through New Years Eve. The satellite is seeing about 50 packet users per day and 30 per pass over the USA.

Anyone with a 2 meter transceiver and T-N-C can easily copy this bird. Just tune the radio to 145.825 and watch for 1200 baud normal AX.25 packet. (AMSAT)

**

INTERNATIONAL-SWEDEN: NO CODE ON JANUARY 1?

GB2RS reports that Sweden is likely to permit former CEPT Class 2 amateurs access to the High Frequency bands from the 1st of January. SM0SMK, the President of Swedish national amateur radio society has said that they hope the Morse code test requirement will be removed at the turn of the year.b (RSGB)

**

INTERNATIONAL - UK: NEW TRAINING PRESENTATIONS ON THE WEB

The Chelmsford Amateur Radio Society in Essex England has made all of its Powerpoint slide presentations for the United Kingdom's Foundation and Intermediate courses available on the web. Those who are interested in seeing what's involved in getting these new U-K licenses can download the slides from www.qsl.net/g0mwt (M5AKA)

**

DX

In DX, the FMRE Sunday bulletin has announced that the X-F4 DXpedition to Socorro Island will begin March 3rd, and run for two weeks. The call sign to be used is X-F-4-I-H. 8 operators from Mexico will be active all bands and modes including VHF, UHF and satellite. No QSL information is available at this time. (XE1KK, N4GN)

And S57CQ expects to be in Bhutan by the time you hear this newscast. He plans to spend as much of his spare time as possible active as A52Q. QSL as directed on the air. (RSGB)

Lastly PA4WM will be in Turkey for six months, on a four week rotation schedule. He operates SSB, CW and RTTY as TA1/PA4WM with 100 watts into a G5RV. He plans to upgrade his antennas with a vertical and receiving antenna for 160 and 80 meters at the earliest available time. (GB2RS)

**

THAT FINAL ITEM: HEAVY METAL ON THE HAM BANDS

And finally this week, Heavy metal is back on the ham bands. No, not the rock music kind. We are talking heavy metal as in vintage AM gear. Paul Goodman, K2ORC, has more in this report filed over the air - using AM :

--

Sunset on December 27, 2003 will mark the kickoff of this year's Heavy Metal Rally. A showcase for AM transmitters that weigh at least 250 pounds and produce 250 watts or
more, the annual event is sponsored by Electric Radio magazine.

The Rally has become a coast to coast highlight for many AM amateur stations in North America with activity on 160, 75 and 40 meters. The event goes all night, ending at sunrise on December 28

Participants who want to compete for the top place trophy submit logs to the event coordinator. Scoring for the Heavy Metal Rally utilizes a point system that takes into account, among other things, total number of contacts and the number of states and bands worked. In a departure from traditional contest-type scoring, a station can receive an extra point for each positive signal or audio report received by the event coordinator from other hams and SWLs.

Scoring notwithstanding, many AM fans participate in the Heavy Metal Rally simply for the pleasure of talking and listening to other AM stations with strong signals and outstanding audio.

Winter HF operating conditions generally lead to numerous coast to coast contacts featuring a diversity of transmitters. It would not be unusual for listeners to hear, an amateur in Colorado on a restored Gates broadcast transmitter chatting with someone in California running a Collins broadcast transmitter.

--
Contact Audio
--

While broadcast transmitters may be the first thing to come to mind when picturing equipment that meets the Heavy Metal weight and power criteria, the Rally also features a sizeable number of homebrew and military rigs. For more information on the 2003 Heavy Metal Rally, including the email address for log submissions and a list of suggested operating frequencies, please visit amfone.net -- that's alpha-mike-foxtrot-oscar-november-echo - dot - net.

Reporting for the Amateur Radio Newsline, this is Paul Goodman, K2ORC.

--

Sounds great, doesn't it! You can hear more for yourself on Saturday evening December 27th overnight into Sunday the 28th on 160 and 75 meters. Its the 2003 Heavy Metal Rally on your radio to enjoy. (ARNewsline(tm))

**

NEWSCAST CLOSE

For this week and this year, that's all from the Amateur Radio Newsline. Our thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News for their assistance in producing this weeks report.

A reminder that our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73, Happy New Year and we thank you for listening. Amateur Radio Newsline(tm) is Copyright 2003 and 2004. All rights are reserved.

Ohio/Penn DX Bulletin No. 641

The Ohio/Penn DX PacketCluster
DX Bulletin No. 641
BID: $OPDX.641
December 29, 2003
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NG3K, W3UR & The Daily DX, K4VUD, N4AA & QRZ DX, N4KZ, W4DKS, KN5G, N5FG, K8JE, K8YSE, CT1EEB, DL/VE3ZIK & www.contesting.info, F5CWU & La Gazette du DX, F5NQL & UFT, I0JBL, I1JQJ/IK1ADH & 425 DX News, JI6KVR & JA-IOTA Islands News, M5AAV, UA2FM, VA3RJ & ICPO, XE1KK, XE2AC, Z35M and ZL4HU for the following DX information.

SPECIAL EDITOR'S NOTE: My family (wife/OPDX's chief proof-reader Linda, Teddy [TJ] and wife Jessica, Katie) and I (KB8NW) would like to wish all DXers, Contesters and OPDX readers a very "Happy Safe and Healthly New Year". Also, we would like thank the many who have contributed information over the year (there are too many to list). REMEMBER, without them there would not be an OPDX Bulletin. I would also thank the many who sent holiday greetings. I tried to answer some and wished I could answer each one of them individually, but it would take a huge amount of time. You would not believe the amount of E-mail I receive......
73 and Have a Great Holiday de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 21st/December, through Sunday, 28th/December there were 214 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9Y, A2, A3, A4, A5, A6, A7, AP, BV, BY, C3, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J6, J8, JA, JD/m, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V5, V7, VE, VK, VK9L, VK9N, VP8, VP8/h, VQ9, VR, VU, XE,

XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

1A, SMOM. The following is a press release on an upcoming operation from the Sovereign Military Order of Malta (SMOM). Luciano Blasi, I0JBL, reports: Following the significant number of "new one" requests received in these years, a team led by Francesco, IK0FVC, will activate 1A0KM during the weekend from January 2nd to January 5th, 2004. Other team members will be I0JBL, IK0FTA and IK0PRG. From the beginning this operation, the QSL manager for the 1A0KM's activities will be Sergio, IK0FTA. For further information an E-mail address will be activated: <mailto:1a0km@sixitalia.org>1a0km@sixitalia.org

5V, TOGO. Members of the F6KOP Le Radio Club de Provins 77 (near Paris) plan to be active from Lome (Grid Square JJ06) as 5V7C from March 6-12th. Operators mentioned are: Dany/F5CW (one of the TO4E gang), Franck/F4AJQ, Pascal/F5TVG, Pascal/F5JSD, Romain/F8BUI and Guenther/F5VHQ/OE5TGL. Activity will be on 160-6 meters CW,SSB and Digital. QSL Manager is F5TVG: Franck Savoldi, P.O. Box 92, F94223 Charenton Cedex, FRANCE. An E-mail address is available for more information, suppoort, sponsoring, help, skeds and etc at: 5V7C@free.fr
The groups Web page (in French) is available at: http://5v7c.free.fr

6Y, JAMAICA. Martin, KN5G, will be active as 6Y5/KN5G until January 4th. He E-mailed OPDX and states that all operations are QRP with an Elecraft K2 using mostly battery power and a vertical dipole along the beach in Negril. Martin states, "The only problem now is I am running out of log sheets!" OPDX spotted him on 80/40/20/17/15/12/10 meters CW this past week.

9N, NEPAL (News). Charles Harpole, K4VUD, informed the DX community this past week that his efforts (along with Satish/9N1AA) to expand ham radio in 9N-land including a memorial club station for Father Moran, 9N1MM 9SK), are on an indefinite hold due to the disturbed social and political conditions there. All radios, including other gear and cash, that was donated some years ago have been distributed to the existing licensed native 9N hams (cash used immediately upon donation to purchase needed items like coax and Morse keys, etc.). Charles states, "That gear will come back to a club station someday. Foreign visitors have operated there, as you know. Please bear with this situation and extend understanding."

A5, BHUTAN. Dane, S57CQ, is now active as A52CQ and is expected to stay in Bhutan through January 14th. Activity is expected to be on all bands as much as possible (no 160m). He was spotted this past weekend on 40m (as early as 1700z and as late as 2345z, then moves to 80m), 20m (1230-1300) and 10m (after 0900z). QSL via S57DX.

DXCC NEWS. ARRL Great Lakes Division Director Jim Weaver, K8JE, informs OPDX that Kirk E. Swallow, W8QID, of Cincinnati, OH, was appointed the

Great Lakes Division Representative on the DXAC, effective January 1, 2004. He will succeed Billy (Pick) Pickard, WA5PAE, who had recently became a "Silent Key" (SK). Kirk is a lifelong worker/manager in the field of two-way communications and retired recently from Verizon as a technical area manager. He is former president of the Queen City Emergency Net (Red Cross affiliate) and is an active member of the SWODXA. He has gone on numerous DXpeditions to the Caribbean (most recently to TI a couple of weeks ago) and is listed at 345 at the Top of the (DX) Honor Roll. Kirk and his wife Joyce serve as QSL Managers for a variety of DXpeditions.

LIGHTHOUSE ACTIVITY. Members of the Five Flags Amateur Radio Association (FFARA), W4UC, will once again operate from the Pensacola Lighthouse (ARLHS USA-592) from the Naval Air Station Pensacola (Escambia county Florida, WW Loc. EM60ii) on January 1, 2004. This will be the FFARA's 3rd annual event from the Lighthouse. The FFARA broadcasted their very first official Amateur station from inside the Lighthouse 3 years ago with assistance from the U.S. Navy and U.S. Coast Guard. January 1st marks a special day as it was on January 1st in 1859 when the light was first lit in the Pensacola Lighthouse. W4UC plans on having a minimum of 3 stations operating on 40/20/15/10/6 meters from 1500-2200z. For QSL information, look up W4UC on QRZ.com Web site. They will be using ARLHS member #844. QSL via operator's instructions.

IOTA NEWS.....
EU-157. John, F5VHQ, will be active from Ile de Cezembre (DIFM MA-008) as F5VHQ between now and January 2nd. Activity on bands/modes were not provided. QSL via his home callsign.

OC-201. By the time you read this, Jonathan, W1CU, should have operated again from Waiheke Island in New Zealand on his way back to the US. He was on the air very briefly on December 27th as ZL/W1CU. QSL to his home call. ADDED NOTE: Jonathan worked about 650 stations on the second day of the CQWW CW Contest from the same site on OC-201.

J49, CRETE. Peri, HB9IQB, will be active as J49PM in the CQ WPX CW Contest (May 29-30th) as a Single-Op/Single Band (15m)/Low Power entry. QSL to his home callsign via the Bureau.

KP2, U.S. VIRGIN ISLANDS (Special Event). To celebrate the New Year, remember to look for operators David/N4KZ and Mark/K4MCE to activate the special event station, N4Z, between December 30th to January 6th from St. Croix. Activity will be on 160-6 meters, SSB and CW. QSL via N4KZ.

PACIFIC OPERATIONS (A3 and T2). Sara/HA9SD and Eli/HA9RE are expected to be active during the new year from Tuvalu between January 1-18th (their callsigns not yet known) and from Tonga as A35RE from January 20th to February 4th. They will have two stations active with operations on 80-10 meters CW/SSB. QSL ONLY direct to HA8IB (with 2 new IRCs or 2 USD).

QSL INFO AND NEWS.....
Please note that QSLs for 4N25K go only DIRECT to YU1SB. The address

is: Bozic Slavko, Jurija Gagarina 196/50, Novi Beograd,
SERBIA AND MONTENEGRO.

Please note QSL info for station T9/9A3GZ, who was active in CQWW CW Contest, ARRL 160m Contest...etc, is T98U (via the bureau) or 9A3GZ (direct).

Graham, M5AAV, informs OPDX that he now has the logs and QSL cards for the TX4PG operation and is in a position to handle "Bureau Requests Only" for last year's Dxpedition.

Victor Loginov, UA2FM, UA2 QSL Bureau official, informs OPDX that on December 6th during a UA2 annual meeting, they decided to start their own incoming QSL bureau. This means that they will stop getting incoming QSL cards from SRR QSL Bureau in Moscow (P.O.Box 88). The new address is: UA2 QSL Bureau, ROSTO Technical School, ul.Ozyornaya 31, Kaliningrad, 236029, Russia. Please update your QSL bureau address book, and from now on send all QSL cards for UA2 only to the address above. Otherwise they won't get them.
ADDED NOTE: Victor mentions UA2 is the second call area of Russia. They have the following active prefixes: all UA2, RA2, RK2, RU2, RV2, RX2 and R2MWO (permanent callsign for the Museum of the World Ocean). (Note that RK21Z was from R1Z.) RW2F is a contest call for the UA2 Contest Club, RK2FWA.

Vlado, ZA/Z35M, informs OPDX that all direct QSL cards for ZA/Z35M, Z35M and Z3100M received no later than December 22nd, have been answered the same way they were received. All QSLs for the Z3100M operation were sent via the bureau. Direct QSLs should be sent via Z35M to: Vladimir Kovaceski, Box 10, Struga 6330, Macedonia.

The Kermadec DX Association along with ZL2HU and ZL4HU wish to advise that with the very strong New Zealand Dollar the way it is at the present, one green stamp no longer covers the cost of ECONOMY postal replies to QSL cards. However, one IRC is still sufficient to cover return mail costs. The Association will respond directly to all requests posted to them before January 1, 2004, where there has been only one green stamp included. As they are a non profit organization, all cards mailed to them on and after January 1, 2004, which do not include sufficient funds for Ecomomy Class return mail will be replied to VIA THE BUREAU. If and when the U.S. Dollar gains some ground against the New Zealand Dollar, they will further consider their position. THEY do appologize for this delay for those expecting to receive cards by the direct mode, but it is beyond their control when governments set currency exchange rates that are not favourable to their cause. "I trust you will all understand. Regards ..... Ken Holdom, ZL4HU, Group Organizer/Team Leader/QSL Manager for the Kermadec DX Association."

SURVEY BEING TAKEN. Jose, CT1EEB, informs OPDX that he is just taking a survey and nothing else but a survey, your reply and help will be mostly appreciated. "From the DXCC Entities/IOTA Ref., what would you vote as

the most-wanted for you concerning the bands you need (from 160-6 meters and IOTA Ref.)?"
A) 4W - Rep. Dem. Timor Leste
B) D2 - Angola (and the Luanda Province Group for IOTA)
C) S9 - S. Tome (Rolas Islet IOTA AF-023)
D) C9 - Mozambique (Mozambique Island or Bazaruto for IOTA)
E) VU - India (the Goa State group for IOTA)
Once again let them know what bands you still need for these DXCC Entities. Jose states, "Let me remind you that this is not a DXpedition project, just a survey I am doing." Jose's E-mail address is: zemurtosa@mail.telepac.pt

TI, COSTA RICA. Bob, KE0UI, is now active as TI5/KE0UI but only until December 31st. He states that he will only be using low power with modest antennas, and CW on the WARC bands will be his priority. QSL via his CBA or via the Bureau.

TO4E QRT. The TO4E/TO4WW team is back home and stopped their transmissions December 20th around 2000z. Dany, F5CW, reports they made 34,000 QSOs. Their logs are now available on the Web at: http://europa2003.free.fr/ Logs were temporarily suspended earlier due to a complaint by the ARRL. The log search contained a wild card feature which Wayne, N7NG/7, from the League stated could compromise the QSLing integrity.

VK9C, COCOS-KEELING ISLAND. Just a reminder that Ken, JA1CMD, will be active from here as VK9CA now through January 2nd. Activity will be on 80-10 meters CW/SSB with only 100 watts. QSL via JA1CMD or K4ST.

VK9X, CHRISTMAS ISLAND (Very early Announcement!). David, VK2CZ, will be active from here as VK9XD between December 3-12th, 2004. Activity will be on all bands plus include an entry in the ARRL 10m DX Contest (December 11-12th) using a 7 element monobander (at 330m ASL) with 400 watts. David makes the following statement about his operation: "It is a long way off, and its a long way there. 1st EVER activation in the ARRL 10m contest!!"

XF4, REVILLAGIGEDO ISLANDS. Ramon/XE1KK and Luis/XE2AC inform OPDX that the Federacion Mexicana de Radio Experimentadores (FMRE) announced last Sunday, December 21st, a XF4 DXpedition is expected to begin March 3rd, for 2 weeks from Socorro Island (NA-030) using the callsign XF4IH. They mentioned that 95% of the paperwork is ready. There will be 8 operators (all XE ops). Operators mentioned are: Pepe/XE1J, Ismael/XE1AVM, Rafael/ XE1GRR, Javier/XE1KOF, David/XE1XR, Luis/XE1GLL and Martin/XE2ML. Their activity will be on all bands 160-6 meters including the WARC bands, VHF, UHF. The modes will be CW, SSB RTTY and PSK31. No QSL info was mentioned yet. More details to follow.

Z3, MACEDONIA. Look for Antonio/IZ8CCW and Pietro/IZ8FWN to be active as either Z38M or Z3/homecalls between January 2-6th. Activity is expected to be on all bands CW, SSB and RTTY. Several members of Z37M are expected to be with them. QSL via IZ8CCW.

ZF2, CAYMAN ISLANDS. Just a reminder that Pete, N2LM, will be active as ZF2PD on Grand Cayman Island (NA-016) now through January 8th. Activity will be 80-6 meter CW/SSB. Requests for QSL cards can be sent to his home callsign, N2LM.

Has anyone had any luck getting the 7Q7BP operation of February 2003 confirmed? I tried through G3MRC and have not received a reply yet. I also worked this station a little over a week ago and decided to try again. Any information will be appreciated.

3202. Sunspot cycle info please

Newsgroup: rec.radio.amateur.dx
Date: 2003-12-31 15:35:14 UTC
From: fazamy@aol.com
Message-ID: <20031231103514.03858.00002243@mb-m07.aol.com>

I need to have the following info about sunspot cycles:

As of 31 DEC 2003, where are we? On an upswing or downswing?
The sunspot number we are currently in?
When does the next 11 year cycle kick in?
A source book or internet source where this stuff is explained for the
non-astro-physicist I am?

Thanks,
KB2AMY

Greetings,

The new version of GeoAlert Wizard provides a chart "Past and Predicted
Solar Indices". This should provide the info you need, and of course much
more if desired. <G>
